Kalart/Victor Projectors Help Sell Porter-Cable Suburban Riders

Porter-Cable Machine Company chose Kalart/Victor as the best possible 16mm sound projector for use by its distributors in presenting an important new sales film on riding mowers and tractors. Here's why:

1. Simple threading a key requirement. Porter-Cable needed a projector that can be threaded and operated by people with no previous experience. Kalart/Victor meets the need perfectly. It is threaded in 3 simple steps, with a color-coded path to show sequence and location.

2. Film safety important to Porter-Cable. No projector guards against film damage more effectively than a Kalart/Victor. Safety Film Trips—an exclusive feature—stop the projector in emergencies, before film is damaged.

3. Can it be set up anywhere? Porter-Cable likes the top-mounted reel feature of Kalart/Victor projectors. With both reels out of the way on top of the projector, any level surface may be used for setup. Projectors were made suitable for use even in small rooms since they were purchased with 1½" lenses instead of the standard 2" lenses.

What features are you looking for in a 16mm sound projector? Great picture quality? Magnificent sound reproduction? Outstanding durability? Adaptability for magnetic recording and playback? Kalart/Victor has them all—and more to boot. Call your Victor Dealer for a demonstration.

50 YEARS OF PROGRESS 1910-1960 VICTOR

Safe Passage for the Film Buyer

An Editorial Foreword

THE PRINCIPAL MISSION of this 11th Annual Production Review issue is to provide managements of business and industrial concerns, advertising agencies, leaders of trade associations and key men within government with a truly dependable and complete reference source to the most capable and experienced producers of business and television motion pictures, slidefilms and related a-v tools.

This 11th Review makes its appearance in an era of unprecedented technical and scientific progress and of worldwide political upheaval. But in this world of change, many things remain the same . . .

It is significant to the buyer that the most-honored motion pictures (and the most *resultful*) that have been created to help inform, to train and to guide millions in industry, in medicine, public education, science and for the national defense, were produced by companies listed in these pages. The 350 producers in the United States, Canada and from 18 lands abroad who supplied *detailed references* on their people, facilities and their clientele include the most-experienced and best-equipped firms in this business. More than a few have served 30, 40 and 50 years in this highly-specialized field.

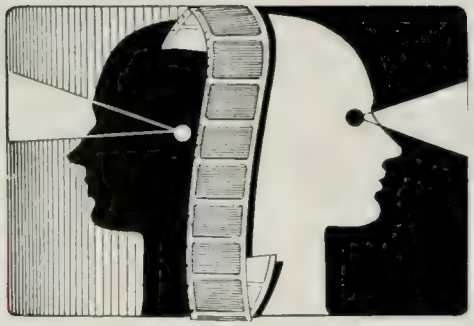
The aim of the Production Review is not mere numbers; we provide safe passage for film buyers by our *reference standards. Quality and results achieved are the primary considerations;* permanence of staff and facilities assure prompt and economical delivery on important assignments. Films worthy of thousand-fold print orders for a single title are becoming common-place as populations grow, industries expand and international borders diminish in time and space. *Quality* in such films is no accident!

Many other useful features appear in this 11th Review issue: facts about organizations; national and international award programs and audio-visual programs in the Federal Government.

To all who contributed so generously to these well-filled pages, our heartfelt thanks and to our hard-working staff, a "well done!"—OHC

63 18531-CL 294

THERE'S MORE THAN ONE WAY...



There may be more than one way to make a motion picture, but there's always one way which is best. Our creative and production staff can help you select the best way to tell your story on film.

DIVISIONS: Canadian Federation of Film Societies, Scientific Film Division, Business Film Service.

PURPOSE: To bring together Canada's educational, scientific, cultural and community interests in the field of documentary films and to encourage and promote the study, appreciation and use of motion pictures and television as educational and cultural factors.

ACTIVITIES: Distribution of the films in the National Film Library (7,000 titles in 24 special collections), Importation of films from other countries, Information Service, Preservation of films of historical interest, Distribution of sponsored films, Canadian Film Awards, Children's film programming, Special services in the fields of business films, scientific films, films on art, films for UNESCO'S East-West project, medical films, etc.

PUBLICATIONS: Monthly Bulletin, Catalogues, Special Subject Listings of Films, Evaluations, Handbook for Film Societies, Information Sheets on selected entertainment films, C.F.F.S. Bulletin.

COMMITTEES: Canadian Film Awards, Canadian Film Archives, Films in Adult Education, Labour Films, Canadian Centre of Films for Children.

CATHOLIC AUDIO-VISUAL EDUCATORS ASSOCIATION

ADDRESS: Box 618, Church Street P. O., New York 7, N. Y.

OFFICERS: Rt. Rev. Monsignor Leo McCormick, Ph.D., *president;* Reverend Michael Mullen, C.M., *vice-president;* Mother M. Benedict, R.S.H.M., *secretary;* Reverend Joseph Coyne, O.S.A., *treasurer.*

PURPOSE: To further the use of Audio-Visual equipment and materials in Catholic education and to encourage production of suitable films for Catholic school use.

ANNUAL CONVENTION: CAVE is coordinating its tenth Annual Convention with the National Catholic Educational Association national convention April 4-7 in Atlantic City, New Jersey. Audio-Visual equipment and materials may be exhibited at this joint convention. No registration fees are required.

OFFICIAL PUBLICATION: The Catholic Educator.

National Organizations In the Audio-Visual Field

DEPARTMENT OF AUDIO-VISUAL INSTRUCTION OF THE NATIONAL EDUCATION ASSOCIATION

OFFICE: 1201 16th Street, N. W. Washington 6, D. C. CONTACT: Anna L. Hyer, *executive secretary.*

OFFICERS: James D. Finn (professor of education, University of Southern California, Los Angeles), *president;* Ernest Tiemann (director, visual instruction bureau, University of Texas, Austin), *president-elect;* Clyde K. Miller (director, division of audio-visual education, Ohio State Department of Education, Columbus), *vice-president.* The Executive Committee: Walter Bell (director, audio-visual education, Atlanta Public Schools); Ralph Hall (director, audio-visual center, Kent State University, Kent, Ohio); Horace C. Hartsell (associate director, audio-visual center, Michigan State University, East Lansing, temporarily on leave of absence); Virginia Kelly (director, audio-visual education, Kanawha County Schools, Charleston, W. Va.); E. Dudley Parsons (consultant in visual education, Minneapolis Public Schools).

PURPOSE: The improvement of instruction through the better and wider use of audio-visual equipment, materials and techniques. The membership consists primarily of directors and specialists in audio-visual in colleges and universities, state departments of education, and county and city school systems. School supervisors and administrators, classroom teachers, librarians, and audio-visual specialists in the armed forces, in industry, and among religious groups are included in the membership.

PRINCIPAL COMMITTEES: Program of DAVI is carried out primarily through standing project committees such as: Bldgs. & Equipment, Irene F. Cypher, chairman; Equipment Standards, Neville Pearson, chairman; History and Archives, M. I. Smith, chairman; International Relations, Howard Kresge, chairman; Legislative, William King, chairman; Professional Audio-Visual and Teacher Education, Ernest Tiemann, chairman; Research, W. C. Meierhenry, chairman; Service Packets, Wanda Daniel Domino, chairman; Television, Raymond Wyman, chairman. Maintains several joint committees with other professional organizations as well as special groups.

ACTIVITIES IN 1961: National Convention, April 24-28, Deauville Hotel, Miami Beach, Florida. Meeting in Atlantic City, June 26, in connection with annual convention of National Education Association. Series of regional leadership conferences and a field service program which provides consultants to assist school systems and colleges and universities in the improvement of their instructional materials programs. The 1962 convention will be held in Kansas City, Missouri, March 25-30, Hotel Muehlebach.

PUBLICATIONS: The department publishes two periodicals, *Audiovisual Instruction* (monthly except July and August), *AV Communication Review* (recently expanded and now published bi-monthly). Recent publications include *Teaching Machines and Programmed Learning: A Source Book,* edited by A. A. Lumsdaine and Robert Glaser, as well as *Learning From Pictures,* by Catharine Williams, to be published in the spring of 1961. A complete listing of publications as well as information on membership is available from the national headquarters.

THE EDUCATIONAL FILM LIBRARY ASSOCIATION

OFFICE: 250 West 57th Street, New York 19, New York.

OFFICERS: Frederic A. Krahn, *president;* Galon Miller, *vice-president;* Iola Tryon, *secretary;* Emily S. Jones, *administrative director.*

COMMITTEES: (Festival) Frederic Krahn, *chairman;* Nominations, Iola Tryon, *chairman;* Membership, Galon Miller, *chairman;* Canadian Membership, E. F. Holliday, *chairman.*

MEMBERSHIP: (Constituent)—465 non-profit educational institutions; (Service)—61 commercial organizations and interested individuals; 3 international members (government agencies, film groups of other countries); 61 sub-memberships and 115 personal memberships.

PURPOSE: To encourage and improve the production, distribution and utilization of educational films. EFLA conducts a film evaluation service.

1961 AMERICAN FILM FESTIVAL: To be held April 19-22 at the Barbizon-Plaza Hotel, New York City.

PUBLICATIONS: For members—Evaluations, EFLA Bulletins, Service Supplements and Film Review Digest. A catalog containing descriptions of EFLA "general" publications is provided.

Trade & Professional Groups Are on Page 13

IT'S THE PICTURE THAT COUNTS...

A child reaches out and the helping hands of The Greater New York Fund answer . . ." a poignant moment narrated by Eddie Albert, as we witness a desertion scene filmed by MPO with startling realism.

This fund-raising motion picture for The Greater New York Fund aptly demonstrates the research effort, infinite care and integrated skills that are combined at MPO. Script, casting, direction, photography, editing—all the facets of film-making—are of the highest artistic and professional standards.

For quality motion picture production, more and more quality accounts have found that it costs no more to trust their film projects to a creative producer . . . MPO. To learn more about MPO's creative staff and studio facilities, or to arrange a screening of recent MPO productions, call Judd Pollock at MU 8-7830 in New York.

SALES TRAINING · CONSUMER SELLING · RECRUITING

Whatever phase of selling your organization may require, chances are that the facts can be more effectively conveyed by tailor-made sound slidefilms—one, or a series—than by any other method.

Better Selling skills have achieved cost-free programs for certain clients.

The slidefilms are paid for but, with some companies, we have been able to show them how actually the programs will cost them nothing . . . when their promotional efforts adapt to defined merchandising procedures.

Perhaps your organization is so fortunate as to be in this class? It takes just a brief inquiry to us to find out.

Prugh, Film Council of Greater Columbus, Memorial Hall, 280 E. Broad St., Columbus 15, Ohio.

National and International Events Honoring Visual Media

FREEDOMS FOUNDATION AWARDS

Sponsored by the Freedoms Foundation Valley Forge, Pennsylvania

Closing Date for Entries: November, 1961

CATEGORIES: Consideration is given to all films produced or released during 1961, which are aimed at building a better understanding of the American Way of Life.

AWARDS: A distinguished jury of State Supreme Court jurists and other eminent citizens selects one film for the top award and approximately 10 others for the George Washington Honor Medal recognition. Awards will be announced at Valley Forge on February 22, 1962.

TO NOMINATE: Nomination forms are available from Freedoms Foundation, Inc., at Valley Forge, Pennsylvania, attn: W. C. "Tom" Sawyer.

ANNUAL INDUSTRY FILM PRODUCERS AWARDS

AWARDS ANNUALLY to outstanding technical and documentary motion pictures in the fields of space age communication, electronics, etc.

1960 IFPA AWARDS to be presented June 2-3, 1961, during Industry Film Producers Association annual meeting at the Miramar Hotel, Santa Monica, California.

THE 19TH ANNUAL NATIONAL SAFETY FILM CONTEST

Sponsored by the National Committee on Films for Safety

(Entries close February 27, 1962)

ELIGIBLE FILMS: All motion pictures and sound slidefilms produced or released during 1961 whose primary objectives are safety or which have important accident prevention sequences.

CATEGORIES: Motion pictures, theatrical and non-theatrical (16mm) in each of four fields: 1. Occupational. 2. Home. 3. Traffic and transportation. 4. General. Sound slidefilms are judged separately.

AWARDS: Bronze Plaques will be awarded to top winners in each of the four fields and to top sound slidefilms. Award of Merit Certificates will be given to other films for special reasons of subject treatment, production excellence and/or unusual contribution to safety. At the discretion of the judges, awards may be given separately for "Instruction-teaching" and for "Inspirational" purpose films.

PRESENTATION: Films winning the Bronze Plaque will be shown in October during the National Safety Congress and Exposition in Chicago, Ill. Plaques will be presented at that time to representatives of sponsors of these films by the Committee's chairman. Certificate of Merit winners will receive their awards immediately after the final judging which is in April. All winners will be notified immediately after the final judging.

SPECIAL AWARD: The David S. Beyer Award, sponsored by the Liberty Mutual Insurance Company, is awarded annually in special recognition of the best theatrical production on highway traffic safety.

INFORMATION ON AWARDS PROGRAM: Write to William Englander, Secretary, National Committee on Films for Safety, 425 North Michigan Avenue, Chicago 11, Illinois.

9TH ANNUAL AWARDS COMPETITION OF THE NATIONAL VISUAL PRESENTATION. ASSN

VISUAL PRESENTATION AWARDS: CONTINUED

and visual presentations contending for its "Best Visuals" citations in various categories noted. Deadline for 1961 Awards was in March; entries for the 9th Competition must be received by March, 1962. Details of the "Day of Visuals" on May 23, 1961:

SCOPE: Two days of talks and seminars on the use, planning and production of visuals in the many categories listed below. Many of the awards winners will be used during these discussions to illustrate outstanding use of visuals for presentation.

CLASSIFICATIONS: Awards are given for: (1) Motion Pictures; (2) Slide Films, Transparencies and Slides (excluding motion pictures); (3) Graphics . . . including flip charts, brochures, flannel boards, binders, etc.

CATEGORIES: In recent Awards Competitions, the number of categories was increased to include: (1) Visual and Audio-Visual aids used by salesmen in a presentation to a customer or prospect to sell a product or service; (2) Public Relations . . . used to inform or influence a public audience; (3) Educational . . . designed for use in schools; (4) Public Service . . . used by any organization to inform or persuade a public audience; (5) Group Relations . . . used to inform an audience about a group problem; (6) Industrial Relations . . . used to explain employee or labor relations, job training, safety, supervisory training, work simplification, etc.; (7) Research & Development . . . used to do a reporting job or present an historical situation and (8) Point of Purchase . . . used to inform or influence at a fixed position where there is consumer traffic.

FOR INFORMATION: Write M. E. Schack, National Visual Presentation Association, 19 West 44th Street, New York 36, N. Y.

13TH ANNUAL SCHOLASTIC TEACHER FILM AND FILMSTRIP AWARDS

Sponsored by Scholastic Teacher Magazine
Entry Deadline: September 1, 1961

BOARD OF JUDGES: Judges are drawn from a panel of 75 outstanding audio-visual education experts—teachers, city and state supervisors, and college teachers. They are nominated by judges on the panel and by Editors of Scholastic Teacher. For impartiality, their names are kept secret. *Chairman*: Mrs. Vera Falconer, Scholastic Teacher Film and Filmstrip Editor, 66 West 87th Street, New York, N. Y.

ELIGIBLE FILMS AND FILMSTRIPS: All films and filmstrips produced for school use (other than college) between September 1, 1960 and September 1, 1961.

AWARDS & CATEGORIES: Certificates are awarded for motion pictures and filmstrips in the following categories: social studies, language arts, arts, science, and miscellaneous. Sponsored films are judged in a separate category for their usefulness in classroom. Films and filmstrips must be suitable for school use and fit into curriculum of Grades 3-12.

ENTRY INFORMATION: Write Mrs. Vera Falconer, Scholastic Teacher Film and Filmstrip Editor, 66 W. 87th St., New York, N. Y.

THE SECOND ANNUAL AMERICAN TV COMMERCIALS FESTIVAL

New York City—May 4, 1961

ELIGIBILITY: Open to commercials shown nationally, regionally or locally on television in the U. S. and Canada during the period March 31, 1960 through March 1, 1961, except those entered in last year's American Festival.

CATEGORIES: Thirty product classifications, (i.e., automobiles, cigarettes, etc.).

COMMERCIALS CLASSICS: Special category for all-time outstanding commercials. First air date must have been during or before 1955. Judged on longevity, productiveness in sales, memorability, influence on later techniques, awards received, etc. Winners to be added to last year's selections in Hall of Fame.

JUDGING: Judging will be handled by the TV Commercials Council of prominent advertising executives. *Criteria*: impact, believability, tastefulness, copy, demonstration, identification, remembrance, audience involvement, entertainment values, plus TV technique.

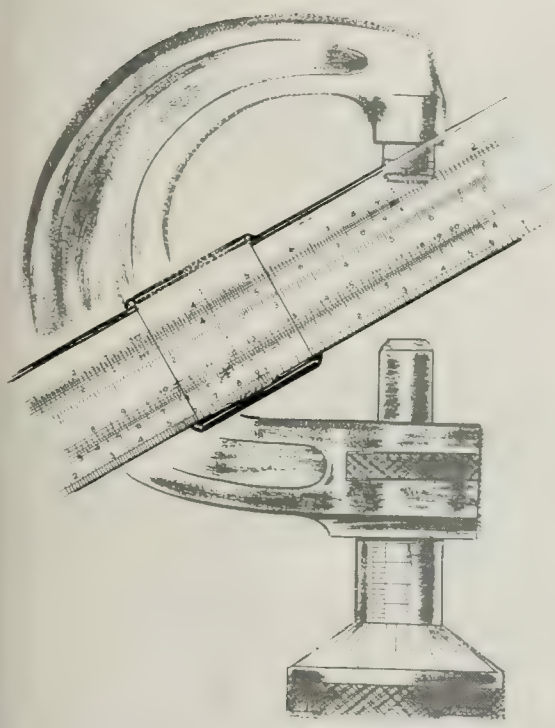
AWARDS: Top 150 Commercials; Best of Product Category awards; special citations for Advertising Achievement; special citations for Craftsmanship.

INFORMATION: Wallace A. Ross, Director, The American TV Commercials Festival, 40 East 49th Street, New York 17, N. Y.

SECOND ANNUAL INTERNATIONAL BROADCASTING AWARDS COMPETITION

Sponsored by the Hollywood Advertising Club

1961 Awards presented February 7, 1961. Open to any company or individual engaged in creating or producing radio or television commercials; any advertising agency, or any radio or television station.



CLASSES & CATEGORIES: *Television competition*: International class—announcements produced anywhere in the world that have received multiple market or multiple nation exposure; Local one-market class—commercial or announcement of any length used in one market only. *Divisions*: Animation and live action—1 minute or over, 30, 20 and 8-10 second lengths.

AWARDS: One award for each length of commercial in each of the two categories—animation, live action. One local one-market award. Awards for technical crafts—Best Editing, Direction, Camera Work (*not* a category of competition). One over-all *Grand Sweepstakes Award* winner.

INFORMATION: International Broadcasting Awards, Hollywood Advertising Club, P.O. Box 38909, Hollywood 38, California, U.S.A.

)UBLIC RELATIONS • EDUCATIONAL• TECHNICAL• MEDICAL• FARM . . . and

Making training films which merely train is like building boats in closed cellars. Something may be accomplished, but no one is going anywhere. Training films need human-interest like dough needs yeast. Both must rise to the occasion. One way to do that is to spend as much screen-time on "why" as you do on "how."

AWARD COMPETITIONS FOR BUSINESS FILMS

THE 13TH ANNUAL COMPETITION OF THE CANADIAN FILM AWARDS

Sponsored Jointly by
The Canadian Association for Adult Education,
The Canadian Film Institute,
The Canada Foundation

MANAGEMENT COMMITTEE: Consists of representatives from each of the sponsoring organizations plus technical advisers, who are associated with the film making industry in Canada. Charles Topshee, *Chairman* and *Manager*: Canadian Film Institute, 1762 Carling Avenue, Ottawa 3, Ontario.

CATEGORIES: A new category has been added for this year's competition. Awards will be given for films produced for TV in two categories, fictional and documentary, and for filmed TV commercials. Other categories are: Theatrical, shorts and features; Non-Theatrical, arts and experiment, children's, general information, public relations, sales and promotion, training and instruction, travel and recreation. Films released during 1960 are eligible for award. Competition closed January 31, 1961.

AWARDS: Amateur Trophy of the Association of Motion Picture Producers and Laboratories of Canada, the Award for the Canadian Film of the Year, an Award of Merit for each category.

CINE

THE COMMITTEE ON INTERNATIONAL NON-THEATRICAL EVENTS

(Coordinating United States Entries in Overseas & Canadian Film Festivals)

OFFICE (of the Coordinator): 1201 Sixteenth Street, N.W., Washington 6, D. C.

OFFICERS: Ralph L. Hoy (Aluminum Company of America), *chairman;* James A. Barker (Capital Film Laboratories, Inc.), vice-chairman; Stanley McIntosh (Teaching Film Custodians, Inc.), vice-chairman; John Flory (Eastman Kodak Company), finance vice-chairman; Anna L. Hyer (Department of Audio-Visual Instruction, National Education Association), co-ordinator.

OTHER MEMBERS: Eyre Branch (Standard Oil Company, N. J., retired); Ott Coelln (Business Screen Magazine); Ralph P. Creer (American Medical Association); Robert Disraeli (American Jewish Committee); Brice H. Howard (National Educational Television & Radio Center); Emily Jones (Educational Film Library Association); Rev. Donald Kliphardt (National Council of Churches of Christ); The Very Rev. Dr. Leo J. McCormick (Catholic Audio-Visual Educators); Edward P. McCoy (Michigan State Univ.); Willis H. Pratt, Jr. (American Telephone & Telegraph Co.); Reid H. Ray (Reid H. Ray Film Industries); Frank Rollins (E. R. Squibb & Sons); Harold E. Wigren (Houston Public Schools); and Don Williams (Kansas City University).

PURPOSE: CINE is a committee of individuals acting in the public interest on behalf of the U. S. non-theatrical film industry to simplify and improve the selection process for sending motion pictures to film festivals outside this country.

1961 ACTIVITIES: Selection of U. S. non-theatrical films for entry in the following seven festivals is being handled by the Committee on International Non-Theatrical Events: tural, educational, entertainment, documen- Edinburgh International Film Festival; Venice International Exhibition of Cinematographic Art (categories include scientific, cultary and children's films). Berlin International Film Festival (June 23-July 4—entry limited to one 35mm subject only); Vancouver International Film Festival (see description this section); and the Harrogate (England) Festival of Films for Industry.

ENTRY FORMS: Write: Anna L. Hyer, Coordinator, CINE at 1201 Sixteenth St., N.W., Washington 6, D. C. for entry forms. For information on business-sponsored motion pic-

For 50 years the camera eye of industry has been focused on the world scene. It has ranged far and wide from farm to factory to new frontier. It has descended into the depths of the earth and soared aloft in a nose cone . . . it has shown approved techniques for building a tire or bathing a baby . . . it has taken city children to the wheatfields of the midwest and given farm boys their first glimpse of the ocean . . . it has gone aboard fast freights and freighters, ridden with racers and truckers and trawler captains . . . it has filmed a Bessemer converter, a bauxite ore conveyor, a banana plantation . . . it has gone to the sun-scorched diamond country of Africa and the windswept wastes of Antarctica . . . it has probed the mysterious world in a drop of water and the geological grandeur of Grand Canyon . . . we have seen mountain side and shining sea, teeming city and prairieland . . . it has shown us Americans at work: doctors, chemists, nuclear physicists . . . nutritionists, jet pilots, construction crews . . . county agents, therapists, CPA's . . . teachers, lawyers, agronomists . . . Americans creating, building, keeping America strong and ready to meet the challenges that lie ahead in the New Age of Space.

Association Films is proud of its role in bringing industry's story to "the viewing millions." Organized in 1911 by the International Committee of Young Men's Christian Associations as the YMCA Motion Picture Bureau, it was later incorporated (on April 1, 1949) as an independent enterprise. The same pioneering spirit which influenced its creation half-a-century ago persists today, as Association Films looks to "the next 50" with unqualified enthusiasm and optimism. We sincerely believe the best is yet to come!

ture entries write: Business & Industry Subcommittee, c/o John Flory, Advisor, Non-theatrical Films, Eastman Kodak Company, Rochester, N. Y.

EDINBURGH INTERNATIONAL FILM FESTIVAL

Edinburgh, Scotland—July, 1961

ENTRY INFORMATION: Selection of U. S. films for entry in this festival is being handled by the Committee on International Non-Theatrical Events (CINE), formed for the purpose of coordinating U. S. entries in overseas Film Festivals. For complete entry data and instructions, contact Anna L. Hyer, Coordinator, Committee on International Non-Theatrical Events, 1201 Sixteenth Street, N.W., Washington 6, D. C.

THE VANCOUVER INTERNATIONAL FILM FESTIVAL & AWARDS

Sponsored by the Vancouver Festival Society of Vancouver, B. C., Canada

July 10-22, 1961: Entries Close June 1st

ENTRIES: Films released since January 1, 1959 are eligible, excepting Canadian and American-made films, which must have been released since January 1, 1960. Foreign language films should have English sub-titles or be accompanied by a synopsis or script in English. But all feature films must have English sub-titles unless special permission is given. Films will be accepted from January 1, 1961 to June 1, 1961. Feature films accepted until June 15. Entrants must pay transportation charges and insurance on films; must meet all custom requirements. Each film must be clearly identified by title, running time, number of reels, point of origin, aspect ratio (wide-screen). U. S. entries must be submitted through CINE (see CINE listing in this section).

CATEGORIES: (A) Feature-length Fictional Films, with a running time of 50 min. or longer, primarily intended for entertainment. (B) Short Fictional Films, with a running time of less than 50 min. (C) Documentary Films: fine arts; science and agriculture; travel; instructional; health, welfare and medical; sociological; institutional public relations; and miscellaneous. If preferred, feature-length documentaries may be entered in above categories. (D) Children's Films: feature, entertainment or educational.

AWARDS: A festival certificate will be presented to all producers of films selected for showing at the Festival. Plaques will be presented to winning entries in categories B, C, and D. Special Diplomas will be presented winners in each section of categories C & D. Additional certificates of merit may be awarded at the discretion of the judges.

ENTRY INFORMATION: For data, regulations and entry forms write: Vancouver International Festival Committee, Hotel Vancouver, Vancouver 1, British Columbia, Canada. Mark attention: Program and Procurement Chairman, Eric Gee.

VENICE INTERNATIONAL EXHIBITION OF CINEMATOGRAPHIC ART

Venice, Italy—July 20-31, 1961

THE ASHEVILLE CITIZEN

"Dedicated to the Upbuilding of Western North Carolina"

ROBERT BUNNELLE, *President and Publisher*

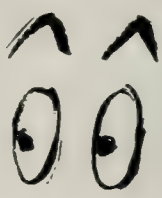
HAL TRIBBLE, *Editor* CLAUDE S. RAMSEY, *Executive Editor*

FRIDAY, DECEMBER 9, 1960

If A Man Answers, Hang On

Maybe we're suckers for the soft sell, but the Southern Bell folks have turned out a tremendous film extolling the wonder of North Carolina in color and sound, and we feel impelled to say so.

Designed primarily as a visual aid in luring new industry, the movie takes a close-up look at the Old North State from Cherokee to Currituck—its people, its agriculture, its industry . . . schools, mountains, seashore, even its spirit.



Here and there throughout the film you can find a telephone, but it never mars the plot, and the plot is magnificent.

So we thought—

The next time your civic club is stuck for a speaker—or even the first time you're able to do so—why not borrow the film from the Southern Bell folks and treat yourselves to a stirring show?

We've forgotten the number of the company, but it's probably in the book.

Tell 'em we sent you.

NOW WE'RE GETTING IN THE PAPER! AN EDITORIAL YET! WE ARE PRETTY PROUD OF THIS, BUT WE CAN TELL YOU FOR SURE THAT OUR CLIENT, SOUTHERN BELL TELEPHONE CO., (one of over 2,000 satisfied to date) IS WELL PLEASED. WE HOPE THAT YOU WILL LET US PRODUCE YOUR NEXT FILM. (At a reasonable cost.)

PRODUCER AND LABORATORY TRADE GROUPS

AMERICAN ASSOCIATION OF FILM PRODUCERS, INC.

OFFICE: 7064 Sheridan Road, Chicago 26, Illinois. Address: Executive Secretary.

OFFICERS: Mervin LaRue (Mervin LaRue, Inc.), *treasurer*. Lawrence Mominee (Atlas Film Corporation); Reid H. Ray (Reid H. Ray Film Industries); Charles Beeland (Charles Beeland Films), *directors-at-large*.

PURPOSE: By mutual cooperation to educate business, government and institutional groups to the advantages and values of films and related audio-visual aids; to foster and promote continued ethical relationships in all matters between producers and clients; to advance the creative and technical arts and crafts of this specialized industry in which member companies serve.

MEMBER COMPANIES: Atlas Film Corporation; Beeland Films; Cinecraft Productions; Condor Films; Mervin W. LaRue, Inc.; Producers Film Studios; Reid H. Ray Film Industries; Sarra, Inc.; Wilding, Inc.

ACTIVITIES: A 1961 organization meeting is to be held in April to discuss future programs; industry-wide cooperation and promotion of member interests. For details regarding membership contact the Office of the Executive Secretary in Chicago, Illinois.

THE ASSOCIATION OF CINEMA LABORATORIES, INC.

OFFICE: 1226 Wisconsin Avenue, N.W., Washington 7, D. C.

OFFICERS: Byron Roudabush (Byron Motion Pictures), *President;* G. Carleton Hunt (General Film Labs), *Vice-President;* Dudley Spruill (Byron Motion Pictures), *Secretary;* Kern Moyse (Peerless Film Processing Corp.), *Treasurer*.

BOARD OF DIRECTORS: Saul Jeffee (Movielab Film Labs); James A. Barker (Capital Film Labs); George W. Colburn (George W. Colburn Labs); G. Carleton Hunt (General Film Labs); E. W. Hamilton (Trans-Canada Films); Louis Feldman (Du Art Film Labs); Byron Roudabush (Byron Motion Pictures); Reid H. Ray (Reid H. Ray Film Industries); Sidney P. Solow (Consolidated Film Industries); Spencer Caldwell (S. W. Caldwell, Ltd.).

MEETINGS: Held semiannually at the same time and place as the Society of Motion Picture and Television Engineers' conventions.

ACTIVITIES: The Association is in the process of engaging the services of a well-known Washington representative to act as Executive Secretary. An ambitious program for the year 1961 has been set up and has been mailed to the members for approval, after which details will be available for publication. The Association now represents approximately 95% of the commercial laboratories in the country.

3 reasons why we think we're the best in the business:

IRST, we think your film should be handled by experts. That's why e employ the largest staff of color film specialists in the motion icture industry—people who take extra care with every job.

ECOND, we know you want flexibility of presentation. That's hy complete processing and release print service is provided for *any* ze film—all your requirements will be satisfied.

THIRD, we think you appreciate fine products. And Technicolor traditionally offers the ultimate quality in film.

CONCLUSION: Your films can be processed only once, and you want the job done right. We have 46 years of experience in the art of manufacturing world famous color projection prints. You don't take chances with Technicolor.

MEMBERSHIP: Canadian firms, partnerships and corporations engaged in motion picture production or laboratory work are eligible for Active Membership. Persons, firms or organizations acceptable to the membership, interested in the furtherance of the motion picture production industry in Canada are eligible for Associate Membership. Present membership, 45 Active and 9 Associate for a total of 54.

PURPOSE: To promote the common interest of those engaged in the motion picture production and laboratory industry in Canada by maintaining the highest possible standards in the production of motion pictures for commercial, theatrical or television release and to represent the industry in its relations with government, other associations and the public at large; to encourage government agencies to have required films let by tender to private producers.

1961 ACTIVITIES: 1. To continue to develop liaison with the Canadian Broadcasting Corporation. 2. To represent the interests of the Association before the Board of Broadcast Governors. 3. To perform an insurance study in all phases of film making. 4. To acquaint industry, advertising agencies, television stations and networks and other potential sponsors with the work of Canadian film producers. 5. To integrate the Association's annual meeting in early May with the huge international convention of the Society of Motion Picture Technicians and Engineers being held in Toronto (first time in Canada) in order to promote one big Canadian audio-visual week. 6. To seek some five or six additional members, which will virtually provide blanket coverage of the industry in Canada.

New York Film Producers Elect Officers

William Van Praag Named President; Lee Blair to Board

WILLIAM VAN PRAAG, of Van Praag Productions, has been elected president of the Film Producers Association of New York, succeeding Lee Blair, of Film-TV Graphics, who has been president for the past year.

Other officers elected by the FPA were Robert Gross, American Film Producers, *vice president;* Thomas Craven, Craven Film Corp., *secretary;* and Peter J. Mooney, Audio Productions, *treasurer.*

Members of the Board

Elected to serve on the Association's Board of Directors were Robert Bergmann, Filmex, Inc.; Sanford Greenberg, MPO Productions, Inc.; Robert Klaeger, Transfilm-Caravel, Inc.; Robert Lawrence, Robert Lawrence Productions, Inc.; Walter Lowendahl, Dynamic Films, Inc.; Fred Raphael, Filmways, Inc.; Henry Strauss, Henry Strauss & Co., Inc.; William Unger, Elliot, Unger & Elliot; Robert Crane, Color Service Company; Herman Edel, Music Makers, Inc.; Arthur Florman, Florman & Babb; David Horne, Titra Sound Corp., and Lee Blair, Film-TV Graphics, serving automatically as a director in his capacity as retiring president.

Began Film Career in '37

The new FPA president, William Van Praag, formed his own company, Van Praag Productions, in 1950. He has been in the film industry since 1937 with such firms as Paramount, United Artists and NBC. He was with the Office of War Information before the war, and served with the Army during the war.

A native of New York, Bill Van Praag is married and has two children. He lives in Kew Gardens Hills on Long Island and is active in youth affairs in that community.

In addition to his continuing activities in the FPA (he was executive vice president last year), Van Praag is a member of the Radio & Television Executives Society, the Society of Motion Picture and Television Engineers, and the Advertising Club of New York.

Herman Roessle: in Memoriam

Inventive Audio Executive a Victim of Fatal Illness at 58

One of the film industry's best-known executives, Herman Roessle, 58, a vice-president of Audio Productions, Inc., passed away on February 24 at his home in Jackson Heights, N. Y.

Mr. Roessle was a graduate engineer who had been in the motion picture field since coming to this country from his native Germany in 1927. He had served as vice-president of Audio since 1942, having joined that company in 1933.

His pioneer work in technical animated drawings and his inventions in that field early attracted the attention of many business film sponsors and the United States Navy. He and the company he served for nearly three decades produced many secret and confidential films on special devices for the armed forces. He was a member of the Society of Motion Picture and Television Engineers.

Surviving are his wife, Mrs Eleanor Roessle, and a daughter Margot.

His Work Served Nation

This brief word of Herman Roessle's passing is far less a monument to his useful life than the many contributions which he and his company have made through the film medium and to the knowledge and understanding imparted to millions who have benefited by the many pictures in which he participated so importantly. Mr. Roessle's work lives on in the training work he helped so immeasurably to improve, and in the lives of men and women helped by his *better* images. He will be long and well remembered by his many friends and his associates in our industry. —OHC

WHAT GOOD IS A FILM

unless it solves a problem?

Since 1947, our specialty has been helping clients *get results and achieve goals* through films and other visual and written communications.

What we provide—in essence—is *down-to-earth communications* . . .

Communications that reach your audience in terms they understand and accept . . .

Communications that really *come to grips with your problem* and help solve it.

Write or phone for "TFI Handbook of Communication Services" today.

Representative clients include IBM Corporation, Charles Pfizer & Co., Carrier Corporation, Metropolitan Life Insurance Co., Pan American World Airways, The Borden Company.

Robert A. Lightburn, President
TFI Productions 150 W. 54th Street, New York 19, New York

magination – Comprehension – Proficiency

Whether it's putting a man into space or producing an effective motion picture, it takes creative thought, a thorough understanding of the problem and professional skill.

The imaginative treatment of "Reaching For The Stars", conceived, written and produced for Corning Glass Works by Holland-Wegman Productions, is just *one* example of creativeness and effectiveness in a motion picture.

Some other current productions:

"FOR EYES TO SEE" . . . . . Bausch & Lomb Incorporated (Public Relations)
"THE INCREDIBLE SHRINKING HOUSE" . . . . Masonite Corp. (Sales Promotion)
"MR. BRADSHAW SPEAKS" . . . . . Carborundum Co. (Distributor Education)
"THE DAY THE PRESSES STOPPED" . . . Hammermill Paper Co. (Sales Training)
"WATCH IN THE NIGHT" . . . . Massachusetts General Hospital (Fund Raising)

Manned space capsule from the film "Reaching For The Stars" for Corning Glass Works.

Let us suggest a fresh, new approach to your next film. Just call or write Ed J. Wegman. We'll be glad to counsel with you anytime–anywhere.

BULLETIN

TO: P. R. DIRECTORS, AGENCIES, COUNSELORS

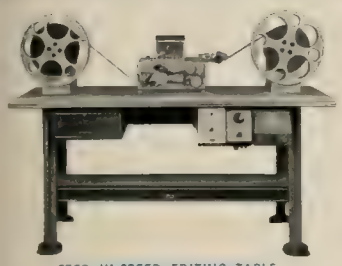
This will bring to your attention a new television series of importance to public relations executives planning 1961-62 programs.

Jim Bishop and Fran Allison are co-featured in this live half-hour information series titled FOR YOUR INFORMATION.

The thirteen half-hours in the series will be produced at CBS in New York in May. National syndication on videotape and film will begin immediately thereafter.

The program will serve as a vehicle for non-commercial public relations messages which have an information content of value to the general public.

Science, travel, health, home economics are just a few of the topics which will be presented by Mr. Bishop or Miss Allison. Your organization can participate by making available short films, guests for interview, or by live studio demonstrations.



For further information about terms and availabilities, write for FOR YOUR INFORMATION Fact Sheet to:

Washington Correspondent for Business Screen

CINE Honors Winners of Edinburgh, Venice Awards

. . . Despite knee-high drifts of powder snow, close to 500 Washingtonians mushed to the National Education Association auditorium on the night of January 27 to view award winning films from the Venice and Edinburgh International Film Festivals. The annual affair—which always rates top billing on the film lover's calendar—was sponsored by CINE (the Committee on International Non-Theatrical Events), a voluntary group of representatives from industry, churches, educational organizations and television, all with a common interest in improving cinematography and adequately representing the non-theatrical industry in international festivals.

Sr. Pascarelli Does Honors

Awards for the 1960 Venice International Film Festival were presented by Italian Press Counselor, Elio Pascarelli, to the grand prize winner of the art film *Neighboring Shores,* produced by Robert Graff, Sextant, Inc. A special award of honor was presented for *Mark Twain's America,* a documentary produced by Donald B. Hyatt, NBC. Other awards were received for *Fusiform Aneurysm of Aortic Arch, Resection, and Replacement with Dacron Graft,* produced by the Baylor University College of Medicine, and *Culdoscopic Technique and Cinematography,* an Audio Productions film, sponsored by Schering Corporation.

British Information Minister, Leslie Glass, C.M.G., presented a diploma of merit to representatives of John Sutherland Productions for *Rhapsody of Steel,* U. S. Steel's prize winning CINE entry in the 1960 Edinburgh International Film Festival.

Festival Films Are Shown

The highlight of the evening was the screening of six films. The first, *The Little Casartelli Circus,* was an Italian prize winning film at the Venice festival. *George IV: Edinburgh,* a British winner at Edinburgh, was also shown. The two foreign films were followed by four American films, including *Rhapsody of Steel, Neighboring Shores, Mark Twain's America,* and an hilarious three-minute cartoon produced by Pintoff Productions, titled *Interview.*

At CINE event (*l to r*): *chr. Ralph L. Hoy; U. S. delegate Donald Baruch; artist Antonio Frasconi and Italian Press Counselor Pascarelli.*

CINE Chairman Ralph L. Hoy, Aluminum Company of America, presided at the ceremonies.

CINE will be handling non-theatrical and short subject film entries from non-government sources in 1961 for these international film festivals: Venice, Edinburgh, Vancouver, Berlin, Harrogate, Mannheim and Stratford. Producers desiring to submit entries for consideration may obtain information and application forms from Dr. Anna L. Hyer, CINE Coordinator, 1201 Sixteenth Street, N.W., Washington 6, D.C.

Inaugural Ceremony Films to Show Widely Overseas

Swift production reaction marked the activity of the U. S. Information Agency in film coverage of the Inauguration of President John F. Kennedy.

Highlights of the coverage included the production of motion pictures of the event for screening overseas. By Monday morning following the Friday ceremonies, USIA placed on the desk of every U. S. ambassador abroad a black-and-white film of the Inaugural address for special showing to foreign dignitaries and invited USIS audiences.

Send Color Version Abroad

In addition, it was planned to have a two-reel color motion picture of the Inauguration sent abroad for showing to foreign audiences as soon as it was processed.

USIA's Motion Picture Service has also provided newsreels with clips of the Inauguration in areas not covered by American newsreel firms.

The Television Service of USIA is also making video tapes of the Inauguration available abroad, air-shipping to all areas as produced. Prior to the Inauguration, the Service distributed a 15-minute program about the new administration, as well as *The John F. Kennedy Story,* a half-hour program.

All Media Cover the Event

All media of the USIA went into action for the event. The ceremonies and portions of the attendant celebration were broadcast "live" in English over 48 of the 87 transmitters of the Voice of America, USIA's radio arm.

Most of the Voice's 35 language services, ranging from Albanian to Vietnamese, provided audiences in distant lands with on-the-scene reports—either live or recorded—from the Capitol, the parade route, and the reviewing stands opposite the White House.

The Agency's Press and Publications Service provided details of the Inauguration by radio teletype to 87 posts in English, and for Latin American countries, in Spanish. Photographs of the Inauguration and copies of Washington, D. C., newspapers were sent to USIA posts for display purposes.

Timely Film on Minuteman

. . . Directly on the heels of the exciting announcement that the new Minuteman ICBM has exceeded the expert's expectations, Thiokol Chemical Corporation has released a 13½-minute version of *Minuteman—Missile and Mission* for TV audiences eager to glimpse the new "bird."

The Air Force Sponsored Film which has already been in wide distribution in 18½-minute length in 35mm ECN and 16mm color reduction, incorporates films of the actual test firing which caused the front-page news.

The story of the "new muscle for peace" was narrated by Chet Huntley and shot, in part, in Thiokol's plants in Utah. It is a colorful, informative documentary of a strategic weapon concept which will afford the nation "instant launch"—or, decisive retaliation in less than a minute.

F. William Hart of National Film Studios, Inc., of Washington produced the timely film for Thiokol. It was directed by Charles J. Hunt, photographed by Bert Spielvogel and written by Paul C. Woodbridge.

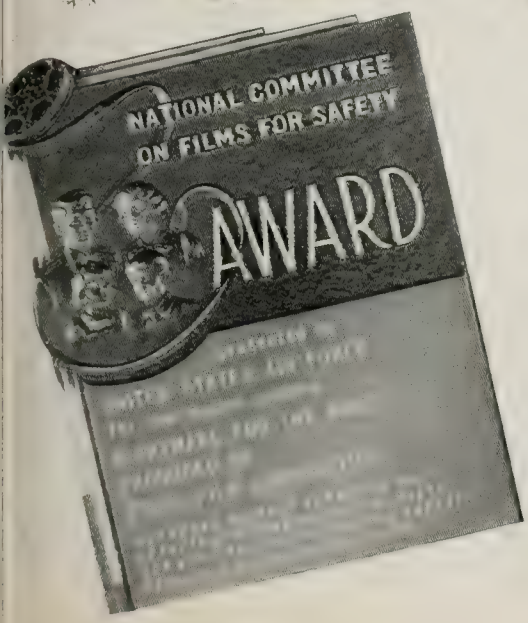
Noted Lawyer in Pilot Film on Defense of the Underdog

. . . Lawyer Edward Bennett Williams, defender of James Hoffa, Joseph McCarthy and Frank Costello, will be the star in an unusual new pilot film project for the National Council on Legal Clinics. The film will deal with the ethics of the legal profession in unpopular or non-paying cases and will be distributed to law schools throughout the country. Producer Theodore Granik—who set up filmed interviews between lawyer Williams and local law students—produced the film at Koster Film Facilities in southwest Washington.

* * *

Sponge Fishing Story Told in Fish and Wildlife Film



. . . Sponge harvesting in the sea is a Greek art with centuries of tradition behind it. Introduced to this country more than one hundred years ago by Greek sponge fishermen, it has been maintained by their progeny throughout the decades.

These old world methods, and old world culture—accompanied by authentic music and dancing from ages past—are included in a colorful new film produced by the Department of Interior's Fish and Wildlife Service for the Sponge and Chamois Institute.

The 14-minute, 16mm sound color film was shot in Florida a

Premiere First in Series of Language Teaching Films

. . . An unusual audience of modern linguists from many nations recently gathered together in the auditorium of the MPAA to preview and analyze the first of a series of truly exciting films designed to teach language teachers how to teach a second language.

The film project is being launched by the Modern Language Association in cooperation with Teaching Film Custodians, a non-profit educational public service corporation distributing classroom motion pictures to schools, colleges and universities.

Produced by Reid H. Ray

Reid H. Ray Film Industries, Inc., is producing the films under the guidance of Theodore B. Karp, writer-producer and president of Language Films, Inc.

Organization of Language, which has been produced after months of intensive research and involved consultation, is imaginative and entertaining as well as instructive. Karp has successfully presented the basic facts of linguistics in an intriguing, non-technical manner. It's almost impossible, for example, to view this film without suddenly realizing that one has gained more than a smattering of knowledge about German grammar!

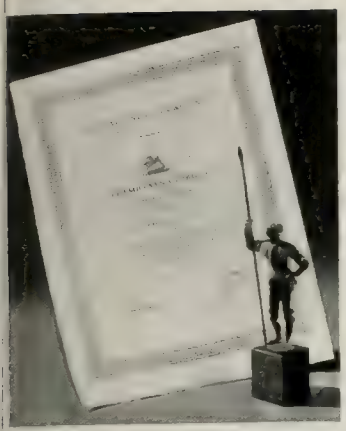
"Beyond Silence" Wins Top Honors at Foreign Festivals

. . . In the past few months, an unbelievably moving film which cost less than $10,000 and was shot in three days has walked away with top prizes in every film festival around the world, including Venice, Edinburgh, South Africa, Bonn and Buenos Aires.

Beyond Silence, produced by Milner-Fenwick of Baltimore for the United States Information Agency, is a simple documentary of the interior and exterior worlds of the deaf mutes in Gallaudet College for the Deaf.

Cited by Evaluation Board



The film won the highest German certificate of cultural merit at the Bonn Festival and received the following critique from the German Film Evaluation Board.

"Thanks to the intensity of the strong visual sequences, the film is so highly impressive that the audience identifies itself with the deaf students and immediately participates, in this way, in the perceptions and the emotions of these physically handicapped people."

For director Ed Levy, who mingled with Gallaudet students until he thoroughly understood

Discussing new Modern Language films (*see above*) *are these linguists* (*seated*): *Dale Lange, French; Dorothea Bruschke, German; John Sanchez, Spanish; Ludmilla Alexeev, Russian; Robert Bruce, English; and Marc Duvivier, French. Standing* (*l to r*): *Ted Karp, series' writer; Dr. Emma Birkmaeir, U. of Minn. H. S., Technical Advisor; producer Reid H. Ray, whose company is creating the scenes.*

Festival prizes *awarded to Milner-Fenwick's "Beyond Silence."*

their problems, Bonn officials were laudatory:

". . . . the film remains entirely free of any sentimentality. On the contrary it manages to remain fascinatingly fresh and objective . . . outstanding recognition should be given to the direction in that the movements of the deaf in this film are completely natural and unaffected."

In summary, festival judges said this about the government film:

"For a difficult and for what some people would consider to be a dry and unrewarding theme, a documentary film of exemplary quality has been achieved which rises far beyond the limits of its very special subject matter because it radiates overwhelming qualities of humanity."

Virginia Fine Art Museum Pictures Cultural Services

☆ *Museum in Action*, a new color-sound film documenting the diverse activities of America's first state-owned art museum, has been released by the Virginia Museum of Fine Arts in Richmond, Virginia.

Narrated by the noted English journalist Alistair Cooke and directed by Academy Award winner Richard de Rochemont, the half-hour 16mm film is being offered for showings by television stations, schools, clubs, libraries and other groups.

The film was produced as part of the Virginia Museum's 25th anniversary celebration. More than a year in production, *Museum in Action* records a Virginia Museum season, including its theatre activities, far-flung traveling exhibitions, imaginative special exhibitions, publications and other events.

Emphasis is given the Museum's massive Artmobile, a unique gallery-on-wheels, as it travels along a Virginia highway.

Inquiries for bookings should be addressed to State Services, Virginia Museum of Fine Arts, Richmond 20, Virginia.

Agriculture's Films Shown to 165 Million Last Year

☆ The annual film distribution report of the Motion Picture Service, U. S. Department of Agriculture, gives figures of an estimated audience of 165,000,000 persons for USDA motion pictures during the past fiscal year.

A breakdown of the total shows that 7½ million were in attendance at the 103,000 showings of USDA films reported by the cooperating film libraries, field offices and borrowers of Washington prints.

An estimated 8½ million persons attended showings of the 12,000 non-USDA-owned prints of Department films in state agencies, colleges, school systems, and other film libraries from which circulation reports are not received.

Television showings accounted for the remaining 149 million viewers, from the 2,376 film bookings to TV stations made by the MPS out of Washington and another 601 bookings reported by cooperating libraries around the country. (Total of 2,977 TV showings is multiplied by 50,000 —the average audience per telecast of public service films.)

The ten most popular USDA films during the year, according to film library reports, were: *Realm of the Wild; Smokey the Bear; The Three Squares; Basic Technique for Home Landscaping; Little Smokey; Your Meat Inspection Service; Tree Bank; The River; Wildlife and the Human Touch,* and *Rainbow Valley,* each with more than a thousand showings.

* * *

11 Million See Industry's Films Via Bureau of Mines

☆ Industry-sponsored motion pictures, produced in cooperation with the Bureau of Mines, U. S. Department of the Interior, chalked up audiences during 1960 totaling more than 11 million persons, the Interior Department has reported.

Films from the Bureau, averaging over 4,000 showings weekly, are dedicated to the conservation of the Nation's natural resources.

Although the Bureau's distribution of the films is limited to the United States, foreign circulation by the International Cooperation Administration and the United States Information Agency added more millions of viewers. Soundtrack narrations for the foreign versions were translated into as many as 15 different languages, and the films were seen in nearly every country of the Free World.

10 "Most Popular" Pictures

The ten most popular Bureau films in 1960 and their industry sponsors were: *The Petrified River—The Story of Uranium,* Union Carbide Corp.; *Arizona and Its Natural Resources,* Phelps Dodge Corp.; *A Story of Copper,* Phelps Dodge Corp.; *Sulphur,* Texas Gulf Sulphur Co., Inc.; *Texas and Its Natural Resources,* Texas Gulf Sulphur Co.; *California and Its Natural Resources,* Richfield Oil Corp.; *The Drama of Steel,* Inland Steel Co.; *Washington and Its Natural Resources,* Richfield Oil Corp.; *The Story of a Modern Storage Battery,* Willard Storage Battery Div., Electric Storage Battery Co.; *Oregon and Its Natural Resources,* Richfield Oil Corp.

Each of these films was shown more than 7,000 times during the year.

Book Films from Pittsburgh

Bookings for these and dozens of other film subjects are arranged through the Graphic Services Section, Bureau of Mines, 4800 Forbes Ave., Pittsburgh 13, Pa., or through the more than 100 cooperating distributing centers in all parts of the country.

PRESTIDIGITATION!

is Magic; one type of Magic: The performance of tricks by quick, skillful use of the hands. The prestidigitator's business is in *diverting* your attention and proving that "the hand is quicker than the eye." The end-result of the trick is transient entertainment and when it's over with it's gone for good, leaving you dazzled at the skill of the manipulator.

There is another type of Magic, one which does not *divert* your attention but *focuses* and *holds* it . . . and this is what we at Depicto offer you. Under one roof, Depicto contains all the facilities to tell your message or sell your product. Whether for an audience of one or an auditorium-filled Sales Meeting we can fulfill your project from conception to production. We have a variety of techniques to *hold* and *focus* the attention of YOUR audience, to sell or to tell . . . without prestidigitation.

Mahlon Martin is Chairman of NAVA 1961 Convention, Exhibit

Mahlon H. Martin of M. H. Martin Co., Massillon, Ohio, has been named General Chairman of the 21st Annual National Audio-Visual Convention to be held July 22-25, 1961, at the Morrison Hotel, Chicago, it was announced by Harvey W. Marks, NAVA President.

Martin, who is the Association's first vice-president, predicted that the 1961 NAVA Convention will be the largest meeting of audio-visual people ever assembled. Plans are being made to register well over 3,000 people, and an exhibit area accommodating almost 250 booths has been set aside for the four-day event.

"Last year, 206 booths were occupied, an all-time high in the history of the annual show. Registration totaled 3,174 persons, topping the three thousand mark for the first time. These two figures represented 21% and 25% increases, respectively. In 1961 we fully expect the convention and exhibit to show a continuation of this surging interest in audio-visuals," Martin said.

The NAVA Convention and Exhibit attracts A-V dealers from all over the United States and Canada, as well as audio-visual users in education, religious instruction, industrial training, business sales and merchandising, government, medicine and agriculture.

Information on the Exhibit and available booth space for the annual trade show, one of the largest single exhibits of a-v equipment, materials and services assembled at any time under one roof, may be obtained from National Audio-Visual Association, 1201 Spring St., Fairfax, Va.

5th San Francisco International Film Festival—November 1-14

San Francisco's annual International Film Festival is scheduled for its fifth year of competition, November 1-14, 1961.

According to Irving M. Levin, director of the Film Festival, the solid success of the 1960 event insured its continuance. Levin estimates that there was a fifty percent increase in Festival attendance to witness the 20 different features from 19 nations and the 43 short subjects from 15 countries.

The newly formed category, "Film As Communication," the non-theatrical 16mm film competition, will be continued in 1961. Last year, more than 125 prints from nine countries were placed in the special competition.

More nations intend sending delegations of their artists to the 1961 event, according to Levin.

"THE GIVE AND TAKE"

PRODUCED BY

MARATHON INTERNATIONAL PRODUCTIONS

FOR

VOLKSWAGEN OF AMERICA

COLOR BY: MOVIELAB FILM LABORATORIES, NEW YORK ■ SOUND BY: REEVES SOUND STUDIOS, NEW YORK

In May, 1960, "The Give and Take," a 26-minute color motion picture, made its bow. It was commissioned by Volkswagen of America. In shooting it, Marathon crews travelled 26,000 miles, conducted business in 14 languages, were on location in 13 different countries and shot 45,000 feet of film. The purpose of "The Give and Take" was to show the necessity of free world trade for a healthy world economy, and how Volkswagen shares in world trade by buying where it sells.

By late December, "The Give and Take" had, on television alone, obtained 288 certified bookings, reaching 12,199,000 people. In addition it had been booked into 1,134 showings to client-selected groups, and had been translated into nine languages for showings throughout the world.

At its present rate "The Give and Take" will achieve a remarkable 400-plus television bookings the first twelve months, and a similarly amazing number of group showings. The record of previous films produced by Marathon International for Volkswagen of America and other clients shows *consistently* similar high exposure.

Only an excellent film can achieve this kind of record. It's the result of a rare cooperation between client and producer; painstakingly creative planning and execution; and the teamwork of outstanding craftsmen such as Movielab Film Laboratories and Reeves Sound Studios.

Since audience is the criterion of success in public service films, Marathon considers its work only half done when the film is in the can. Marathon oversees production of prints, then sees to it that each film gets the widest possible distribution to the *desired audience*.

Check the depth of impression and audience figures of your own business films. If there's room for improvement, talk to Marathon about your next motion picture.

Norman T. Hatch, *Chief, Radio-TV-Newsfilm Branch*
Phone: OXford 7-5111

ACTIVITIES: The Audio-Visual Division approves release of Armed Forces stock footage which cannot be procured commercially for newsfilm television programs, theatrical productions, etc. The Production Branch cooperates with producers of some 35 major theatrical productions and 10-12 TV series featuring or relating to the Armed Forces. There is an Armed Forces Film supplement which lists the various Service films of Army, Navy, Air Force and Marine Corps available for public non-profit showing or cleared for public service TV programs. Information of such films can be obtained from the Production Branch. The Still Photo Branch releases to the press and television approximately 1500 photographs per year.

The Radio-TV-Newsfilm Branch releases approximately 260 (2-3 minute) subjects to the TV, newsfilm and theatrical newsfilm media annually. It maintains two small Pentagon studios for servicing the news media and radio programs, which feature interviews with top Defense officials. In addition, the Radio-TV-Newsfilm Branch releases taped and televiewed messages by Secretaries and Service Chiefs and radio trailers for Armed Forces Day.

PRODUCTIONS: The only film directly produced in 1958, 1959, 1960 by the Office of Public Affairs for the Secretary of Defense is an annual film report to the Armed Forces and public on the progress and achievements of the Armed Forces. These reports have been edited and assembled by the Army Pictorial Center in New York. The current *Ramparts We Watch* is an 18-minute, 16mm color film with Chet Huntley as Narrator.

Armed Forces Institute of Pathology

Medical Illustration Service

Herman Van Cott, *Chief, Medical Illustration Service*
Phone: RAndolph 3-1000, ext. 2866

Morris Goldberg, *Chief, Training Aids Division*
Phone: RAndolph 3-1000, ext. 2865

Miss Ruth U. Baker, *Chief, Visual Aids Branch* (AFIP Film Library)
Phone: RAndolph 3-1000, ext. 2864

ACTIVITIES: This Institute makes or supervises films for the Armed Forces on all medical subjects.

FACILITIES: In-house capability, and contracts for films through the Army Signal Corps.

DISTRIBUTION: AFIP operates a U. S. Army Signal Corps film exchange for medical films. The institute procures and loans films for the Armed Forces wherever and whenever they are needed. Unclassified films are available to anyone, with borrower paying postage both ways. For information about available films, write the Government Printing Office, Washington 25, D. C., and refer to *The Film Reference Guide—Medical and Allied Subjects.*

Office of Armed Forces—

Information and Education

Paul J. Murdock, *Chief, Motion Picture Branch*
Phone: OXford 7-2967

Dallas Halverstadt, *Assistant Chief*
Phone: OXford 7-2967

• This office produces and distributes films for the use of the Armed Forces. Films are distributed through the film exchanges of each service, through on-base theaters, and sometimes to TV network in 31 overseas locations.

DEPARTMENT OF THE AIR FORCE

The Pentagon, Washington 25, D. C.

• The U. S. Air Force produces for itself or contracts with commercial producers for approximately 500-700 films of all types each year for internal and external purposes.

ACTIVITIES:

• **Training Films:** The Office of the Chief of the Training Film Section in Headquarters USAF validates, funds for, and directs the production of all Air Force Training films. Ninety percent of this total effort is contracted out to industry. All contracts are negotiated by the Air Materiel Command, Wright-Patterson Air Force Base, specifically in the Aeronautical Systems Center. All Contracts are monitored by the Air Photographic & Charting Service, Orlando, Fla.

This same office in the Pentagon is responsible for a brand new program, designated the Weapons/Support system Training Film Program, which has been established so that training films on new weapons systems will reach the field at the same time as the weapon system itself. The ultimate goal for this program will be 100 productions per year. In most cases, the Air Materiel Command will negotiate with the motion picture industry for these films, and the prime contractors on the job will oversee the technical and engineering aspects of the films.

Further information may be obtained from:

Major John G. Rogers, *Chief, Training Film Section*, AFPTR-D-2, Headquarters USAF, The Pentagon, Washington 25, D. C.
Phone: OXford 5-5569

Robert Ashenfelter, *Contracting Officer*, Aeronautical Systems Center, Air Materiel Command, Wright-Patterson Air Force Base

DEPARTMENT OF THE AIR FORCE:

• **Services & Support Division:** This division is responsible for the Air Force Sponsored Film Program, Special Film Projects and Production-Laboratory Services.

Sponsored Films: Over $850,000 worth of educational and informational films are in production or distribution in the Air Force's Sponsored Film Program. These films, which cover a wide variety of subjects of interest to the Air Force and to the public, are privately financed by industry and are distributed through the Air Force's Central Film Exchange in St. Louis, Mo. Present subjects under consideration by industry include "basic research"; the Air Force "grass roots" farm program; "plastics in the missile and space program"; "telemetering"; "nuclear propulsion" and others. This program is administered by the Chief, Motion Picture Section.

* * *

Special Film Projects: include general information and indoctrination films for the Air Force, and in some cases, the public.

Production-Laboratory Service Contracts: supplement the Air Force's in-service capability and provide for a combination of services from the motion picture industry.

The following officers are in charge of these programs:

Rodney B. Radford, *Chief, Motion Picture Section*, AFOOP, Headquarters USAF, The Pentagon, Washington 25, D. C.

James Etheridge, *Action Officer*, Motion Picture Section, AFOOP, Headquarters USAF, The Pentagon, Washington 25, D. C.

Major E. A. Michalski, *Action Officer*, Motion Picture Section, AFOOP, Headquarters USAF, The Pentagon, Washington 25, D. C.

• **Office of Information Services:** This office releases Air Force newsfilms and still pictures:

Major William J. Lookadoo, *Chief, Pictorial Branch*, SAFOI, Headquarters USAF, The Pentagon, Washington 25, D. C.
Phone: OXford 5-5853

Major Stockton B. Shaw, *Deputy Chief, Still and Reel Pictures*, SAFOI, Headquarters USAF, The Pentagon, Washington 25, D. C.
Phone: OXford 7-5630

FACILITIES: The Air Photographic & Charting Service, Orlando, Florida, provides complete in-service capability for making Air Force films. "Qualifying questionnaires" for producers interested in bidding on AF contract productions may be obtained from the office of:

Brigadier General Clifford H. Rees, *The Commander*, Air Photographic & Charting Service, Orlando, Florida

Colonel James Warndorf, *Deputy Chief of Staff, Photography*, Air Photographic & Charting Service, Orlando, Florida

DISTRIBUTION: Air Force films are distributed through the Air Force Central Film Exchange in St. Louis which serves, in turn, 140 base film libraries all over the world. This film exchange has recorded 1,900,000 showings to an audience of 19,000,000 in one year, exclusive of TV programming.

FEDERAL AUDIO-VISUAL PROGRAMS

DEPARTMENT OF THE ARMY

Office of the Chief Signal Officer

Army Pictorial Division

The Pentagon, Washington 25, D. C.

• The Chief Signal Officer of the Army is responsible by regulation for policy matters on the procurement, production and distribution of *all* motion pictures for the Army. As a result, all film programs are handled by the Army Pictorial Division of the Office of the Chief Signal Officer. Information on *any* subject pertaining to these programs may be obtained in this office from the Chief of the Motion Picture Branch or the Chief of the Distribution and Utilization Branch.

Col. A. A. McCrary, *Chief, Army Pictorial Division*
Phone: OXford 7-3520

Lt. Col. Bevelle T. Brown, *Chief, Motion Picture Branch*
Phone: OXford 7-4455

James A. Moses, *Chief, Film Distribution & Utilization Branch*
Phone: OXford 7-2039

ACTIVITIES: The Army Pictorial Division produces more than 300 films of all types each year, including the TV series *The Big Picture*, and some films for the Office of Armed Forces Information and Education.

FACILITIES: The Army has complete production facilities at the Army Pictorial Center, Long Island City, New York, and contracts for many various services with commercial producers, writers and laboratories.

DISTRIBUTION: All official motion pictures, film strips, transparencies and related audio-visual aids are distributed throughout the Army by the U. S. Army Film Distribution & Utilization System. This system includes the Film Distribution & Utilization Branch, Army Pictorial Division, OCSigO; the Distribution Branch of Army Pictorial Center, and the 256 Film & Equipment Exchanges located at Army headquarters, major service schools and training installations throughout the ZI (Zone of Interior) Armies and Overseas Commands.

DEPARTMENT OF THE NAVY

Washington 25, D. C.

• The U. S. Department of the Navy produces motion pictures for such purposes as training, maintaining fleet readiness, explaining new weapons and devices, and for medical, historical, indoctrination, safety and recruiting uses, to name a few key subject areas.

ACTIVITIES:

• *Information and General Policy Procedures* on all aspects of the Navy film program, including application information for commercial producers interested in bidding on Navy contract films, are handled by the Chief of the Bureau of Naval Weapons, Navy Department, Washington 25, D. C.

Captain E. L. Kiem, USN—Code FF, *Director, Photographic Management Division*
Phone: LUdlow 4-5400, ext. 381-2

T. G. Cassidy, Code FFPH-5, *Head, Training Film & Motion Picture Branch*, Photographic Management Division
Phone: LUdlow 4-5400, ext. 389-391

• *Procurement policies and procedures*, which involve information on technical questions regarding bids, are handled by the Officer in Charge, Navy Purchasing Office, Washington 25, D. C.

Captain A. C. Appelby, USN, *Officer in Charge*
Phone: OXford 6-5141

LCDR E. H. Clark, USN, *Director, Purchase Division*
Phone: OXford 6-6479

FACILITIES: The U. S. Naval Photographic Center, a field activity of the Bureau of Naval Weapons, is the central photographic laboratory for the Navy Department and the Navy's largest photographic activity. The Center, composed of over 530 military and civilian personnel, provides photographic assistance and specialized services to the entire Naval Establishment, supervises the production of Navy training films and maintains the Navy's motion picture and still photographic film libraries.

The motion picture production facilities at the Center are modern and complete. There is a sound stage, film and tape recording and mixing equipment, an art and animation group and editorial branch. Here experienced script writers and artists collaborate with Navy photographers and technicians, maintaining a high standard of quality for Navy productions. The processing division has the capability to develop and print negative film and release prints in 35mm and 16mm black-and-white and negative-positive color. About 75 percent of all Navy films, however, are contracted with established commercial producers.

In addition, there is a growing requirement for films to report on the Navy's research and development activity, and to meet this need rapidly, a TV closed circuit kinescope facility has been activated at NPC during the past year.

Extensive libraries of both still and motion picture photography are maintained at the Center. Library services are provided to the Naval Establishment and other government agencies and to commercial concerns on a cash sale basis. The Still Picture Department produces all types of still photography such as press, serials, murals, and official portraits. Up-to-date continuous roll paper printing and processing units meet the Navy's large volume print demands. There are also complete negative, positive and transparency color processing facilities.

A research and development group conducts tests, experimentations, development and evaluation of photographic equipment. Here, technical photographic specifications, instructions and other publications are also prepared. Information about NPC may be obtained from: the Commanding Officer, Naval Photographic Center, Naval Air Station, Washington 25, D. C.

Captain Noel R. Bacon, USN, *Commanding Officer*
Phone: LUdlow 4-2400, ext. 224-5

LCDR C. W. Richey, USN, *Head, Motion Picture Department*
Phone: LUdlow 4-2400, ext. 355

J. Walter Evans, *Assistant Head, Motion Picture Department*
Phone: LUdlow 4-2400, ext. 282

DISTRIBUTION: Prints of Navy films available to the public can be purchased from United World Films, Inc., 1445 Park Avenue, New York 19, N. Y., under an annual contract administered by the U. S. Office of Education. Navy films may be borrowed from the nearest Navy film supply

(LISTING CONTINUES ON FOLLOWING PAGE

"Always the Low Bidder"

FEDERAL AUDIO-VISUAL PROGRAMS:

UNITED STATES ATOMIC ENERGY COMMISSION

Office of Public Information
Audio-Visual Branch

Washington 25, D. C.

• The Audio-Visual Branch of the Atomic Energy Commission has as its primary function responding to requests from the public media in all the audio-visual fields for assistance in the preparation of films, stills, and other audio-visual materials on atomic energy.

Edwin L. Wilber, *Branch Chief*
Phone: HAzelwood 7-7831, ext. 5365

Elton P. Lord, *Deputy Chief*
Phone: HAzelwood 7-7831, ext. 5476

ACTIVITIES: This branch plans and carries out audio-visual and still picture projects to advance specific Commission programs, and acts as advisor to Commission and contractor personnel in Washington and nationwide on audio-visual problems and projects. This branch also places Commission- and contractor-produced motion pictures into loan and commercial sale channels, determines the content of the 10 domestic and 4 overseas film libraries, and issues popular-level and professional-level film lists.

FACILITIES: AEC has no motion picture production facility or motion picture laboratory, but uses Government and/or commercial services.

DISTRIBUTION: AEC operates an 8,000 still photo library, and distributes films through 10 domestic film libraries which cover particular geographical areas. All films are for free-loan. The Commission also has four overseas libraries at its offices at the U. S. Embassies at London, Brussels, Tokyo and Buenos Aires, stocked with semi-technical and technical films. The Brussels and Buenos Aires libraries have about 50 films each in French and Spanish respectively. Information on libraries available from Washington office.

STOCK FOOTAGE: The Commission has more than 120,000 feet of 35mm black-and-white unedited film footage on peacetime uses of atomic energy available for purchase. Information may be obtained from Washington office. Color stock footage is also available from any of the completed documentary films produced by or sponsored by the government. Films may be borrowed from libraries in geographical areas. Unedited stock film footage in black-and-white and color on nuclear or thermonuclear detonations is sold at Lookout Mountain Air Force Station, USAF, 8935 Wonderland Avenue, Hollywood 46, California.

PRODUCTIONS: During 1960, this headquarters produced a film on the Nuclear Ship Savannah with the Maritime Administration, titled *Underway;* also *Industrial Applications of Radioisotopes; Group Shelter; Technical Information Services of the AEC.*

GENERAL SERVICES ADMINISTRATION

Federal Supply Service, Washington 25, D. C.

Mrs. Marjorie Britt, *Assistant Chief,* Office and Photographic Equipment Section
Phone: WOrth 3-5772

• This office makes Federal Supply Schedule contracts for photographic supplies for all of the government agencies.

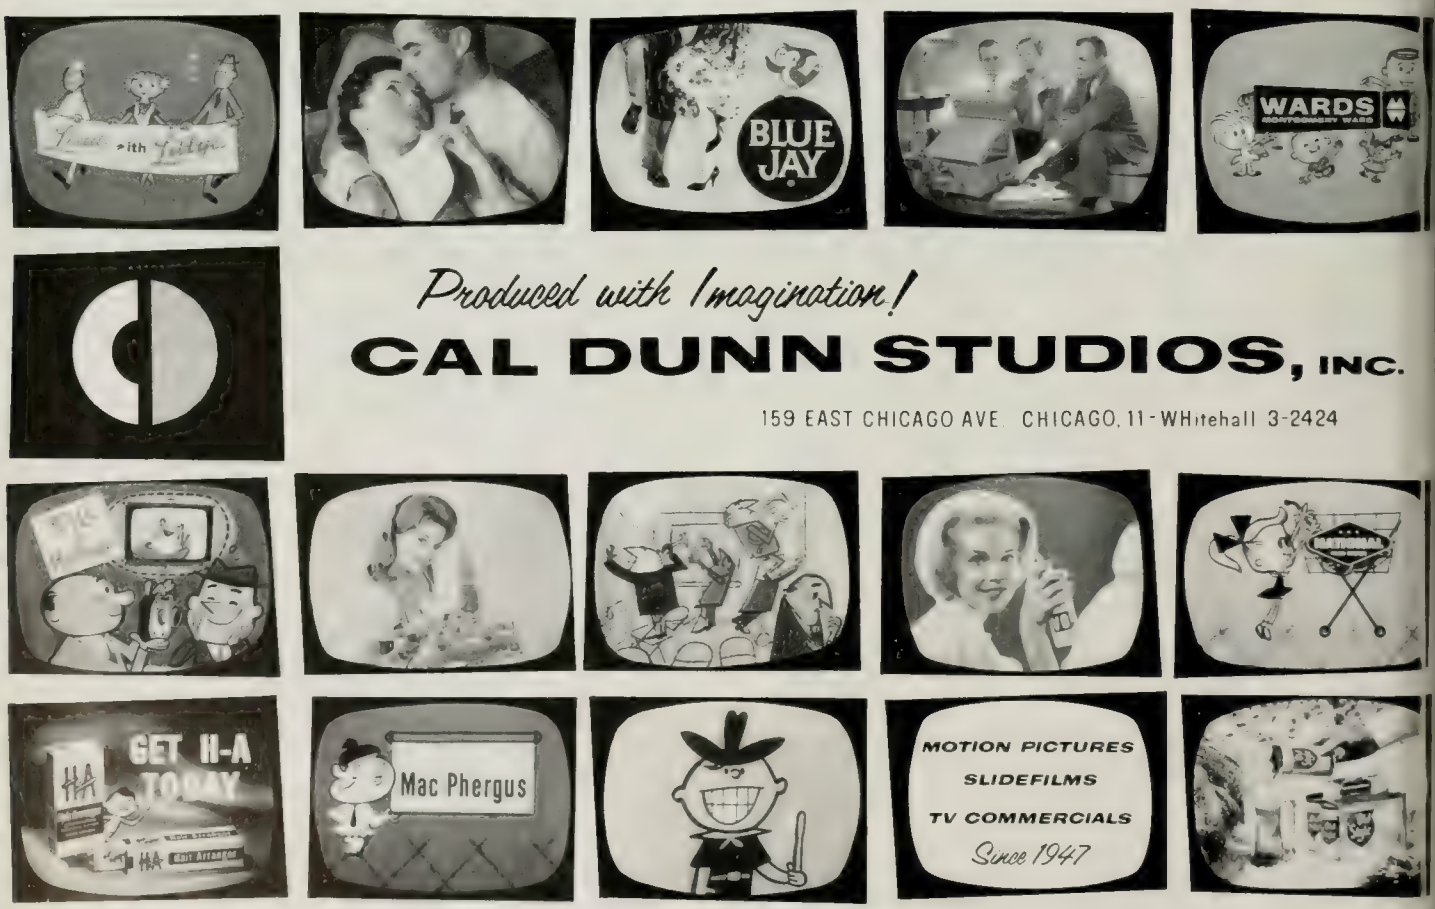
ADVERTISING FILM AWARDS

(CONTINUED FROM PAGE TWENTY-SIX

d'Or" awarded to the producer with the highest average marks in either or both groups, for a minimum entry of six films.

JURY: An International Jury will be selected to judge motion pictures entered. Members of the various international and national advertising associations and federations will compose this judging group.

INT'L SCREEN ASSOCIATION



(CONTINUED FROM PAGE THIRTY

geria); Levant Screen Services (Lebanon Egypt & Jordan).

PURPOSE: To develop members' business in foreign countries and in their own countries and to exchange information, ideas, film scripts, publications and all other matters of interest to members. To represent and promote interest and advancement of members both in their own countries and abroad.

MEETINGS: Executive Committee meeting held quarterly. 1961 Annual General Meeting in September, date not set.

1961 ACTIVITIES: The 8th International Advertising Film Festival, June 12-16, Cannes France. (Joint sponsor with International Screen Advertising Services.) Contact: Mr Peter Taylor, International Advertising Film Festival, Head Office, Excel House, Whitcomb Street, London, W. C. 2, England.

From "Your Share in Tomorrow" produced for The New York Stock Exchange

What makes a movie MOVE . . .

move your products, move your ideas?

We believe the answer is *people.*

PEOPLE

with original concepts...
and the ability to present them dramatically.

PEOPLE

with creative talents...
and the skill to employ them in the medium of film.

PEOPLE

with pride of craft...
and the awareness that every project
is a lasting yardstick of their talents.

dustry Film Producers in tional Convention, June 2-3

The second National Convention of the Industry Film Producers Association, originally set for March 31-April 1 at the Miramar Hotel in Santa Monica, Calif., has been rescheduled for June 2-3 at the same location.

The dates were changed in order to avoid conflict with Easter observances and to grant some Trade Show participants additional time to prepare exhibits.

The professional use of 8mm equipment will be one of the innovations introduced to the film industry at this year's Trade Show. A "Production Clinic" will feature a staff of experts to discuss specific problems of film production with convention delegates.

Speakers at the two-day event will include leaders in government and industry, covering a wide range of topics applicable to the industry film field. Session topics already scheduled for the program are: *Low Budget Animation; Dubbing for Foreign Distribution; The Role of Motion Pictures in Nuclear Weapons Testing,* and *Techniques of Music and Sound Effects.*

Information on the IFPA convention may be obtained by writing Convention Headquarters, c/o the Paul Garrison Organization, 10323-F Santa Monica Blvd., Los Angeles 25, California.

Al Carrello, *Chief of Production*
Phone: DUdley 8-3628

Sid Schwartz, *Chief of Planning & Research*
Phone: DUdley 8-2073

Arthur Foster, *Chief of Laboratory*
Phone: DUdley 8-6747

James E. Alford, *Chief of Distribution*
Phone: DUdley 8-5246

Mrs. Anne Ware, *Stock Footage Librarian*
Phone: DUdley 8-3628

ACTIVITIES: The USDA currently has 300 films in distribution with an estimated audience of 165 million persons. These films cover such subjects as conservation, forestry, agricultural research, insect eradication, nutrition and marketing. In addition, the Department is prepared to cooperate with qualified non-government organizations in the production and distribution of agricultural educational motion pictures and TV films which are related to agricultural programs, if the non-government cooperator is a non-profit organization or association concerned with the dissemination of agricultural information or the production or handling of one or more agricultural products.

FACILITIES: The USDA Motion Picture Service has complete in-service production and laboratory facilities which have been in continuous operation since 1907.

DISTRIBUTION: Films for school and group showings are distributed through cooperative film libraries in each state. Films for TV bookings are distributed directly from Washington, and prints of all films may be purchased from United World Films of New York. Catalogues are available of motion pictures, films suitable for TV showing, and of stockfootage, which is for sale at a nominal cost.

PRODUCTIONS: 1960 productions include: *Breakthrough*, a career film in farm research; *The REA Story*, the history of the Rural Electrification Administration; *Roundup*, the story of the eradication of the screw worm; *Miracles from Agriculture*, a marketing research film; *Opportunities Unlimited*, a film about improving living conditions in certain rural areas; *The Forest*, about the multiple uses of national forest lands; *Wanted: Plant Pest Detectives*, about reporting unusual insects and pests; *Fallout and Agriculture*, a presentation of the problems of radioactive fallout as it affects the farmer; and others.

DEPARTMENT OF COMMERCE

Washington 25, D. C.

• The U. S. Department of Commerce produces and circulates motion pictures dealing with those domestic and foreign subjects relating to the offices which are under the jurisdiction of this Department.

Business & Defense Services Administration

Nathan D. Golden, *Director, Scientific, Motion Picture & Photographic Products Division*
Phone: WOrth 7-4378

Geo. R. Donnelly, *Chief, Motion Picture & Photographic Products Branch*
Phone: WOrth 7-2778

Earl Young, *Motion Picture Analyst, Motion Picture & Photographic Products Branch*
Phone: WOrth 7-2911

• The Motion Picture and Photographic Products Branch was established to serve the motion picture and the photographic and motion picture apparatus, equipment and supplies industries. It performs many functions, some of the more important being to foster, promote, and develop the foreign and domestic trade of these industries. It provides market development counsel to producers and exporters as to where and how to cultivate and expand their overseas sales, acquire distributors, facilitate the acquisition of frozen remittances, and render assistance in other problem areas. It also participates in tariff and trade negotiations, and maintains constant surveillance of foreign trade trends, and periodically issues concise basic information releases for industry guidance. Furthermore, the Branch acts as the focal point for industry with reference to advice and guidance to other agencies and use of other agency facilities.

Coast & Geodetic Survey

G. P. Meredith, *Chief, Technical Service Div.*
Phone: STerling 3-9200, ext. 749

• This division has produced, in the past nine years, four documentaries on the following subjects: general activities of the Coast & Geodetic Survey; tides; geodesy, and surveyors at work. Certain aspects of these productions were contracted to industry. In addition, the Coast & Geodetic Survey recently collaborated on the National Academy of Science's *Planet Earth* series. Film information is available through the Technical Service Division.

National Bureau of Standards

William R. Tilly, Office of Technical Information, Connecticut & Van Ness Avenues, N. W., Washington, D. C.
Phone: EMerson 2-4040, ext. 7093

• This Bureau produces scientific and technical motion pictures about the research programs of the National Bureau of Standards. Films are available from the Photographic Services Laboratory at the above address, and information is available from the Office of Technical Information.

Bureau of Public Roads

Ray B. Dame, *Chief, Motion Picture Branch*
Phone: EXecutive 3-4957, ext. 736

ACTIVITIES: This Bureau produces films on subjects pertinent to highway development and improvement, safety, and other related subjec for government agencies, state and local highwa departments, engineering colleges and unive sities, and other interested organizations. Film are often produced in cooperation with the organizations and schools.

A MESSAGE OF IMPORTANCE TO ALL BUSINESS FILM EXECUTIVES

This new film "How We Elect a President" is the most exciting new documentary explaining in full detail, in sound and color, the important steps in this process. ■ A print of this film with an appropriate credit closing for your company would make an excellent public relations gesture when gifted to the schools, the civic groups, political groups and other vital organizations in your community. ■ And because it is so current a topic, it is of greater moment now while it is news.

HOW WE ELECT OUR PRESIDENTS

A new timely film documentary on the most important political event in United States History ■ Current as November's election headlines . . . yet never out-of-date. Re-born again every four years . . . and as American as apple pie . . . ■ A new valuable 16mm sound film study of the democratic processes that appoint one man out of over 160,000,000 to be President of the United States for a four-year term. ■ Starting with the national convention . . . the platforms and nominations and roll call on the convention floor . . . from the first gavel-crack to the last hurrah . . . everything is presented in clear, concise, exciting ways that will enthuse every American from a first grade student to a college professor . . . from a baker to a banker! The issues, the highlights that go into the manner of selecting delegates, voting information, the "big" states to watch, election day tally, the electoral college . . . all of the campaign electricity . . . brought into focus by the first film of its kind to be offered covering this most important quadrennial event. ■ This film is going to be a "top seller" now . . . and for all times. Every school, every civic group, every veteran's organization, every political group are your prospects . . . every American, your audience. ■ Order your copy of this new release . . . today! Available in color, **$125** . . . black & white, **$50** each.

FEDERAL AUDIO-VISUAL PROGRAMS:

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

Office of Vocational Rehabilitation

W. Oliver Kincannon, *Chief, Publications and Reports Service*
Phone: WOrth 2-2040

• This office produces TV spots on vocational rehabilitation for state agencies which then distribute them through local TV. At the present time, through contract, the office is planning a major film on this subject.

DEPARTMENT OF INTERIOR

Washington 25, D. C.

• The Department of Interior produces films which are concerned with the management, conservation and development of natural resources in every section of the Nation. Films are available from the bureau in which they have been produced.

Office of the Secretary

Harlan Wood, Division of Information
Phone: REpublic 7-1820, ext. 3171

Inquiries concerning the use of Department of Interior films for television should be addressed to this office.

The Bureau of Mines

A. Nicholas Vardac, *Motion Picture Representative*, Bureau of Mines, Washington 25, D. C.
Phone: REpublic 7-1820, ext. 3359

Meyer Reinews, *Chief, Bureau of Mines Distribution*, 4800 Forbes Ave., Pittsburgh, Pa.

ACTIVITIES: The Bureau of Mines has a broad film program dating from about 1920. Motion picture subjects deal with natural resources of states and areas and with mineral commodities including metals, non metals, coal and petroleum.

FACILITIES: All films are made in cooperation with private industrial firms which pay production costs and select commercial film producers. The Bureau maintains no production facilities of its own.

DISTRIBUTION: About 6,000 prints of films are distributed to the public on a free loan basis from the principal film center of the Bureau of Mines, 4800 Forbes Ave., Pittsburgh, Pa., and from depositories in 40 states. Annual number of bookings is 225,000. Most films are cleared for free TV use. Single or block bookings arranged. Catalogues available.

PRODUCTIONS: Films in current production include: *The Magic of Sulphur; The Story of Copper;* and *About Phosphate.*

The Bureau of Reclamation

Ottis Peterson, *Assistant to the Commissioner, Information*
Phone: REpublic 7-1820, ext. 4662

ACTIVITIES: The Bureau of Reclamation produces one or two pictures a year on water resource development in the seventeen western states. These films are usually "low budget," sound-color films which run 28 minutes for TV use. Film catalogs are available from regional offices and from Washington D. C. office.

FACILITIES: Most of the film work for the Bureau of Reclamation is contracted by the appropriate regional office to commercial producers. There are seven regional offices, supervised by the Washington office.

DISTRIBUTION: Each of the seven regions, and the Washington office, has its own distribution channels. On occasion, prints are loaned to educational institutions for short periods of time.

PRODUCTIONS: Recent productions include: *Key to the Future*, a film about the Colorado river storage project in Utah, Wyoming, Colorado and New Mexico; *Canyon Conquest*, the story of the construction of the Glen Canyon Dam (an up-to-date version to be issued every two years), and a new film on the Central Valley Water Project in California.

The Bureau of Land Management

Dwight Rettie, *Information Officer*
Phone: REpublic 7-1820, ext. 3609

The Department of Interior and the Department of Agriculture cooperated on the following two films which are available for loan and for TV purposes and are distributed through the Washington office. *Our Public Lands* is a 28-minute color film on conservation and development programs, and *Alaska, Land to Grow On*, is a 28-minute color film on public land and resource programs in Alaska.

The Geological Survey

J. O. Kilmartin, *Chief*, Map Information Office
Phone: REpublic 7-1820, ext. 2446

This department has a small collection of training films of a technical nature on topographical survey subjects. The films were produced in

It is with great regret

and a sense of deep personal loss

that we announce the passing of our esteemed

and beloved Vice President and friend,

HERMAN ROESSLE on February 24, 1961.

Audio Productions, Inc.
New York, N. Y.

YOU DON'T HAVE TO FLOAT A LOAN...

to have a film made!

It's possible to make the kind of film you need on a budget you can afford. We, at Coleman Productions, have been doing it for years, since 1935 to be exact.

The secret? It's no mystery . . . we've simply perfected the knack of extracting every ounce of value out of every cent of our clients' money (we spend it as if it were our own). We know how to cut away the excess fat from each step of movie production . . . how to economize on everything – except *quality*. Proof? Our films have won awards in competition with the most expensive productions.

Good taste and sound merchandising are intangibles, but their effect on a film is concrete. We have an uncanny instinct for infusing our films with creative writing, inspired direction, dynamic editing and superb music scoring. When the finished product is projected on the screen, we always feel a glow of pride and our client always feels a glow of satisfaction with a film that is both artistic and, what's more important, *tells our client's story with the greatest effectiveness.*

Our clients range from modest firms taking their "first plunge" with a simple five minute film, to industrial giants like Pan American World Airways and Olin Mathieson for whom we've produced, respectively, location films from Norway to Tierra del Fuego, and an epic of one of the world's largest aluminum plants (the latter took over two years).

Why not take a few moments off and see for yourself. No obligation, of course. No bother to us . . . we enjoy showing our films. Write or phone.

COLEMAN PRODUCTIONS

SOME OF OUR RECENT AWARDS

THE CHRIS AWARD 1959—1960
THE BLUE RIBBON AWARD 1960

Business Films at the American Festival

500 Motion Pictures and Slidefilms Vie for Blue Ribbon Honors at American Film Festival, April 19-22 in N. Y.

FROM *Resuscitation of the Newborn* (Smith, Kline & French Laboratories) to *Memory is for the Living* (Rock of Ages Corporation), business and industrial organizations are represented as sponsors, owners, or producers of nearly half of the more than five hundred 16mm motion pictures and 35mm slidefilms entered in the 34 Blue Ribbon Award competitions of the 1961 American Film Festival.

The Festival is sponsored again this year by the Educational Film Library Association and scheduled for April 19-22 at the Barbizon-Plaza Hotel in New York City.

More Public Service Entries

The EFLA Festival Committee, headed by the association's President Frederic A. Krahn, notes a marked increase of sponsored public-service films among this year's Festival entries, with productions submitted ranging from classroom films to those designed for the general audiences of television.

"So many sponsored films were entered for the 'Health, Safety and First Aid' category competition, for instance, that it has been necessary to create two separate Blue Ribbon categories—'Health for Non-Medical Audiences' and 'Safety and First Aid' "—reports Mr. Krahn.

As in previous years, "Business and Industry" is one of the five major headings under which the 34 Festival competition categories are grouped, with a wide variety of sponsored films submitted in such categories as "Industrial and Technical Processes," "Institutional Public Relations—Commercial Organizations," "Personnel Training and Relations," "Sales and Promotion" and "Sales and Technical Training."

Review Films in February

Many sponsored films are also entered throughout the range of other competitions for the Blue Ribbon Awards which are grouped under "Education and Information," "Art and Culture," "Religion and Ethics" and "Health and Medicine."

All motion pictures and slidefilms submitted for the Festival were reviewed during February by Pre-Screening Committees which include representatives of business and industrial organizations and trade associations as well as technical specialists and professional A-V people. Working under the supervision of EFLA, this year's Pre-Screening Committees met in more than a dozen cities across the country.

From the hundreds of entries screened, the Committees nominate approximately 250 motion pictures and slidefilms for the final competitions of the Festival, where juries of A-V experts will vote the coveted Blue Ribbon Awards.

Make-Up of Festival Juries

Like the Pre-Screening Committee, each Festival Jury comprises at least two persons from the fields of audio-visual production, distribution, or administration; two who are specialists in the subject area of the particular competition category; and two who are experienced in using films with the audiences for whom entries in that category are intended.

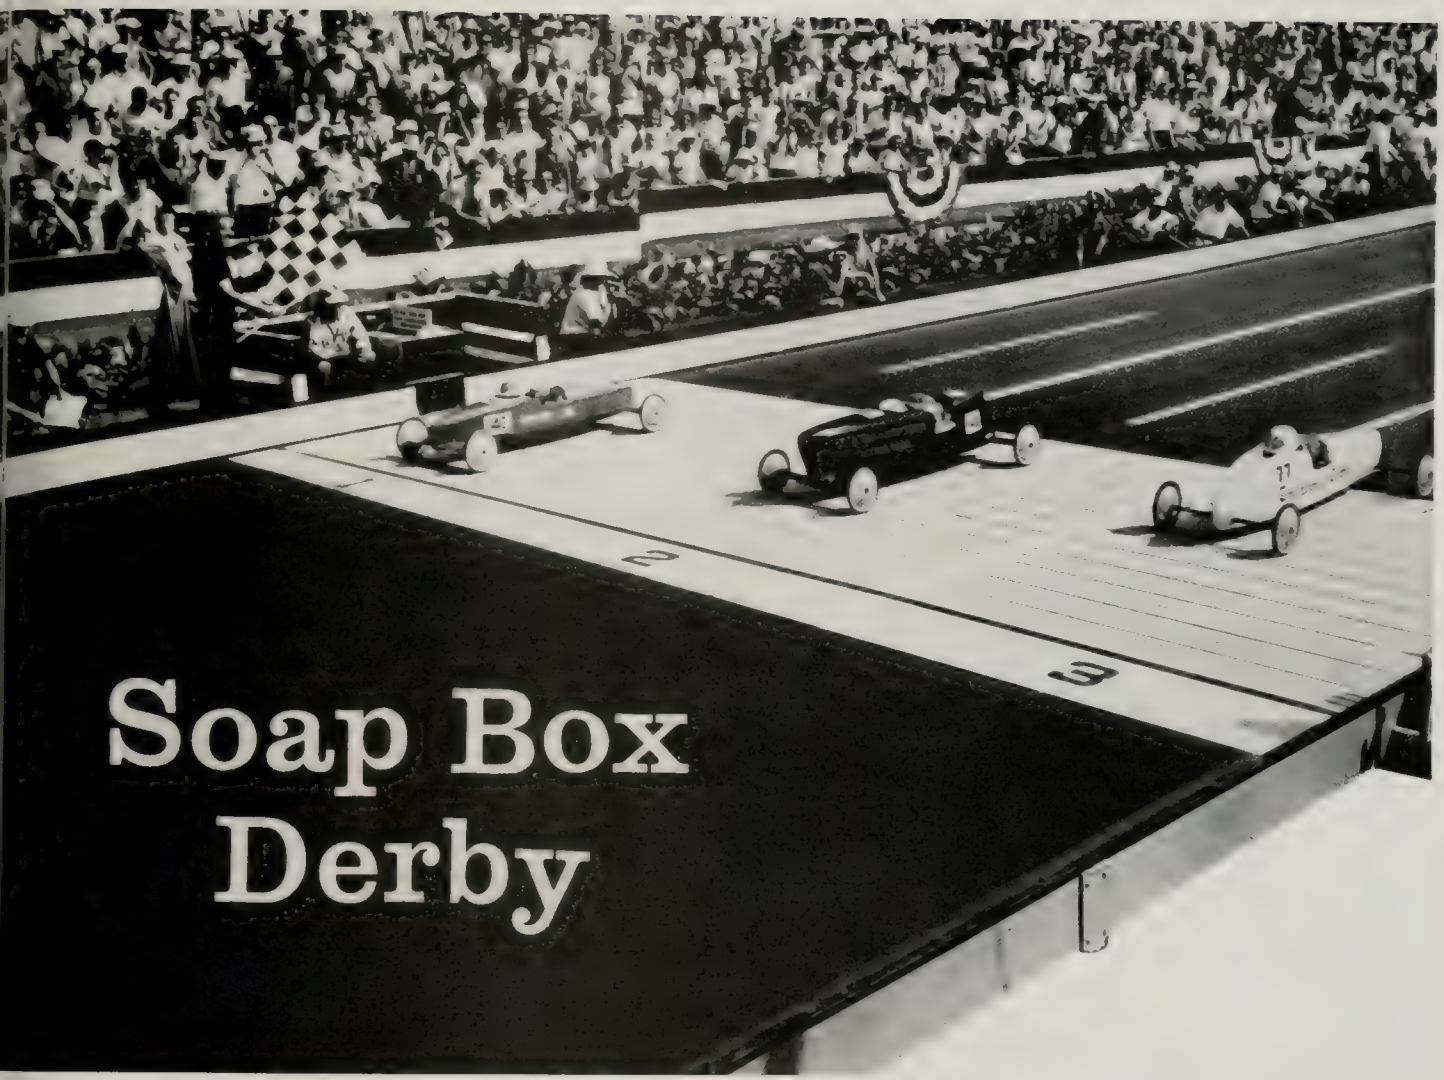
According to Miss Emily S. Jones, Administrative Director of EFLA, application forms for Festival Jury assignments are being sent out to all the A-V experts who have served at previous Festivals. Other qualified persons may apply for assignments through EFLA, 250 West 57th Street, New York 19, N. Y.

It is anticipated that business and industrial film sponsors will again be featured prominently on the list of Blue Ribbon winners, as they were last year when awards went to the Tobin Packing Co.'s *The First Prize Story* (winner in the Industrial and Technical Processes category); the J. I. Case Co.'s *On The Go* (Sales and Promotion—Direc Sales); Pan American World Air way's *Wings to Italy* (Sales an Promotion—Service and Informa tion); U. S. Steel's *Rhapsody o Steel* (Public Relations—Com mercial Organizations); Johnso & Johnson's *Hospital Sepsi* (Medical Sciences for Profes sional Audiences), and such slidefilms as Bell Telephone's *Th Formation of Ferromagnetic Do mains* (Science—High School College, Advanced).

These Companies Represented

Typical of major industrie represented among Festival con tenders this year is Oil, with a list of entries from such com panies as American, B. P. (North America), Cities Service, Esso Maruzen, Phillips, Richfield Shell, and Standard Oil of Cali fornia.

The widely diversified host o notable business and industrial or ganizations with entries include A. B. Dick, Aetna, Alcoa, Ali talia, Allis-Chalmers, American Airlines, American Bakeries American Cyanamid, AMF AT&T, Armour, Armstrong Cork, Baltimore Sunpapers, Bel Telephone, Bethlehem Steel, B. F Goodrich, Boeing, Bulova, Car nation, Chevrolet, Clairol, Con vair, Comptometer, Dr. Pepper Dun and Bradstreet, Dunlop E. R. Squibb, Ford, the French Lines, General Dynamics, G. E. General Foods, G.M., IBM, In ternational Harvester, Jantzen J. I. Case, Johnson & Johnson Lockheed, Lufthansa and May tag.



Other Festival Participants

Other representatives of indus try and business are Martin Metropolitan Life, Merck Sharp & Dohme, Montgomery Ward NATION'S BUSINESS, New York Central, New York Life, Paillard Panagra, Pan American World Airways, Pendleton Mills, Pepsi Cola International, Raybestos RCA, Reynolds, R. R. Donnelly R. T. French, TIME, INC. Thompson Ramo Wooldridge U. S. Steel, Volkswagen, Western Electric, Westinghouse, and White Stag.

Especially significant in 1961 is the number of trade and professional associations represented by entries in the Festival competitions. Among such co-operative sponsors of films submitted are the Air Transport Association of America, the Allied Masonry Council, American Academy of Chefs, American Association of

In the United States, the USIA films are available for educational use through purchase from United World Films, 1445 Park Ave., New York 29, New York. USIA does not distribute films or maintain a film lending library in the United States.

INTERNATIONAL COOPERATION ADMINISTRATION

Communications Media Office

Washington 25, D. C.

Gerald F. Winfield, *Chief*
Phone: STerling 3-6400, ext. 7143

V. M. Commeree, *Motion Pictures*
Phone: STerling 3-6400, ext. 7303

ACTIVITIES: This organization is composed of a group of specialists whose prime duties are to provide professional technical advice and assistance to a large number of functionaries working in conjunction with approximately seventy U. S. Operations Missions in various cooperating countries of the free world. They are responsible for the Communications Media program within I. C. A., including all audio-visual aids for instruction, the development of the media of mass communication, and the training of personnel in the professions and skills of technical information. The responsibility includes planning, development and use of communications media ranging from hand-made indigenous devices through more complex media such as motion pictures, radio and television. Such support extends itself into all technical fields with which I. C. A. programming is involved.

FACILITIES: With respect to film productions, some missions have complete professional staffs and facilities; others vary widely in degrees of completeness. All rely on the Washington staff to a greater or lesser extent for "backstop" guidance and services.

DISTRIBUTION: Except for a limited number of films produced under contract in the United States, motion pictures, film strips and slides are made in cooperating countries and are designed for overseas distribution. Approximately fifty films have been selected for showings to Educational and Civic groups in this country. They are available upon request from Educational Film Libraries in 10 geographic locations. Further information is available from I. C. A. or the Educational Film Library Association, 250 West 57th Street, New York 19, N. Y.

American Festival:

(CONTINUED FROM PAGE 62)

Nurse Anesthetists, American Brush Manufacturers Assn., American Dental Assn., American Hospital Assn., American Institute of Architects, American Medical Assn., American Petroleum Institute, American Podiatry Assn., American Society of Agricultural Engineers, and the American Textbook Publishers Assn.

Other professional and trade organizations represented are the American Title Assn., the Associated Bulb Growers of Holland, the Canned Salmon Institute, the Copper and Brass Research Assn., the Credit Union National Assn., the Farmers Union Grain Terminal Assn., the Federation of Danish Industries and the Danish Agricultural Marketing Board, the Institute of Life Insurance, the National Assn. of Wholesalers, the National Cotton Council, the Manufacturing Chemists Assn., the Rubber Manufacturers Assn., the Southern Furniture Manufacturers Assn., the Vermont Co-Op Council, and the Western Pine Assn.

Expect Large Attendance

Since the American Film Festival affords registrants a unique opportunity to see a large number of top-quality informational films that are of particular interest in both content and technique to men and women in business and industry, high registration at the Festival is expected again this year.

In addition to the screenings scheduled throughout the four days of the Festival, EFLA is programming a number of special panel discussions to be led by nationally known 16mm authorities, as well as informal discussion meetings.

Awards Banquet on April 21

The Festival will be climaxed by the Gala Award Banquet at which the Blue Ribbon Awards will be announced and presented on the evening of Friday, April 21. All of the Blue Ribbon films will be screened again on Saturday, April 22.

Detailed information on all program events and screenings will be announced in advance of the Festival, and advance programs and registration forms will be available soon through EFLA.

Invitations Out for 4th Annual Vancouver Film Festival, July

The fourth annual Vancouver International Film Festival will be held this year July 10-22 in Vancouver, B. C., Canada. The Film Festival is one of the most important events of the Vancouver International Festival, which also features a Military Searchlight Tattoo as well as the Arts Festival.

Stanley H. Fox, chairman of the Film Committee, announced that invitations to submit films are being sent out to film producing organizations around the world. Entries are being invited in a number of categories including feature length films.

Screening committees will select 20 features and 100 documentaries and short subjects for public presentation during the twelve-day Film Festival.

In 1960, the Vancouver International Film Festival drew a total audience of 22,000, repeating its success of the first two years. Hundreds of people were turned away from showings of such films as *Hiroshima Mon Amour* and *The World of Apu*, resulting in numerous theatrical bookings of these and other Festival films by theatrical chains across the country.

For further information on the Film Festival, write to The Vancouver Festival Society, 900 West Georgia St., Vancouver, B. C.

Mr. R. W. Carlisle
Wondsel Carlisle & Dunphy Inc.
1600 Broadway
New York 19, New York

Dear Bob:

Now that "Last Clear Chance" has had wide distribution for several months, I am very happy to advise you this crisp story of the hazards of careless highway driving is being shown in schools, on television and wherever people gather, with very pleasing comments.

We believe the attendant lessons will create a positive deterrent to chance taking when approaching grade crossings, because the picture deals with this aspect of driving in a very realistic manner in keeping with the tempo of drivers today.

Congratulations to you and your organization for a fine picture from Bill Moore and myself.

Yours very truly,

F. B. Lewis

Winner of a National Safety Council award, this safety film represents the kind of product we at Wondsel, Carlisle & Dunphy can produce for you—to guarantee you and your organization an end result that will pay off.

FEDERAL AUDIO-VISUAL PROGRAMS:

DEPARTMENT OF THE TREASURY

Washington 25, D. C.

Internal Revenue Service

Charles M. Lammond, *Public Information Officer*. Phone: WOrth 4-4037

John Burleson, *Audio Visual Training Officer*. Phone: WOrth 4-3465

ACTIVITIES: The Internal Revenue Service prepares, from time to time, motion pictures for either internal or external use. Those prepared for training purposes are produced under the jurisdiction of the IRS Training Division and are used at district and major local offices throughout the United States to instruct new personnel or those being assigned to different tasks in the work they are to undertake. *The Public Information Division* supervises the production of films and television spot announcements intended to acquaint taxpayers throughout the nation with matters of presumed interest to them involved in IRS operations.

FACILITIES: The public information films of IRS are produced professionally, usually utilizing the agency's own office facilities and personnel for background scenes but hiring professional talent for action bits, narration, etc. Laboratory production facilities are contracted to complete the film after the first rough cut. Training films are sometimes produced with IRS personnel and sometimes with professional talent.

DISTRIBUTION: Two public information films are presently available from IRS district offices in either color or black-and-white versions. Each of these films runs 28 minutes and both are available in 16mm only. All clearances and releases have been obtained for general showings.

PRODUCTIONS: Two information films have been produced since 1959: *Since the Beginning of Time*, the use of which is now being curtailed, and *The Inevitable Day*, just released.

United States Coast Guard

Don Farran, *Chief, Motion Picture Section, Public Information Division*
Phone: WOrth 4-5303

ACTIVITIES: The U. S. Coast Guard produces information and training, as well as recruiting films. The majority are in 16mm color-sound with running time of 14 or 28 minutes. For the past three years, CG films have consistently been selected by the United States government for entry in foreign film festivals, and have won a number of awards.

FACILITIES: In-house capability. The CG uses its own facilities, including writing, directing, shooting, and editing to final cut of its productions.

DISTRIBUTION: Distribution of the films is made through the various Coast Guard District offices and from Headquarters to television stations, schools, colleges, various organizations providing information to their members. Usually, the films are cleared for non-theatrical and television use, and no charges are made for use. An annual Film Catalog is issued by Coast Guard Headquarters and separately by each District office.

PRODUCTIONS: Recent subject matter of the films has ranged widely across the world, including LORAN stations on Pacific isles, discovery operations in the Arctic and Antarctic, Search and Rescue, International Ice Patrol, Aids-to-Navigation, Merchant Marine Safety, small boat safety operations including training films on navigation and rules-of-the-road.

U. S. Savings Bonds Division

Jacob Mogelever, *Promotion Manager, U. S. Savings Bonds.*
Phone: EXecutive 3-6400, ext. 4157

• The U. S. Savings Bond Film Program is completely dependent on the volunteer support from the non-theatrical and theatrical film industry and other industries. Over the past 20 years it has received over 1 billion dollars worth of promotional support.

VETERANS ADMINISTRATION

Washington 25, D. C.

Assistant Administrator for Management Services

Mrs. Grace Moore, *Administrative Assistant, Visual Aids Division*
Phone: DUdley 9-2915

Charles H. Glazer, *Chief, Motion Pictures, Visual Aids Division*
Phone: DUdley 9-2724

ACTIVITIES: Veterans Administration film programs are controlled through the Assistant Administrator for Management Services Office which produces and procures educational, training, informational, technical, and medical films for use within the agency on a loan basis and for use by participating hospitals, schools, etc.

FACILITIES: VA films are produced in collaboration with the Department of Agriculture Motion Picture Service. VA has no in-service capability.

DISTRIBUTION: There is a central agency library in the Washington headquarters of the Veterans Administration, which controls and issues copies of all films used by this agency. There is no rental fee.

PRODUCTIONS: The most recent VA film is titled *The Giant Step Forward*, and depicts all the program activities of the VA.

LIBRARY OF CONGRESS

Washington 25, D. C.

Willard Webb, *Chief, Stack & Reader Division*
Phone: STerling 3-0400, ext. 466

James H. Culver, *Head, Motion Picture Section, Stack & Reader Division*
Phone: STerling 3-0400, ext. 721

Joseph W. Rogers, *Chief, Copyright Cataloging Division, Copyright Office*
Phone: STerling 3-0400, ext. 458

Mrs. Katharine W. Clugston, *Audio-Visual Specialist, Descriptive Cataloging Div.*
Phone: STerling 3-0400, ext. 484

Miss Frances L. Menges, *Head, Special Services Section, Card Division*
Phone: STerling 3-0400, ext. 839

• The Library of Congress has an unrivalled collection of American films dating from the infancy of the motion-picture industry, which it has acquired through the operation of the copyright law and through gifts, and it also has a large body of foreign films turned over to it as a result of wartime confiscation. The Library's activities in the motion-picture field include the registration of claims to copyright, the acquisition of films, the cataloging of films and related bibliographic service on the collection.

The Library's Copyright Office has registered

People and Pictures That Made the News

Industry Loses a Leader as Herb Myers Dies in Air Crash

The crash in February of a Sabena jet airliner at Brussels, Belgium, which took the lives of the entire U. S. figure skating team, also caused the death of one of the A-V industry's leaders, H. Herb Myers, who was on a business trip.

Herb, 63, was president of Charles Beseler Company, East Orange, N. J., a position he held for the past seventeen years. He was a long-time supporter of the National Audio-Visual Association, and a contributor of time and talents to NAVA projects. He was also interested in the National Institute For Audio-Visual Selling, and not only taught several courses over a number of years, but served as an active member of the Institute Board of Governors.

Herb is survived by his wife Lee, his son Marty, and his daughter Mrs. Ruth Berman. Memorial contributions may be directed to: Trees For Israel, Jewish National Fund, 42 E. 69th Street, New York, N. Y.

* * *

Lee Benjamin Heads Motion Pictures at H. D. Rose Co.

Lee C. Benjamin has joined the staff of H. D. Rose & Company, Inc., New York, as producer. He will head up the Rose Company's newly established motion picture department.

Benjamin was formerly with J. Walter Thompson Company as producer-writer-director of training, documentary and industrial films.

* * *

Veteran Harry Peterson Dies: With Atlas Over Four Decades

Harry Peterson, veteran technician in the motion picture industry, died February 28 at his home in Oak Park, Illinois.

Mr. Peterson joined Atlas Film Corporation, Oak Park, in 1919 and was employed with the firm continuously since that time. He was a Charter Member of the International Alliance of Theatrical Stage Employees, Local 666.

He is survived by his wife Charlotte, children Richard A. and Patricia Stevens, and seven grandchildren.

During his career, he accomplished many technical achievements, many of which have been adopted by Hollywood. In 1926, for example, Harry Peterson filmed the first interior scenes lighted by incandescent lamps specially manufactured at Nela Park by General Electric Company. These early 2500-watt lamps were made with hand-turned filaments.

As a cameraman he worked on many motion picture productions and industrial films ranging from photography 4000 feet underground to airplane photography. He was cameraman on many "blue chip accounts" such as Sinclair Refining Co., Pure Oil, Inland Steel, Swift & Co., Studebaker, Ford, Allis-Chalmers and Phelps-Dodge.

Harry Peterson continually served the film industry and earned the rightfully deserved title of industry pioneer.

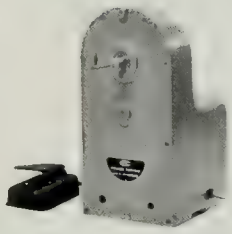
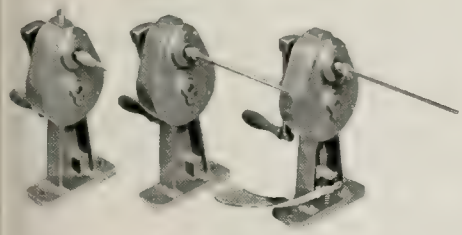
The ~~thinking~~ WORKING man's equipment



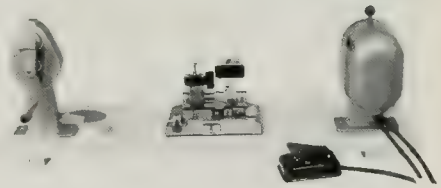
The "Thinking Man" may have his place but let's be realistic, it takes more than thoughts to splice film or synch picture with sound, it takes performance. Performance by professional men working with professional equipment. This is why we have purchased this space, not to run a so called "Special Bargain" as we are not in the bargain business, but to offer professional equipment to professional men. Naturally, when a piece of our equipment is purchased we benefit, but the person buying that equipment is also benefiting because we know that every piece of equipment that goes out of one of our showrooms is the best performing, most professional piece of equipment that money can buy. We know because we not only design, but manufacture all of our own equipment and are aware of exactly what goes into each item and what that item can or cannot do. Here are just a few of the items available from our stock, which we offer for your consideration:

AUTOMATIC SPLICER



HOT SPLICER

POWER REWIND



HAND REWIND

REELS - CANS - FIBRE CASES - SPLIT REELS

INSPECTION UNIT

AUTOMATIC TAPE SPLICERS: AFS-35 (35MM) AFS-16 (16MM) HOT SPLICERS: FSC-1 for 16, 35/32, 35MM; FS-816 for 8 or 16MM film. POWER REWIND: PR-1 is extremely quiet in operation with a V belt drive and a handle to disengage the motor when the operator uses the hand rewind to wind film back. HAND REWINDS: RE for normal winding; REF with a top friction control knob to retard the pull on the film; REL; with an elbow brake used in the inspection of film. REELS, CANS, FIBRE CASES. SPLIT REELS. HFC and Goldberg reels, cans and fibre cases are ruggedly built to offer the best possible protection to your film. For over 40 years Goldberg has been the outstanding manufacturer of reels, cans and fibre cases. The HFC split reels are a fast method of winding film from reels to cores or core to core and can be used for projection reels without the necessity of having the film put on solid reels. HFC INSPECTION & REPAIR UNIT: (IU-16) This unit consists of an HFC 16MM power rewind, an elbow brake rewind and a 16MM hot splicer. The unit is built to offer complete, compact facilities for the inspection and repair of film. All items are mounted on the base and are easily stored when not in use.

Industrial Safety Films to Be Shown in Plants Around World

Three safety films recently made on location in a Chicago manufacturing plant are scheduled to be shown around the world, under the auspices of the National Safety Council, as examples of organization and operation of an effective safety program.

Produced by Cal Dunn Studios, the series was filmed at the Appleton Electric Company factory, 1701 West Wellington Avenue.

Chicago's Appleton Electric *company was site for safety series.*

Titles of the 10-minute, 16mm black-and-white motion pictures are *Safe As You Know How, Not Even One Chance* and *Help Yourself to Safety.*

Helpful "how-to-do-its" and "how-not-to-do-its" are plentiful, and attention and interest are enhanced by cartoon sequences. The films will be shown to company employees during lunch periods and shift changes.

Appleton Electric Company was chosen for this honor because of their continuing safety program since 1956 and the many man-hours of accident-free work over the long period.

The films were made with the guidance of Roy Benson, manager of the Industrial Division of the National Safety Council.

* * *

Colorful, Exciting Stock Car Race on Film From Pure Oil Co.

The full color spectacle of an exciting stock car race has been filmed by the Pure Oil Company and several other major companies, in cooperation with the management of the Darlington Raceway, Darlington, South Carolina, scene of "the biggest stock car race south of the Mason-Dixon line."

Stars and Bars is the title of this 28-minute film, replete with all of the color pageantry and drama that has become a tradition with the Darlington "500" mile stock car race. The 16mm, color

Darlington Raceway scene *in the current Pure Oil film release.*

and sound motion picture is an account of the 11th annual running of the Southern 500 race on Labor Day, 1960.

Included are sequences of hair-raising shots from inside racing cars and outside deadly turns. The camera gives closeup coverage of twelve crashes, a three-death tragedy in backstretch pits, and a racing duel between drivers Fireball Roberts and Buck Baker.

Stars and Bars has been booked for television showings throughout the country, but because of the impact that color gives this story, it is available for free showings to interested groups from the producer, Walter J. Klein

AMF Sponsoring 16mm Prints of Two Top 1960 TV Documentaries

Soon to be released for 16mm non-theatrical distribution are two of the outstanding television documentaries of 1960, sponsored by American Machine & Foundry Company.

The Thinking Machine and *Big City—1980,* produced for television by CBS as "Tomorrow" presentations, are the hour-long films. AMF is also sponsoring the 16mm prints.

The Thinking Machine is a treatise on automatic machines and "electronic brains." The film is "awesome proof that man has something to reckon with in the machines of his creation, specifically those that can play chess (and win) and turn out creditable scripts for TV Westerns."

Big City—1980 is a tour of Brasilia, the all-new, ultra-modern capital of Brazil, which smacks of the cities of the future found in science-fiction.

* * *

Nuclear Age Cooperation for Schools Under Civil Defense

Providing practical guidelines for the development of civil defense programs in schools is a new motion picture released by the Office of Civil Defense Mobilization, *Civil Defense in Schools.*

The 23-minute black-and-white film presents a step-by-step review showing school and civil defense officials working together in planning and activating plans to protect our children now, and to prepare them for adult life in the nuclear age.

Of special interest to school boards, administrators, parents and school connected groups, the film may be borrowed from local State Civil Defense Organizations. Prints may also be purchased directly from Motion Picture Service, U. S. Department of Agriculture, Washington 25, D. C., Attn.: Mrs. Alice Baldwin. The cost of one print is $31.29 including reel, can, case and prepaid shipping.

Second American TV Commercials Festival Jurors Review Entries: Awards Due on May 4th

THE SECOND AMERICAN TV Commercials Festival, scheduled for May 4, 1961, in New York City, has been assured industry-wide support, according to Wallace A. Ross, Festival Director.

Entry deadline was March 1 for all eligible entries—film or videotape commercials shown on U. S. and Canadian television between March 31, 1960 and March 1, 1961.

A total well over last year's 1327 entries is expected to compete for the thirty "Best of Product Category" awards and the ten or more Craftsmanship and Advertising Achievement citations. Twenty-five additional "Commercials Classics" will also be selected to augment those already chosen for the TV Commercials Hall of Fame.

Enlarge Council of Jurors

Judging will again be a function of the TV Commercials Council, composed of eminent advertising executives. In order to reflect the industry-wide interest in this project and to include more geographic representation and a better cross-section of the profession, the Council has been enlarged this year.

Continuing as Chairman of the Council is John P. Cunningham, Chairman of the Board of Cunningham & Walsh, Inc. Other components of the Council are an Agency Advisory Board, an Advertiser Advisory Board and an Executive Board of Judges.

The criteria for selection during the judging will include: impact, believability, tastefulness, demonstration, identification, audience involvement, entertainment values, plus technique. The goal is to select "outstanding ads" rather than artistic achievements.

Wallace A. Ross, *Director, Amer. TV Commercials Festival*

Panels of ten will screen the entries according to the thirty product categories (i.e., automobiles, cigarettes, etc.) and select a TOP 150 for showing at the Festival. Category winners and other selections will be chosen from these 150 at a general Council screening.

Screen Best 150 on May 4

The May 4th Awards Luncheon will be part of an all-day program at the Hotel Roosevelt, featuring morning and afternoon screenings of the TOP 150 and the Commercials Classics.

Following the New York presentation, the festival director plans to stage similar one-day programs in other cities around the country under the sponsorship of the various advertising clubs and other organizations. During the past year, more than fifty advertising clubs as well as the national conventions of the Four A's, the Advertising Federation of America and the Association of National Advertisers featured the Winners and other top commercials from the first American Festival.

Suppliers Aid on Program

Major suppliers such as Eastman Kodak, Minnesota Mining and Manufacturing, DuPont Photo Products and Ampex are providing equipment or exhibiting, and advertisers, agencies and commercial production firms are guaranteeing advance registration.

For further information and attendance details, write The American TV Commercials Festival, 40 East 49th Street, New York 17, N. Y., Attention: Wallace A. Ross, Festival Director.

News Along the Film Production Lines

Niles Producing Formica Film for Promotion, Sales Training

☆ Helping to promote the biggest furniture program in Formica Corporation's history is a 15-minute color slidefilm produced by Fred A. Niles Productions, Inc., which will be provided to top retail dealers in March.

In line with the promotion's aim to support both manufacturers and retail dealers in an expanded acceptance of Formica Plastic Laminates as quality surfacing for furniture, the film offers sales training assistance to retailers.

Art work and simulated home and sales floor scenes show why Formica is used as surfacing on the top-brand furniture lines, how to sell it to the consumer and suggestions for local merchandising. In addition, general sales techniques are pointed out.

Formica's new promotion program is highlighted by a new point-of-sale identification—stick-on labels to create immediate brand recognition at the point of sale. The labels identify the manufacturer as well as the laminate, and contain use and care information.

Coinciding with the distribution of the sales guidance slidefilm in March, Formica will run a series of one-minute spot commercials on NBC-TV's Jack Paar show. Narrated by Hugh Downs, the TV spots will feature individual brands of furniture and will promote consumer acceptance for both the laminate and the lines. Full-page trade magazine advertisements will precede the date of each TV commercial, for the convenience of retailers' local promotions.

E. A. More, Director of Advertising for Formica Corporation, a subsidiary of the American Cyanamid Corporation, has stated that increased identification of Formica laminates with top-brand furniture lines has prompted the full-scale effort to combine the two in tie-in sales features.

Script for the Formica color slidefilm was by John Bancroft of the Niles organization.

U. S. Steel's Agricultural Films Show Efficient Farming Methods

☆ Two new agricultural films, *Fence Building, The Modern Way* and *According to Webster,* have been produced by U. S. Steel as part of its program to help farmers cut costs through efficient farming methods.

Fence Building, The Modern Way concerns the Fury Fencer fence-building machine recently developed by U. S. Steel. A nine-minute color film, it shows the mechanical fence machine in action to make a back-breaking and tedious job easier, faster and less costly for the farmer.

A ten-minute color film, *According to Webster,* portrays fence as a modern farm production tool. Noah Webster, who defined the word "tool" more than a hundred years ago, comes out of the past to show today's farmer how proper fencing can increase efficiency and bring greater profits.

Both films are available for showings without charge through United States Steel Corp., Chicago Film Center, 208 South LaSalle St., Chicago 90, Ill.

Electrical Safety Aboard Ship Filmed for Navy by Depicto Corp.

☆ *115 Volts Deadly Shipmate,* an electrical safety film, was recently accepted by the Navy Department from Depicto Films Corporation, New York.

Photographed in 16mm color aboard the destroyer USS Bristol in Newport, R. I., the film is designed to motivate Naval personnel to handle "115 Volts" with extreme caution. While the Navy is ever alert and employs every available means to protect personnel against electrical hazards, careless handling of electrical gear results in many fatalities every year. Personnel are cautioned to treat "115 Volts" as extremely dangerous and regard it as they would high voltage.

Deadly Shipmate emphasizes that "115 Volts" is so dangerous because it is so familiar to them, they've known and used it all their lives. However, aboard ship they are constantly in contact with metal, thereby providing the grounding necessary for electrocution.

Directed by C. V. Ragsdale, the film depicts the re-enactment of actual case histories of careless incidents resulting in fatal shock. The role of the typical careless sailor is portrayed by Broadway actor Chris Bohn.

Provided with a full musical score to lend dramatic impact, the film is scheduled for release in the near future.

Air Force Safety Picture Wins Atlas National Honors

In last year's 10th Annual Production Review, BUSINESS SCREEN presented an article on the powerful film dramatization of automobile safety and youth, titled *Nightmare for the Bold*, produced for the United States Air Force by Atlas Film Corporation.

Since then, honors have come to the film. In October, 1960, at the National Safety Congress Film Session in Chicago, *Nightmare for the Bold* was awarded the Bronze Plaque for films for safety. The award was accepted by Col. W. L. Tubbs, Assistant for Ground Safety, U. S. Air Force, Washington, D. C.

Throughout the year since its release, the film has become a required subject of all Air Force personnel. Each member of this branch of service is required to see the film twice during the year . . . an honor formerly granted to only the *Articles of War*.

All other services were quick to see its value, and now this Air Force film may be found wherever members of any of our armed forces serve. It is also presently in demand by schools and industry.

Announce Topics Scheduled for SPSE Annual Convention in May

Photography at high speeds and altitudes and in outer space will be high on the agenda of the annual convention of the Society of Photographic Scientists and Engineers in Binghamton, N. Y., May 22-26.

Taking part in the meeting, which will highlight new advances in color and black-and-white photography, will be scientists from Japan, Germany, Belgium and all parts of the United States, according to M. G. Anderson, general program chairman who is Director of Operations and Product Technology of Ansco, a Division of General Aniline & Film Corporation.

Among the papers to be presented at the convention are: *Enhancement of Print-Out Effect by Bathing Treatment*, Yoshitada Tomoda, Japanese Govt. Research Institute, Tokyo; *Standardization of the Correct Exposure of Color Reversal Films Under the Aspect of the Probability Theory*, Dr. W. Behrend, Agfa Research Laboratories; *The Contrast Transmission of a Sinusoidal Signal of Large Amplitude by Photographic Means*, Dr. Henri Thiry, University of Liege, Belgium; *Effect of Temperature of Exposure on Photo Sensitivity and the Rate of Development*, Dr. T. H. James, Eastman Kodak, and *The Electrolytic Removal of Thiosulfate from Processed Photographic Papers*, R. E. Rice, Ansco.

Many leading photographic and electronics manufacturers will display new products in an exhibit at Binghamton's Arlington Hotel. For information on the convention, write to Binghamton Chapter, Society of Photographic Scientists and Engineers, Binghamton, N. Y.

H. Lou Gibson (2nd from left) receives Louis E. Schmidt Award of *the Biological Photographic Association from Mervin LaRue (middle), BPA pres.-elect. Gibson was cited for his work on lighting for photographing medical patients, his research on infrared medical photography, and his development of optical formulas for photomacrography. Gibson, of Eastman Kodak x-ray sales division, is also an author and photographic journal editor. Others, from left, Charles G. Brownell, x-ray sales div. staff; Wm. S. Vaughn, pres. Eastman Kodak, and Edward Rusin, asst. mgr., x-ray sales division*

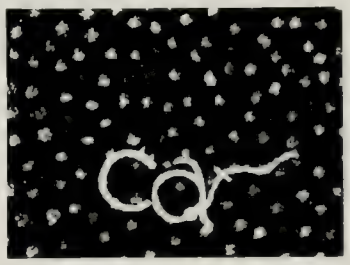
Elektra Commercials Win Top Honors at—

Hollywood Ad Club's First Broadcast Awards

COMPETING IN A FIELD of more than 900 entries, and selected by a panel of notable judges representing the fields of television, advertising and industry, Elektra Film Productions of New York won the Television Sweepstakes trophy for the best TV commercial in the Hollywood Advertising Club's First International Broadcasting Awards competition.



The winning production, an Esso Oil Heat commercial, also won top honors in the Local One-Market Television category. Advertising agency for Esso is McLaren Advertising, Ltd., Toronto.

Win Two Additional Awards

In addition to these two honors, Elektra productions also scored in two other categories. A commercial for Brillo Soap Pads, through J. Walter Thompson Co., won in the one-minute, animation and live action group; a 20-second animated commercial for Puss'N Boots Cat Food, through Spitzer, Mills & Bates, Ltd., also won first place in category.

Presentation of awards took place at the IBA Awards banquet on February 7 at the Moulin Rouge, Hollywood. Don Estey, general chairman of the event, said "The IBA competition seeks to highlight, on an international basis, the outstanding merit of broadcast advertising, a field which, until now, has been singularly unappreciated."

According to Estey, entries were submitted by many foreign countries, including France, Belgium, Mexico, Canada, Finland, Ireland, Norway, Germany, Greece, Spain, England and Austria, in addition to United States entries.

Esso's Oil Heat *spot won Elektra the Grand Sweepstakes' trophy.*

Other First Prize Winners

Other winners in the television phase of the competition included Animation, Inc., Hollywood, with a top award for an animated

This Leo Burnett *spot won honors for Earl Klein's Animation, Inc.*

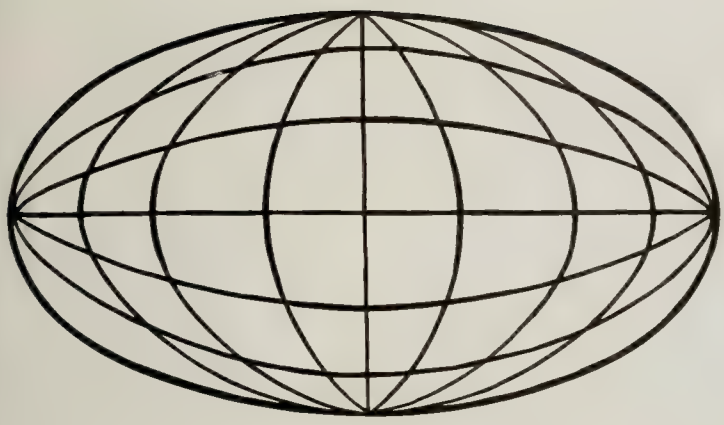
Franco-American Spaghetti commercial for the Leo Burnett agency, Chicago; Cascade Pictures, Hollywood, with Dole Corporation's ABC Breakfast Juice commercial for Foote, Cone & Belding, San Francisco; Robert Lawrence Animation, New York, with a Prudential Insurance commercial for Reach, McClinton & Co., Inc., New York.

TV Graphics, New York, won a top award for their live-action Alcoa Colorib commercial for Fuller & Smith & Ross, Inc., New York. A British firm, Advision Ltd., London, was honored for the live-action Scotts Porage Oats commercial for Alfred Pemberton, Ltd., London. A 10-second I.D. spot for Dilly Bean, through Papert, Koenig, Lois, Inc., New York, brought an award to Elliot, Unger & Elliot, New York.

Technical Awards Presented

Technical awards were presented for direction, editing and camera work. The animation direction award went to John Wilson (Fine Arts Productions and Freberg Ltd.) for his Butter-Nut Coffee commercial for Buchanan-Thomas Advertising Co. Animation film editing award went to Hugh Kelley (Playhouse Pictures) for Olin Mathieson (packaging materials), D'Arcy Advertising Agency. Producer was Saul Bass & Associates with Playhouse Pictures.

Winner of the animation cameraman award was Allen Childs (Playhouse Pictures) for Falcon-Ford Motor Co.'s commercial through J. Walter Thompson.



International Awards Noted

Jack Parker (Arco Film Productions) won the award for live action film editing. The commercial was for Chevrolet, through Campbell-Ewald Co. The live action cameraman winner was Bernard Davis (Anglo-Scottish Picture, London) for Gibbs S. R. Toothpaste, Young & Rubicam, agency. No award was made this year for live action director.

Final judges of the competition were Pat Frawley (pres., Ever-

(CONTINUED ON PAGE 92)

WHAT DOES THIS SYMBOL MEAN TO YOU?

An amateur psychologist might say that . . .

1. if you see a spider attacking an orange, you're probably hungry;

2. if you think of a paper lantern and fiery pinwheel, you may be repressing memories of a wild Chinese New Year party;

3. if you're reminded of prison bars and the rifling in a gun barrel, you're watching too many tv westerns.

We'd like this symbol to remind you of several important things:

OUR NEW NAME — It's new and more accurately descriptive: HORIZON PRODUCTIONS, a division of Longmoor-Nelson, Inc. (formerly Basore-Longmoor, Inc.). But new though the **name** is, it still represents the same **top-flight, talented personnel** and 14 years of solid growth and wide experience!

OUR NEW LOCATION — We're already at work in much larger quarters — 301 W. 73rd St., Kansas City 14, Mo. — with **more space** to stretch our imaginations (hence, your dollars), **more room** for our expanded facilities to keep pace with our ideas.

SCOPE OF OUR SERVICES — from script to screen . . . from tv film series and tv commercials to sales, instructional and industrial films . . . from the vigorous, representational "here" to the **avant garde** on the far horizon . . . we're equipped and staffed to provide you with technical excellence.

CREATIVE SUPERIORITY — We believe that only when the full sweep of imagination is brought into sharp **focus** does truly creative (productive) thinking take place. That focus is not on the assignment our client has given us, but on the client's objectives. The product we create for you is a means to achieving your objectives.

IF YOU HAVEN'T YET TAKEN ADVANTAGE of our services, why not drop us a letter — or call us collect — today? Let's talk over your objectives. Or, perhaps (as Basore-Longmoor, Inc.) we've served you before. If so, let us know how we can help you again — soon!

Fifteen experts from the tion's top sound and film co panies will present papers o wide range of subjects includ recorder and microphone ty and characteristics, recorder cessories and associated equ ment, synchronizing metho power supplies, testing meth and audio equipment.

In addition, subjects such recording curves, monitoring s tems, projection playback sponse, sound mixing, editing optional recording will be cover

Names of the speakers will released at a later date. Interes persons wishing to attend sho contact Behrend Cine Corp.

New Supervisory Training Film Series by Modern Management

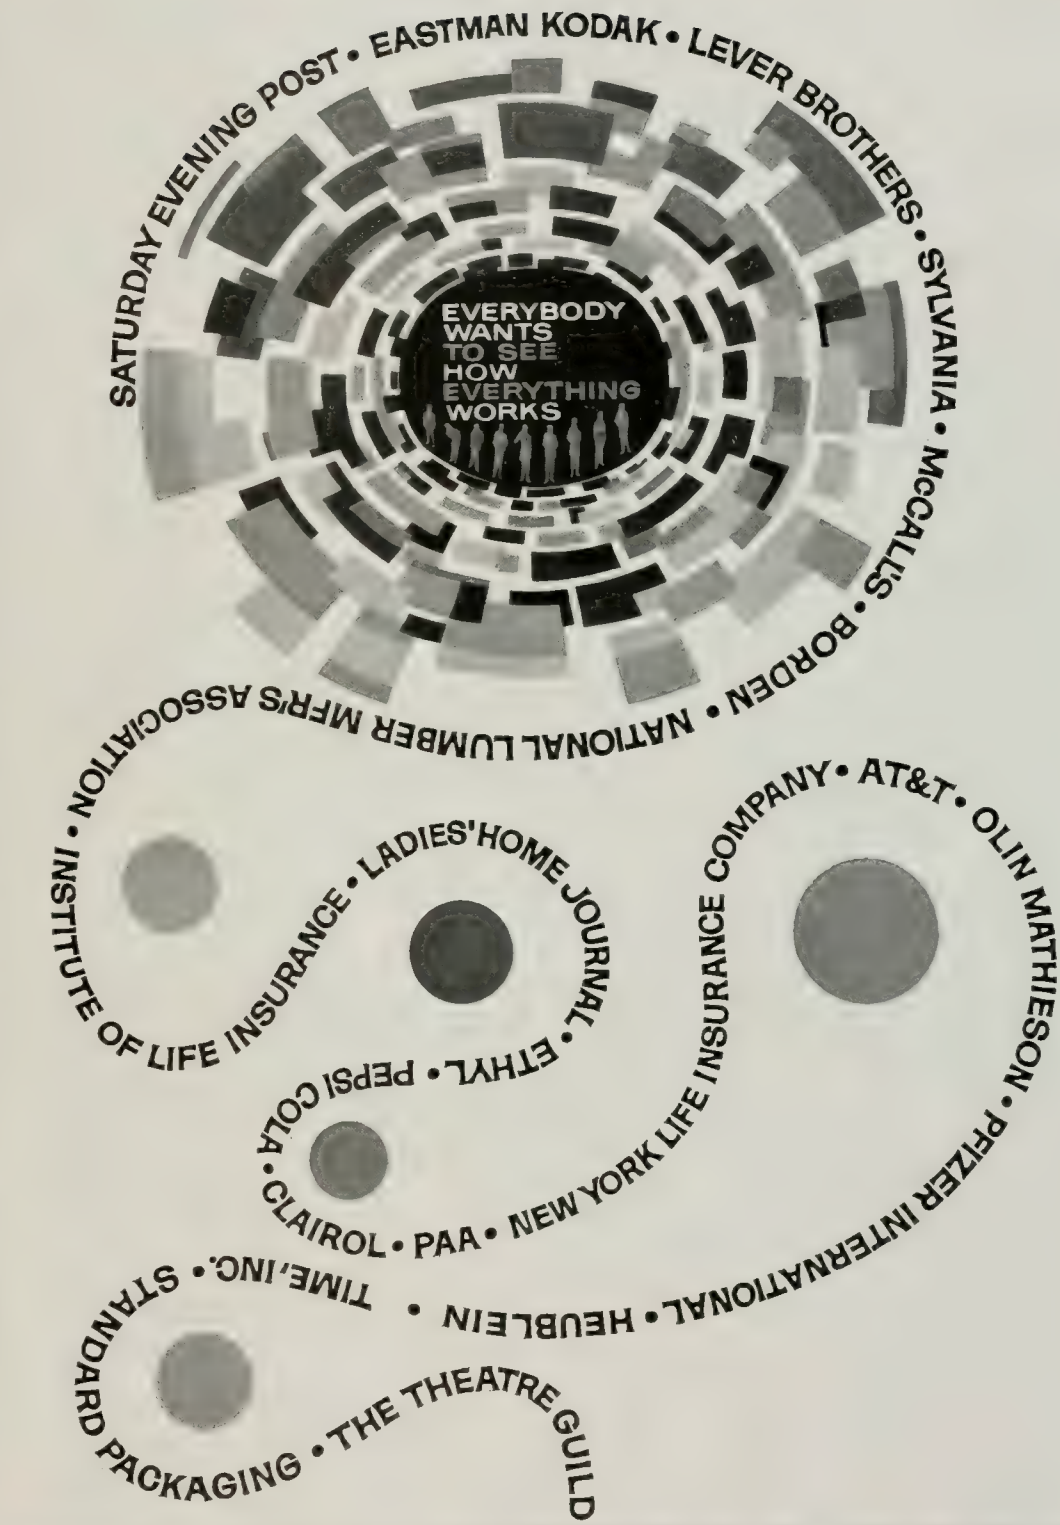
Four films for supervisory training have been released by Modern Management Films, a division of The Bureau of National Affairs, Inc.

Designed to teach basic principles of supervision and stimulate discussion of supervisory problems, the 16mm color and sound motion pictures are suitable for office or plant use.

Four Areas of Supervision

With these films the Modern Management Films series now provides training aids for four important problem areas of supervision: (1) giving orders and instructions; (2) listening; (3) motivating employees for higher productivity; and (4) leadership. Each film is accompanied by a Leader's Guide to assist trainers and conference leaders in conducting a one-hour training meeting with maximum results.

The four films in the series are: (1) *Instructions or Obstructions*, with Prof. Paul Pigors, of the Massachusetts Institute of Technology, illustrating his famous "seven steps in the order-giving process." Designed to help supervisors to do a better job of verbal communication with subordinates, and to show how to get voluntary cooperation from employees in carrying out orders.



(2) *Listen, Please*, highlighting the importance of listening in the supervisor's every-day job. A supervisor's day is ruined by failure to listen to other people. In the end, he learns *why* listening is an important aspect of communications.

Attitudes Affect Productivity

(3) *The Case of the Missing Magnets*, representing lost productivity in a department where employee attitude is poor. Reviews the basic principles of human relations, and a proper understanding of discipline.

(4) *The Challenge of Leadership*—presented through the story of five men on a hunting trip who face a crisis which threatens their lives. Helps supervisors to identify the various elements which make up leadership, and to relate these to their own daily jobs.

Modern Management films may be purchased either singly or in series, and are available for rental or executive preview. For further information write: Modern Management Films Division, The Bureau of National Affairs, Inc., 1231-24th St., N. W., Washington 7, D. C.

Three Staffers Join Corporate Structure of Visualscope, N.Y.

Three new shareholders: Edward Rasch, vice-president in charge of sales; Marvin Green, sales manager; and Pud Lane, vice-president, have joined the corporate structure of Visualscope, Inc., New York.

Messrs. Rasch and Green joined the rapidly expanding company about a year ago. Mr. Lane came to Visualscope last month from Transfilm-Caravel, Inc., where he was a vice-president and account executive.

Pud Lane's career in the film industry began in 1932 when he was a staff artist with Aesop's Fables. In 1943 he joined Transfilm as art director, and in 1945 was made vice-president in charge of art and animation. He left in 1950 to become TV art director and executive film producer at Ruthrauff & Ryan, an advertising agency. He returned to Transfilm in 1955 as head of its slidefilm and filmograph department.

Musical Sound Effects Library for Films by Musifex, Inc.

Musifex, Inc., New York, has announced a new library of musical sound effects available for unrestricted use and particularly designed for the film industry.

The musical sound effects library has over 150 effects on both sides of two LP records. Effects include all sorts of pings, boings, drums, tympani, etc. The records are being offered for outright sale.

For further information write New Products Desk, BUSINESS SCREEN, Chicago 26.

* * *

H. F. H. Productions Names L. Schwartz Exec. Producer

Lewis Schwartz has joined H. F. H. Productions, Inc., New York, as executive producer. He was formerly with J. Walter Thompson advertising agency as production supervisor in charge of commercial animated film production.

He will work in close association with vice-presidents Dan Hunn and Ronald Fritz on production for the 35 advertising agencies and 140 national, regional and local sponsors now being served by H. F. H.

Mr. Schwartz, in addition to his agency background, has done writing and drawing for several newspaper cartoon strips.

"... 28 minutes after I flip this switch, I can count on 25% of my audience becoming buyers"

"We like to imagine the sound of switches click-ig among our 'fleet' of Kodak Pageant Pro-ctors. For with every click, we know this 28-inute movie will open another portion of the 0,000 sales leads we expect from it this year."

These are the words of sales genius Herman rl, Chairman of the Board of Charlex Realty orp., Newark, N. J., selling agents for General evelopment Corp., developers of huge Port harlotte, Florida, homes and sites.

"A convincing film is a formula for sales suc-ss," says Mr. Perl. "From experience, we ow films sell. Any of our salesmen can show ur Port Charlotte film to anyone, anywhere, at y time, and produce leads. And because it's med, the presentation is never diluted, always rfectly duplicated, always successfully the same, whether shown in Bangor or Kokomo.

"This film program gives us another bonus: an enthusiastic sales force. Salesmen know that to *show it* means to *sell it*. So they eagerly pack equipment and show it. We are careful that the equipment we give them guarantees a smooth-running performance."

Mr. Perl's firm owns 60 Kodak Pageant Sound Projectors. They have made approximately 6000 showings in the first half of 1960 without a single projector mishap.

"Our salesmen aren't mechanics," Mr. Perl continues. "Their projectors must be easy to set up and operate, without a hitch. They must have a projector that doesn't get in the way of their presentation. And these Kodak Pageants fit the bill."

If you would like full details about Kodak Pageant 16mm Sound Projectors, tear out the coupon and mail it today.

Films Share Annual Freedom Award Honors

Encased Honor Medal Given to U. S. Post Office for "An American Credo" as Illinois Bell, Equitable Life, and Religious Groups Share 1961 Awards

On Washington's Birthday, February 22nd, the nation's press and television networks carried the announcement that the George Washington Honor Medal, highest honor awarded by the Freedoms Foundation, Inc., was given to the United States Post Office Department for the sound motion picture, *Our American Credo*. The 13½-minute color film was produced last year by Wilding, Inc.

The annual Freedoms Awards, given to all media which convey expressions of the American way of life, were also shared in the film category by the Illinois Bell Telephone Company, which won an Honor Medal award for its production, *Youth on the Go*.

These Sponsored Films Also Honored

The two motion pictures were not the only sponsored media to be accorded 1961 honors, with the top television award in this competition going to the Missouri Synod of the Lutheran Church for a half-hour filmed program in the *This Is the Life* series. The program presented practical solutions to one of the nation's problems, juvenile delinquency.

Another televised film winner of an Honor Medal award was *Not Without Honor*, one of *The American Heritage* program series sponsored by the Equitable Life Assurance Society of the U. S. This program depicted four years in the life of Alexander Hamilton.

Other Freedoms Awards went to the National Broadcasting Company for *U. S. Government*, as presented on the Today show from the nation's capital (a special two-hour presentation); to the National Council of Catholic Men for *The War of Geoffrey Wilson* as presented on the NBC program, *The Catholic Hour;* and to the Southern Baptist Convention's Radio and TV Commission for *Bread on the Water*, a televised episode.

A distinguished jury of supreme court justices and leaders of national community organizations selected *Our American Credo* for the encased Gold Medal award. The presentation was made at ceremonies held at the Freedoms Foundation's historic headquarters' site in Valley Forge, Pa.

Credo is an account of the words and traditions of great American patriots as they are carried throughout the world by the "American Credo" postage stamp series. The series was designed to express quotations by such famed Americans as Washington, Lincoln and Patrick Henry. Other *Credo* sequences include the story of the "Champions of Liberty" stamps which commemorate foreign-born freedom fighters such as Masaryk, Bolivar and Magsaysay.

"An American Credo" *brings the immortal words of Patrick Henry to the screen in a prize film.*

Focus on Extra-Curricular Activities

Illinois Bell's *Youth on the Go* is a documentary production filmed in the state's high schools. It pictures teen-agers in positive, constructive activities. Science clubs and fairs, dramatic groups and athletic competition share screen sequences with activities which are helping American teens to "learn and practice the rights and the *responsibilities* of citizenship."

Both productions embody the highest aims of the Foundation Awards and their designation continues a tradition which the sponsored film medium has achieved in past Awards.

Helping Develop Tomorrow's Citizens

Youth on the Go was narrated by television commentator Alex Dreier. In presenting its glimpses of activities and interests which occupy the extra-curricular time of high school youth, the film shows the value of these activities as they contribute to the growth and development of students as individuals, preparing them for their future as citizens.

This high school radio club member *epitomizes the spirit of today's "Youth on the Go." The film won a Freedom Medal.*

Camera Eye

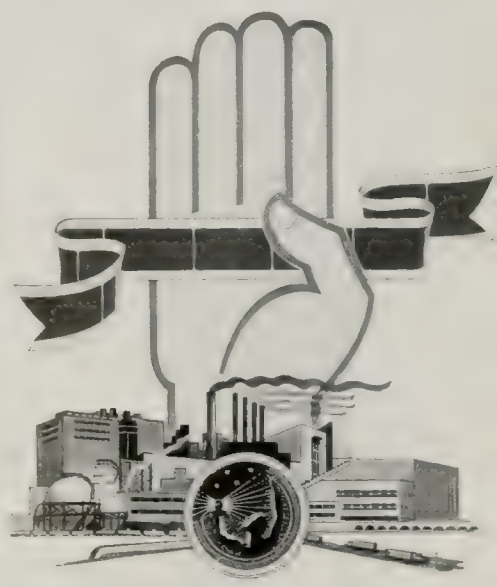
THE EDITORIAL VIEWPOINT

These Production Review Listings Provide Basic Facts for the Buyer

This 11th Annual Production Review brings top managements in companies, ad agencies, trade groups and leaders in government the detailed reference facts about 320 film production companies and their affiliates in the United States and Canada. It also provides invaluable, authoritative reference data on 38 overseas film companies, covering every continent.

Standards for an unqualified listing in these pages remain high. References on 1960 activities remain the basic qualification for appearance, though the Editors take into full account that a producer may justifiably take the full year to complete one or two major motion picture projects and that dozens of sound slidefilms will occupy far less time and effort.

Listed Films Have Won Top Awards



The heart of this specializing film industry is sound. Its members have weathered economic storms of a tremulous year with only a few exceptions. Their work is representative of the finest films being turned out for commerce, industry and education. The many awards accorded these sponsors and their producers listed in these pages bear good testimony of excellence and experience.

But even more convincing are the thousands of prints being struck from listed titles. A single sponsored motion picture with upwards of 2,000 prints currently in use (and many exceed 1,000 prints) reflects the size of the audience available to professional concepts, to the useful information conveyed to these audiences and the power of the medium to serve both sponsor and viewer.

Advertisers Reflect Reader Interest

The family of Production Review advertisers continues to grow and the Editors of Business Screen are proud to note that this

(continued on the following page 99)

BASIC FACTS FOR THE BUYER:
(CONTINUED FROM THE PRECEDING PAGE)

publication leads all magazines in any way devoted to audio and visual media with the largest single issue in size and scope of its editorial content *and* advertising.

For the guidance of the subscriber-reader, the *basic key* to year-long use of these pages is contained in the detailed references. *"By their works"* is the guiding phrase which invites the prospective user of these production services to request showings of films listed and others relevant to his project. *Permanence of staff, completeness of physical facilities immediately available, and financial stability are other primary factors* which such groups as the Association of National Advertisers have agreed are *fundamentals* for the film buyer.

List Federal Audio-Visual Programs

This 11th Annual Production Review also brings our readers an extensive new feature: the detailed listing of Federal Audio-Visual Programs and their key personnel concerned with procurement, production and distribution of films which play such a vitally important role in public information, government training programs and the National Defense.

In addition, there are numerous pages devoted to other exclusive features such as Annual Film Award Competitions, the principal professional and trade groups within the film field and the listing of principal national distributors of sponsored films. —OHC

2nd U. S. International Medical Film Exhibition in N. Y., June 25

☆ The thousands of doctors attending the 110th annual meeting of the American Medical Association in New York City on June 25-30 will share the world's latest and best medical motion pictures. A special scientific feature of the meeting will be the second U. S. International Medical Film Exhibition.

The Exhibition is being coordinated by the A.M.A.'s Department of Medical Motion Pictures and Television, under the direction of Ralph Creer, in cooperation with Johnson and Johnson. Showings will be held in Room C of New York's big Coliseum during the convention.

"Important Phase of Medical Education"

"We are pleased to again participate in this important phase of postgraduate medical education," said Dr. John Henderson, medical director of J. & J. "These carefully selected films, covering practically every specialty of medicine, represent a fine medium for the continuing education of the busy, practicing physician."

More than 50 outstanding new medical motion pictures will be shown and, in many instances, the films' authors will be present to answer questions from attending physicians.

"The American Medical Association is happy to present these outstanding films to its members," said Dr. F. J. L. Blasingame, executive vice-president of the A.M.A. "The exhibition points the way toward better medical procedure through teaching, thus helping the doctor in his daily practice."

Let's Maintain Quality in Government's Films

A BUSINESS SCREEN EDITORIAL

☆ The well-intended enforcement of an old government regulation affecting the non-theatrical motion picture industry may well turn out to be a surprising boomerang for the American Taxpayer.

On 1 July, the first day of the government's fiscal year, the Armed Services Procurement regulations were revised to read:

> *". . . every proposed, advertised, or negotiated procurement . . . which may result in an award in excess of $10,000 . . . shall be publicized promptly in the Department of Commerce "Synopsis of U. S. Government Proposed Procurements, Contract Awards and Sales."*

For the United States Navy, which contracts out to industry eighty percent of its motion picture business, this is apt to turn out to be one of the hottest headaches on the Potomac. And for the qualified film producer, who has *always* had an excellent chance to bid and receive Navy contracts, the new procedures are bound to result in a costly lap full of red tape.

It all began when the last Congress voted across the board to give a boost to "small business." Unfortunately, in this case, the boost may be a bust for everyone concerned. Let's look at the facts.

In the past, there have been close to 100 qualified producers of all types of motion pictures on file with the Navy. During a year, it has been estimated that 90% of these producers—from the ranks of big and small business—were given a chance to bid on one or more films. Usually from three to seven bids, with an average of five, were let out for each motion picture. Medical films, training films, animated films, filmagraphs, and technical animation—producers were selected on the basis of their facilities, capabilities, work on hand, past number of opportunities to bid on Navy films and, of course, their reasonable estimates on the job.

It is well known throughout the industry that this has been an extremely gratifying arrangement for both the producer and the Navy. In our opinion, it is probably the prime reason that the high quality of Navy films is undisputed. Some producers have become highly-skilled specialists.

Under the new system, with some very limited exceptions, *anyone at all* can bid on a Navy film. Low bidder gets the contract, unless it can be shown *by existing facts* that a satisfactory product *will not* be delivered.

This, of course, means that someone will have to establish definite minimum standards for the procurement of such a creative type product as a motion picture. The "telephone booth" producer who makes a film every couple of years, the photo-finisher—the writer-editor-producer-cameraman with his office in his pocket—all will be bidding right along with those producers with financial status, adequate facilities and experience, and permanent personnel.

Already, for example, six Navy films have been publicized under this new ruling, and one of them has received 25 bids. What will happen when the word gets around—and twice, maybe six times that many producers—some qualified and some not—will bid on a single production? How many months will this delay the award of a contract? How much will this cost in terms of man hours and wages for the Department of the Navy?

And what will this cost the motion picture industry? It has been intelligently estimated that each producer spends a minimum of $200 to carefully estimate his bid for each film. Let us suppose, and it *is* within the realm of possibility, that *200* producers bid on a Navy film.

200 producers times 200 dollars is $40,000 spent by the film production industry right from the beginning for a film which will average $12,000! Suppose this happens to fifty Navy films a year???

Will this regulation enhance "small business" or, will it, perhaps, cause complicated new procedures, delays, and unnecessary hard feelings between government and industry? If the cost of a government film should take precedence over its quality, will U. S. Navy films maintain the reputation which has made it legend that Navy training films are among the most effective and technically superb productions now used in the services? —*The Editors*

SUPER HYPAN® 16mm negative film has a fast ASA 500 Daylight, 400 Tungsten rating that sidelines costly lighting equipment. When areas are large and illumination low, this new high speed film can eliminate a carload of lighting rentals by performing reliably with the light available. The quality: The best of any high speed film now available! New Super Hypan negative film has a tight grain pattern and resolution approaching that of medium speed films. It prints cleanly, crisply with full detail discrimination from highlight to shadow. And, Super Hypan has processing adaptability to permit forcing for speeds of 1000 or better. Try this new high speed stock on your next assignment for a new quality in low light levels. Ansco, Binghamton, New York, A Division of General Aniline & Film Corp.

CANADA IS A FOREIGN COUNTRY

Canada is the United States' best friend and best customer—but it is a "foreign" country with its own identity, its own customs and its own national outlook. Wise Americans recognize this fact and tailor their message to Canadians.

When it comes to films, most choose Crawley's, Canada's largest film production company.

Crawley Films Limited

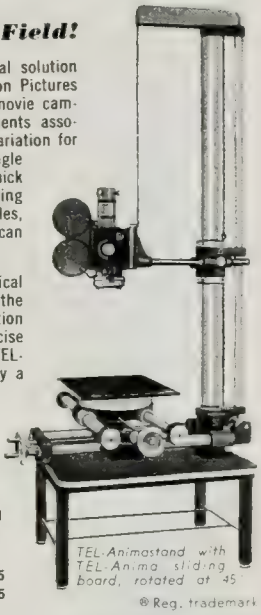
LISTING CONTINUES NEXT PAGE

TEL-Animastand® with Electronic Zoom
ANIMATION and SPECIAL EFFECTS CAMERA STAND

Greatest Value in the Low Cost Field!

TEL-Animastand is world famous—the most economical solution to all animation and special effects problems in Motion Pictures and Television. Embodies features of photo enlarger, movie cameras, micrometer, railroad roundhouse and all movements associated with much higher priced stands. Every type of variation for trick photography and optical effects such as pans, angle shots, montages, zooms, matching zooms, spins and quick closeups are accomplished by simply raising or lowering the camera—as well as Animation, Special Effects, Titles, Stills, Film Strips, Cartoons, Enlarging, Etc. Operator can also work comfortably in sitting position.

A camera fitted to a movable, counterbalanced vertical carriage photographs the art work. Will accept even the heaviest 16mm or 35mm camera (Acme with stop motion motor illustrated). Accuracy is assured through precise registration of art work. The only difference between TEL-Animastand and the very expensive models is primarily a few rarely used special features.



Electronic Zoom Control

Features:

Adjustable Dynamic Braking
Constant Motor Torque at any speed
Instant Response at any position
Infinite Variable Speeds

Basic Title Stand	$1495
Basic Stand with Compound	$2995
Basic Stand, Compound, Electronic Zoom	$3740
Electronic Zoom	$ 750

LaBelle Combines Film-strip and Tape in the

"Tutor" Automatic Audio-Visual Projector

Introduces a New Dimension for Creative Imagination!

Think of it—no records to break, change, jump, wear out or cause accidental tripping of the picture change due to similar frequencies on the recording. Think of it—no tape threading . . . simply slide in cartridge and go. The story unfolds continuously and automatically . . . the story you so proudly produced is presented with brilliant pictures—high fidelity sound—fully automatic.

LaBelle "Tutor" with cartridge—also in reel type tape

Unleash your bold new ideas for punch and drama. Sequence shots add animated action, charts built up in separate scenes save the punch picture for the punch line. The silent signal on a separate track on the tape commands a new picture to appear . . . always in perfect synchronization to the sound.

No longer is "Costs too much!" a deterrent. Now this type of live, actionized-projection program can be made to meet the most restrictive budget. No longer is "Not ready yet!" a valid reason for delay. Now story and pictures can be brought up to the minute and inexpensively at that, whether there's a new addition being planned, or a new executive starting soon, or a new product going to be introduced, or a change in packaging or design planned.

See and hear a LaBelle "Tutor" . . . get the facts—arrange for demonstration. Write to LaBelle Industries, Inc., Dept. B, Oconomowoc, Wisconsin. (*Adv.*)

At lunch time, Hancock's 75-seat theatre is filled to capacity.

Noon Hour Films "Lift" Employee Morale

They're Daily Fare in Boston's Hancock Insurance Theatre

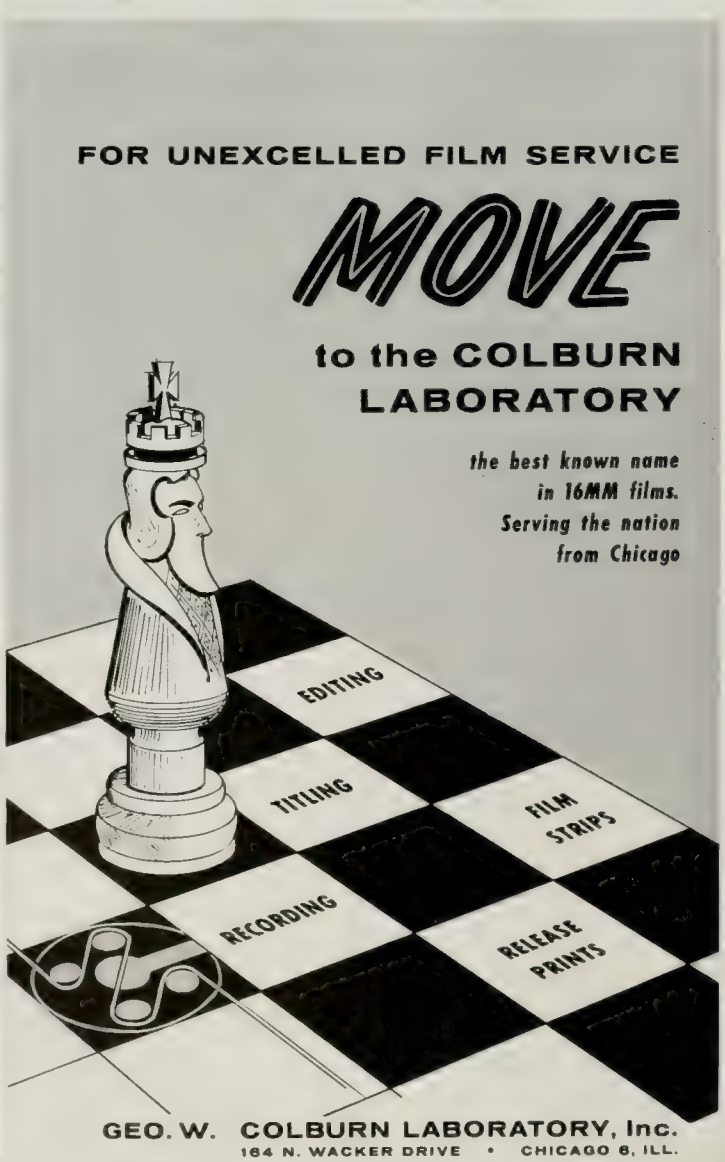
As FILMS CONTINUE to play important roles in 20th century industrial operations, their expanding and versatile tasks have extended beyond the area of strictly business. One of these most useful functions is that of company-sponsored recreational facilities.

At the John Hancock Mutual Life Insurance Company in Boston, for example, a free movie program is offered, in a 75-seat theatre, to some 5,500 employees —an integral part of the company's noontime recreational opportunities which include a library, lounges, card and game rooms.

Now In Its Tenth Year

Inaugurated in 1951, the Hancock film program was established primarily for its educational value, as a means of entertainment and a pleasant "break" in an eight hour day. Patronized by personnel in all types of positions and age groups varying from recent high school graduates to long-standing members approaching retirement, the theatre is open Monday through Thursday from 11:30 to 2:00.

With some eight to ten showings daily, the room is usually filled to capacity. Most films last about 15 minutes, allowing audiences a balance of 25 minutes in the official company lunch periods which are staggered over a two and one half hour span.



Wide Variety of Sources

All films are obtained on free loan from a variety of sources ranging from libraries, business film distributors, the armed forces and national travel bureaus, like Canadian Travel. With a change of program once a week, billing varies from travelogues and occupational movies, to scientific, civic and campaign films. The latter often are run in connection with local and national fund drives, such as Red Cross, Muscular Dystrophy, Crusade for Freedom, and the United Fund.

Other films are seasonal. At Christmas, for example, the theatre features films on Yuletide customs around the world. And throughout the winter season, films on winter sports are a favorite attraction. Travel films hold first place in popularity the year 'round.

Men Like Remington Film

While audiences are comprised of a fairly equal representation of both sexes, some films, naturally, attract more of one than the other. The Remington Arms film on *Exhibition Shooting*, for instance, played to an almost all-male audience. And the men's reaction to the film? Wholly enthusiastic! "Terrific marksmanship, photography, and just enough

Noon-hour movies *are publicized to attract Hancock audiences.*

pulchritude thrown in to make it a thoroughly enjoyable film for every man," said Stanley T. Dingman, director of the Hancock's public relations department.

Dingman, by the way, along with the company photographer, Alan Lydiard, initiated the John Hancock's recreational film program back in 1951. Both feel that the enthusiastic response throughout the company makes the project well worth the efforts of planning, scheduling, and maintenance.

Dingman's reaction to the Remington film was echoed throughout the company from maintenance to actuarial departments, and from the sub-basement divisions to the building's 26th floor.

Some Viewing Serial-Style

William Barber of the Hancock's Heating and Air Conditioning Division said it took him two days to see the film. He watched half of it one day, the other half the next day. Barber catches most of the films that way, he explained. Allows him more time to eat lunch and gives him something to do two days out of the week.

Many of the gals use his system too, those who do catching a film a week. "The movie is a terrific way to kill some time, and often educational too," voiced Florence Bouchard, a secretary in the company's Group department. On the non-movie days, Florence and many of the other moviegoers spend the time shopping. Funny thing about the Hancock's movie fans, those who frequent the shows usually see all of them. There are many more "regulars" than "sometime" patrons.

Photo Bureau Selects Films

For the most part, film selection is handled by the company's photo bureau under the management of Al Lydiard. All films are returned to their source with a film report card giving a complete evaluation of audience attendance and reaction.

As a result of the report, the Canadian Travel Bureau some time ago formulated a two months' program covering sport, social, and economic life in that country. The series was almost as popular as a TV western.

Before released in the theatre, every film is previewed by the company photo bureau. If considered controversial, it is submitted to a review board of five who determine whether it shall be released. It has seldom been necessary, however, to exercise censorship.

Technical Subjects Listed in Modern's New Free Film Catalog

A new guide to technical films listing more than 130 technical subjects has just been published by Modern Talking Picture Service.

Titled Modern's Catalog of Free Loan Technical Films, the listing includes topics in the realm of pure sciences as well as those affecting practical considerations of production and distribution. Almost all basic American industries are represented by one or more films in the catalog.

Copies of the catalog may be obtained from Modern at 3 East 54th Street, New York.

BACKGROUND: Founded in 1911 (as "The YMCA Motion Picture Bureau," a division of the International Committee of the YMCA's), Association Films was the first sponsored film distributor in America. In 1949, the company was incorporated as an independent national distribution service.

SERVICES: promotion, publicity; booking, shipping, storage and inspection of prints (electronically); film programming (community and school groups); film programming (TV stations). Furnishes monthly reports on print activity and audiences (IBM tabulated); advance booking notices to sponsors; correspondence and confirmations (to users); merchandising of teaching aids and other film-related materials; and print servicing (physical handling of professional, sales and TV prints).

OPERATION: prints and bookings are serviced from four regional film distribution centers, wholly owned by Association Films.

Jack Lalley, *Vice-President*

BACKGROUND: the outgrowth of a pioneering program in the field of talking motion pictures by Electrical Research Products, Inc., a subsidiary of the Western Electric Co., formed in 1927 at the birth of the commercial sound motion picture medium, Modern Talking Picture Service first emerged as the non-theatrical department of that company. An early pioneer in the licensing and operation of portable sound projection apparatus and also providing projection service for industry, etc., Modern's present trade name was adopted by its licensees in 1935 and Frank Arlinghaus, then of ERPI, was placed in charge of this growing activity. Modern became an independent corporation on July 1, 1937, under the ownership and management of its distribution employees.

SERVICES: In 1961, in its 24th year, Modern represents over 400 organizations from industry, commerce and the professions, distributing their public relations films to schools, colleges, industrial plants, offices, and to the public and private clubs, and social groups throughout the United States and Canada. Other primary channels of distribution in which Modern is a leading specialist include: theatres showing sponsored short subjects; television stations; and rural roadshow operations. Modern operates a network of 30 regional libraries. For sponsors utilizing its service, the company promotes, ships, cleans, repairs, maintains and stores their films. Additionally, it counts audience attendance, records their comments and furnishes the sponsor a monthly tabulation. Extensive IBM facilities and

equipment for promotional printing are maintained at New York headquarters. All regional libraries are equipped for electronic film inspection and handling. In 1960, Modern established its Modern Learning Aids division to distribute educational films for purchase, subscription (series rental) and lease-to-buy. MLA distributes the high school physics films developed by the Physical Science Study Committee.

REGIONAL EXCHANGES are located in Atlanta, Boston, Buffalo, Cedar Rapids, Charlotte, Chicago, Cincinnati, Cleveland, Dallas, Denver, Detroit, Harrisburg, Houston, Indianapolis, Kansas City, Los Angeles, Memphis, Milwaukee, Minneapolis, New Orleans, New York, Omaha, Philadelphia, Pittsburgh, St. Louis, San Francisco, Seattle, Washington D. C. as well as in Honolulu, Hawaii and Anchorage, Alaska.

SPECIAL ACTIVITIES & PUBLICATIONS: A physical handling service is maintained for technical, professional and special films. Recent references for sponsor reading (available on letterhead request or by telephone from listed sales offices) include: "The Opportunity for Sponsored Films" —"Business Films at the Movies"—"How Television Stations Use Business Sponsored Films" —"The Teen Age Market"—and "Series Programming, PR Films Free From Modern TV."

THE PRINCETON FILM CENTER, INC.

P. O. Box 431, Princeton, N. J.
Phone: WA 4-3550

Gordon Knox, *President*

DISTRIBUTION OFFICES: Atlanta, Ga.; Chicago, Ill.; Dallas, Texas; San Francisco, Calif.

ROTHACKER, INC.

Time & Life Building, Rockefeller Center
New York 20, New York
Phone: CIrcle 5-6878

Douglas D. Rothacker, Jr., *President*
W. Stanfield Cooper, *Vice-President*
Mayme R. Dawson, *Secretary*

BACKGROUND: Established in 1910 as the Rothacker Film Manufacturing Co., producer and distributor of educational films, the organization was subsequently reorganized as Rothacker, Inc., and is currently engaged in specialized business film distribution through all available media to audiences throughout the world.

SERVICES AND OPERATION: For all types of non-theatrical audiences, and for theatrical and television showings, individual promotional campaigns, audience selection, publicity, multiple confirmation, audit follow-up are done on a separate basis for each film. Prints are all hand-inspected, sound-read, cleaned, repaired, shipped, stored and a complete record maintained on condition of each print; annual print breakdown with classifications sent as well as monthly exhibition reports with full information of each showing; special questionnaires provide additional information on audience reaction, comments. Supervisory operation in New York supplemented by distributors functioning locally in New England, the South, Middle West and Far West.

---

this symbol over distributor listings in these pages refer to display advertisements within this Production Review issue.

FILM DISTRIBUTION:

FOREIGN DISTRIBUTION: In addition to full coverage nationally, Rothacker, Inc., now offers its international distributing service covering Europe, the Orient and Latin America. The same standards of operations, available domestically, are handled, for Europe and the Far East, through our representatives working through New York. For Latin America, arrangements are made through the facilities of Servicio de Informacion Panamericana.

Physical handling of sponsored film prints is served by 43 regional film libraries. Distributes sponsored business films to self-equipped audiences and television, nationally and internationally.

Meat for Theatre Audiences

Top Cast, Light Touch Wins Bookings for National Meat Board's Picture

High in the Himalayas, *Hans Conreid pursues his vain quest for a really luscious meal.*

Conreid portrays a suburbanite *who dreams of high adventure in far-away places.*

In a parody *on the Stanley-Livingston rescue, our hero prepares to eat a ham dinner.*

SPONSOR: National Live Stock and Meat Board.

TITLE: *The Adventures of Dudley Worthington*, 15 min., color, produced by Wilding, Inc.

☆ Pointing up how fortunate we are to have in this country a readily available supply of a wide variety of wholesome, appetizing, high quality meat items, *The Adventures . . .* creates a strong, immediate desire for a good, tasty meat meal. And it's not done subliminally; the specially-prepared dishes featured in the film have some of the "meatier" roles.

The Adventures of Dudley Worthington, starring Hans Conreid, popular television, motion picture and radio performer, consists of a number of dream sequences in which a suburban USA resident, who usually leads a normal life, continually finds himself in far-off lands, engaged in adventurous, appetite-stimulating situations.

He Dreams of Food . . .

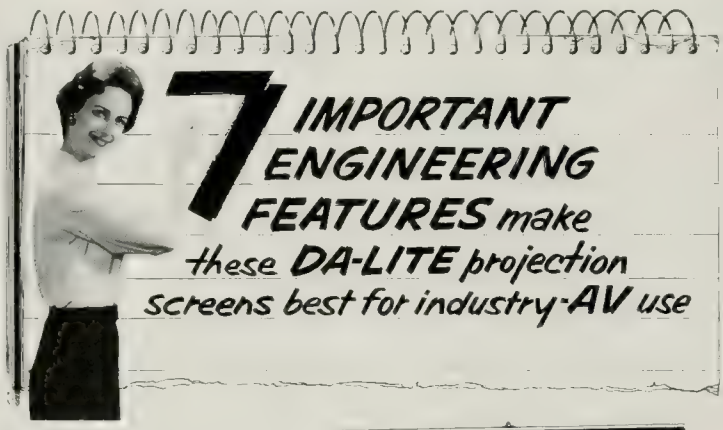
Since Dudley went to bed hungry, with only a water-cress sandwich for energy, each of his dreams involves food. Each dream ends just as a mouth-watering meat meal is being served—and then is lost. In each instance, the meat is shown in a close-up shot, literally focusing the audience's attention on its taste-tempting desirability and appetite appeal.

After conquering Mt. Everest, the hero's porterhouse steak is stolen by an Abominable Snow Man; in the jungle a ham is taken by a cannibal; in his desert adventure Dudley loses a tempting plate of ready-to-serve meat items, and even in a jail sequence, as a condemned man eating his last meal, he is deprived of a standing rib roast when he is pardoned.

By now awakened, Dudley jumps out of bed and heads for the refrigerator, where he takes advantage of a well-stocked meat compartment. He and his wife prepare a big, meat-filled breakfast, and this time Dudley is able to enjoy the nutritious dishes before him. His dreams are over, but he will never again take for granted the mealtime benefits provided him by the livestock and meat industry of the United States.

Prepared in Studio Kitchen

The meat dishes used in the color film were prepared by the Meat Board's staff of skilled home economists in a special kitchen at Wilding Studios. Stand-ins for the meat cuts were also prepared to have the best appearing meat ready for the camera and the hot spotlights.



The Adventures . . . is an extension of the Board's program of reaching more people with more information on meat. While the Board's previous nine motion pictures were 16mm films for use in classrooms, on television and before special audiences, the new film is a 35mm production, made specifically for use in motion picture theaters as a short feature. It is being scheduled at theaters by a commercial booking agency and has also been cleared for use on television.

United Film Studios' Slidefilm Featured in Hospital Journal

We Appeal, a sound slidefilm produced by United Film & Recording Studios, Inc., Chicago, for the Weiss Memorial Hospital, also in Chicago, was the subject of a feature article, and scenes were reproduced on the cover of the November, 1960, issue of HOSPITALS, the Journal of the American Hospital Association.

It is pointed out that the results of the film were so rewarding that it is now used as a regular part of employee indoctrination.

1 SELF-LOCKING EXTENSION TUBE—Sturdy 1" square seamless steel center tube and ⅞" extension tube, chrome plated. Easy-operating Height Adjuster and Screen Case Lock. Convenient knobs provide positive stops in all positions.

2 "GABLE-ROOF" ALUMINUM LEGS—Legs of heavy-gauge extruded aluminum form sturdiest of tripods in combination with Da-Lite's heavy cast tripod leg bracket. Supports a man's weight.

3 STURDY ROLLER, OCTAGON CASE—Pre-set positive safety stops on roller prevent fabric from being torn off. Octagon case prevents fabric scraping . . . has patented "no-rub" flat back.

4 AUTOMATIC LEG LOCK, FABRIC LOCK—Leg lock fastens all three legs, releases at touch of toe. Fabric lock protects screen surface from sagging or shifting in carrying or storing. Locks closed screen rigidly in place.

5 SLAT SADDLE COLLAR AND PLUG—Long slat-saddle insures wrinkle free picture surface. Collar and plug protect edges from fraying.

6 FLEXIBILITY IN HEIGHT—Case adjusts from low at tripod leg bracket to high at top of center tube. Square sizes adjust to rectangular. Even largest size at highest case position extends to full 70" x 70" (128") height.

7 FAMOUS "WHITE MAGIC" SURFACE—White Magic glass-beaded surface seamless in all sizes. Whiter, brighter and stays white. Brilliant, life-like pictures, excellent color. Viewing over wider seating area. Flame and mildew resistant. Also in mat white.

Vidiomaster A
is engineered to meet the Audio-Visual needs of Industry! This heavy-duty portable tripod has features that assure years of outstanding service. Vidiomaster A is unequalled for performance. Scenes from "Financial Planning"—latest in . . . the film project covering "The Later Years"

Our National Goals for "The Later Years"

Film on "Financial Planning" Helps Aging Prepare for Retirement

AWARE THAT LIFE EXPECTANCY in the United States is rising sharply—(in 1900 it was about 47 years; today it is almost 70)—and concerned with the effect of this phenomenon on our economic and social life, Dynamic Films, Inc., began an active collaboration in 1955 with the National Council on the Aging, a standing committee of the National Social Welfare Assembly.

Seeking useful ways to serve the cause of the aging, the collaborators brought out a motion picture, the first of its kind, called *A Place to Live*, dealing with institutional care of the aged. This film has been seen by over 18,000,000 people since it was produced in 1955.

Over 15 Million in U. S. Over 64

But *A Place to Live*, successful as it was, touched only briefly on a problem with many wide-ranging and serious aspects. When it was considered that this aging process was nagging at the whole country and everyone working in it—(there are now close to 15,000,000 people in the United States over 64, and by 1975 it is estimated there will be 20,000,000)—Dynamic probed deeper to see if more definite and useful film approaches to the problem could be devised.

It was found that some 400 bills relating to the aging had been introduced into Congress before a decision was made to hold a White House Conference on Aging in 1951. Also that some 35 states and nearly all the major cities have established official committees or commissions on aging. Programs on preparation for retirement have become the concern of many industry, labor and community groups; millions of dollars have been spent on medical research on aging; universities have established departments on gerontology; and institutes are frantically training workers everywhere to deal with older people.

Advisory Board Guides the Program

After determining that there was crying need for materials with which to educate people for their later years, Dynamic Films in association with the National Council on the Aging and the National Association for Mental Health set up an advisory board two years ago to plan overall objectives and supervise content for a definitive film approach, in depth, on the problem.

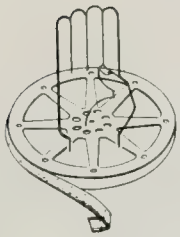
On this board now sit representatives of industry, commerce, national and state governments, the major religious denominations, labor, medicine, psychiatry, the universities, social welfare and mental health.

Financial Preparation for Retirement

The meetings of this board have been on the highest level of competency. The decision was unanimous that the first film, in addition to stating the general problem, should relate itself in great measure to financial preparation for retirement.

Knowing from experience that a public service film must never be confused with other types of film making, but unlike these must be planned simultaneously with a program for distribution, Dynamic Films set about publicizing the first of the *Later Years* films even before the script was finished.

It winnowed out the names of the 500 biggest industrial and commercial concerns in the country, and with the approval of Frank H. Cassell, of Inland Steel Company, who is a member of the advisory board for the *Later Years* project, sent a mailing, mentioning his name, which told them about the project and asked for information, based on their own experience, which would assure maximum usefulness for the films.



Project Has Been Widely Publicized

This was followed by press releases to newspapers and specialized publications. Articles began to appear in the New York *Times* and other dailies, in AGING, the official publication of the U. S. Department of Health, Education and Welfare, in PROGRESS REPORT, issued by the National Social Welfare Assembly, and in film and business periodicals.

A second mailing, sent on stationery of the National Association for Mental Health, again to top industrial firms and others who were known to have retirement plans of varying character, brought excellent results. In answer to a questionnaire which accompanied this mailing came about 20% replies.

At this point a far-seeing sponsor with "corporate citizenship" insight and a desire to serve the American community was found.

Business Screen Previews the Sponsored Films of the Month

THE "LATER YEARS" PROGRAM:

(CONTINUED FROM THE PRECEDING PAGE)

The Mutual Benefit Life Insurance Company made a grant to the National Council on the Aging which has partially financed the first film in the *Later Years* Series, *Financial Planning*.

"Improve Economic and Social Climate"

In announcing this grant, H. Bruce Palmer, president of Mutual Benefit, said: "Mutual Benefit is proud to be associated with this undertaking which we believe will provide a genuine public service. Our fundamental objective as a business is to provide a needed service through life insurance protection. However, we believe that as a good corporate citizen we must be actively involved in projects that will strengthen and improve the economic and social climate in which we operate.

"Problems of aging have always been with us, but only in recent years has society begun to face up to them. Education of this kind is imperative for all citizens if they are to be better equipped to live in their later years."

Emphasis Is On Financial Security

Production of the film, *Financial Planning*, has recently been completed. It provides a general introduction to the problems of retirement with emphasis on maintaining financial independence in the later years. It depicts some of the ways in which the individual can plan retirement well in advance, thus making the most of this later period of life and guarding against its pitfalls.

Although the film ends on a hopeful note, it very realistically depicts the problems of an aging couple who had *not* planned for retirement—who, for a time, lived in agonizing frustration at having to deny themselves the little luxuries and even some necessities of former years.

Test Audience Reactions Are Noted

Financial Planning has now been thoroughly tested in actual audience situations at many locations in the Metropolitan New York area during the past several months. Summarizing the film's results, the testing group reported to the *Later Years* advisory committee as follows:

1. We learned from our test showings that our film did best before precisely the age group for whom it was made—people between 45 and 55.

2. Also, that passive reaction to the film was unlikely. Both those who liked it, or reacted away from it, agreed that it "hooked" them one way or another. They were forced to attend to what it had to say and often admitted that though they might try to minimize its importance, it "worried" at them sufficiently to require attention. In the 45-55 age showing, where we got the most stimulating audience discussion, we later learned that the film resulted in increased requests for individual counseling. So it "worked" the way we wanted it to.

3. We are also ready to say now, as a result of these showings, that there is no such thing as a "uniform" retirement audience.

(CONCLUDED ON THE FOLLOWING PAGE 192)

Scenes from American traditions and of the present are shown in Birad's "How We Elect"

A Film You Can Sponsor: "How We Elect Our Presidents"

In these times, with communistic influences infiltrating so many parts of the world, many management men believe they have a responsibility to project an image of the American democratic system in action.

One useful vehicle in carrying this idea to realization is a new film recently released on our election system. Called *How We Elect Our Presidents*, the film was prepared particularly for syndicated sponsorship by American industry. It is sold with the suggestion that prints may be offered by business sponsors as a public relations gesture, to schools, civic groups, political and veterans' groups, and other vital organizations in the community.

The film starts with the national conventions, as documented by excellent color scenes of the 1960 conventions. It goes on to depict how delegates are chosen, the "pattern" of voting results to watch on election night, and succeeds in capturing much of the campaign excitement of the big quadrennial event.

Where to Acquire Sponsor Prints

Birad Corporation (1564 Broadway, New York), producer and distributor of the film, offers prints at $50 in b/w and $125 in color. Birad will also make arrangements for credit titles for industrial sponsors, if desired.

Dramatic Portrait of Our Latin-American Neighbors

Haunting Beauty, Age-Old Culture Pictured in Panagra's "South America"

SPONSOR: Pan American Grace Airways

TITLE: *South America, Continent of Contrasts*, 27½ min., color, produced by Coleman Productions.

Audiences of prospective visitors to South America's West Coast nations will be intrigued by this entertaining motion picture combining the dramatic photography of travel film expert, Harry Coleman, and his lyric scripter, Millard Lampell.

From Panama to Ecuador and Peru

Starting at the gateway to the west coast, the film first visits Panama. We might see almost anyone here—sailors from Bremen or merchants from Bombay—on the crowded streets of this crossroads of the world.

Quito appears—dyed in the colors of Spain

Colorful Indian dancers perform *in a scene from Panagra's new film by Harry Coleman.*

Machu Piccu . . . Andes' stronghold of Incas.

—as if seen in an ornate mirror of Barcelona or Madrid.

Proud Peru, with its roots in the New World dating back to the 16th Century, shows us the treasures of its architecture and its arts—particularly its finely wrought silver pieces. At the same time, Peru has other than austere aspects—here are surfboarders and bathing beauties on the beaches, tennis players at Lima's ultra-modern country club.

Striking Scene of Inca Stronghold

Machu Piccu, last stronghold of the Incas high in the Andes, was photographed by a Coleman crew at dawn after having camped out all night in one of the ruins waiting for the perfect shot in the morning.

Much of this part of the continent has a

haunting, mysterious quality, reflected in the scenes of Cuzco, with its mountains surrounded in the mist, or in the stoic faces of the Bolivian Indians.

But there is always a balance. Harry Coleman's lenses gravitate back to sea level and the exquisitely pretty girls of Santiago, Chile. This nation seems to have such great contrasts of scenery—deserts, thousands of miles of seacoast, the majestic Andes, and the thousands of lakes like fallen fragments of sky.

South America—Continent of Contrasts is a beautiful reminder to winter-bound audiences in the United States that summer is only a day away—via Panagra.

In "Tale of Three Chemists"

Geigy Chemical Views Past, Present & Future

SPONSOR: Geigy Chemical Corp.

TITLE: *A Tale of Three Chemists*, 13½ min., color & b/w, produced by Willard Pictures.

The three chemists of this interesting film represent the past, present and future of Geigy pharmaceutical and chemical activities. Played by Bil Baird puppets, the three chemists meet on the front lawn of the Geigy plant in Ardsley, New York, and discuss the parts they play in the scientific discoveries of their ages.

In the course of this, we can see the origination of the Geigy company in Basle, Switzerland. In 1880-1890, the company enjoyed the services of a wizard dye chemist, Traugott Sandmyer, who led Geigy to a leading place—worldwide—in the dye industry.

Paul Meuller, a Geigy scientist who is much alive today, invented D.D.T. insecticide.

Long a resident citizen of the United States, the Geigy company has plants all over the map, and makes a long line of agricultural products—Diazinon, a new and highly effective insecticide, and Simazin, a weed killer, are leading examples. Sequestrin, a new chemical discovery, removes iron salts and oxides from water. Other interesting Geigy products prevent static in carpets, control foaming action in soap and detergents.

A Tale of Three Chemists is distributed to television stations by Modern TV.

Bil Baird puppets *as the three chemists who relate stories of scientific discoveries.*

Pure's Pictorial Report on Oil Transportation

"Get Me There" Completes Series on Exploration, Production and Refining

SPONSOR: The Pure Oil Company.

TITLE: *Get Me There*, 33 minutes, color, produced by Atlas Film Corporation.

What is transportation? A commuter or traveler would ordinarily think of trains, busses, automobiles, airplanes and lately, rockets. But when you are in the oil business in a big way you think of transportation as tankers, barges, pipe lines and trucks, for these are the methods of moving the large volume of petroleum products needed every day by a nation in the midst of the atomic age.

In order to bring this interesting story to the public, a 33-minute, color and sound motion picture has recently been completed for the Pure Oil Company. *Get Me There* is the theme and title of this epic undertaking produced by Atlas Film Corporation, Oak Park, Illinois.

To Deliver Oil Quickly, Economically

The objectives of petroleum transportation may be stated simply—to bring quality products to market quickly, at the lowest possible cost. The first big step is to bring the crude oil from the producing area to the refinery where products are made.

In the early days of the petroleum industry, transportation was a minor problem. Products and markets, were relatively few, so the refinery could be located close to the market it served.

Today, crude oil yields literally hundreds of products and numerous markets are located at far distant points. Petroleum transportation presents a continuing challenge to ingenuity and knowhow, because conditions change constantly. There are changes in costs, changes in crude supply, changes in manufacturing facilities and marketing areas.

Transportation experts strive constantly to develop better and more flexible methods that will serve today's needs and accommodate tomorrow's changes.

Pipeline . . . tank car . . . transport truck . . . river barge . . . ocean tanker . . . each method has advantages of its own, under the right conditions. Pure Oil Company uses the one that's most convenient, most economical —or works out the combination that's most efficient and least costly.

Flexibility Helps Prevent Shortages

Flexibility of method is of high importance. Throughout the complicated network of transportation, sudden emergency may strike at any time. Floods, earthquakes, hurricanes—natural disasters of any kind can break up normal operations. Therefore, the system is designed to be so flexible that if anything goes wrong with one method of movement at any point, the transportation people are prepared to switch at once to another method, and keep the supply flowing.

How did Atlas Film Corporation go about filming oil transportation? Story-wise you start

By barge and tanker, *oil moves to market as in this scene from the new Atlas' film . . .*

at the oil well, but in *Get Me There*, you start in the Chicago area and in a running conversation between two men you visit over a dozen locations covering a distance of seven thousand miles. Each location is vital to the complete story, and each location is unique in some way to the problem of transportation.

Animation Used to Tell Intricate Facts

The intricacies of routing the various types of crude oil and finished or refined products to their destinations through the pipelines is explained with skillful use of animation; this coupled with artful use of the motion picture camera on location presents a photographic symphony of oil on the move.

The transportation problem of the production crew was symbolic of the problem set forth by the title *Get Me There*. It took a convoy of four vehicles to move the crew and film equipment. It took four airplanes to cover the vastness of the pipelines; it was necessary to have a string of oil barges carrying over a million gallons of finished products to demonstrate this method of transportation; huge ocean-going tankers to carry crude oil and cargoes of packaged products were shown.

These Pure Oil Executives Supervised

The entire production was under the supervision of Bill Bright, manager of employee development and training, and Pete Reiman, personnel coordinator, Transportation department, The Pure Oil Company. Director was Al Bradish of Atlas, with Harry Petersen, cameraman, and Jim Dricker, editor.

Get Me There is part of a series sponsored by The Pure Oil Company, also covering Exploration, Producing and Refining. Each of the four films in this series is or will soon be available for public showings.

Striking pictorial photography *helps to illuminate Pure's oil transport story.*

Color Slidefilm Shows How

Dun & Bradstreet Serves

SPONSOR: Dun & Bradstreet, Inc.

TITLE: *How To Use Your Dun & Bradstreet Service Most Effectively,* 14½ min., ssf., color, produced by Gotham Film Productions.

This film was designed to serve two functions. First, it is an instructional, complete review of Dun & Bradstreet services which the Agency salesman can utilize in selling a contract. Second, and more importantly, it is an educational film useful in explaining to current subscribers—and more than 75,000 American companies are in this group—optimum use of the service to which they are entitled.

The slidefilm, examining step-by-step the fictional Hudson Company's use of Dun & Bradstreet service, demonstrates for credit managers and their assistants, secretaries, file clerks—even office boys—the methods, procedure and characteristics of Dun & Bradstreet credit services. In addition, through the natural device of a flashback case history narrated by Hudson's credit manager, the function of the Dun & Bradstreet Service Consultant is made clear.

Finally, the wide assortment of supplementary credit and business facts services offered by D&B are briefly outlined, and a human interest value is added through a flashback sequence narrating the Hudson manager's visit to D&B's headquarters office at 99 Church Street. This allows a presentation of the modernity and the scope of the home office operation, prototype for the 142 smaller branch locations.

The basic problem Gotham Film Productions was asked to wrestle with was that of conveying a substantial mass of semi-technical and detailed information in a manner that would be clear, effective, attractive, and never tedious. In the judgment of all company officials who have seen the film, this objective was admirably achieved.

The film will be used in conjunction with a booklet of the same title covering in close detail the same material. The graphic design elements of the two will harmonize, the booklet serving as an effective "follow-up" or "memory stimulant" after a showing of the film, and as a permanent reference as well.

Glimpse of the *credit reference facilities at Dun & Bradstreet New York headquarters.*

Salesmate projectors are used in some locations and Du Kane in others.

The film was premiered in New York in the fall at a meeting of all of Dun & Bradstreet's 142 branch office managers. Plans are being made for equipping the branch locations.

IBM Bids for Graduates

Automated Lane-Cole-Dietz Program Aid to Recruitment and Employment

Competition for qualified college graduates is an expensive fact of life for the country's large business corporation. Recruitment has taken on the aspects of a military campaign. A barrage of ads in local and college newspapers announces forthcoming visits of recruiting teams. Notices go up on bulletin boards. Special interview rooms are set up on college campuses. A maximum recruiting campaign must be conducted within a strict time limit set by the colleges.

International Business Machines, competing with other large companies for top college students, decided that pre-recruitment through automated slidefilms would be one of the best ways to improve and speed up its recruitment and employment campaign. The films are shown on Beseler Salesmate automatic projectors, which have a built-in screen and are self-winding.

Two new films of the IBM program have recently been completed, to complement a first film released some time ago. Lane-Cole-Dietz Corporation, New York audience communication firm, which produced the two new films, is scheduling creation of still another for release in the near future.

For Your Consideration, one of the new films, gives college seniors and graduates waiting to be interviewed by IBM recruiters a quick orientation of IBM, its job opportunities and what to expect during the interview. With ingenious use of color and humor, the film speeds up the interview by answering beforehand many questions usually asked the recruiter. To make the showing of these slidefilms in anterooms and classroom halls acceptable to colleges, the continuous slidefilms may be used with multiple sets of earphones.

To complete the recruitment process, L-C-D also has produced *Welcome,* an orientation slidefilm to be shown to every new IBM employee on the morning of the first day he or she first reports to work at a branch office. It explains IBM office procedures and employee benefits and puts the employee at ease in the new job. Every IBM office in the country shows the film, which standardizes indoctrination procedures throughout the organization.

Jim's last day at work *is a time for looking ahead but when job promises fall through the future suddenly becomes uncertain . . .*

Driven by desperation *and his wife's urging, Jim agrees to give his State Employment Service a try. (Scenes from "A Man Is a Job")*

Improving Your State Employment Services

State and Federal Agencies' Wider Use Is Aim of "A Man Is a Job"

SPONSOR: New York State Employment Service and the United States Employment Service.

TITLE: *A Man Is a Job*, 23½ min. b/w., produced by Henry Strauss & Co.

At this time, when chronic unemployment has reached a twenty-year high . . . and a fully-functioning economy has been given national priority . . . it's paradoxical that much valuable talent available to industry and the community goes begging or is employed at much less than full capacity.

Equally paradoxical is the fact that the United States Employment Service, with an unmatched record of finding jobs for others, often does not find full employment for itself. Too many employers and too many job-seekers don't know about, or have faith in, the skill, knowledge and experience the Employment Services have to offer. The implications for the health and productivity of our entire economy are serious . . . the effects on individuals are often needless frustration and hardship.

Part of Interlocking Federal System

As a result, the New York State Employment Service, which is part of the whole Federal system of interlocking job-finding services, has decided, at the request of the Federal Government, to stir itself up internally; and, at the same time, to rouse more recognition and demand for its facilities and those of all the other State Employment Services.

Both these goals are closely interrelated. Only if Employment Service people themselves have both strong *emotional* feelings and clear *intellectual* understanding of the need for broadening the scope of their work, can they produce the desired acceptance by employers and job-seekers. In turn, public attitudes encountered in their daily work have an obvious effect on morale and job outlook of Employment Service people.

To attack this problem, the New York State Employment Service enlisted the cooperation of Henry Strauss & Co., looking to this company's broad experience in attitude development. The result of this collaboration is a current motion picture, with integrated discussion and training materials, titled *A Man Is a Job*. This program was designed to:

1. Change negative attitudes toward the Service by dispelling some popular misconceptions.
2. Build positive attitudes of interest, confidence and respect.
3. Tell the factual story of the Service's work.
4. Stimulate employers and job-seekers to wider use of State Employment Services, particularly for executive and professional placement.
5. Orient, or re-orient, Service people with new insights into the nature and importance of their responsibilities—plus the human relations, promotional and personal contact responsibilities involved.

Story Has Strong Emotional Impact

The plot of *A Man Is a Job*, which skillfully weaves these various elements into a unified pattern with sharp emotional impact, revolves around three people. First there is Jim Gordon—a skilled, experienced, cost-accountant—representative of the type of high-level person the Service is increasingly interested in placing.

Out of a job because of a merger, Jim doesn't worry too much at first—he has friends and he's had offers. But as the weeks go by and nothing materializes, his courage and self-respect begin to falter. Still, he is reluctant to come to the Employment Service.

"What, Me Go to the State Office?"

As he puts it, "Look, I'm not a laborer. I'm not going to stand with a long line of unemployed in a crowded, dirty office. What's a real company going to think of me if I come from the State Employment Service?"

Jim finally does go . . . out of desperation . . . but hesitantly and with a chip on his shoulder. Here he meets the second protagonist—Bob Tyler, a capable, interested interviewer working to thaw Jim's obvious nervous hostility. Bob sees his job . . . and the job of the Employment Service . . . not simply as getting a man off the unemployment roles, but doing the kind of evaluation and "selling" job

Wide-Screen View as

Lever Introduces New Liquid "all"

SPONSOR: Lever Brothers, for Liquid "all."

TITLE: *Introduction of New Liquid "all,"* color, produced by Visualscope, Inc.

☆ Within a ten-day period recently, 300 Lever Brothers salesmen in every part of the country were introduced to a new product, Liquid "all," which is expected to take a significant part of the market for clothes washing products within a short time.

Six units of demonstrators armed with a wide-screen slide-film toured the country for simultaneous introduction of the product. Equipment used consisted of DuKane projectors, with special Visualscope anamorphic lenses, and 4½ by 12 foot screens.

New products are a constant circumstance in the grocery business—50% of all the products on the shelves today are less than ten years old. Liquid "all" looks like a winner because the sales curve of automatic washers is rising—surpassing the proportion of low-sudsing detergents (on which the automatics thrive) to high-sudsing detergents now being sold. And liquids are finding ever-increasing favor among housewives.

Thus, with a strong marketing program planned, and the first major, low-suds liquid to be introduced, Lever Brothers is aiming high for the new "all" product. And the wide-screen presentation has played an important part in getting the product off to a fast start.

* * *

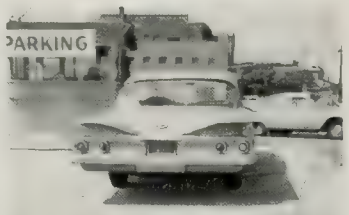
Foot Care for TV

SPONSOR: International Shoe Company.

TITLE: *Now, Look Here, Harry,* 12½ min., b/w, produced by MGM-TV, Metro-Goldwyn-Mayer, Inc.

☆ This is a television clinic that features a wife's explanation of what good foot care can mean for the family. It discusses various shoe problems in giving pointers for foot hygiene, including regular measurement of feet and the selection of proper shoes.

The film is available on free loan to television stations through all offices of Modern TV, 3 East 54th Street, New York.



"Step Out on Color" With DuPont Nylon

Strength, Color Qualities Visualized for Carpet Customers

SPONSOR: E. I. du Pont de Nemours & Company, Inc.

TITLE: *Step Out on Color,* 17½ min., color, produced by Audio Productions, Inc.

☆ A colorful invitation has come from Du Pont's Textile Fabrics Department to learn the fundamentals of something we all stand on—carpets. *Step Out on Color,* a definitive documentary on nylon carpets, was previewed at the International Home Furnishings Market at Chicago in January.

At left: *nylon carpet was laid out on parking lot for weeks of punishing "torture" tests.*

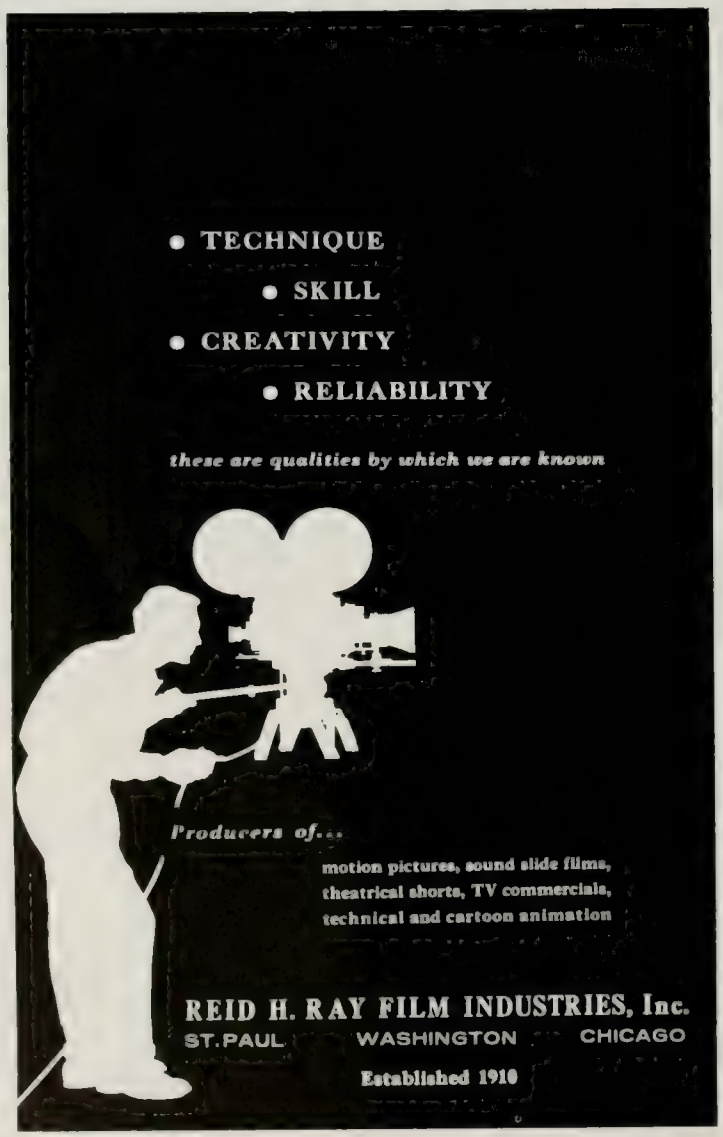
Emphasizing styles in new Du Pont 501 carpet nylon, the film takes the audience to several mills to describe the three major methods of carpet making—(weaving, tufting and knitting)—and dyeing. Other stops include a parking lot, country club locker room and a crowded lobby to illustrate durability and cleanability, and to

Beauty of interior decor *was achieved by use of this colorful, rugged, nylon carpeting.*

a home furnishings store to view samples.

Torture Test for Nylon

Particularly impressive is the scene of a nylon carpet laid across the entrance to a parking lot to take whatever punishment was handed out—which was plenty. After several weeks of this torture the carpet was cut in half and one half was cleaned. The film shows convincingly how the full clear color and texture came back to life.



Another striking sequence portrays the needles of a carpet "knitting" machine purling nylon at amazing speeds, and then again in slow motion. Du Pont's new 501 nylon is shown to be similar to the material used in the sheerest hosiery and lingerie, but actually stronger than steel wire, weight for weight.

A sequence on decorating highlights patterns and colors used to create moods through the selective use of carpets.

Primarily for Consumers

Designed primarily for showing to retailers' customers, *Step Out on Color* will also be made available to schools and women's clubs. Distribution will be handled through regional offices of mills participating in the 501 nylon program—(Barwick, Bigelow, Cabin Crafts, Callaway, Lees, Monarch, Patcraft, Alexander Smith, Wunda Weve)—and directly through Du Pont, Wilmington 98, Delaware.

Magna's Mobile Video Unit

☆ Magna Film Productions, Boston, has installed what is said to be the first mobile television tape recording unit in New England. The recorder is an Ampex 1001A compact model and is mounted in a walk-in panel truck. The VTR thus may be used for recording on location, or connected to studio facilities at Magna's new film and TV operations center at 55 Berkeley Street.

Nutrition Pointers for Young Homemakers

"Case of Bewildered Bride" Informs While It Entertains

SPONSOR: The Carnation Company.

TITLE: *The Case of the Bewildered Bride*, 20 min., color, produced by Parthenon Pictures—Hollywood.

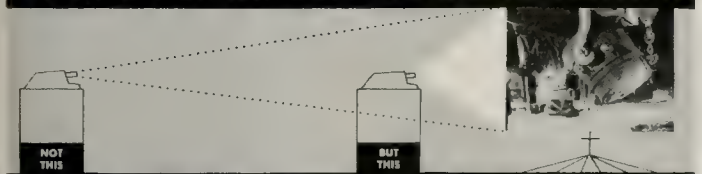
The Carnation Company has long recognized that high on its customer and potential-customer list are two groups—the young homemaker, and the high school girl who will soon enter that category. With this in mind, a new film was addressed primarily to this audience to inform them of the "good life" that will reward proper family nutrition practices.

The Case of the Bewildered Bride tells a charming and witty story that is a bit offbeat, yet informative and convincing. Its format insures that the attention of even the most squirmy elementary or high school home economics student won't wander much.

The film concerns Jill (the "Bewildered Bride") and her problems. To begin with, she discovers on their first morning at home after the honeymoon that husband George has invited both sets of parents for dinner that night. Jill has never been initiated to the complexities of proper planning, marketing or nutrition, and begins to realize her shortcomings.

She's further panicked by the realization that George's father considers himself somewhat of a gourmet, and this will be her first chance to prove that his son did not marry an idiot child bride.

Carnation's "bride" *faces a bewildering array of kitchen aids . . .*



Despite her determination, her shopping for dinner ends in disaster.

Help comes from her sister Jeannie, a Home Economics teacher, who explains the necessity for proper planning and organization, plus the effects of proper and improper nutrition on family life. As Jeannie talks, these points are illustrated in "dream" sequences.

Jeannie gets to the problem at hand by outlining suggestions for a nourishing and appetizing menu. Then Jill goes to work, and not only does wonders, but has fun doing it. The meal is a success, and even George's father smiles with pleasure and approval.

The Case of the Bewildered Bride, produced by Parthenon Pictures of Hollywood, has some unusual visual production. Writing, directing and producing were handled by Charles "Cap" Palmer and John E. R. McDougall. The film will be distributed by Sterling-Movies U.S.A.

Develop Better Supervisors and Managers With

Modern Management Films

Make your supervisors better leaders with Modern Management Films, produced in full color and sound by The Bureau of National Affairs.

These 16-mm films present typical supervisory situations and suggest solutions to supervisory problems in an interesting and stimulating way. They are designed to precede and encourage group discussions.

Each film is about 10 minutes long, and is supplemented by a discussion leader's guide. A 95-member advisory panel of leading industrial executives suggests subjects and reviews scripts to make sure they are realistic and sound in principle.

More than 1,000 firms have successfully used the first Modern Management film, "LISTEN, PLEASE." We now offer a library of four films:

LISTEN, PLEASE... a series of situations in a supervisor's typical day which emphasize the importance of *listening* and *communicating*.

THE CASE OF THE MISSING MAGNETS... showing how a supervisor can motivate employees for better teamwork and production.

INSTRUCTIONS OR OBSTRUCTIONS... Dr. Paul Pigors of M.I.T. demonstrates the primary task of supervision: *giving orders and instructions to others.*

THE CHALLENGE OF LEADERSHIP... a dramatic demonstration of leadership. Designed to stimulate supervisory thinking about leadership skills.

Available for purchase or rental.
Executive previews can be arranged. Write:

"Plus" Audiences for Sponsored Pictures

Nuclear Ship Prints Hit College Circuit After Use on TV

SAM ORLEANS, film producer in Knoxville, Tennessee, has found another way to get extra mileage from motion picture prints after they have completed the television circuit. He offers them to colleges and universities throughout the nation, and the response indicates an enthusiastic audience on tap—long after television and general bookings have been exhausted.

A case in point is the quarter-hour television version of *Full Speed Ahead*, first of a three-part series of documentaries on the Nuclear Ship Savannah, the first nuclear powered passenger and cargo surface vessel.

Produced by Sam Orleans

Full Speed Ahead was produced by Sam Orleans for the U. S. Maritime Administration and the Atomic Energy Commission. The television version and its distribution was financed by the ship's contractors, Babcock & Wilcox Co., New York Shipbuilding Corporation, States Marine Lines and DeLaval Steam Turbine Company.

Full Speed Ahead depicts the initial undertaking of the nuclear ship project. In minute and graphic detail it follows the inception stage of the N. S. Savannah from designer's dream to keel laying, with Mrs. Richard Nixon as sponsor. A study of contrasts and comparisons is offered between this Twentieth Century marvel and the marvel of 137 years ago for which it was named—the first steam powered ship to cross the Atlantic.

Premiered in Washington

The film was premiered in Washington, D. C., for AEC and U. S. Maritime Administration officials and their guests, shipbuilders, industrialists from many fields, and representatives of interested government agencies.

Their expressed approval gave impetus to the film's distribution—on television, in theaters, and for private and general bookings across the nation. Prints were circulated for use at civic club and patriotic organization meetings. An estimated 10,000,000 viewers watched the N. S. Savannah's highly technical, but understandably narrated birth pangs.

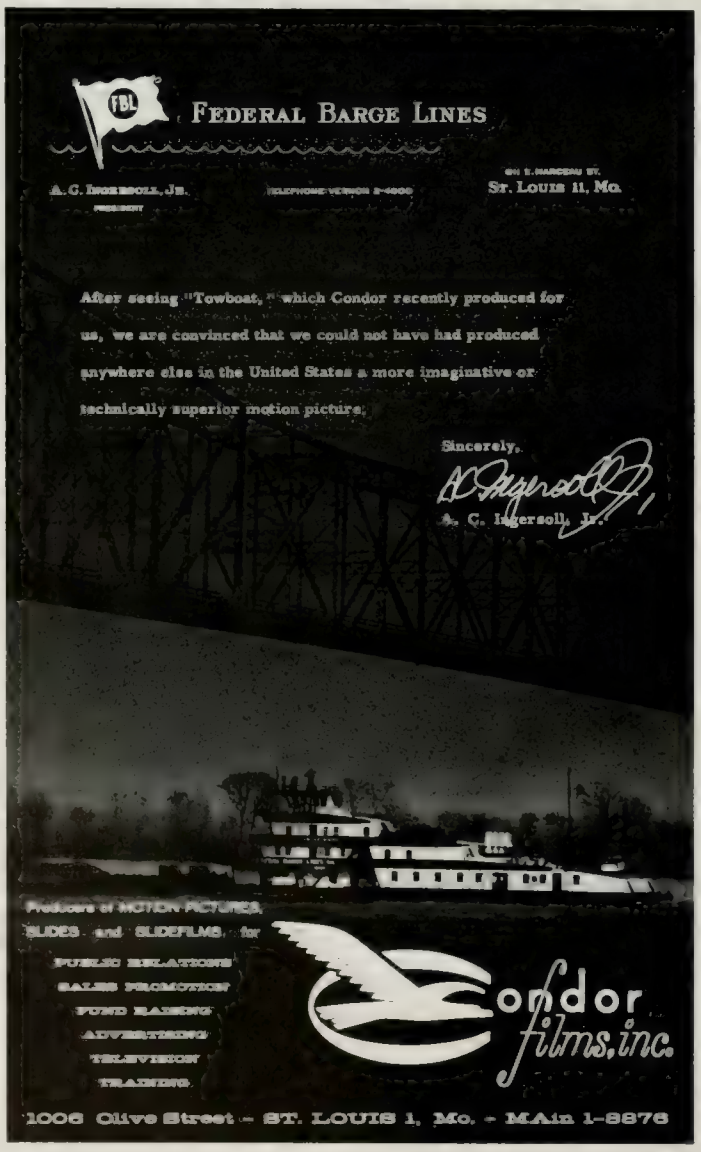
Then it seemed all sources of distribution had been exhausted. Should the film go on the shelf? Sam Orleans thought not. He sent out letters of inquiry to top colleges and universities and to lesser known technical schools throughout the country. Would not the easily digested technical information contained in *Full Speed Ahead* be interesting and beneficial to their engineering students?

The answer was a definite "Yes" in all cases. The AEC and USMA approved the plan, and the 100 television prints went out on their new rounds, showing students how the N. S. Savannah became the testing ground for remarkable new theories in atomic power for sea craft.

Second Film on Television

Even as the first students were viewing the picture and studying the hows and whys of the placement of superstructure to make room for control rods and reactor of the atomic power plant and steam generators, the N. S. Savannah was being filmed by Sam Orleans and Associates for another film, *Under Way*.

Maritime rep. Pat Pattison (*in white helmet*) *on ship with producer Orleans* (*r*) *and cameraman.*



This second film of the series is now being distributed country-wide by Sterling-Movies, U. S. A., for 400 or more telecasts; bookings are being made on television stations; requests are piling up for private showings through AEC and Maritime Administration information offices. And when the regular route is run, 150 engineering schools will be waiting to receive prints for the enlightenment of their students.

Also Slated for Students

Production of the final phase of the N. S. Savannah series will detail the installation of reactor controls, dry locking, painting, interior appointments, sea trials, and arrival at the first port of call. This film, too, will find a second life among the nation's undergraduates.

Like *Full Speed Ahead* and *Under Way*, this as yet unnamed project will gather no dust on the producer's shelf for years to come.

RCA Expands Marketing Setup; A. Cortese Heads Eastern Sales

In the first move toward expansion of its marketing organization for audio-visual products, the Radio Corporation of America has appointed Alighiero Cortese as manager of Eastern sales.

In the newly-created position, Cortese will direct sales of all RCA audio-visual equipment and electronic training devices in states east of the Mississippi River, with headquarters in Camden, New Jersey.

Growing sales volume of RCA's product line, including 16mm sound motion picture projectors, language laboratories, tape recorders, sound systems and auxiliary equipment, prompted the expansion of the marketing setup, and a Western division is being organized.

Cortese has a background of nearly twenty years in the a-v products field, and was formerly district and regional sales manager with the Stromberg-Carlson Division of General Dynamics Corporation.

Phillips' Dealers Meet Mystery Ladies

Annual Sales Program Alerts Company Dealers to Women Prospects as 1960's Film Stars Return to Give Prizes

A MYSTERY that was introduced to 16,000 Phillips 66 dealers in early 1960 is finally being solved. The question: Who is (or *was*) the Phillips Super Mystery Motorist?

The answer is revealed in a new, 22-minute color motion picture, *If You Ask Me*, being shown at dealers' sales meetings across the country.

Centron Corporation, Inc., business communication firm of Lawrence, Kansas, produced the film and meeting as a follow-up to the 1960 meeting, *The Secret of the Sixties*. (BUSINESS SCREEN, Vol. 21, Number 3).

One of the features of the 1960 filmed and live-action meeting was Anita Bryant, popular television and recording star, singing about *The Mystery Lady*. The mystery lady was actually several women who drove more than 60,000 miles in 1960, visiting Phillips stations, helping to select the most deserving station operators for a $1,000 award.

Women Visit the Dealers

If You Ask Me points up the potential sales to women customers. Portraying the Super Mystery Motorist in the film is Miss Athena Lord, popular radio and screen actress from New York—she represents the "typical" mystery motorist as she traveled throughout the country. Centron crews filmed the re-enactment of her visits to prize-winning stations in Richmond, Va.; Pendleton, Ore.; Dayton, Ohio, and Topeka, Kansas.

Some of the award-winning dealers appear in the film in a re-enactment of the Mystery Lady's visit. Two of the actual Mystery Ladies, Alice Eakin and Ann Smith, appear at the end of the film to explain their role in the Phillips 66 Service Jackpot.

Service, Courtesy Incentives

Centering on good driveway service, cleanliness and courtesy, the contest was an incentive program geared to recognize the top Phillips dealers. But more important, the plan acquaints the dealers with the fact that women drivers are a group of prime importance in buying motoring products.

The Phillips company, impressed with the reception of the 1960 sales meeting, decided that another effective film would be the most dramatic way to present to the dealers the findings of the Super Mystery Motorist incentive program.

How Dealers Were Judged

The Super Mystery Lady, on her cross-country stops, judged stations on three categories: service, cleanliness and courtesy. The attendant's customer greeting, window cleaning, whisk broom service, tire checking and the manner of transacting business were noted. On the point of courtesy, the willingness to assist customers was stressed highest.

The station itself was evaluated on appearance and cleanliness. Exterior displays, overall station appearance (including office, rest rooms and lube room) and personnel appearance counted high.

The film's title, *If You Ask Me*, has two meanings. It introduces the sharing of a confidence (if you ask *me* . . .), but it is also a plea for more aggressive selling. Customers rarely buy unless they are asked to buy. The Mystery Lady suggests that opportunities for greater sales are possible—"If you *ask* me to buy it from you, I may say YES!"

"On set" at Centron with Athena Lord and Phillips' Mystery Ladies.

The Ladies Had Problems

The Mystery Ladies who participated in the program from the driver's seat were not without problems. One that had to be solved, over and over again, was the matter of getting rid of the gas in the tank in order to drive up to the next station and answer "yes" to the question:

"Fill it with Flite-Fuel, ma'am?"

This problem was solved by connecting a small pump to the tank that would drain half the fuel with just a flick of a switch. Other problems, from loneliness to getting lost, plagued the drivers. But the Mystery Ladies agreed that the pleasures of the trips outweighed the complaints.

Two Other Meeting Pictures

Phillips jobbers and salesmen also viewed two other Centron films at their recent sales meetings. The two, *Payoff at Las Vegas* and *Payoff at Pier 66*, were 5-minute previews of the top prizes in the Jobber Salesman Contest . . . a trip to Florida or to Las Vegas awaits the salesman with the greatest percentage increase in his personal sales record.

"Image Makers" Offers Moral for Business

Good New Pepsi Cola Film on Public's Reaction to Employees

SPONSOR: The Pepsi Cola Company.

TITLE: *Image Makers*, 22 min., color, produced by Don Nestingen Associates.

A recurrent Pepsi Cola problem—a problem of every marketing concern—is to get across the importance of a good corporate image down through all levels of the company and its dealers. But, how does a company communicate such complex ideas as "consumer motivation" and "image making" to the employee in the plant, or the route salesman on the delivery truck, who knows very little of the terminology of advertising and public relations and cares less?

The solution to this difficult communications job for Pepsi Cola has been a new film called *Image Makers*, a tremendous one-man performance by Pepsi sales engineer, Ted Wielkopolski, with a brief assist from another Pepsi image, Mrs. Joan Crawford Steele.

They Meet the People . . .

Basically, the picture makes only one point: the impression that the public has of Pepsi Cola is created by each and every employee; the way he does his job, by what he does, by what he says and how he acts toward the public while on the job, and how he maintains the Pepsi Cola plants and trucks and equipment.

Throughout the film this idea is developed and amplified with examples that are easily understood by production personnel, route salesmen and office people.

Ted Wielkopolski is featured throughout the film to develop the idea, and he has the impact of a zany but superior pitchman in his ability to hold the attention of the audience. At times he is the serious business man, appealing to the audience to understand the seriousness of his message; and then suddenly he becomes an oddball employee, so delightfully exaggerated that employees are not offended, but he makes a graphic visual point each time.

Remember What They See

In good motion picture practice, the things that the audience will remember from *Image Makers* are mainly what they see rather than what they hear.

They are asked to look at two women's shoes, one scuffed and dirty and worn, the other trim and neat, and to imagine the type of woman that would wear each of these shoes. They are amused by a Mack Sennett-inspired sequence of an unshaven and crude driver-salesman who is working in a terrible rage; and they enjoy, in contrast, seeing a smart Pepsi route salesman making a delivery.

Because these examples are based on a real understanding of the feelings of all Pepsi people, employees enjoy watching the film. The thought is that they will catch themselves in many day-to-day situations, tending toward the attitudes they saw exaggerated on the screen, and that most people would generally rather be the "good guy" than the "bad guy."

80% of Bottlers Use Films

Image Makers is one of a library of company films now in use by Pepsi Cola bottlers. Of the 541 American bottlers, over 80% use the films, which are both motion pictures and slidefilms.

Meeting Our Goals for Skilled Workers

SPONSOR: The Sears-Roebuck Foundation.

TITLE: *Knowledge and Skills*, 20 min., color.

It has become a talking point that the nation's youth must increasingly be cast in the mold of atomic physicists or other high-level scientists. This may be a laudable aim, but our scientific and technological establishment cannot exist with all generals and no soldiers. We need skilled technical workers almost more than scientists.

While serious areas of unemployment exist in many parts of the country—in the same areas are shortages of skilled workers—excellent jobs with no qualified takers.

This film is a special report on tomorrow's skilled people, training in the Trade and Industrial program of the public schools, a program known as T & I. The purpose of the T & I program is to prepare people for useful employment by offering practical technical experience along with textbook theory.

The picture shows how the Federal government encourages this type of vocational training.

Dr. John P. Walsh, Director of Trade and Industrial Education in Washington, makes his own report in the film.

What happens when this educational program becomes a part of a typical American town is the main point made in the film. The program is significant not only to students but to prospective employers in every community and to the communities themselves. The film reports on various adult education activities as well as on programs for high school students.

Knowledge and Skills is available on free loan from all offices of Modern Talking Picture Service, 3 E. 54th Street, New York.

Form Systems Technology Films, an Affiliate of Marathon Intl.

A new production firm, Systems Technology Films, Inc., has been formed in New York to produce films designed to help solve problems involved in integrating new, complex concepts and materials into both planned and existing manufactures. The new company is an affiliate of Marathon International Productions, Inc.

According to Eric Swarthe, managing director, STF will specialize in films to complement the approach of a sales engineer, particularly those which call for exposition of complex and often ponderous equipment together with intricate terms and information.

Before joining STF as managing director, Swarthe was a project engineer at RCA. He also served as senior design and development engineer with North American Aviation, working on the design of radiation test carts, automatic check-out of air-borne systems, and missile check-out instrumentation and electronic product design. Swarthe served as senior instrument engineer with Ralph M. Parsons Company, of Los Angeles, where he worked on development of a nuclear blast detection system, designed a computer controlled process for propellant manufacturing, and made instrumentation studies for the Mercury "Man in Space" project.

President of Systems Technology Films is Hanns E. Hecker, a mechanical and naval engineering graduate of both Stuttgart and Hamburg universities. Kenneth Baldwin, Marathon production supervisor, was appointed vice-president, and Marathon president, Konstantin Kalser, becomes chairman of the board.

Film Portrait of Vanderbilt University

"Our Greatest Task" Brings Alumni to Campus of Today to Support National Committee's $30 Million Campaign

YOU KNOW, it's a great feeling coming back to the campus—after you've been away 15, 20 or more years!" says an alumnus.

And it's this same feeling that will be aroused in other alumni of Vanderbilt University when they revisit their alma mater through the University's new motion picture, *Our Greatest Task*.

Scenes of College Life

Filmed for the University's National Development Committee as part of the $30 Million for Vanderbilt Campaign, the 16mm color motion picture is filled with scenes that remind the alumni viewers of their college days . . . Homecoming, the football game and pretty coeds . . . the campus and the statue of Commodore Vanderbilt . . . the classrooms, and students with books under their arms.

Classrooms, students and their education—the link between those days past, the present and the future.

As An Alumnus Sees It

An alumnus, the film's representative of all Vanderbilt alumni, sees the great strides the university has taken in the years since he has graduated. He is proud, but he is mindful of the fact that much more remains to be done in the years ahead for the proper education of our nation's leaders-to-be.

Along with the beautifully photographed glory of a dynamic university, he sees overcrowded classes and realizes the significance of the fact that classrooms built 25, 30 or 40 years ago are no longer adequate. New facilities, and an enlarged faculty program must be part of the future if Vanderbilt is to maintain her proud heritage as a foremost educational institution, the film says.

The camera sweeps the campus to show graphically the school's needs. Physical accommodations for classes are crowded, laboratories need to be expanded and equipped, new buildings are necessary, and this can be done with the support of the alumni.

New Tools for Learning

The film specifically says and shows that new training and educational tools, such as atomic reactors and giant computers, run into more money than the training tools of the past, but there is no commercial "hard sell" to urge support of the $30 Million for Vanderbilt Campaign. Rather, by recreating an identification with the school for its alumni, and by inspiring pride in the association, the National Development Committee hopes that Vanderbilt's alumni, the primary audience of the film, will respond with an overwhelming support for the campaign.

The production crew of Cal Dunn Studios, Chicago, spent three weeks on location on the campus in Nashville, Tennessee. The color and excitement of Homecoming are real—footage was shot in the midst of the annual festivities last October.

Build High Camera Platform

For a sequence featuring the statue of Founder Cornelius Vanderbilt, the camera crew did some scrambling. In order to picture the campus as seen from the Commodore's point of view, a 30-ft. high platform was constructed behind the statue, and the camera was aimed past the statue's head.

Throughout the film, excellently used color lighting enhances interior shots to set off the subject and add photographic interest. The score features the Vanderbilt band, the campus carillon atop Kirkland Hall, and the Alma Mater by Vanderbilt's Glee Club.

The heart of the film's message is presented in the actual filmed meeting of the University's Board of Trust. Fifty of the nation's top-ranking financial, indus-

trial and educational leaders are shown in attendance, along with leading members: Harvie Branscomb, Chancellor of the University; Eldon Stevenson, Jr., president of National Life & Accident Insurance Company; Harold S.

During filming of Vanderbilt scene, *producer Cal Dunn (right) chats with Harold Vanderbilt (2nd from left). Others (l to r): financier Henry Alexander; Chancellor Branscomb, talking with Eldon Stevenson.*

Vanderbilt, kin of the founder and New York financier, and Henry C. Alexander, chairman of the board of Morgan Guaranty Trust Company.

Mr. Stevenson, chairman of the school's National Development Committee, addresses the Board —and all alumni—with a reminder that with the help of all, Vanderbilt can continue to improve its quality, and can continue to grow. "A great future lies ahead. But to meet this future our University needs every one of us. This is the greatest task our University ever has faced."

As the camera pans the present crop of students, an anonymous Voice of the University intones that ". . . the future of Vanderbilt must be built not by the philanthropy of a few, but by the generosity of many."

The effective script was written by Helen A. Krupka of Cal Dunn Studios. *Our Greatest Task* was produced by Joe Betzer and Cal Dunn, and directed by Cal Dunn; Arthur Haug was on camera, Arthur Ellis edited.

The 33½-minute motion picture was produced for the Office of the Development Foundation of the University for use in connection with the National Development Committee's meetings before alumni and other interested groups across the country.

The Kellogg Company Opens New Power Piping Plant

SPONSOR: Power Piping Division, the M. W. Kellogg Company.

TITLE: *Power Piping*, 18 min., color, produced by Don Nestingen Associates.

This up-to-date report on power piping for electric generating stations and for industrial users as well, shows the importance of good piping in large central stations of utility companies.

Then the film serves as a guide through the Kellogg company's new power piping plant in Williamsport, Pa., said to be the most modern plant ever designed for this purpose.

Power Piping is intended for the management and engineering staff of industrial concerns and utility companies. It shows what power piping is, what it does, how it is made and erected. The film is available from offices of Modern Talking Picture Service.

What's NEWS in Visual Communication

Film Service Companies and Manufacturers Expand Facilities

N. Y. Film Editing Firm Moves, Adds Sound Recording Service

JF Film Editing & Sound Co., Inc., has moved to new facilities at 45 West 45th Street, New York, and has expanded its film production services to include sound recording and transfer, as well as the film editing service the firm has conducted for leading producers in the past several years.

The new JF layout features four complete and newly equipped cutting rooms, 16mm and 35mm screening with interlock, a narration sound studio and Ampex and Magnasync recording and transfer facilities.

E. M. I., Spedy-Q and Standard sound effects libraries are now offered exclusively by the JF firm.

A recent major undertaking by JF's president, Josef Filopowic, is recording narration and editing film for a new TV series, *Magic Moments in Sports*. The series consists of 365 five-minute films narrated by Leo Durocher, and produced by Javelin Productions.

Viewlex Opens New Plant Bldg., Expands Research, Development

Viewlex, Inc., designer and manufacturer of photographic, mechanical and electronic products for industrial, commercial and educational markets, as well as for the military services and defense installations, has opened a new plant and headquarters building.

The 60,000-square-foot plant incorporates the expansion of Viewlex's New Products—Research and Development Departments, which in the next three months will introduce five new products to the visual-aid and related industries.

Viewlex has produced recording machines for oscillograms used on the Nike program, aerial cameras for the highest altitude and supersonic aircraft, cameras and instruments for guided missiles and pilotless aircraft. One of the latest Viewlex developments is a special training system incorporating magnetic tape and slide projection systems so that visual and audible presentations are made on a fully automatic basis.

The completely modern and automated factory building has a board room furnished with the latest audio-visual equipment, and the most up-to-date intercommunication systems. The new plant is located on Veteran's Memorial Highway, Holbrook, L.I.

Younger, Boris Join Beseler's Salesmate Div. in Expansion

The recent expansion of the Salesmate Division of Charles Beseler Company brings the appointment of two new executives to Salesmate's staff.

Charles A. Younger becomes Senior Project Engineer, and Jack Boris joins as the Division's Eastern Sales Manager.

Younger will be in charge of the Division's technical development and field service sections, and will work closely with the film and tape labs that produce sound slidefilms for the Salesmate viewer. He was formerly associated with national broadcasting networks, Warner Bros., RKO Pathe, and was a pioneer in the development of video tape, kinescope and sound-on-film. He is a member of SMPTE and Broadcast Pioneers.

Shown (*l to r*): *Jack Boris; Bob Shoemaker and Charles Younger.*

Boris will head the Division's sales in Eastern states, including New England and the Middle Atlantic region. He was formerly vice-president of the International Swimming Pool Corp., and business management consultant with the George S. May Company.

Frisco's Palmer Films Offers Technical Services to Producers

A complete technical service facility in the West for producers of 16mm motion pictures is now available at W. A. Palmer Films, Inc., San Francisco.

The company, established in 1936 as a film producer, is no longer engaged in direct film production. A change in policy is now providing other producers with top quality recording and printing techniques developed for years.

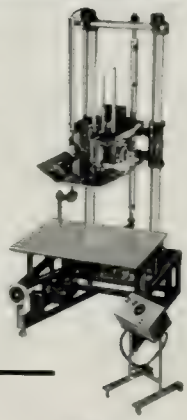
W. A. Palmer, a registered engineer recognized for his contributions to 16mm film recording and duplication, will continue to serve as president of the re-oriented company. He describes the new Palmer service facility as a "one stop" operation, providing the in-industry film-maker and the independent producer with every essential service under one roof.

The company provides published, uniform costs so that a producer can budget accurately and maintain complete control of the film-making process.

Technical services include editorial, photographic, recording (including mobile kinescope), art, title and animation and screening. A Palmer pioneered technique of film communication, "Live-Camera," derived from the fluid, continuous takes of the TV cameras, offers the industrial film maker unusual advantages in versatility, efficiency, short production time, speed in finishing and economy.

Producers may write for information to W. A. Palmer Films, Inc., 611 Howard Street, San Francisco, Calif.

New! PACKAGE PROGRAMS
OXBERRY MASTER SERIES



FOR SLIDE-FILMSTRIP

OXBERRY AUTOFOCUS SLIDE-FILMSTRIP STAND Model FS-4300

This Master Series Stand has been designed for high speed, top quality film strip production. Autofocus combined with automatic rackover and lamp that projects aperture onto table top are invaluable in quickly positioning various sized pieces of art work. Receives up to 35" art work. Accessories may be ordered to include animation components, other lenses, double aperture shuttle, top lighting, etc.

BASIC STAND: Welded steel base, ground steel 4½" diameter dual columns. Ball bearing camera carriage, manual drive. Foursided zoom scale. Shadowboard. Fixed table top 36" x 48" has 9" x 12" hole in center with removable glass and wood inserts. Overall height 11'4", width 48", depth 58".

News Along the Film Production Lines

Kansas City Film Firm Expands, Now Named Horizon Productions

Horizon Productions, Division of Longmoor-Nelson, Inc., is the new name of the Kansas City film production firm formerly known as Basore-Longmoor, Inc.

The fourteen-year-old company, producer of 16mm and 35mm films for sales, sales training, public relations, educational and religious fields, and of television films and commercials, has expanded to much larger quarters at 301 W. 73rd St., Kansas City, Mo.

The new quarters provide some 12,000 square feet of floor space, including a 4,200-square-foot sound stage, additional studio and office space, more room for film and sound equipment and for storage as well as movement of scenery and props.

In addition, Longmoor-Nelson, Inc., has an option on adjoining property for further expansion.

The new name, Horizon Productions, has been adopted to indicate the company's philosophy and scope of services, said William V. Longmoor, president and general manager.

Spence Caldwell Active in Plans for Canadian Television Network

Negotiations for network television in Canada were carried on recently by Spence Caldwell, president, and Gordon Keeble, vice-president, of S. W. Caldwell Ltd., Toronto, during a circuit of the Western provinces.

The purpose of their trip was to discuss affiliation details of the proposed Canadian Television Network with the second TV stations in Winnipeg, Calgary and Vancouver, and with CFRN-TV Edmonton. Also under discussion was the matter of programming, both to and from the CTN.

Transfilm-Caravel Office Moves

Transfilm-Caravel Incorporated has moved its executive offices to 445 Park Avenue, New York 22, N. Y., occupying the entire 16th floor. The Film Production Division remains at 20 West End Avenue, New York 23, N. Y. New telephone number for both is PLaza 2-4100.

Transfilm-Caravel, producers of TV commercials, industrial films and live business shows, was formerly located at 35 West 45th Street, New York, N. Y.

TV Film's Graphic Demonstration Dramatizes Scientific Research

An example of the visual media put to use graphically and effectively to demonstrate a theory or method is seen in a television commercial for E. I. du Pont de Nemours & Company.

In order to show du Pont's basic research into the effects of high pressure on various chemical substances, an unusual demonstration was devised by Dr. Harold Young of du Pont's Experimental Station and Dr. Jonathan Karas of Jonathan Karas & Associates, Durham, New Hampshire.

A jet of water at a pressure of 60,000 pounds per square inch was used to "punch" a hole through a glass plate without shattering it. Other demonstrations include experiments with a high-temperature insulation material which allows a red-hot bolt to be held safely. An oxyacetylene torch, which produces one of man's hottest flames, is used to melt a slab of copper separated from a man's bare hand by only an inch of insulating material.

The demonstration commercial was first used on du Pont's television *Show of the Month*, February 18th via networks.

News of Staff Appointments Among Companies in the Field

Neal Keehn is Vice-President in Chg. Sales at General Lab

Neal Keehn has been named vice-president in charge of sales for General Film Laboratories, Hollywood, according to an announcement by William E. Gephart, Jr., president.

Keehn's duties will include direction of General's advertising and sales promotion, as well as national sales, and he will continue to edit General's monthly publication for film producers, THE REWIND.

After serving the past two years as regional vice-president in charge of the Central Division office in Kansas City, he will now work out of the main office in Hollywood. Before joining General, Keehn was sales v-p of The Calvin Company, Kansas City, and director of the Calvin Workshop from its organization in 1947.

He was recently elected a Fellow of the Society of Motion Picture and Television Engineers.

* * *

Ted Jacobsen is Sales Manager for Westrex Corp., in Hollywood

T. L. "Ted" Jacobsen is new sales manager for the Hollywood facility of the Westrex Corporation, a division of Litton Industries, according to an announcement by Manager Ralph Wight.

Jacobsen was formerly Eastern sales manager for the facility, which includes the Recording Equipment Department of Westrex. He has had more than 15 years' background in electronic design, project administration, product planning and marketing.

He holds a BSEE degree from Newark College of Engineering, and is a member of the Institute of Radio Engineers, the Society of Motion Picture and Television Engineers and the Armed Forces Communications and Electronics Association.

Staff Changes at Anthony Lane

Anthony Lane Studios, Inc., producer of industrial and educational films and still photography, with offices in Minneapolis, Hollywood and New York, announces two staff appointments.

E. J. Willette has been named sales manager at the studio's Minneapolis office, 7401 Wayzata Blvd. He is former field promotion representative for Janney, Semple, Hill and Co.

Neill McCaffrey is the new manager of the New York office. He is president of Jupiter Enterprises, New York.

Niles Appoints Robert J. Elenz Television Creative Director

Robert J. Elenz was appointed Television Creative Director for Fred Niles Productions, Inc., Chicago.

Elenz joined Niles from McCann-Erickson, Chicago, where he was a writer-producer since 1955. Prior to that he was on the radio-TV writing staff of Ruthrauff & Ryan for seven years.

Combining ad agency and motion picture experience, Elenz will work with agencies in the formulation of television-advertising campaign. Elenz' appointment provides Niles with "another executive who can approach TV advertising from an agency point of view," said Fred Niles.

Elenz wrote the copy on the Milk Foundation of Chicago's award-winning advertisement in 1959, serviced through McCann-Erickson, which won first place in the milk industry's national competition. He has also produced and directed convention shows for Autolite and General Outdoor Advertising.

* * *

Mucciolo Named V-P of Gerald Prods. and Affiliated Firm

Louis Mucciolo has joined Gerald Productions, Inc., as executive vice-president. He will also function as vice-president of Advertising, Radio and Television Services, Inc., an affiliate of the Gerald firm.

Mucciolo was formerly with Robert Lawrence Productions.

Michael Palma Is Executive of T.F.P., Div. of Buckeye Corp.

Michael A. Palma, executive vice-president of Transfilm-Caravel Incorporated, has been appointed vice-president and chief financial officer of T.F.P., Inc., the entertainment division of The Buckeye Corporation, according to T.F.P. President Samuel F. Rubin.

Palma will also handle financial, operational and administrative affairs of Transfilm-Caravel, Flamingo Films, Pyramid Productions and their subsidiaries, all of which comprise T.F.P.

The combined companies in T.F.P. produce and distribute filmed programs for television, commercials, industrial films and live business shows.

* * *

Kranz, Bernard Are Promoted at Robert Lawrence Productions

Ben Kranz has been named a vice-president and senior producer, and Harold Bernard is the new editorial supervisor at Robert Lawrence Productions, New York.

Kranz has been a producer with the Lawrence firm since April. Previously, he had been a commercial production manager for Screen Gems, MPO and Filmways.

Bernard joined Lawrence in 1954. He had previously been with NBC and the U. S. Army Signal Corps.

* * *

Stan Popko, Director, in New Post at James Love Productions

Stan Popko, film art director, was appointed to the new position of Creative Director at James Love Productions, Inc., television commercial and motion picture producer in Princeton, N. J.

Popko has 13 years' experience working with producers, networks and advertising agencies developing TV commercials and documentaries. He has worked with NBC's creative departments on *Victory at Sea*, *Nightmare in Red*, *Jazz Age*, *The Coming of Christ*, and recently, the *Wisdom* Series and *White Paper*.

Most recently, he collaborated with CBS-TV's Twentieth Century division for their half-hour documentaries including *Ireland*, *LaGuardia*, *Japan's Changing Face*, *Paris in the 20's*, *Turn of the Century*, *Rommel* and *Ministry of Hate*.

* * *

Heads Crawley's Quebec Office

Arnold Shuster has been appointed general manager of Crawley Films Limited's expanding

Quebec market, it was announced by Graeme Fraser, vice-president.

Shuster, a graduate of Sir George Williams University in both Arts and Commerce, has a background in professional accountancy and in systems and procedures sales. He has also held senior management positions in both the data processing and microfilming fields.

Shuster's headquarters office will be at 1467 Mansfield St., Montreal, Canada.

* * *

Robert Borlek to Produce A-V Presentations for Ad Agency

Robert Borlek has been appointed to the newly created post of producer of visual communications in the public relations division of the Fuller & Smith & Ross Inc., advertising office in Chicago.

Borlek, a veteran actor and director of Chicago stage, screen and television productions, will be responsible for producing closed circuit television presentations, motion picture and sales meeting shows for client firms. He will also be in charge of the FSR Speaker's Bureau.

He has served as registrar and head of the drama department of Columbia College, a school of communications arts in Chicago. His acting and directing background includes work with top name stars, the Air Force, and private industry.

* * *

R. Tilton Heads Motion Picture Dept. at Brooks Photo Institute

Roger Tilton was appointed head of the Motion Picture Department of the Brooks Institute of Photography, Santa Barbara, California, it was announced by Ernest H. Brooks, president.

Tilton taught recently at the City College of New York and at Columbia University before joining Brooks Institute; he has two graduate degrees, in Education and Design.

For his abilities in motion picture production, Tilton has won a number of awards of recognition. His *Jazz Dance* received the Award of Merit at the Edinburgh Film Festival in 1955 and the Special Award of the Robert Flaherty Documentary Film Competition in the same year. It was also viewed at the U. S. Exhibit at the Brussels World Fair in 1959.

In addition to writing scripts for a variety of theatrical training and television films, his articles have appeared in numerous periodicals and professional journals.

Jim Holmes to Wilding, Inc. as Midwest Account Executive

The appointment of James E. Holmes as account executive in the Midwest region has been announced by Wilding, Inc. Announcement was made by H. Williams Hanmer, president of the Chicago-headquartered organization.

Holmes comes to Wilding with an extensive background in all phases of business communica-

James E. Holmes

tions, including production, sales and service. He has worked with major industrial companies in training, sales promotion, public relations and advertising films and programs. He will be serving major midwestern accounts for Wilding and will be based in Chicago.

Holmes is well known in film production and is the former Secretary of the American Association of Film Producers.

* * *

Charles Gray Heads Industrial Relations at Bell & Howell, Chgo.

Charles W. Gray was appointed director of industrial relations for the Photo Products Division of Bell & Howell Company.

Gray is in charge of the organization and personnel program of the division and Chicago headquarters operations. He has been with Bell & Howell for four years, having joined the company in 1957 as director of training and communications. He was formerly director of economics projects at the University of Chicago's Industrial Relations Center.

THE "LATER YEARS" PROGRAM:

(CONTINUED FROM PRECEDING PAGE 176)

The personnel or training counselor who is sensitive to the peculiar composition of his audience will do best with the film. The community in which the showing takes place, the similarity or diversity of national backgrounds of the viewers, their majority social status, social mobility, language competence, urban, suburban or metropolitan residency, their relationships with management, the economic potential of their community—all these things influence audience reaction. In one place, where the counselor was of the same "immigrant" origin as the workers, there was, oddly enough, more—rather than less—"stiffness" between audience and counselor than in other places.

Psychological Factors Are Important

4. We also learned that there were psychological factors in the relationship between audience and counselors which had weight. In a showing not described by this report, a senior management man who projected the film for his junior executives detected "guilt" on the part of these "white collar" juniors in rejecting some of the "blue collar" situations acted out in the film. This same "guilt" expressed itself in places covered by this report in other ways. In one place, management's man had come up from the ranks. His approach to his audience showed a slight apologetic stance before the people he had "left behind." In another, the counselor came from another and higher social milieu altogether. He strained to prove to his audience that he was "one of the boys."

5. We also detect that the presence of women is important when the film is being shown. Women are generally very practical about everyday problems that will face their husbands on retirement. In each case, when they came with their husbands, it was the wives who insisted they attend.

Need Two Types of Discussion Guides

6. We know now, better than we did before these screenings, what materials will be needed to assure effective use of the film in industry. We are currently working on two types of discussion aids—one for the leader, another for the audience.

7. We also discovered that dramatic "sophistication" of viewers determined their reactions to certain plot and characterization elements in the film. "Plain" people who saw

THE "LATER YEARS" PROGRAM:

(CONTINUED FROM THE PRECEDING PAGE)

it nodded their heads with approval over the "salt" incident; they recognized the characters; they said they "knew people just like them" and were amused where we wanted them to be amused, worried where we wanted them to worry.

Most Identify With Portrait of Wife

For everyone who took exception to a certain stark realism in the "drawing" of Matt's wife in the film, a woman herself past sixty-five, there was a heavier percentage (among plant workers) who identified with her completely.

This, too, is important to remember when the film is used in a counseling program. It stems from "social status stance" among those who see it.

Home Ownership Is a Key Factor

Similarly, economic values are pertinent. Among metropolitan urban workers, for instance, the mere fact of owning a house—any house—makes a man "well off." To them Matt's position as a homeowner gives him "nothing to complain about." In other, suburban areas, anybody neglecting to safeguard his home is "just plain shiftless." Everybody owns a home in such an environment. On the other hand, in small communities bordering on a big metropolitan area, giving up a big house and taking an apartment is "no tragedy"; quite the contrary—it is "good sense."

Other films in the *Later Years* Series will include such subjects as physical and mental health in the later years, work and leisure time, housing and living arrangements, general retirement and self-employment. *Financial Planning* is being distributed by the producer, Dynamic Films, Inc. (405 Park Avenue, N. Y.). Print costs are $190, and rental charge is $12.50, with 25% discount to nonprofit groups.

Series Fills a Widespread Demand

There is growing interest in industry today, both by labor and management, in the manifold problems connected with retirement. Dynamic Films and the National Council on the Aging believe that these programs will be of specific service to the American industrial community. Similarly, the films will fill the need for definitive educational materials on retirement by other community service agencies and organizations.

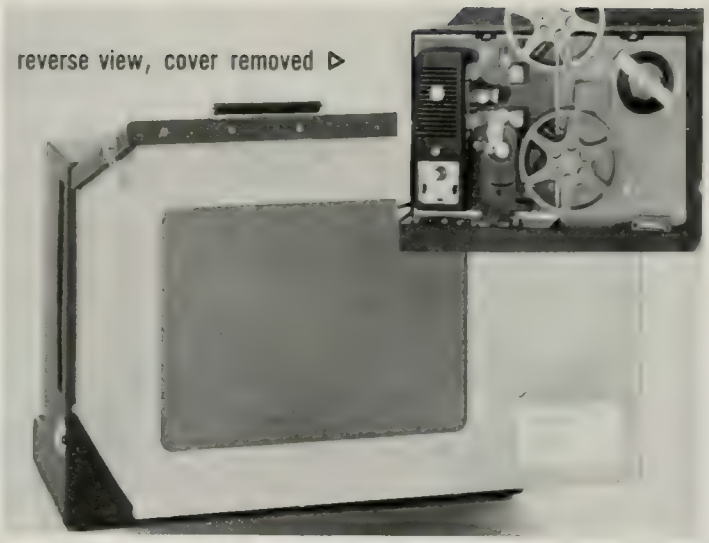
LIQUID GATE PRINTING FOR 16-35 BLOW-UPS

An amazing new 16mm and 35mm process which eliminates scratches, smooths out grain and enhances overall quality. It is particularly valuable for use in . . .



- RECLAMATION OF OLD AND WORN FILMS
- SALVAGING VALUABLE SCRATCHED ORIGINALS
- 16mm to 35mm BLOW-UPS . . .

The scope of this economical theatrical production blow-up medium has greatly increased due to the tremendous benefits of Liquid Gate Printing. A test will prove its value . . . See "Cinemagic of the Optical Printer" in the A.S.C. Manual, Page 361.

Front, rear views of Vicom's new "Vicaudio" 8mm Sound Projector.

Portable, Continuous 8mm Sound Projector; Built-in Rear-Screen

☆ A major breakthrough in the increasing popularity and importance of 8mm sound for industry use is a portable, continuous repeater 8mm sound motion picture projector with a 9" x 12" rear-projection screen built into the carrying case.

Manufactured by Vicom, Inc., the "Vicaudio—Mark I" unit incorporates the Kodak Sound 8 Projector, and is used together with Vicom's patented optical system to achieve the 500x magnification required brilliantly to fill the screen in a short distance.

One of the Vicaudio features is light brilliance, enabling the unit to be used in the most severely lighted areas, such as for window display, offices, store counters and exhibits. Continuous, or normal reels up to 400', are standard components, with optional larger reels available to accommodate up to 40 minutes of projection time.

There is no need of refocusing with the specially designed lens system, and the projector may be adapted for normal head-on projection without a change of lenses.

Another feature of Vicom is the "Total Projection Plan," particularly valuable to the "fleet" buyer. Available in its entirety, or in whatever phases are needed, the Plan consists of three basic parts, all covered by one contract: top quality prints; prompt guaranteed delivery to projection points; nationwide professional maintenance and service.

U. S. AUDIO-VISUAL ACTIVITY:

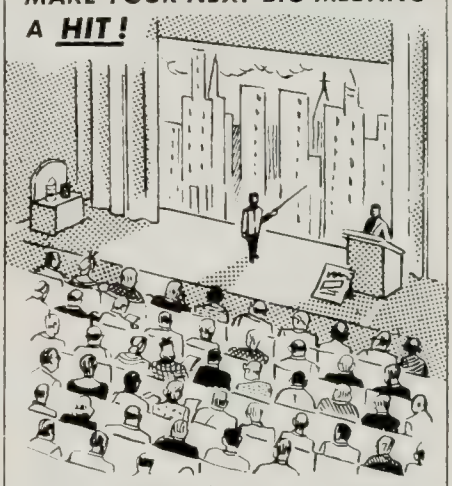
(CONTINUED FROM PAGE SEVENTY-FOUR)

claims to copyright for motion pictures since 1894, when the first examples of this medium were deposited in the Library in the form of photographic paper prints; since 1912 the copyright law has provided for the registration and deposit of motion pictures as such. Generally, under the provisions of the motion-picture copyright agreement between the Library of Congress and the motion-picture proprietors, the films are returned to the copyright proprietor by the Copyright Office after registration, but the Library has the right to claim the deposits for its collections later.

The Copyright Cataloging Division of the Copyright Office prepares a semi-annual Catalog of *Copyright Entries: Motion Pictures and Filmstrips*, which lists all such materials registered for copyright in the United States and which is published by the Library and sold by the Government Printing Office. It has also prepared four cumulative catalogs entitled *Motion Pictures*, which together cover registrations of films for the years 1894-1959 and which are for sale by the Government Printing Office.

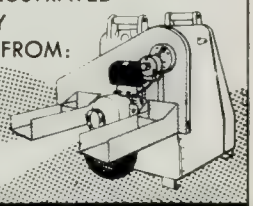
In addition, the Library's Descriptive and Subject Cataloging Divisions catalog educational films, using data submitted largely by producers and distributors, and the Library publishes this cataloging information in two useful forms for purchase by other libraries or individuals. One form is the printed catalog card, which any film-user may purchase to establish his own card-catalog for the control of his collection and for the dissemination of film information. The other is a book-catalog reproduced photographically from the printed cards and containing a detailed subject-index, adequately cross-indexed; entitled *Library of Congress Catalog—Motion Pictures and Film-Strips*, this publication is issued quarterly and in annual cumulation, and it also appears as a volume in the quinquennial cumulation of the Library's *National Union Catalog*. Both the printed catalog cards and the book-catalog may be purchased from the Card Division, Library of Congress, Washington 25, D. C.

The Library's collection of motion pictures now comprises more than 126,000 reels and is in the custody of the Stack and Reader Division in the Reference Department. It is primarily an archive in nature, and reference service is limited to scholarly research. The Library does not lend motion pictures, but some films may be copied under certain conditions; copying requires the signing of a standard loan-agreement concerning the selection of laboratory, the clearance of copyright, insurance coverage, and the copying of equivalent footage for the Library.



The National Archives

May E. Fawcett, Motion Picture Branch,
National Archives
Phone: WOrth 2-2513



• This branch has an increasing amount of retired government motion pictures (about 45,000 reels at present). Films are available for viewing by anyone. No films are reproduced without the consent of the depositing agency.

arwald Shows New Features n Model U Inspect-O-Film

Several new features on the In-pect-O-Film Model "U" machine r inspecting, editing and clean-g motion picture film are an-punced by the Harwald Com-any.

Foremost is the introduction of n all-new speed control and raking system, involving three otors controlled by direct cur-nt. This results in positive con-ol of operating speed, and

mooth, jerk-free stops precisely here a repair is indicated. Each rake is adjustable electrically, ithout the use of tools, by means f a simple knob control.

Machine speed is adjustable, rom a stable low where desired or operation such as liquid clean-ng by hand to the 1000-feet-per-inute rate for rush period run-ing.

The 546-sq.-in. work surface as been designed for the opera-or's ease with ample room for ll equipment.

Cleaning tapes, either chemi-cally-treated reusable velvet or "throw-away" flannel types, are both silicone and anti-static treated. An electronically con-trolled liquid film-cleaning at-tachment is available as optional equipment.

Also optional is a counter cali-brated in minutes and seconds in-stead of in feet, for use on ma-chines in television stations. The film measurer automatically sub-tracts during reverse running for editing and inspection.

A new design triple jewel film defect indicator affords increased accuracy, and is readily adjust-able for any desired tolerance. Many of these new features can be installed into any of the six previous Inspect-O-Film models. For further information write New Products Desk, BUSINESS SCREEN, Chicago 26.

YOUR EMPLOYMENT SERVICES:

(CONTINUED FROM PRECEDING PAGE 179)

that will get the right man in the right place.

This is not easy. Bob is handicapped not only by Jim's continuing explosive frustration and distrust . . . but by the attitude of the third principal character, Mr. Howell, a potential employer. His all-too-characteristic reaction: "I've got nothing against you Employment Service people . . . but factory hands are one thing. An executive . . . that's a horse of a different color."

At the end, we think Bob Tyler has started to soften the tough plant owner . . . we think Jim Gordon may get the job . . . but the film doesn't tell us. It leaves us wondering . . . and thinking . . .

"If I were out of work, maybe the Employment Service could find the right job for me."

"Perhaps the Employment Service does have executive and professional people we could use in our business."

"I wonder if I've been thinking big enough about what we in the Service have to offer . . . trying hard enough to sell it."

This kind of impact is not produced solely by the plot. Production values also play an important part. Stylized backgrounds with a harsh interplay of light and shadow; distorted perspectives in which the job-seeking Jim Gordon appears lost and small—these produce a heightened emotional effect and serve, by contrast, to make the picture's realistic settings even more natural.

None of the protagonists are "types." Jim Gordon does *not* display unbroken courage in adversity; Bob Tyler is *not* all-understanding; Mr. Howell, the employer, does *not* suddenly see the light.

In addition to developing a training course to be used internally with State Employment Service personnel in equipping them to do an aggressive, comprehensive promotional job with employers and job seekers, the Strauss organization supplemented the film with a guide for utilizing it with key audiences, including: policy-making and administrative executives of industry; personnel and employment managers and the broader, public range of groups which include business and service clubs, fraternal, veterans' and other community organizations, unions and schools.

The guide outlines general principles of effective film use . . . plus specific suggestions on the attitudes likely to be encountered among individual groups; methods of introducing the film; post-showing discussion and follow-ups.

For a Public Audience:

De Beers' "Eternal Gem" a Diamond Documentary

SPONSOR: De Beers Consolidated Mines, Ltd.

TITLE: *The Eternal Gem*, 27½ min., color, produced by Wondsel, Carlisle & Dunphy, Inc., through N. W. Ayer & Son.

The idea of this film is to correlate the diamond of the engagement ring with the diamond of the deep South African mines and the intricate cutting rooms of Europe. While the romantic dialogue between "Dan" and "Joan" is well done and pretty to watch, the meat of the picture is the documentary treatise of the diamond industry.

Diamonds, as the film shows, are found in the throats of long-dead volcanos, or in "terraces" where they have silted down on river beds near the sea. So much time and labor spent for such a tiny little pebble—1/142 ounce of diamond from each big truckload of ore. The recovery methods are interesting—ore is broken up into small pieces and combined with water into a sort of sludge—screened in many ways and many times, and finally passed over layers of grease. The diamonds stick to the grease and the other pebbles do not.

But, of course, the frosty pebble is far from the gem of Joan's engagement ring. It must be cut—on a phosphor bronze wheel with diamond dust, and it must have facets, bevels, pavilions, brilliants—58 surfaces in all before it is ready for mounting.

Gem diamonds, the film shows, come in five shapes: brilliant, emerald, marquise, pear and oval. Their worth is judged by the four "C's": carat (the weight, a carat is 1/142 ounce), cutting (the quality of fire and gloss), clarity (lack of flecks), and color (the best diamonds are colorless—and the popular term "blue-white" is a misnomer for a highest quality gem).

Distribution of *The Eternal Gem* is handled by all offices of Association Films, Inc., 347 Madison Avenue, New York.

"We Make Sure Our Training Sessions Run Smoothly by Using Kalart/Victor Projectors..."

"The way we use 16mm sound films," continues Mr. Al Tinker, President of Tinker Kirby Nassau Company, Inc., "we need a projector that is dependable at all times. Films play a big role in our program of training men how to sell Kirby Home Sanitation Systems. When we schedule a training session, we want to know that the projector will do its job at the flip of a switch. Our Kalart/Victor fills the bill on this count, and many more besides."

A company such as Tinker Kirby Nassau, with so much at stake in its training program, particularly appreciates the fact that Kalart/Victor projectors are engineered to provide trouble-free performance in continual daily use.

Simplicity of threading, ease of maintenance and protection against film damage are other important features that Mr. Tinker looked for —and found—only in Kalart/Victor.

Three-step threading with color-coded path showing sequence and location makes it easy for nearly anyone on Mr. Tinker's staff to set up a Kalart/Victor. Safety Film Trips, a Kalart/Victor exclusive, prevent damage to valuable training film. And a large-capacity oil reservoir built into the Kalart/Victor means that lubrication is necessary only once a year.

What features are you looking for in a 16mm sound projector? Great picture quality? Magnificent sound reproduction? Adaptability for magnetic recording and playback? Kalart/Victor has them all. Call your Victor Dealer for a demonstration.

Major Industry Conventions Spotlight the Month's News

"International Achievements" Is 89th SMPTE Convention Theme

It's a sell-out for exhibit space at the 89th Convention of the Society of Motion Picture and Television Engineers.

Three months prior to the convention, all 47 of the scheduled exhibit booths had been reserved, according to Exhibit Committee Chairman Kenneth Oakley, and the addition of space is under consideration.

The SMPTE Convention, with the theme "International Achievements in Motion Pictures and Television," will take place May 7-12 at the King Edward Sheraton Hotel, Toronto, Ontario, Canada.

The equipment exhibit will also be international in scope, with United States, European and Canadian firms displaying products.

Among the companies which have contracted for exhibit space are: Beckman & Whitley, Inc.; Bell & Howell Co.; Behrend Cine Corp.; Berndt-Bach, Inc.; Birns & Sawyer Cine Equipment, Inc.; Braun of Canada Equipment Ltd.; Caldwell A V Equipment Ltd.; Camera Equipment Co.; Canadian Broadcasting Corp.; Canadian Applied Research Ltd.; Alex L. Clark Ltd.; Eastman Kodak Co.; Ferrania Div., Viditon Corp.; Film Editing Equipment, Inc.; Florman & Babb, Inc.; Harwald Co.; Philip A. PROVIDING EVERY EDITORIAL AND PROCESSING FACILITY FOR 16mm FILM PRODUCERS

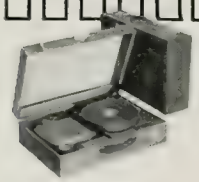
THESE SALES-MEN FOR "HIRE"

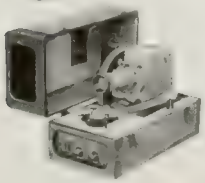


Any one of these "sales makers" will be valuable additions to your sales staff. Take a look at their qualifications:

1) After initial investment, they require no salaries, expense accounts, sick leaves or vacations.

2) They make every sales point you want made . . . the way **you want it** made (every time, too!).

3) They never tire . . . as persuasive on last call of day as first in A.M.



No, we haven't found a sales robot to replace the salesman. But, we have designed a line of sales "assistants" that will help your present sales force put their sales curve into orbit. Why not look into these Viewlex "sales makers" for your staff now. Contact your local Viewlex franchised A-V dealer or use coupon below.

Select 15 Sponsored Motion Pictures to Represent U. S at International Industrial Film Festival in Turin

FIFTEEN motion pictures have been selected by a panel of industrial film specialists to represent American industry in the Second International Industrial Film Festival in Turin, Italy, June 25-28.

Janet Wilkins, producer in the Audio-Visual Department of the National Association of Manufacturers, supervised the assembly of eligible outstanding motion pictures produced for industry in 1960. The films were screened by a selection committee composed of three industrial audio-visual experts: Eyre Branch, Standard Oil Company (N. J.), retired; Gordon L. Hough, Manager of Public Relations-International Group, American Machine & Foundry Company; and Frank Rollins, Manager of Motion Picture Department, E. R. Squibb & Sons.

Sponsored by Industrial Council

The Festival will be held under the patronage of the 18 nations composing the Council of the Industrial Federations of Europe (CIFE). The competition is open only to organizations which represent their nation's industry as a whole.

The purpose of the Festival is to stimulate the production of high quality films which spread industrial know-how and publicize the contributions of industry to the social and economic development of society.

These Awards to be Presented

Among the prizes is one offered by the sponsoring organization, the Confederazione Generale dell'Industria Italiana, for the best illustration of the contribution of private enterprise to social and economic progress; the Grand Premio of CIFE for the best national selection; and a first and second prize in each of these seven categories:

. . . Films on industrial techniques and productivity.

. . . Films containing general information of industry for the benefit of the public at large.

. . . Films on marketing and sales technique.

. . . Films on scientific research for industry.

. . . Films on vocational training and education.

. . . Films on social welfare.

. . . Films on industrial safety and on the hygienics of work.

The United States select[ed] are:

- *Ages of Time*, produced [for] Hamilton Watch Company [by] MPO Productions.
- *Are These Your Hands?*, [pro]duced for McGraw-Edison C[om]pany by Cullen Associates.
- *Assignment America*, produ[ced] for New England Mutual In[sur]ance Company by Bay State F[ilm] Productions.
- *Better Medicines for a Be[tter] World*, produced for Parke, D[avis] & Company by The Jam Ha[ndy] Organization.
- *Beyond the Gravisphere*, [pro]duced for Armour & Company [by] Douglas Productions.
- *Eddie, Inc.*, produced for My[stik] tag Company by Columbia [Pic]tures.
- *Faces and Fortunes*, produ[ced] for Kimberly-Clark Corpora[tion] by Morton Goldsholl-Design [As]sociates.
- *Frontiers*, produced for [the] First Security Corporation [by] Dick Durrance Productions.
- *The Land of White Alice*, [pro]duced for the Western Elec[tric] Company by Willard Van Dyk
- *Me*, produced for TRUE Ma[ga]zine (Fawcett Publications) [by] Elektra Film Studios.
- *A Number of Things*, produ[ced] for Woman's Day-Fawcett Pu[bli]cations by Elektra Film Stud[ios]
- *Rendezvous—90° South*, [pro]duced for Lockheed Aircraft C[or]poration by Robert Stricklan[d] Lockheed's film unit.
- *Revolution on the Right [of] Way*, produced for Southern [Pa]cific Railroad by Edward Car[ney] and the Southern Pacific film u[nit]
- *Temperature Made to Or[der]* produced for General Mo[tors] Corporation by TV-Saizis.
- *This Is Steel*, produced f[or] Bethlehem Steel Company by [Ra]dio Productions, Inc.

THE EDITORIAL VIEWPOINT

The Audio-Visual Industry's First National Goal Should be *Real Facts*

THE RETIRING PRESIDENT of the Industrial Audio-Visual Association, addressing the Annual Banquet last month of that uly professional society of the nation's busi- ess a-v executives, recalled the shaggy dog tory about the man whose retriever walked n top of the water whenever he went out for ie "bag." Instead of showing expected amaze- ient, his companion says, "doesn't seem to e able to swim, does he?"

Far too much "water walking" is going on mong audio-visual equipment manufacturers, lm producers, sponsors and some "experts" n this field. The honest fact is that nobody eally knows how many 16mm motion picture rojectors, or sound slidefilm projectors or ny other of the familiar, useful a-v tools are eing made and consumed, much less how hany of each type are currently in use, any- here.

Our Production Review Provides Facts

Except for our own studio-by-studio, labo- ously gathered and carefully checked annual urveys of commercial film production com- anies, there is no comparable accounting in hat field either.

Thanks to the U. S. Department of Com- nerce, which serves the *entertainment* film in- ustry well, you can find out how many heatres there are in Thailand or Australia or apan. And how many cameras and other gear re exported or imported. But individual com- anies (or the National Association of Photo- raphic Manufacturers) don't report annual gures on projector manufacture. Then who oes?

Guesswork Turns Into Promoter's "Facts"

The truth is there are *no real figures* on -v equipment in use or being made. But you vill find "educated guesses" which are now be- ng turned into "facts" about a *"$300 million year"* market to promote expensive advertis- ng for *"40,000 distribution" of free books.*

Fact: less than 5,000 (and far less) indus- rial companies in the United States account or 85% of the nation's total industrial out- ut.

Fact: fewer than 500 national and regional rade groups comprise the real strength of hat interested audio-visual clientele.

Fact: less than 800 companies belong to he Association of National Advertisers, com- rising the bulk of the nation's big media uyers.

Fact: fewer than 50 American colleges and niversities have any motion picture produc- ion units, outside of the football coaches.

Fact: in four separate first-class mailings to very name available, only 320 film produc- ion companies in the U. S. and Canada could ome up with the minimum references re- uired for a *free* listing in our recent Annual roduction Review issue. That meant produc- ng as few as five *slidefilms*, for example.

No, you don't have to "burn down the ouse to roast the pig," as the old Scandi- avian saying goes. And you don't have to vaste hard-earned profits on a lot of "water valking" when there are better, more depend- ble answers to be had.

It's time for this industry to take *swimming* essons. Time for the presidents of projector companies to take a leaf from the Radio & Television Manufacturers who report how many color or b&w television sets and radios are made, year-by-year.

What Today's Film Festivals Cost

Time for every other segment of the audio-visual field to stand up and take census, without this "moonlight and roses" approach. Time for all of us to find out that the ribbons and statuettes awarded our films cost $15-$25 apiece for *each and every* entry. That 300 X each entry fee is costing participants from $4,500 to $7,500 for *fees alone* in each domestic film festival! Time to decide whether the judgment of *peers* or the *opinions* of enthusiasts are worth the price of these parties.

This publication *prints, distributes* and *certifies* an honest 8,000-plus copies of *one* magazine that devotes *all* of its contents *to the relevant business of business and industrial audio-visuals.* No special issues to promote irrelevant microfilm ad sales; no promoting the offset printing business or the myriad of equally irrelevant industrial photographic assignments which run the gamut from blueprinting to X-ray work.

In a *single* U.S. corporation where we have three *paid subscribers,* the annual film budget totals several million dollars. Every one of this company's nationwide subsidiaries is also a *paid* subscriber. And when the president of this leading American business stood before his tremendous family of shareholders recently, he carried with him an abstract from the pages of our Annual Production Review. *That's fact,* brethren!

Facts Can Help Expand Film Budgets

Sponsors and agencies would be tremendously encouraged to expand their budgets for multi-print film programs if fortified by accurate statistics on 16mm sound projector ownership. News of industry acquisitions of this equipment would encourage other industries to procure and use a-v tools. Just as the solid, dependable facts are leading companies, agencies, trade groups and Government to the doors of reputable film producers through pages of the 11th Annual Production Review. *Go thou and do likewise.*

* * *

Ken Penny Elected President of the Industrial Audio-Visual Association

MEMBERS OF THE Industrial Audio-Visual Association, meeting at Chicago's Edgewater Beach Hotel April 25-27, have elected Ken Penny, of the Minnesota Mining & Manufacturing Co., as their 1961-62 president. Bill Pratt, American Telephone & Telegraph Co., is the new IAVA first vice-president and James Craig, General Motors Corporation, is second vice-president of the professional society of audio-visual executives within industry.

Harold Daffer, Minneapolis-Honeywell, was elected secretary and the assistant secretary-elect is Don Peterson, Caterpillar Tractor Co. Fred Woldt, Illinois Bell Telephone Company, continues as treasurer. Vice-president for Illinois is John Hawkinson, Illinois Central Railroad.

Five Regional Directors Are Named

Regional directors named include Harvey Plants, of General Foods, for the Eastern Region; Bill Morris, Baxter Laboratories, Central Region; Howard Williams, Edw. Johnson, Inc., in the Northern Region; Bob Strickland, Lockheed Aircraft, for the Southern Region and Vincent Hunter, Union Pacific Railroad, for the Western Region.

Retiring president Alan Morrison, Socony Mobil, becomes chairman of the Past Presidents' Committee. Chairman of IAVA's Fall Meeting is Dan Rochford of Jersey Standard, and continuing Chairman of the Membership Committee is Larry Warnock, Link-Belt.

Other Committee Heads; New Members

Other Committee posts went to Bill Connelley, Union Carbide, as Chairman of the Publicity Committee, and Projects are in charge of Charles Fox, Brown & Bigelow; The Roster is to be handled by AT&T's Roy Vanderford. Roy Mumma continues as IAVA's Technical Chairman.

New members elected include Frank Stedronsky, A. B. Dick & Co.; William A. Smith, U. S. Steel; Milton W. Sebring, the Norton Company; Ralph Applegate, Burroughs Corp.; Benjamin Gill, American Oil Company; and William A. Wallace, Falstaff Brewing Company.

Annual Plaque Award to Al Morrison

Al Morrison received the organization's annual award plaque, given each retiring president, from past president O. H. Peterson, American Oil Company, at a traditional banquet ceremony. Highlight of the dinner was the tribute paid member Ralph Hoy, Aluminum Company of America, for the work which he and Mrs. Hoy have carried on in hospitals worldwide under their "Recordings for Recovery" volunteer taped-music program. IAVA became a supporting donor to this cause in an unprecedented tribute to the Hoys.

A joint session for IAVA and members of the Audio-Visual Committee of the Association of National Advertisers was headed by Bill Pratt of AT&T on the subject "How to Inform Your Management of the Value of An Audio-Visual Program."

Guest speaker at this key program event was Dr. Seymour Banks, vice-president for Media & Program Analysis, Leo Burnett Co., Chicago, and chairman of the Audience Concepts Committee of the Advertising Research Committee. Presenting a preview of some phases of the ARC's forthcoming report on Audience Concepts, Dr. Banks challenged company film executives to present facts about their activities in terms which management can understand and accept.

"HOW TO PREVENT OBJECTIONS IN SELLING"

a "must" film for every salesman facing today's tough sales climate!

Many sales objections can be prevented if salesmen themselves do not plant them. This exciting, new Borden and Busse hit, "How To Prevent Objections in Selling" shows salesmen how to avoid the 5 most common mistakes made in selling presentations:

. . . by pointing out the prospect's needs without needling him.

. . . presenting sales points smoothly.

. . . avoiding excess verbage.

. . . avoiding "chip-on-the-shoulder" words.

. . . preventing routine objections by creating a stronger sales desire.

Here is a file film addition for your sales training program . . . one that puts real meat into your sales meeting . . . one that's sure to jolt salesmen out of bad selling habits.

This 30-minute, 16mm, b&w motion picture is available for outright purchase or rental.

From the Experts' Viewpoint:

A Look Into the Future of 8mm Sound

GROWING RAPIDLY and gaining in importance, 8mm sound film is "another milestone in the communications revolution," which may extend the boundaries of the motion-picture industry just as paperbacks have extended the field of publishing, says John Flory of the Eastman Kodak Company, Rochester, N. Y.

But there are major technical and economic obstacles to be overcome, he notes, before the potential of 8mm for home entertainment, community service, religion, medicine, science, business and industry, and education can be fully realized.

Overall View by John Flory

Discussing "The Future Role of 8mm," Flory, Advisor on Non-Theatrical Films at Eastman, will open a session on new developments in 8mm sound-on-film at the 89th Convention of the Society of Motion Picture and Television Engineers in Toronto, Canada. The session will take place May 9th at the King Edward Sheraton Hotel.

William D. Hedden and Kenneth B. Curtis of Calvin Productions, Inc., Kansas City, Missouri, will present a paper in this session on "Early 8mm Sound Developments," showing that although some of the recent interest in the 8mm field began to flourish after the introduction of several 8mm sound projectors, much research and development had been done previously.

Roundup of 8mm Equipment

An historical resume of the work of the late Lloyd Thompson will give attention to the sound projection equipment he introduced and some of the film procedures that he utilized to make release prints.

Eyre Branch of Noel Enterprises, Hartsdale, N. Y., (a BUSINESS SCREEN contributing staffer) will present an "8mm Magnetic Sound Equipment Round-up," reviewing the latest in 8mm sound projectors, cameras and magnetic-striping equipment. Types of projectors will be described and illustrated, including: (1) built-in sound couplers operating with tape recorders; (2) conversion to sound by addition of separate recording and playback heads; and (3) complete 8mm magnetic sound recording and playback units.

R. G. Hennessey of the Industrial Products Division, Fairchild Camera & Instrument Corp., Yonkers, N. Y., will discuss "8mm Magnetic Sound Film in Audio-Visual Applications," presenting equipment advantages in comparison with previously existing machines, results of tests, and detailed descriptions of various applications.

"Educator Looks at 8mm Sound"

Louis Forsdale, of the Horace Mann-Lincoln Institute of School Experimentation, Teachers College, Columbia University, New York City, will present his views as "An Educator Looks at 8mm Sound Film." The development of 8mm sound film suggests important advances for film in education, he believes, including increased utilization resulting from decentralization of film libraries, increased use of film by small groups and individual learners, expanded lists of titles, new uses in research, and exploitation of local production possibilities.

Other speakers and their topics include: Steve Knudsen of Iowa State University, Ames, Iowa, "8mm and the Classroom Film Library, its Potentials and Requirements"; Richard C. Gearhart of Cousino Electronics Corp., Toledo, Ohio, "An Endless-Loop Magazine for Projection of 8mm Film; Silent and Magnetic Sound," and Fred E. Aufhauser of Vicom Inc., Rochester, N. Y., "Rear Projection of 8mm Sound Prints."

General Film Labs' Report on Film Usage Indicates Increases

☆ General Film Laboratories, film processing division of Pacific Industries, Inc., reports that it turned out more footage of completed film for motion picture and television use in its Hollywood facilities in the first three months of 1961 than in any previous three-month period.

William E. Gephart, president of General Film, said the company's Hollywood lab processed approximately 25 per cent more film in the first quarter of 1961 than in the same period of 1960.

He described the increase as being part of the generally brighter outlook, with both color and black-and-white film usage increasing. The long-term outlook continues to indicate that the processing of industrial and teaching films will be increasingly important to the General Film Division as new uses are found.

CUTS CAN MEAN INFECTIONS

And supposed wrongs in the minds of your employees, based on misunderstandings and lack of facts, can mean trouble.

Stop it before it gets started . . . by developing supervisors who are alert to detect grievances . . . who have the know-how to handle them with an appreciation of human feelings.

American Medical Assn. Film Bookings Are Up 34% in 1960

Increased use of films by medical societies during 1960 is reported for the American Medical Association's Film Library.

A total of 7,570 bookings from the Film Library in 1960 shows an increase of 34½% over 1959's total. The 1960 figure compares with 1,572 bookings in 1951. During the 10-year period ending in 1960, the Film Library has completed 37,693 bookings.

Medical Societies Book 479 Films

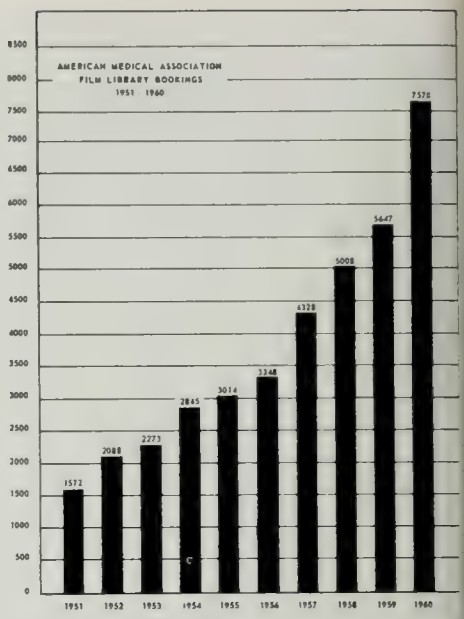
During the year 282 medical societies used 479 films from the library, an 85% increase over 1959's figures of 151 societies using 258 films.

Ralph Creer, AMA director of Medical Motion Pictures and Television, reports that the library now has 1,066 prints of 254 subjects. There are 725 prints of 172 medical subjects for professional audiences and 341 prints of 82 health films for lay audiences.

Hospitals Are Most Active Film Users

Civilian hospitals account for the greatest use of AMA films, with 2,307 films loaned to hospitals in 1960, compared with 1,499 in 1959, an increase of 54%.

Creer said that 96% of the medical schools in the U. S. borrowed films in 1960; 83 medical schools used 975 films last year, a 7% increase over 1959.



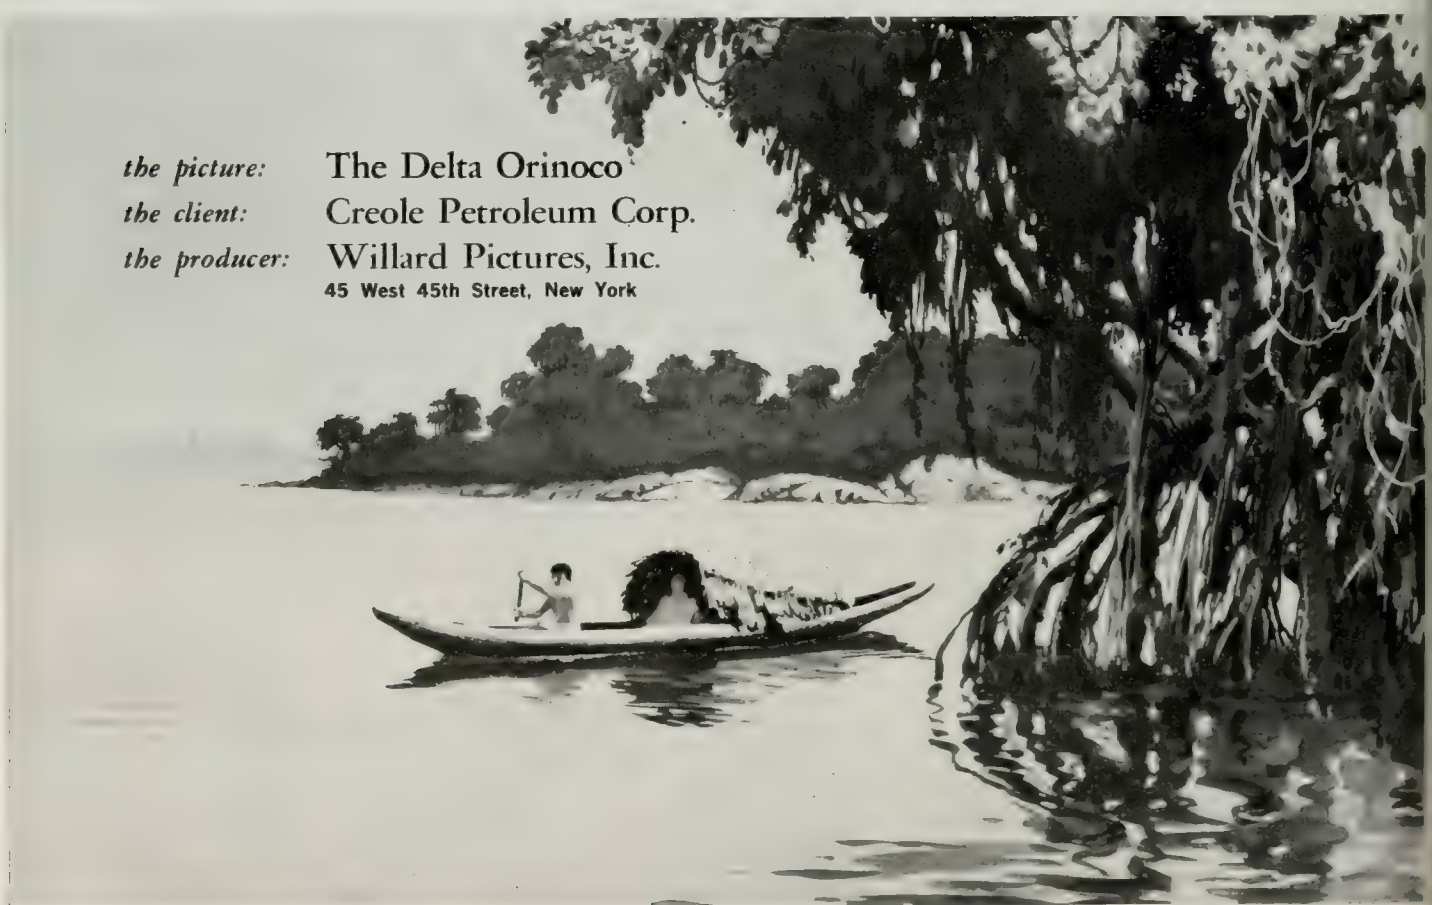


Chart shows 10-year pattern *of steady growth in film distribution by A.M.A. Film Library*

What's NEWS in Visual Communication

Wertheimer Is Named President of Radiant Manufacturing Corp.

Adolph Wertheimer, a longtime leader in the a-v industry, has assumed the presidency of Radiant Manufacturing Corp., 8220 N. Austin Ave., Morton Grove, Ill.

Wertheimer joined Radiant in 1940, one year after its founding, taking complete charge of sales, distribution, merchandising and advertising. He was later sales vice-president and became executive vice-president in 1952.

Adolph Wertheimer

Wertheimer, recognized as an outstanding authority in the photographic industry, was active in both manufacturing and sales long before coming to Radiant. He previously owned and operated manufacturing plants in Germany and headed sales for the Albert Specialty Company, manufacturers of photographic equipment.

Retiring president Harry Eller leaves Radiant to assume the presidency of Panacolor Corp., Los Angeles, marketing a "revolutionary new method" of printing color motion picture film.

Modern Opens Toronto Office for Film Distribution in Canada

Distribution of sponsored motion pictures throughout the Dominion of Canada is now being offered to business concerns and other clients by Modern Talking Picture Service. The company has opened an office at 140 Merton St., Toronto, Ont.

The new office will serve as a film library for the distribution of prints to television stations, schools and community groups across Canada. It will also serve as a sales office for Canadian clients interested in film distribution in Canada or in the United States.

John A. Brown of Toronto is the manager of the office.

Robert Frost, Philosopher-Poet in Action in New Documentary

Robert Frost, the philosopher-poet whose commemorative poem was heard by millions during the Inaugural ceremonies of President John F. Kennedy, is the subject of a new documentary film released through United World Films.

Produced by the U. S. Office of Information, the 25-minute color film *Robert Frost* takes its viewers to the home of the poet and shows how he lives and works.

His readings of some of his own poems are a highlight of the film which is designed to honor and promote a wider knowledge and appreciation of one of the most important contributors to the American cultural scene.

RE-RUN FOR THOSE WHO HAVE REQUESTED REPRINTS

In the course of discussions with a client about certain complexities which were being pressured into his picture, it became necessary to crystallize in words one of the principles on which good film-makers have always instinctively built their work.

NOTE ON SIMPLICITY

True simplicity is an elusive quality, and very rare. But many forms pass for "simplicity." There is the simplicity of *paucity*, where that's all the man knows about the subject and hasn't had time to fog it up with complex constructions and long words. Then there's the simplicity of *selection*—this is getting closer to it; it at least sloughs off and discards a lot of irrelevancies and items which, though relevant, aren't really fundamental to the subject.

But, to me, the real simplicity is the simplicity of *distillation*. Here you start with the whole complex subject and distill it down to its utter essence . . . you boil off not just the irrelevancies, but the explanatory material and developmental aspects—and you distill down to the syrup. To switch metaphors, you start with the bush covered with flowers, trace the branches back to the main stalk, follow down the stalk to the ground, and then at the bottom of the original root you find the seed from which the big, showy bush grew. True simplicity is that seed.

Here's an example. For a phonograph record-album called "The Story of Jesus," Side 3 permitted exactly eight seconds to tell the audience (children aged 6 to 9) why Jesus' teachings endured when the many other prophets of the time were soon forgotten. *Why* was He different? I put the question up to our pastor advisors and got a succession of 5,000-word confusing roundabouts. I read them, I studied the four Gospels in a half dozen translations, thought long and hard, and finally got the answer from my wife:

"Until Jesus came, people had always been *afraid* of God."

At first glance, this seems *too* simple. But when you think it over and roll it around in your mind, you find that in those few words is the seed from which the Gospels could be written and on which a church was founded.

The simplicity of paucity . . . the simplicity of selection . . . but, for real—and for good films—the simplicity of *distillation*.

WASHINGTON FILM COMMENTARY

by Mary Finch Tanham
Washington Correspondent for Business Screen

Illinois Central Film Aids Railroads' Labor Hearings

When the Presidential Commission concerned with railroad "featherbedding" met on Capitol Hill last month to discuss the feasibility of placing a third man (fireman) in electric railroad cabs, three out of four hours of the hearing were devoted to audio and visual testimony. And a convincing show it was!

Before members of the Commission, the American Railroad Association unfolded a twenty-foot-long, push-button, technicolor-ribboned blackboard to demonstrate that "multiple unit" (without a fireman) equipment can traverse, with ease, the complicated web of tracks and signals that is traversed by conventional equipment. It was their contention that "MU's" have been doing it for fifty years, that the public has accepted this type of operation, and that it is safe and logical in modern times.

After the model board demonstration, which was set up to simulate both day and night operations, members of labor, management and Commission officials viewed *The One Man Transportation Story*—a one hour and forty-five-minute, 16mm sound-color film trip in an electrified Illinois Central cab on lines radiating out from Chicago.

J. T. Hawkinson, Manager of Illinois Central's Audio-Visual Department, filmed the unusual presentation, which included fine underground subway scenes shot in natural lighting with high-speed film. By filming actual railroad operations—which placed the audience in the engineer's seat—the railroad management dramatically and persuasively projected their side of the story.

"Time of Migration" Wins Plaudits for Potomac Films

The "alewife" is a strange, fresh water herring which lives in the secret fathoms of the sea for part of every year, and struggles up the Cape Cod streams to spawn in early spring. The suicidal drive of this creature to perpetuate life is the subject of a rich, beautiful new film called *A Time of Migration*. Nick Noxon of Potomac Films, Inc., wrote and directed the 13½-minute educational film which is based on John Hay's book, "The Run."

The drama of inland spawning has been sensitively photographed by Gregory Knowles and is accompanied by original violin music by Ron Riddle, particularly suitable for the scenes of tumbling streams. Sylvia Betts edited the film and Molly Noxon was Assistant Director. John Daly narrated *A Time of Migration*, which will be shown in theaters, schools and on television.

* * *

National Wildlife Federation Sees "Runways in the Wild"

General Thomas D. White, Chief of Staff of the U. S. Air Force, and a small, select group of National Wildlife Federation and Remington Arms Company officials recently pre-previewed a new conservation film, titled *Runways in the Wild*.

The Air Force-sponsored film, which includes refreshingly primitive aerial shots of Florida forests, demonstrates how natural resources at defense installations are being managed for recreation, by both military personnel and the general public.

A premiere of the new film was a feature of the 25th annual convention of the National Wildlife Federation which recently convened in the fabulous new Washington headquarters building which features blue and white stone bas-relief of nature subjects on its exterior.

This 14-minute sound-color film was filmed in 16mm by Douglas Productions, Inc. of Chicago.

NASA Has 750,000 Feet of Space Footage in Depository

Commercial film producers wh use right-up-to-the-minute spac subject stock footage are discove ing a wealth of material in the Na tional Aeronautics & Space Ager cy's Central Film Depository i Washington.

Housed in Byron Motion Pic tures, the space agency depositor has, in less than one year, amasse roughly 750,000 feet of film Nearly 80 percent of this film ha been shot at Cape Canaveral, an the rest is representative footag of research and development sub jects from NASA centers.

William Gratrix and Glenic Johnson are in charge of the bur geoning project; they have gath ered close to 500 indexings base on the Navy cataloguing system This cross index file provides a expeditious way to uncover, scen by scene, all material on spac and aeronautical subjects. Infor mation may be obtained fror them at 1226 Wisconsin Ave N.W., Washington 7, D. C. At th present, search time and service are free, although NASA asks tha rough outlines of requirements ac company requests for stock foot age. For cases when lots of mate rial is needed, NASA review scripts. Stock footage is available of course, at no cost to the gov ernment.

Coe-Peacock, Inc., Debuts as New Script-Production Firm

☆ Coe-Peacock, Inc., is the name of Washington's newest script-writing and production coordinating services firm located in the Woodmont Triangle Bldg., 8030 Woodmont Ave., Washington, D. C. Under the direction of Lowry Coe and Clifford Peacock, formerly with Scripts by Oeveste Granducci, Inc., Coe-Peacock will specialize in motion pictures, sound slidefilms, slide presentations, meeting programs, training programs, and film reports for commercial, in-plant, military and government producers.

Lowry Coe has had 13 years' experience in the non-theatrical film industry; he was, for five years, with the Naval Photographic Center in Washington, and was with Granducci for eight years, where he served as vice-president, secretary and member of the Board of Directors.

Clifford Peacock was formerly a writer-director with WTVR-TV, General Electric, and the Martin Company of Baltimore. He is a specialist in space and missile films and has won many awards in this field. He, too, served as vice-president and member of the Board of Directors in Granducci's well-known company.

Revenue Service Releases Film "The Inevitable Day"

☆ *The Inevitable Day* comes for every American citizen sooner or later, which accounts for the title of a new, light film about a very dull, taxing subject—the Internal Revenue Service.

Like Halloween, New Year's Eve and the Fourth of July, every year the inevitable day arrives when 5 billion dollars in taxes are collected by IRS—and almost one-half that amount from personal income. It's a fascinating story when one peeks behind the scenes, and Gene Starbecker has written and directed a breezy, human documentary of this government agency which reveals all.

The film covers every conceivable operation—from the electronic machines, which will eventually provide a master file on tape of every taxpayer, to an amusing account of what one does if he disagrees with a tax finding against him. Animated TV spots, woven nicely into the film story, provide moments of levity after necessarily long information about tax forms has been explained.

In another typical scene, when a high school boy tells his father what he has learned about deductions in one of the new high school "tax education" cours[es] we find the father flat on his bac[k] with one red-soxed foot on a sc[hair] and the other in his wife's lap, h[is] ing darned.

The film employs professiona[l] actors in various agent roles, b[ut] uses actual office operations t[o] highlight many important fu[nc]tions.

Claude Rains, noted sta[ge] screen and television actor, n[ar]rates sections of the film in whi[ch] performers do not actually spe[ak].

Ralph Lopatin Productions [of] Philadelphia produced the fi[lm] under the supervision of the I[RS] Public Information Division a[nd] Mr. Charles Lammond, Inform[a]tion Officer.

Revised American Standard Ci 35mm Sound Test Film by SMPE

☆ For use by theatre owne projectionists and acoustical en neers, a new revised Americ Standard cites a test film qualitatively checking and adju ing 35mm motion-picture sou reproducers and judging the aco tical properties of auditoriums.

Approved by the Americ Standards Association as "Ame can Standard Theatre Sound T Film for 35mm Motion-Pictu Sound Reproducing Systen PH22.60-1959," the new sta ard is a revision of one appro in 1948. Now it specifies a 35m film which may be used to det mine sound reproduction and efficiency of acoustical systems.

The test film contains samp from studio feature pictures, a also examples of typical relea print material intended to prov a check on reproduction. This cludes volume range, freque response, system noise, pow handling capacity and flutter.

A 500-foot test film made i accordance with the Americ Standard has been produced y the Society of Motion Picture a Television Engineers, the adm istrative sponsor of the project.

Don't get too educational when you make an educational motion picture. True, you usually have a captive audience, a group in a special field willing and eager to learn; but "educo" still means to bring out not to push in. Be gentle with the ladle. Be generous with the inspiration, the application, and the "what's-in-it-for-me."

Authentic Look at Yesterday—

"Flickers" of 1910 Recreated by Jamieson

☆ Authenticity in motion pictures can be carried a long way . . . and when it is convincingly applied to production equipment, that deserves note.

Production of a series of television commercials by Jamieson Film Company, Dallas, Texas, called for re-creation of scenes from the period circa 1910. Sponsor was Blue Plate Foods, Inc., through Fitzgerald Advertising Agency, New Orleans.

Props Selected With Care

Meticulous care was taken by the Jamieson crew in assembling the obvious props—period costumes for the four principals were slavishly copied, accurate sets were chosen, and even an original 1910 Locomobile was unearthed to add authenticity to one of the series.

But, sticklers for detail, they decided to go a step further and recreate the old "flickers" of 1910 to take viewers back to the early days of the cinema. Problem was, though, that modern film processing and cameras are specifically designed for smooth action and pictures of high photographic quality.

Use Old Hand-Crank Camera

An immediate solution was the use of an old Bell & Howell hand-crank camera, retired to a Jamieson storeroom for some thirty years. Because of its hand-crank motion, the old Bell & Howell did a good job of duplicating exactly the flickers of a half century ago.

But one problem created another. Chester Gleason, head cameraman, discovered that the old camera itself posed a strange difficulty. Modern camera crews, accustomed to the completely motor-driven equipment of our era, were stuck with learning how to operate the crude old-timer. Here, Hugh Jamieson, Sr., founder of Jamieson in 1916, came to the rescue with pointers on how "movies" were made in the "good old days."

Original 1910 Locomobile *is pictured in Blue Plate films.*

Acting of the Old School

Even Director Jerry Dickinson and his talent, schooled in the subtle, sophisticated action and expressions of modern techniques, had to re-learn the old gestures and pantomime necessary to tell the story without sound.

And, finally, the film quality problem had to be solved by the processing lab. The answer came in using sound recording film instead of modern picture negative film to get the effect of "moving pictures" that grandma and grandpa used to see.

Hartford's Constitution Plaza Construction Project on Film

☆ Maher Productions of Wethersfield, Conn., will produce a color motion picture on the inception, construction and co[m]pletion of Hartford's Constituti[on] Plaza, it has been announced [by] F. H. McGraw & Company, co[n]tractors for the $50-million urb[an] renewal project.

The film will be a time-lap[se] production covering approxima[te]ly two years of construction. P[at]rick Maher, cameraman and he[ad] of the firm, started assembli[ng] footage on the construction ar[ea] prior to demolition of existi[ng] buildings and has a complete fi[lm] record of the project to date.

Besides historical c o v e r a g[e] from the time Constitution Pla[za] was a depressed area, the film w[ill] stress modern methods of co[n]struction, the vast supply of m[a]terials required to erect the bui[ld]ings, the veteran "constructio[n] eers" who are building it, a[nd] some of the innovations employ[ed] in construction of the project.

)pening Young Minds to Modern Science

A Nobel Prize Winner, Harvard Professor Purcell Is One of Men of Science Contributing to Modern Learning Aids

)NE OF THE American scientists selected recently by IME Magazine as 1960's "Men f the Year" is also one of the ontributors to a modern teaching rogram that is upgrading high chool science courses.

Professor Edward M. Purcell f Harvard, who won a Nobel ward for his "nuclear resonance" ystem for measuring atomic roperties, is a member of the 'hysical Science Study Committee. The PSSC was organized in 956 at the Massachusetts Institute of Technology when it became apparent that the teaching f physics in American high chools was as much as 50 years ehind the times.

Modern in Content, Approach

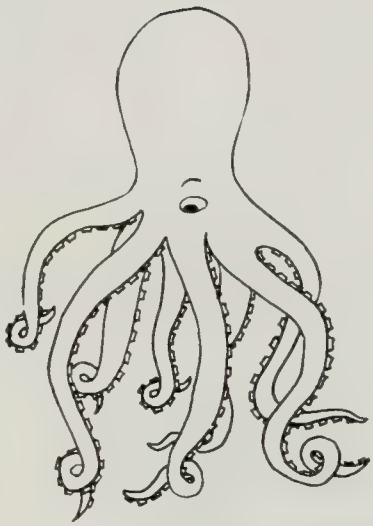
The committee, composed of niversity professors, high school eachers, industrial scientists and echnical specialists from many arts of the country, set out to deise a new course in physics that ould be modern both in content nd in teaching approach.

Support was given the committee by the National Science Foundation, the Ford Foundation and he Sloan Foundation, and the ommittee created a completely ew course of study. It was tested every step of the way in actual classrooms.

Components of the course include a new textbook, laboratory equipment especially designed to bring the student into experiments, achievement tests, a series of paperback books for supplementary reading, and a series of 16mm motion pictures. A number of institutes have been held to train teachers in the use of the new course.

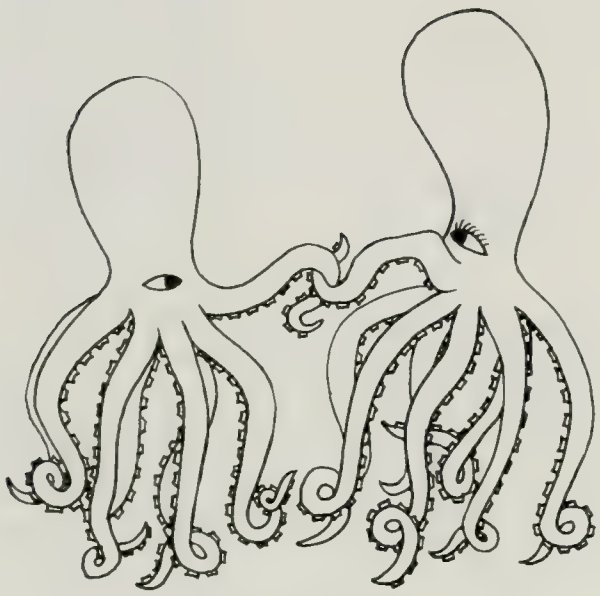
Distributes Film Portions

The film portions of the courses are being distributed for the PSSC by Modern Learning Aids, a division of Modern Talking Picture Service organized for the program.



Like all of the materials of the course, they can be used independently of the others; a PSSC scientist has correlated the films with corresponding chapters of all leading texts now in use.

Advantages of Film Medium



The advantages of the motion picture media were brought into account in the aim of the film production. Each film was expected to meet at least one of five criteria—it had to show something that was either too big, too small, too complicated, too ex-

Left: *"Millikan Experiment" shows Dr. A. Redfield of I.B.M. performing simplified experiment photographed through microscope so students can see it clearly.*

pensive or too remote to be conveniently brought into the classroom or performed there. All of the films were carefully designed to be useful to the teacher—never to replace him.

The quality of the films is noted in that one of them was chosen as the best high school science film at the American Film Festival of 1960, sponsored by the Educational Film Library Association.

Dr. Purcell himself may be seen in two of the films, *Inertia* and *Inertial Mass*. In the former, as an example of the kind of unusual visual interest created in the films, he dramatizes Galileo's principle of inertia by having trained fleas pull heavy, but nearly frictionless, hockey pucks on dry ice bearings.

The films are available to all schools on a purchase or subscription rental basis from Modern Learning Aids at Modern's film libraries in 30 principal cities throughout the country.

Medical Groups Produce Film on Physician-Hospital Relations

☆ *A Case for Understanding* is a new motion picture for hospital orientation of medical students, interns and residents. The film was produced by the American Hospital Association, with the cooperation of the American Medical Association, for the Hospital Research and Educational Trust under a grant from Abbott Laboratories, North Chicago, Illinois.

Production of the film was handled by Centron Corporation, business communications firm in Lawrence, Kansas.

The relationship of the physician to the hospital is the theme of *A Case for Understanding*. At its premier showing during the AHA's annual Midyear Conference of Presidents and Secretari of Hospital Associations, Robe R. Cadmus, M.D., noted th hospital medical staff membe and hospital administrators mu "talk the same language if tl best possible care is to be give to patients."

Improved understanding b tween hospitals and physicians c help solve such problems as risi costs and personnel recruitmer said Dr. Cadmus, director of tl North Carolina Memorial Hosp tal, Chapel Hill.

In commenting on the filr Daniel P. O'Donnell, assista manager of the Hospital Divisio Abbott Laboratories, said "W hope the film will help to serve a bridge of understanding betwe young doctors and the hospital ar thereby contribute to the bette ment of health care."

The film (sound, color, 16mm runs 27 minutes. It may be rente from the American Hospital A sociation, 840 N. Lake Sho Drive, Chicago 11, Ill., at $6 f three days, or may be purchase for $150. It is also available c loan from the American Medic Association and Abbott Lab ratories.

Visuals Help Inform Investors' Salesmen

Frequent Use of Visuals for Group Meetings and Training Pays Dividends at Investors' Diversified Services, Inc.

ONE OF THE NATION'S largest investment firms has found that frequent use of visual aids at group meetings and training sessions pays substantial dividends.

Investors Diversified Services, Inc., Minneapolis, uses visuals wherever possible to lend versatility and variety to all meetings —whether the group be members of the board or sales trainees.

According to Douglas F. Johnston, Manager, Investment Controls, the benefits are significant. They come in the form of increased attention, heightened speaker effectiveness, greater ability to project ideas and information, more efficient meetings and often a saving of considerable time.

When Words Aren't Enough

"There are many presentations we can make visually which we can't bring in verbally," Johnston says. "If, for instance, we have a graph or chart of figures we want to present, it's difficult and time-consuming to try to do it verbally.

"Then, too, a speaker has a tendency to lose his audience if he hands out printed sheets. The speaker can be discussing one point and most of his listeners are too busy looking either ahead or behind on their own material to pay much attention.

"People are more inclined to follow a presentation given pictorially with a verbal narration, and they retain information better when it is given in this way. In our training sessions, we tell the men they are going to be given just what they see. In this manner we get their full attention," Johnston says.

Overhead a Most-Used Tool

The Investment Controls section maintains a research and control system to provide investment and fund performance data on a current basis. This includes statistical material for the analysts and up-to-date information for management.

The overhead projector is the most frequently used visual aid tool at Investors Diversified Services. For several years it has played a role in sales training, board meetings, and other group sessions where data of one type or another is being discussed.

A speaker using this device faces his audience and can easily observe reactions during his presentation, since the projector operates effectively in a lighted room.

Procedures analyst *Henry Whitbeck uses "Thermo Fax" overhead projector to illustrate a discussion in board room at Investors Minneapolis headquarters.*

He may do his own projecting, correlating both visual and oral elements of his presentations, and writing or sketching on the transparency film with a grease pencil as it lies on the projector, if he so desires.

Shown to 250 Salesmen

As many as 250 salesmen attend training sessions held regularly by the company, and IDS salesmen agree that the overheads are a help to them.

The meetings are scheduled where there is adequate room for all to see, and a large screen is used. The visual presentations include such items as data about other companies, information on special sales points the men are asked to highlight, and background material on investment projects handled by the company.

Other visuals may be of an organizational nature, such as decision flow charts showing how potential investments are studied and decisions made.

Also Aids Public Relations

"We have also used the projectors in cases where inaccurate stories about the company have been published and the salesmen have expressed concern," Johnston said.

"For instance, if erroneous data has been used in a published report or article, we clip it, make a projection transparency and put it on the screen, then go on from there to show the group precisely how the report was wrong by projecting the correct data along with it."

The recent development of a new method of making transparencies for the overhead projector has given Investors Diversified Services an opportunity to use the machine where it never had the capability before.

Developed by 3M Company

Under the new process developed by Minnesota Mining and Manufacturing Company, projection transparencies of almost any written, printed, typed or drawn document can be made in seconds under any lighting conditions and are then ready for instant use.

The transparency is made by simply running the document to be copied and a sheet of transparency film through a "Thermo Fax" dry process copying machine. The new flexibility has been a factor in tripling the company's use of visuals during the last year, Johnston reported.

He adds that during meetings many questions which can't

Announce Winners at American Film Festival

Business-Sponsored Films and Producers Take Top Honors at Third Annual New York Program With 16 Blue Ribbon Awards in Festival's 34 Categories

SIXTEEN MOTION PICTURES, slidefilms (sound) and silent filmstrips created for American business companies received 16 of the 57 Blue Ribbon Awards presented at the annual awards banquet which concluded the Third Annual American Film Festival on Friday evening, April 21st in New York City.

Sponsored by the Educational Film Library Association and held at Manhattan's Barbizon-Plaza Hotel, the 1961 Festival drew more than 800 entries for the 34 award categories in which films were judged.

The second largest group of Blue Ribbon Awards (11) went to five motion pictures and six filmstrips produced for educational use, with nine of the Festival's top awards going to pictures produced by government organizations, including the National Film Board of Canada, the United States Department of Agriculture and the United Nations.

Awards to Service and Medical Groups

Service organizations and professional medical groups shared six Blue Ribbons, for three motion pictures and three filmstrips produced for such groups as the Boy Scouts of America, the Girl Scouts of the U. S. A., the American Heart Association, the American Hospital Association and the American Association of Nurse Anesthetists. Religious groups such as the American Bible Society, the Billy Graham Evangelistic Association and the United Church of Christ shared three Ribbons for motion pictures and filmstrips.

Network television programs, represented by CBS and NBC, received two of the Festival's top awards and two producers from overseas, one in London, England and the other in Paris, France were other winners.

Sponsors of Award-Winning Pictures

Of the awards presented for business-sponsored subjects, top honors for motion pictures in ten of the 34 Festival categories were shared by such groups and companies as Aetna Life Affiliated Companies; American Title Association; Bethlehem Steel; Coffee Brewing Institute (two Blue Ribbons); Claude Michael, Inc.; Planning Research Corporation; Smith, Kline & French Laboratories; Sperry & Hutchinson Company; Volkswagen of America; and the Western Electric Company.

Blue Ribbons for sound slidefilms and silent filmstrips sponsored by business organizations were shared by the Frigidaire Division of General Motors, Household Finance Corporation, Reynolds Metals Company, Shell Oil and Time, Inc.

All except one motion picture and a single filmstrip program sponsored by these business groups were produced by specializing commercial producers. In addition to sharing 14 of these Blue Ribbon awards, other well-known producers such as The Jam Handy Organization, Centron Corporation, Pilot Productions, Henry Strauss & Company, Churchill-Wexler Film Productions and Visualscope Incorporated drew an additional total of seven Blue Ribbons for prize-winning motion pictures and slidefilm or filmstrip productions.

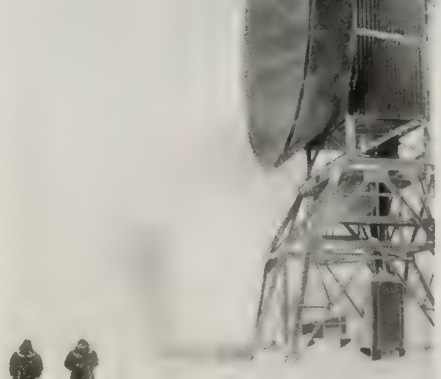
The Coffee Brewing Institute took Blue Ribbon honors in two separate categories with a first place in Home Economics' films for *This Is Coffee* and another top award in the Sales & Promotion classification for *The Long Cool Summer*. Both pictures were produced by Vision Associates, Inc.

"The Give and Take," *produced by Marathon International, shared the "Economics" award.*

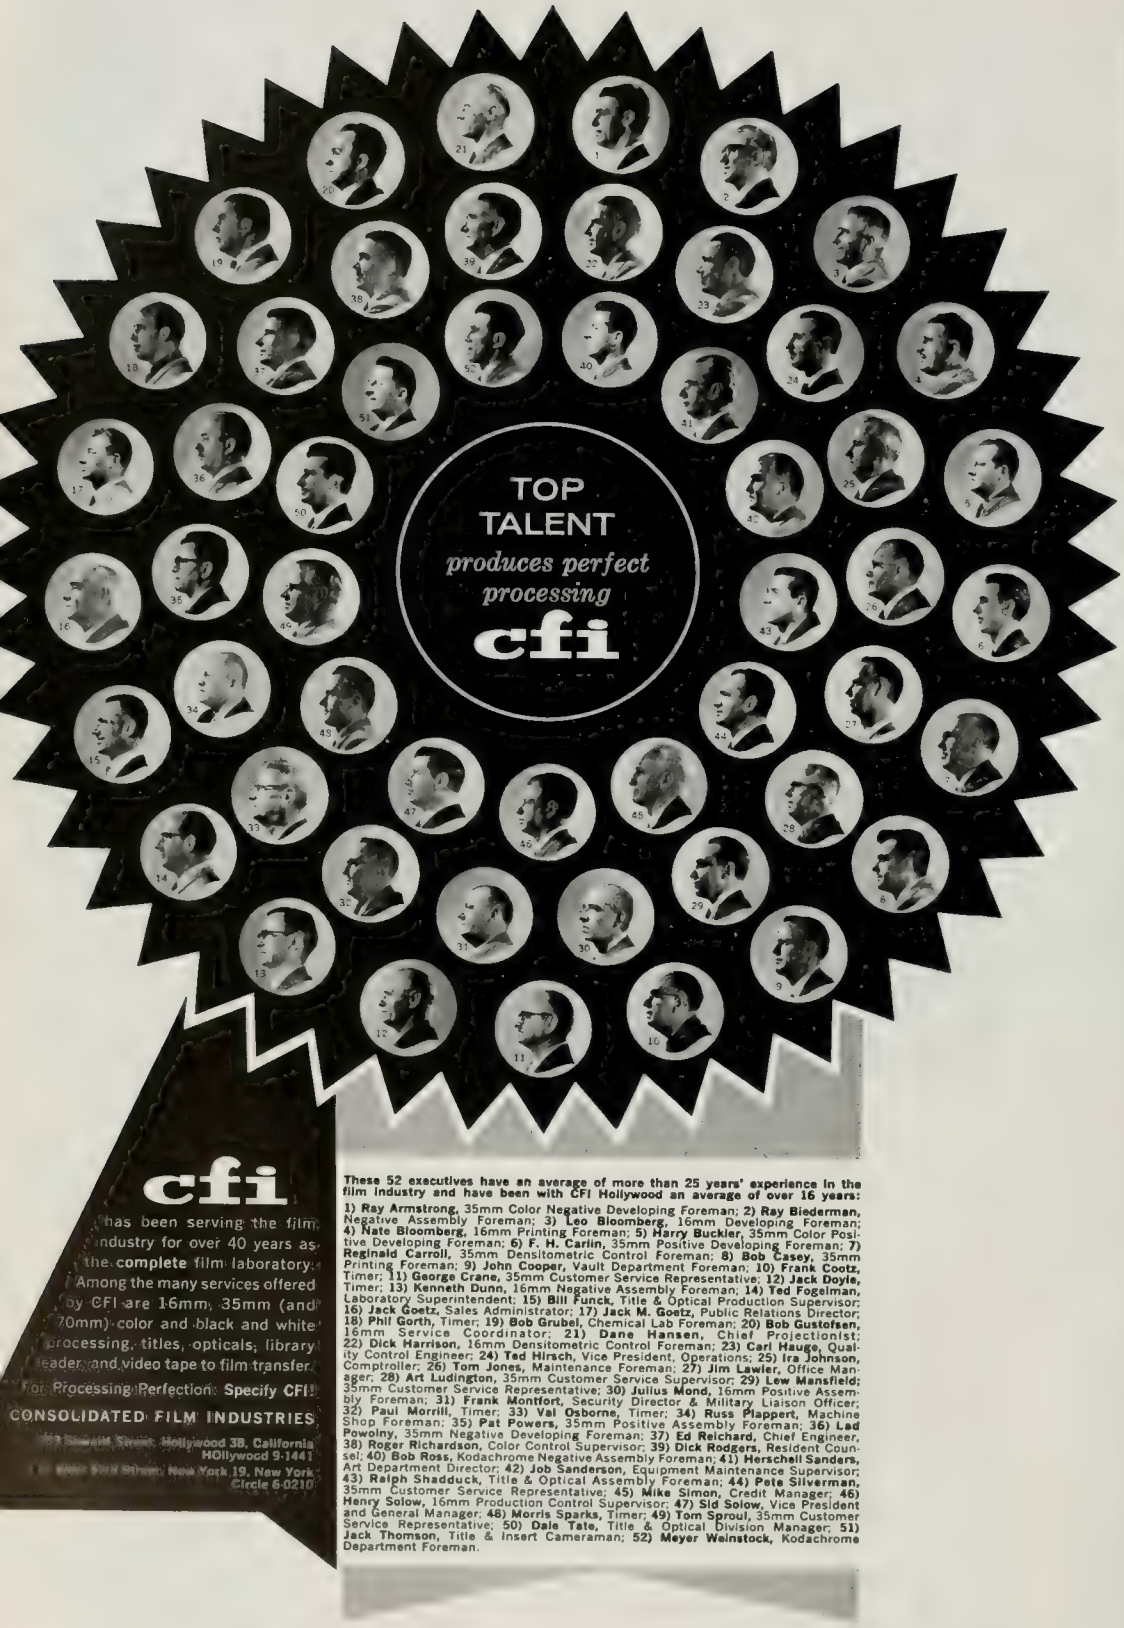
"A Place in the Sun" *was the co-winner among "Economics" films, produced by Jamieson Film Company for the American Title Association.*

Left: *Bethlehem's "Vacuum Pouring" (produced by Audio Productions) was a Blue Ribbon co-winner.*
Right: *a scene from "The Land of White Alice."*

Top Blue Ribbon award *for Public Relations' motion pictures went to "Mural-Midwest Metropolis" produced by Fred Niles Productions.*



Public Relations Ribbon to "Mural"



The top award for motion pictures in Public Relations: Commercial Organizations went to *Mural: Midwest Metropolis*, produced by Fred A. Niles Productions, Inc., for the Sperry & Hutchinson Company.

In the group of Economics' films, duplicate first-place awards were shared by the motion pictures *The Give and Take*, produced for Volkswagen of America by Marathon International Productions, Inc., and *A Place Under the Sun*, produced for the American Title Association by the Jamieson Film Company, Dallas, Texas. A similar tie brought Blue Ribbons in the Industrial & Technical Processes' group to the Bethlehem Steel Company for its motion picture, *Vacuum Pouring for Better Forgings*, produced by Audio Productions and to the Planning Research Corporation for *The Supply Manager's Dilemma*, produced by Graphic Films Corporation.

The Western Electric Company's informative motion picture on the North American Defense establishment, *The Land of White Alice*, received a Blue Ribbon award in the Geography & Travel category. Producer Willard Van Dyke shared the honor. In the Sales & Technical Training Films area, *On Solder*,

Copies of Production Review

☆ While available, copies of th 11th Production Review issues ar available at only $2.00 each.

BLUE RIBBON WINNERS:

(CONTINUED FROM PAGE TWENTY-SEVEN)

roduced by Scope Film Associates, brought Blue Ribbon to its sponsor, Claude Michael, nc.

The motion picture, *Congestive Heart Failre,* was the Blue Ribbon winner among films n Health for Non-Medical Audiences. It was roduced by Churchill-Wexler Film Producions. The top-ranked motion picture in Medal Sciences for Professional Audiences was *Resuscitation of the Newborn,* produced by Sturgis Grant Productions, Inc., for Smith, Kline & French Laboratories.

Centron Production Wins Blue Ribbon

In the important category of Personnel Training & Relations' films, first prize went to *A Case for Understanding,* produced for the American Hospital Association by the Centron Corporation, Lawrence, Kans. The Safety Films winner was Aetna Life Affiliated Companies' *To See Ourselves.*

With both sound slidefilms and silent 35mm ilmstrips judged alike in various categories, oth business sponsors and national associaions came out with winners in many categories. Pilot Productions' slidefilm, *A Special Type of Nursing,* won a Blue Ribbon for the American Association of Nurse Anesthetists; n Sales & Technical Training slidefilms, a Blue Ribbon went to the Frigidaire Div. of General Motors for *What's the Good Word?,* roduced by Henry Strauss & Company. Home Economics' filmstrip honors went to the William P. Gottlieb Company production, *Manging Your Clothing Dollars,* sponsored by he Household Finance Corporation.

Awards to Animatic, Elektra Titles

Sales & Promotion filmstrip-slidefilm "firsts" ere shared by Reynolds Metals Company's *Highways—They Make America Great,* produced by Animatic Productions, Ltd., and by Time, Inc. for its promotional slidefilm *Time,* roduced by Elektra Studios, Inc. The Shell Oil-produced filmstrip (part of a series) *Perception of Driving Hazards—Part III* won the Safety filmstrip award.

With a total of four Blue Ribbons, the Naional Film Board of Canada took top Festival honors. The NFB motion picture, *The Back-Breaking Leaf,* won a "first" among ilms on Agriculture, Conservation & Natural Resources and *Universe* was the motion picture winner among Science & Mathematics' ilms for High School, College and Advanced Groups. Two NFB filmstrips, *The Seaway* and *Owls,* were other Blue Ribbon selections.

Among Government producers, the U. S. Department of Agriculture's Motion Picture ervice won the Blue Ribbon award in Guidnce: Personal and Vocational motion pictures with a long-awaited title on *Agricultural Engineering.* The United Nations' motion picture *The International Atom* was a Blue Ribon winner in general Science & Mathematics ilms and the motion picture, *A Scary Time,* roduced by Shirley Clarke for the UN's Children's Fund won a Blue Ribbon for Public Reations among non-profit and educational oranizations.

Other government-sponsored Blue Ribbon winners included the Danish Government Film Office, for *Introduction to Denmark* and the Los Angeles Fire Department, for *Our Obligation,* both motion pictures.

Two Ribbons to Jam Handy Filmstrips

The Jam Handy Organization, Inc., received two filmstrip Blue Ribbons for *Airplanes, Jets & Rockets* and *Instruments of the Symphony Orchestra.* Other multiple award winners among classroom film producers were Film Associates of California with Blue Ribbons for motion pictures *Discovering Color* and *What's Under the Ocean.* Weston Woods Studio received a Blue Ribbon "first" for the motion picture *In the Forest* and another for its filmstrips, *Picture Book Parade—Set No. 5.*

Time, Inc., was honored for the filmstrip series, *Darwin's World of Nature* and for the motion picture, *Primary,* produced by Richard Leacock. The University of California with a Blue Ribbon for *Baboon Behavior,* shared Sociology & Anthropology honors with the Columbia Broadcasting System's *The Population Explosion.*

Cite Films in Broad Public Interest

In the broader public interest were such Blue Ribbon award winners as the NBC Project 20 filmed program, *Mark Twain's America; And No Bells Ring,* the Blue Ribbon winner among Education & Child Development motion pictures, sponsored by the National Association of Secondary School Principals; and Billy Graham's filmed story of his African tour, *Africa on the Bridge,* produced by World Wide Pictures for the Billy Graham Evangelistic Association. *The Coming of Christ,* sponsored by U. S. Steel on NBC's Project 20 television program, was also awarded a Blue Ribbon.

Presiding at the Festival Award Banquet was Frederic A. Krahn, President of the Educational Film Library Association and Assistant Director of the East Meadow, N. Y., Public Library. EFLA's newly-instituted award to "the person who has done most over a period of 10 years or more, to expand significant use, production, or distribution of audiovisual materials," was presented to Dr. Edgar Dale, Professor of Education and Director of the Bureau of Educational Research & Service of Ohio State University.

Special emphasis on 35mm filmstrips throughout the Festival attracted an overflow audience to the evening program "Filmstrips—the Cinderella of the A-V Field." Joining chairman Dr. Irene Cypher of New York University in a panel discussion on this subject were Anne E. Cotter of Filmscope, Inc.; Hans Moeller of the National Film Board of Canada; Hy Schwartz of Victor Animatograph and Peter Yung, of Elektra Studios.

Another Festival evening was devoted to a panel-led audience participation program on "Film Making in Africa" under the chairmanship of George C. Stoney. Julien Bryan's soon-to-be-released motion picture *Tropical Africa* was shown in its entirety. A special afternoon film forum on current production of films concerned with "Mental Health in Today's World" was another Festival event. Kathryn Linden, Director of the ANA-NLN Film Service, was the chairman.

BEHIND THE SCREEN

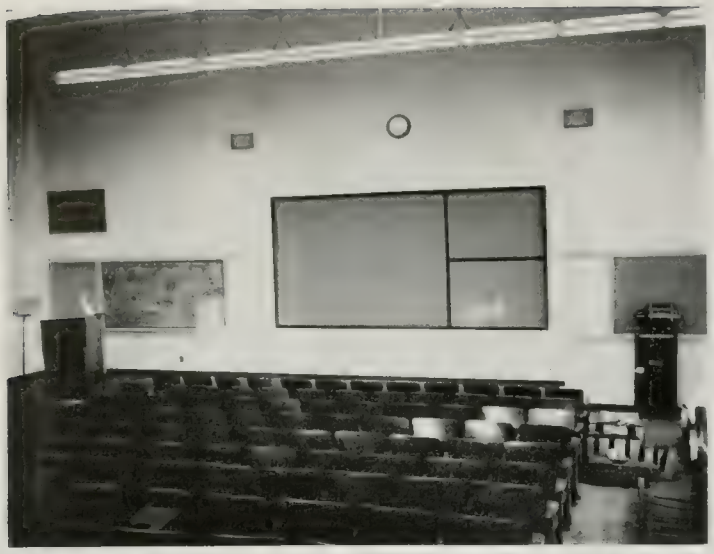
1961 Greater New York Fund Drive to Show "Hidden City" by Wilding, Inc.

☆ Kudos to Wilding, Inc., and producer Mel London for the heart-warming new 10-minute film, *Hidden City,* which will spark the 1961 Greater New York Fund campaign. Premiered May 1st at the Commodore in Manhattan, the film dramatically portrays the city the average man seldom sees—the heart of the town in its hospitals, homes for the aged, homes for foundlings and for crippled children as well as family and youth counseling agencies. Ronald Reagan's narration helps tell the story of the *Hidden City* in one of the year's best!

* * *

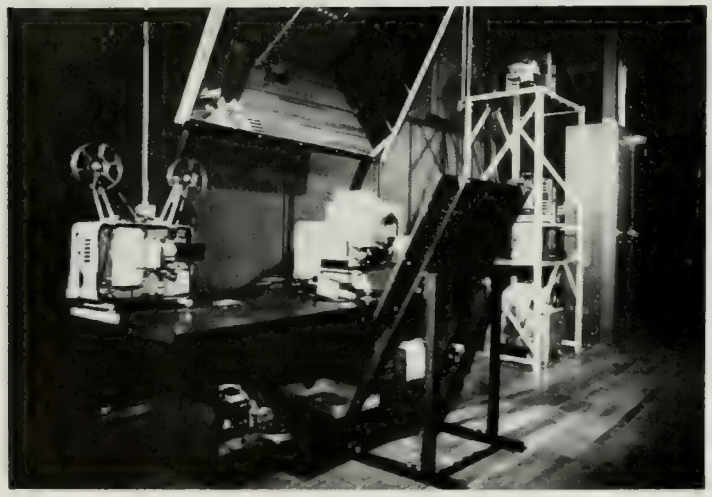
Controlling Interest in Atlas Film Corp. Acquired by Kellock, Associates

☆ The controlling interest in the Atlas Film Corporation, Oak Park, Illinois, has been purchased by James A. Kellock and associates. News of the acquisition of the nation's oldest industrial film company (founded in 1913) was released at presstime. The new slate of company directors will be named at the annual meeting on May 9th and new officers will be announced on that date.



Mr. Kellock is a veteran in the business communications industry with more than 25 years of experience in the production of motion pictures, slidefilms, TV commercials, government training films and business shows and meetings and expects to expand Atlas' services to include all these media.

You Read About These Prize Films and Their Producers in These Pages



☆ Readers of BUSINESS SCREEN were well-informed about seven of the 11 Blue Ribbon award-winners among business-sponsored motion pictures at the recent American Film Festival; reviews of two other winners, *This Is Coffee* and *The Long Cool Summer,* were already in print (see page 33) when the awards were announced.

But in 1960 you read featured reports in these pages about Aetna's *To See Ourselves;* the American Title Association's *A Place Under the Sun;* Bethlehem Steel's *Vacuum Pouring for Better Forgings;* the Smith, Kline & French motion picture, *Resuscitation of the Newborn;* Sperry & Hutchinson's fine *Mural-Midwest Metropolis;* and Western Electric's *The Land of White Alice.*

As a fitting postscript, let's add that our recent 11th Annual Production Review issue carried the detailed reference listings (exclusively) of 19 of the specializing film production studios credited with Blue Ribbon-winning motion pictures and filmstrips. All except TWO of the commercial film studios involved in these cited productions were REVIEW listees. That's batting 900 per cent in anybody's league for buyer reference!

Communication wall *in new University of Wisconsin classroom shows three-section rear-projection screen. TelePrompTer lectern at the left.*

Mirrors reflect *visual images from variety of equipment to the rear projection screen behind the "communication wall" of classroom.*

Projection equipment *for motion pictures, slides or overhead material is located behind screen—out of view of audience and teacher.*

Communication Wall Concept Integrates Audio-Visuals in a Wisconsin Classroom

TelePrompTer Installation Increases Teacher Efficiency

MACHINE AUTOMATION, already extensively employed in industry and business, has entered education *en masse* in a University of Wisconsin classroom during the current semester.

In order to seek to improve university instruction and to test teaching via automation as against the usual teaching methods, the classroom has been converted into a laboratory. The auditorium used as the laboratory is much the same as the room in which students have been listening to lectures for years—but there has been a change.

Equipment Out of Sight

The difference lies under the floor and behind a three-section plastic projection screen in front of the room. Packed out of sight of the students are two slide projectors, a motion picture projector, opaque projector, teleprompter units, tape recorder, four-speaker sound system, controlled lighting, a television projector, and an elaborate system of electronics to automatically control the machines.

Under the direction of Prof. John Guy Fowlkes and Associate Dean Paul Eberman, the Wisconsin Improvement Program of the University School of Education will be conducting the "experimental" laboratory. At least six professors will use the laboratory during the initial semester. They will prepare integrated lecture and audio-visual material with the assistance of Raymond Hagen, specialist from the TelePrompTer Corporation.

Can Automate All Devices

Using any or all of the equipment, lectures may be taped and played back to students. Slides, motion pictures and kinescopes may automatically appear before the class at appropriate times. Although it is possible that the apparatus could entirely replace the professor in certain classes, the University has no plans calling for such use.

The human professor must still choose and prepare visual and audio material. He must answer student questions. Most important, he must prepare the lecture and keep it up to date. In fact, Dr. Walter Wittich, professor of au dio-visual education, believes tha professors using the new equip ment will spend much more, no less, time preparing a course—al to produce increased efficiency i learning outcomes.

Tools Cued to TelePrompTer

When a teacher utilizes al equipment, he uses the tele prompter, an endless roll contain ing his lecture which appears i front of him but which is no visible to students. The tele prompter may contain "cues which, at prearranged times, au tomatically turn on one or all o three motion picture and slid projectors, a tape recorder or television projector.

All projectors are placed be hind the screen, except the TV projector, and project through th screen to eliminate classroom dis traction.

For More Effective Learning

What are the purposes and ad vantages of creating such a class room laboratory?

Fowlkes, director of the Wis consin Improvement Program, ha given important reasons. "It i possible that more effective lec tures can be presented becaus there will be tightness in writin and presenting lectures in the lab oratory," he said. He also pointe out that use of multiple visua aids, in the form of the thre screens and the television screen will possibly mean more rapi and efficient learning.

"What we are attempting," said Eberman, "is to make lectures t large groups as effective as pos sible and to explore a variety o uses for audio-visual equipmen in the classroom." He also pointed out that use of this equip ment can involve a type of tean teaching because several profes sors can share their competencie in a single course through thi medium.

"Not For All Teaching"

But he also emphasized that th equipment cannot be used in al kinds of teaching. "It will be use only where the material may b adapted to a formal, well-planne lecture program."

Prof. Michael Petrovich, wh

Red Cross Dedicates Its 164th Picture to Services of Two Million Volunteers

Latest Film Marks 34th Year for Producer William Ganz

SPONSOR: The American Red Cross

TITLE: *A Little Bit More*, 15 min., b/w, produced by the William J. Ganz Company.

Both on the stage and before the cameras Ralph Bellamy has achieved real satisfaction in his profession by going beyond the mechanics of the acting trade to put a little bit more of himself into every part he plays.

In real life, too, Mr. Bellamy does a little bit more. For instance,

On the set (l to r): Roy Johnson, Pub. Info. Director, Red Cross; Actor Ralph Bellamy; Warren Murray, film's director; and Julian Townsend, on camera.

as a Red Cross volunteer he appears as guide and narrator to this new film which tells of volunteer work in a typical community —Mr. Bellamy's home town, as it happens.

Volunteer Tradition Strong

The film shows a tradition that has always been strong in American life—the volunteer . . . firemen, nurses, workers on civic committees, in hospitals and

Producer Bill Ganz *(left) with Roy Johnson; director Murray; and film's star, Ralph Bellamy.*

countless other activities. We'd be hard put to do without them.

Let's take Amy Jenkins, a housewife in this film who drives for the Red Cross two days a week; or Debbie Carter, a young student who takes care of children for people in emergency situations. Dozens of people in the town do so much for their neighbors as Red Cross volunteers—teach first aid, home baby care, serve on disaster committees, or work in hospitals as Gray Ladies. In fact, out of 155 Red Cross workers, only one is a career staff employee, all the others are volunteers—part of two million Red Cross volunteers across the nation.

Bellamy sums it up: "The story of volunteers and their work is never ending, for it's a chronicle of our consciences, our communities and our country. How it continues, how well it succeeds, is up to you and me."

A Proud Record of Service

A Little Bit More is the 164th picture made for the American Red Cross by Bill Ganz, head of the William J. Ganz Company. The association of the Red Cross with the production firm goes back 34 years.

The film was made possible by a grant from the Becton, Dickinson Foundation for the Advancement of Scientific Knowledge. The Becton, Dickinson Company makes thermometers, syringes, needles and other medical products; the film is completely noncommercial. Distribution is through local chapters of the American Red Cross.

UNIVERSITY CLASSROOM: (CONT'D FROM FACING PAGE) teaches Russian history, is one of the first to use the lab, and provides a case in point on the application of the audio-visual aids:

"During a lecture on Napoleon's invasion of Russia, for example, we can show a famous painting of the battle of Borodino on the large screen, project a diagram of the battle formations and a map of battle plans on the two small screens, and play Tschaikovsky's 1812 Overture for background music."

Bowling for Overseas Markets

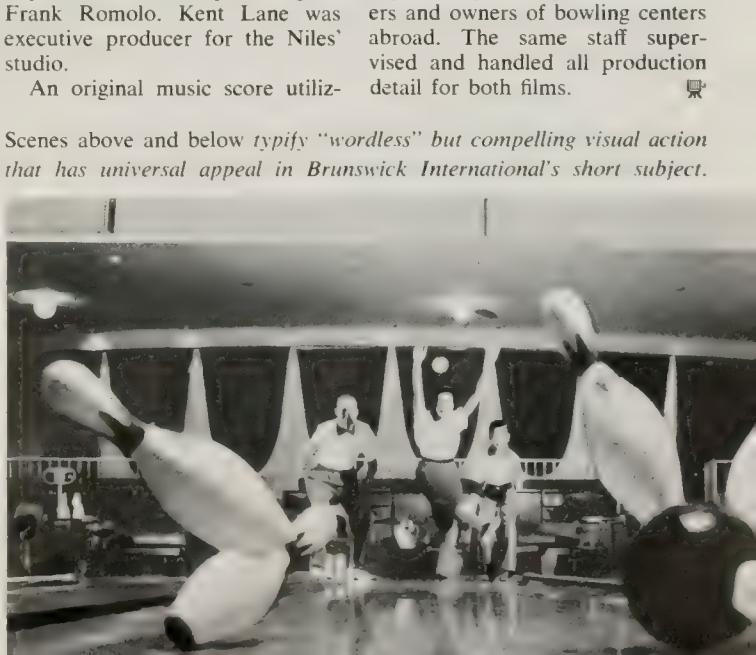
New Brunswick International Color Film is "Wordless" as Pictures and Music Spark Viewer Interest in Sport

TENPIN BOWLING is one American sports-pastime that seems destined to become as widely popular in lands abroad (where its early ancestors derived) as it is with young and old in North America. Helping to carry the spirit of the sport to audiences overseas is a remarkable new "wordless" motion picture which uses its color images and music background to "speak" a universal language.

The new 11-minute short subject, produced by Fred A. Niles Productions, Inc., for Brunswick International, hasn't a single word of dialogue or narration but it captures the essence of the game and emotions of the players with rare skill.

Showing in Theatres, on Television

Action hits the screen fast in this untitled short which is destined to play in movie theatres and on overseas television stations. Directed by Niles' Gordon Weisenborn, whose wife Selma did the shooting script, the Brunswick film gets momentum from the camera work of Andy Costikyan and the sharp editing of Frank Romolo. Kent Lane was executive producer for the Niles' studio.



An original music score utilizing a jazz motif that catches the tempo of the alleys and has a strong "international" beat is the work of talented Sid Siegel. Brunswick International's president, Myron O. Karlin, notes the "decision to focus in the realm of pictures and music has resulted in not only successfully bridging language barriers but has achieved an artistic success as well."

Most sequences were filmed in a Grand Haven, Michigan, bowling establishment, concentrating on the significance of the game to all ages who frequent these modern centers—a place of wonder for children, sport for the teenager, a date rendezvous for youths, exercise, fun and rugged competition for adults—recreation for all.

Also Has Second, Longer Film

Prospective investors in bowling equipment abroad will see a second and entirely different, longer picture, also produced by Niles for this sponsor. Presenting in detail the many Brunswick services and equipment, this film has the narrative track it needs to explain important points to builders and owners of bowling centers abroad. The same staff supervised and handled all production detail for both films.

Scenes above and below *typify "wordless" but compelling visual action that has universal appeal in Brunswick International's short subject.*

Dial Shows Teens the Way to "Good Looks"

Bright New Sutherland Film on Grooming Replaces Widely-Shown "Clean Look"

TIPS FOR TEENAGERS on general cleanliness, the how's and when's of bathing, and care of hands, hair and complexion are pointed out in a new color film produced by John Sutherland Productions for Dial Research Laboratories, Armour & Company.

Good Looks is a 20-minute, 16mm sound presentation on personal care and good grooming for the twelve-to-twenty set. This is Dial's second film on grooming; *The Clean Look*, produced in 1950, was recently withdrawn from circulation after widespread and continuous use in junior high and high school home economics, health and hygiene, speech and physical education classes.

Special pointers for the girls include do's and don'ts on the proper use of make-up; and for both boys and girls, suggestions on clothes and manners—all a part of good grooming.

A teacher's manual and student booklets—illustrated and reproduced in color—are available for use with *Good Looks*. The film is being distributed without charge to junior high and high schools and other youth groups through Association Films and Modern Talking Picture Service, Inc., nationwide.

Teen-agers are advised: *"be sure you rinse thoroughly, get all soap off your skin . . ."*

"The idea *is to get rid of as many of these bacteria as possible," notes the narrator.*

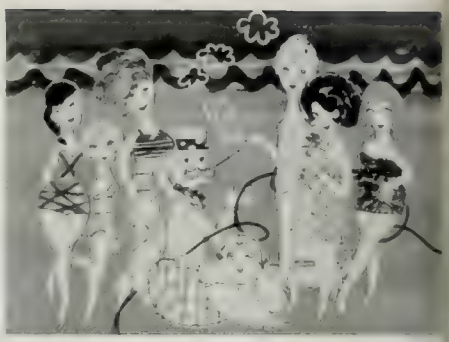
"A lipstick brush *gives a well-defined line and helps to stop lipstick smearing . . ."*

". . . boys don't care *much either for girls who overdress or overload with jewelry . . ."*

An Appetizing View of Seasoning's Role in Cookery

Housewives, Home Ec Groups Learn About Spices and Herbs from R. T. French

SPONSOR: R. T. French Company



TITLE: *The Kitchen Keyboard,* 20 min., color, produced by On Film, Inc.

☆ Since seasoning is a personal art there is no hard and fast rule for cooking with spices and herbs. The only rule is to make your own—experiment, and see how the dish comes out.

This is the theme of *The Kitchen Keyboard,* a new film which offers easy guides for the use of seasonings in everyday dishes as well as in foreign foods. It is said to be the first such film produced by a spice marketer.

The film highlights the exotic past when spices were worth their weight in gold, taking its audience back to when kings valued spices as flavors, preservatives, healing potions, ransoms, precious gifts and money. It portrays the confusion of many women when they are confronted with an array of seasonings. Then it describes how three different types of housewives use spices and herbs to add excitement to their cooking. The housewife is advised to use spices and herbs daringly but sparingly, and to try out new combinations of spices and herbs for unlimited variety.

The Kitchen Keyboard is available on free loan from Modern Talking Picture Service.

Looie Lawters had seven single daughters . . would they remain, not change their name

Jantzen Suits Seven Sisters

Light-Hearted Tale of "Looie Lawters" Is Latest in Effective Retail Program

SPONSOR: Jantzen, Inc.

TITLE: *Looie Lawters and His Seven Daugh ters,* 6 min., color, Pelican Films, Inc.

☆ Looie Lawters' seven daughters were (1 Shirley (flute music), with the too-wide hip (2) Carmen (Latin music), with the too-sho legs; (3) Tillie (brass music), too angular an tall; (4) Evvy (hot jazz music), er . . . tc heavy; (5) Thelma (slow symphonic music with a thick-set waist; (6) Bertha (deep cell music), too plump all over; and (7) Tiny Tin (violin music), in the know, already has Jantzen, and a beau.

If we mention their defects it is not to sa the Lawters girls are unattractive. Not at all– what they have needed is just the great di ference that a right-style Jantzen can mak For now, they're the belles of the beach– after Myrtle, the brilliant salesgirl, had don her job well, with a knowledge of figures an Jantzens to sell. She fitted them in Jantzer that play up their smiles and personalities, an disguise their figure liabilities.

Looie Lawters is another in a series c clever, effective Jantzen training films planne for retail sales people by Hockaday Associate a New York advertising agency with kee knowledge of the potentialities of film and proven capacity for getting a lot out of eac film project.

This picture, composed of rhymed narra tion, very informal art and animation, has sprightly tuneful air sure to pep up many hur dreds of training sessions.

With their Jantzens each a perfect fit, it wa obvious to all they'd made a great hit.

Film Takes GM's Motorama Into Theatres

Imaginative and Entertaining Fantasy Brings "A Touch of Magic" to Millions

SPONSOR: General Motors Corporation.

TITLE: *A Touch of Magic*, 10 min., color, produced by MPO Productions, Inc.

General Motors' *Motorama*—the big annual auto show of GM cars—travels to New York, Los Angeles and San Francisco. But GM needs to reach many more millions of consumers.

The solution this year, as in several years past, was a big film in Cinemascope, *A Touch of Magic*, which is now playing to theatre audiences all over the country.

As the problem was presented to MPO producer-director Victor Solow, and writer Joseph March, the film could not be simply a recording of the show. It had to stand on its own as top-notch theatre entertainment, with a story line of its own, and the presentation of the cars had to be so thoroughly integrated into the entertainment that the theatre audiences would react favorably to the cars.

Startling Effects Win Audience Interest

The concept, as realized in the finished film, is a fantasy, utilizing unusual and startling effects. Abrupt changes of scene and discontinuity serve to heighten the mood. And the mood itself sweeps the viewer into the theme of the magic of today. The point is made that today's magic—as embodied by the GM cars and appliances—is superior to the nostalgic magic of the past, and gives us a view of the magic of the future—GM's Tech Center, of the GM cars, of the GM Dream House of Appliances.

Filmed almost entirely at night—necessary to avoid the crowds at the Motorama—the

"A Touch of Magic" on the screen.

finished film is an exciting example of a creative and professional approach to film-making. Imaginative—and in many ways daring—cinematography and direction, combined with exciting choreography, make *A Touch of Magic* a work of considerable beauty, impact and effective sell.

Showing This Spring in 3,500 Theatres

The film is now being shown in 3,500 movie houses and drive-ins during the spring months.

Coffee Marketers Bid for a Better Brew

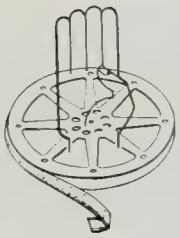
Three Fascinating Short Films for TV Aimed to Improve Art of Coffee Making

SPONSOR: Coffee Brewing Institute.

TITLE: *The Secret of Good Coffee*, 5 min.; *The Long Cool Summer*, 5 min.; *This Is Coffee*, 15 min.; b/w, produced by Vision Associates.

The Coffee Brewing Institute, the projected image of the country's leading coffee marketers, has been waging "a furious battle" for many years against the pallid brew that still passes for coffee in many homes. CBI says the homemaker is too tight-fisted with her coffee —over-extracts to get all she can from each tiny ground.

As an important part of its campaign to promote better coffee making habits, the CBI is distributing three short films to TV stations. The three—on hot coffee, on iced coffee, and a longer film which wraps up the subject more thoroughly—are aimed at the 250 daytime "home" shows now running on stations in the United States and Canada. The shows, often with five or more hours a week to program, are hungry for good non-commercial material. Coffee, with no brand name attached has an ideal appeal.



To reach these stations, Vision Associates, distributor as well as producer, sent out posters for each of the films. Coffee-colored, and measuring 17 by 22 inches, the posters brought a very quick response. (As well they might—all have been cited as "outstanding" by ART DIRECTION Magazine, and named as one of the best direct mail pieces of the year by the Journal of Commercial Art.) In five months' time over a hundred stations have played the films and some have played repeats.

The CBI pictures take a prosaic subject—just cups of coffee—and by moving the camera way in (the widest angled shot only covers three feet square), laying out some handsome, sparkling tableware and coffee-makers, and putting on a fine, jazzy sound track, they make coffee-making into quite a fascinating pastime.

The three tabletop coffee spectaculars were written and directed by Lee Bobker. Seymour Weissman was art director. Following TV distribution, plans are now being made to offer the films to home economics classes in high schools.

Coffee Films Win Festival Awards

Blue Ribbon awards at the recent American Film Festival were given *The Long Cool Summer* and *This Is Coffee*, reviewed above.

Business Screen Previews the Sponsored Films of the Month

Focus on MIT President Julius A. Stratton . . .

MIT Dedicates to Learning

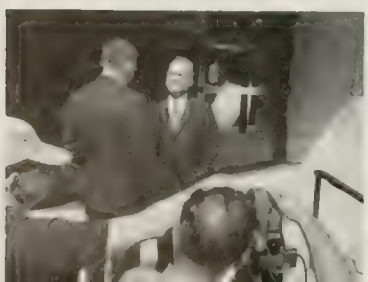
A Great School Enters Second Century With Renewed Dedication to Leadership

SPONSOR: Massachusetts Institute of Technology.

TITLE: *To Greater Strength,* 25 min., color, produced by United States Productions.

☆ MIT's second century is just beginning. With the fortunate opportunity it has had to attain a position of leadership recognized all over the world, the Institute must now prepare to continue to undertake the responsibilities of leadership in the next hundred years under conditions of special urgency in these challenging times for men of science.

To Greater Strength is a new film document of this dedication. Moving into the classrooms, labs and bull sessions, the film gives a particularly live and convincing demonstration of the character of MIT. To be seen in the film are such examples of the MIT way as these outstanding teachers: Professors Hans Mueller, Carvel Collins, Otto Carl Koppen, Alexander Rich, Harold Eugene Edgerton and Sanborn Conner Brown.



What do the students have to say?

. . . "The guy whose ambition is to escape as much work as possible will probably conclude that 'Tech is hell.' But I guess that a student who comes here to learn will develop an approach to things that will stand by him all his life."

. . . "I've seen some of these people when they first get here, seen them with their book open just underlining the passages so they can go and regurgitate it for a quiz. But if you just memorize this stuff here, you don't pass your quiz. Most of the tests are open-book tests anyway. You can carry an armload of books. It doesn't do any good to memorize. You've got to know it. You've got to know the procedures."

To Greater Strength will be used during the next few years to stir the hearts and open the minds of MIT alumni. It can hardly fail.

Dean Howard Johnson faces camera.

The Common Heritage of Japan and America

"One Hundred Years" Pictures Two Vastly-Different Lands With Much in Common

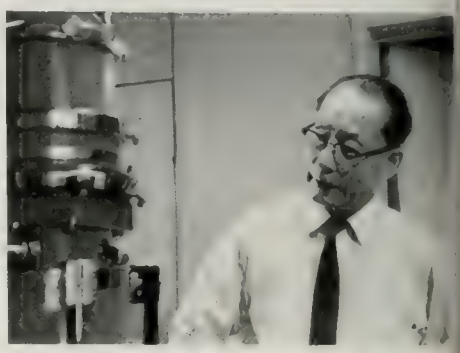
SPONSOR: United States Information Agency.

TITLE: *One Hundred Years,* 27 min., b/w, produced by Owen Murphy Productions.

A hundred years ago three ambassadors of Japan visited the United States—the first time in several centuries that Japan had had any relations with a major western power. One of these men—Noumosa Muragaki, kept a diary that has recently been printed in the United States and in Japan.

With this diary and sketches made at the time as background material, the U.S.I.A. is releasing the new film, *One Hundred Years,* this year, to audiences in Japan.

Muragaki's notes tell of his reception by the people of San Francisco and Washington; and



Japan's culinary art *is appreciated by many Americans who enjoy these unusual dishes in a growing number of fine restaurants.*

of being entertained by President Buchanan: "It seemed to be one of those strange customs of a foreign country, to receive foreign ambassadors without ceremony or formality but in a most friendly manner, as if they were old acquaintances."

Two old friends, one Japanese and one American, upon whose conversation the film is pegged, comment on the great changes of a hundred years and on the increasing influence of American customs on the Japanese today: the popularity of baseball, American music, movies, American style clothing and social customs.

But there are also Japanese influences in the United States, although not as much, and not everywhere. There are, of course, many popular Japanese products: radios, cameras,

Honored Nisei in the film *include the famed California cancer specialist, Dr. Kinoshita.*

toys—and Japanese restaurants are becoming more popular.

The film goes on to show Japanese audiences that Americans have applauded such artists as the Kabuki group; they enjoy Japanese gardens and architecture—such as the Motel on the Mountain in Suffern, N. Y., designed by Yoshimura.

There has been great American interest in the Japanese art of flower arranging. Large museums regularly feature the work of Japanese artists.

"The idea of blending and integrating indoor and outdoor living, with all that it implies . . . the deep feeling for nature . . . the quiet leisurely enjoyment of simple pleasures . . . These have been a carefully cultivated way of life in Japan for centuries. The fact that Americans have also come to adopt these concepts shows a surprising similarity in the basic values of the two peoples.

"However, perhaps one of the greatest contributions that Japan has made to the United States is her own people . . . Over the past hundred years thousands of Japanese have come to the country to work and become citizens. Since these people brought their cultural heritage with them, they gave the American people an opportunity to get acquainted with the ancient Japanese customs and values."

The film shows such honored Nisei as Dr. Kinoshita, Los Angeles cancer specialist; Congressman Inouye; the young dress designer Reiko, and Nancy Umeki, the actress.

One Hundred Years is part of the U. S. Information Agency's continuing film program for overseas distribution.

Answers to Young People on Preparing for College

College Board Picture Bridges That Big Step Between High School and College

SPONSOR: The College Entrance Examination Board.

TITLE: *College Counsel and Advice,* 30 min., b/w, produced by Audio Productions.

☆ The United States is fortunate in having developed a highly diversified system of some 2,000 public and private colleges and universities. With a regularly increasing demand for admissions, the questions of how to prepare for, select and enter college have become more and more important. Half of the graduates o

e country's 25,000 high schools now go on college.

Views of Five Experts Presented

To help give college-bound students and eir parents information on the decision and ocesses involved in making the transition m high school to college, the College Enance Examination Board has brought toether in this film five experts in the field of llege admission and student counseling. ey are: John K. Steinbaugh, Director of dmissions, University of Southern California; harles Sanford, Dean of Admissions and ecords, University of Illinois; Ann Splitstone, irector of Admissions, Hollins College; liver Melchior, Principal, Scarsdale (N.Y.) igh School; and Wilbur Bender, Dean of Adissions and Financial Aids, Harvard College. Moderating this panel of experts is John K. . McCaffery, well-known television newsster.

Here are some of the points made by the nel in discussing college entrance considerans:

. not everyone can, or should go to college, it it is in the national interest that everyone ho has the ability, preparation and desire ould go on to college.

. the decision to go to college should be ade preferably by the student and his parts. Students without parental support have fficult times coping with college situations, ough it can be done if the desire is great ough. On the other hand, students in colge only to please their parents most often do t have the motivation to succeed.

Advise Early Decision on Program

. the college decision should be made early -in the seventh or eighth grade. If a student ould choose engineering, for example, he ust plan early to get enough mathematics.

. the national testing programs serve the imrtant function of providing two different nds of competitive scores—ability and hievement—based on national measureents.

. the panel saw the junior, or community vo-year colleges as filling an increasingly sigficant role in advanced education.

. students should not broadcast 15 applicaons hither and yon hoping for an acceptance, ut should carefully plan to include one first oice—that might be difficult—and another a college almost certain to accept him, and o more than two others.

. students should force themselves to work full capacity, irrespective of ability—thus quiring good habits of work, study and selfiscipline.

. English—the ability to read and write—still the most important single skill a college udent needs, regardless of his major study.

. colleges should not try to prescribe rigid nes of study in high schools—should make exible allowances for experimental schools nd courses, and for regional differences.

. students are urged not to panic at the roblem of college admission. The situation as been much overstated.

College Counsel and Advice is being disributed to school and PTA groups by the ollege Entrance Examination Board.

Industry's Big Challenge: Total Reliability

In Missiles or Any Job, Today's Workers Must Be "Locked On"

AUTOMATION, as we hear often enough, has moved in and taken over. But it hasn't completely replaced the *human* factor—which can be a vulnerable point in production. For without the accuracy of reliable human workers, the system breaks down.

Just what is this "Reliability" we're hearing so much about, apart from being industry's current Hot Topic?

According to the lead character in Parthenon Pictures' new motion picture *Locked On*, for Convair-Astronautics employees, "Reliability is where everything works perfect every time you hit the switch." A little later he refines his definition into, "If at first you don't succeed, cut your throat."

$2.00 Valve Can Fault a Missile

Both definitions are accurate. And they have to be, or a ten million dollar Atlas Missile burns on the pad because of a failure of a two-dollar valve. Or at the other end of the scale, an electric razor comes back to the factory because of a forgotten pin.

But despite the fantastic precision and complexity of some of our new gadgets, if every part is wisely designed, and every individual does his job right, the bird *will* fly every time, and the razor will buzz every morning. *That* is what is meant by this new thing in American industry, the Total Reliability Concept (of which quality control is only one phase).

But it is one thing to discuss the Reliability Concept in cigar-scented management seminars, and quite another thing to get it understood out on the factory floor, let alone accepted by the hourly-wage men and women who have become blase and immune to the cartooned slogans and placarded exhortations which clutter up the bulletin boards along with the notices of union dues and the bowling team schedules.

Yet, the acceptance of the Reliability routine by the factory worker, and the personal upgrading which the concept requires of him, comes close to actual national and world survival. Every time one of our missiles fails, the odds on that pari-mutual machine in Moscow change, and the tragic day comes closer when Khrushchev may decide that he can knock out America before our missiles can get their nuclear warheads on the way to his cities.

When one of our missiles fails, there is a human error in back of the failure—a lapse in Reliability. And that is the job staked out for the film *Locked On* . . . to key the Reliability Program for Convair-Astronautics in the Atlas factories and on the launching pads.

As is necessary in seeking to effect a deep attitude change, *Locked On* probes for common-denominator identification, and uses a strong emotional approach. But the emotion serves as a vehicle for solid, logical demonstrations, so that the evangelical conversion which we hope to get as the film is viewed has foundation on which to build a permanent attitude change.

In Joel Mondeaux, who sees himself as "a yesterday guy in a tomorrow job, and I don't know what the hell to do about it," every factory man who secretly fears himself outpaced by the onrush of new practices and new standards will identify himself. And in one of the actual case histories photographed at San Diego, Sycamore Canyon Test Stands, and at Cape Canaveral, he will see a situation which comes close to his own job.

Film Available to Other Industry

In the final success of Joel Mondeaux, which is achieved by a simple character change expressed in the picture's title, he will see himself receiving the reward of being classed as one of the new elite, one of the plus-people, who can "cut it" under the tough conditions of the new industrial age.

Locked On is almost an hour long; this is deliberate, to impress upon the factory viewers that the subject is far more than ordinarily important.

For other industries faced with similar problems, prints of the film are available at $250 cost through Parthenon Pictures, 2625 Temple St., Hollywood 26, Calif.

Joel's "a yesterday guy in a tomorrow job". . .

until he learns the meaning of "Locked On"

Budd Takes Automotive Engineers on Trip to Utopia

Auto Men at Convention Enjoy Visual Visit to Company's New Body-Testing Lab

SPONSOR: The Budd Company.

TITLE: *A Trip to Utopia*, 14 min., color, produced by Unifilms, Inc.

☆ Budd's Automotive Division ordered this new film to be the centerpiece of the Division's beautiful exhibit at the Society of Automotive Engineer's convention in Detroit, last January.

Right in the heart of the exhibition Budd had a nice little 21-seat theatre with easy chairs (and foot vibrators!) that played to capacity for the whole week's duration of the convention.

Show a Second Film, Plus a Slidefilm

A Trip to Utopia, though a feature performer, was not Budd's only audio-visual gambit. Another short film was displayed continuously by rear projection in the "Testing Labs" section of the exhibit, and a slidefilm was projected continuously in the "Wheels" section.

"Utopia" might be a lush tropical island of sun-warmed indolence and darkly-beautiful girls to some guys, the film says, but not everyone's utopia is the same. Take an automotive stylist—"For me it's not the South Seas. That's Escapia. No, in my utopia I'd strive only for pizazz and I'd see every spook I designed *built*. There wouldn't be a gorpy line anywhere—they'd all be ipsipipsi. And anybody on my team who came up with spaghetti or stinkle would be shot. They're all up here (tapping forehead)—and if I could get 'em in production, that would be my utopia."

Budd's body-testing lab *offers automotive designers and engineers "A Trip to Utopia."*

The engineer's perfection might be a solar engine; the production man might choose a line without bugs—just make the components and let folks assemble their own cars. But the man at the top sees no utopia anywhere. To satisfy today's market he must make more styles, more sizes, more engines, different weights and prices than ever before. Quality has to be higher—costs lower. A nightmare.

Company's Lab Has Real Autopian Plan

So, in steps Budd with a real Autopian plan. Budd, the fine old outfit that pioneered the disc wheel, the all-steel body, the production application of the unitized body. Here is Budd's latest: one of the country's largest labs for body testing. This research shop has come up with new ways to control the quality of brake drums, new breakthroughs in unitized automotive body construction, and many other advances.

Budd's pitch: when you have a red hot fender job and need extra facilities—Budd can do it. Short runs, quick die changes, literally the backstop of the industry.

Budd will use the film as a general sales promotion tool—part of an increasingly diverse and effective audio-visual program instituted by Budd management during the past year.

Fire's Chemistry, Physics Are Made Vivid and Clear

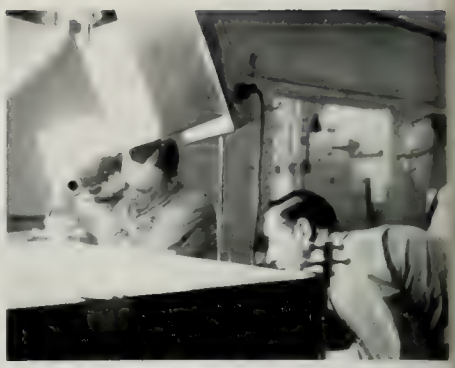
"The Science of Fire" Produced by MPO for National Board of Fire Underwriters

SPONSOR: National Board of Fire Underwriters.

TITLE: *The Science of Fire*, 20 min., color, produced by MPO Productions.

☆ Where does the flame go when you blow a candle out? What happens when you spray water on a fire?

The answers to such basic questions as these are contained in a new teaching film, *The Science of Fire*, which is being offered principally to science classes in high schools and colleges, and to the general public as well.



The premise of the film is that the chemical and physical characteristics of the big subject of fire can be convincingly demonstrated by narrowing it all down to an intense look at the common candle. In fact, the film is actually based on a book by the British scientist Michael Faraday, *Lectures on the Chemical History of a Candle* (1861).

MPO's producer-director Lloyd Ritter set out with a prime object of making teaching aspects of the film very clear. It is not loaded with technical terms or difficult concepts. Secondly, he has made a very beautiful film. Most of the scenes are in tight close-up, many are made using a high-speed camera.

For instance, in answer to the question, "Where does the flame go when you blow a candle out?"—the 5,000-frames-per-second camera shows that it just moves slowly off the candlewick and gradually gets smaller until it disappears. The flame has the fantastic appearance of seeming like a solid object, not a region.

What does water do to a fire? The camera shows that the only thing water does is to cool the fire. If it cools the fire enough the flame goes out.

The Science of Fire is available on free loan from the Bureau of Communications Research, 267 West 25th Street, New York.

Producer Walter Engel *(on left) sharpens h lens on baking scene with a specialist's car*

Modern "Magic" of Bread

American Bakeries' Useful New Teachin Film Tells Facts on "The Staff of Life

SPONSOR: American Bakeries, Inc.

TITLE: *The Magic Bread Box*, 13 min., colo produced by Walter Engel Productions.

☆ The film tells of the historical backgroun of bread—the "staff of life" for all civiliza tions since the dawning of mankind. It is teaching film, designed for classroom use.

After showing the background of bread– in early Egypt—and showing how whe grows, the film then goes into a moder bakery to watch how a loaf of bread is pr duced. The flour is sifted, aerated, enriche and then formed with water, yeast and othe ingredients into a "sponge." For 4½ hou the bread ferments, taking on the porosity texture and flavor it will have in its final form During the forming process, the dough "proofed" and excess gas is eliminated. Fina ly, the risen bread is baked, wrapped an on the grocery store counters in a matter o hours.

The Magic Bread Box is a good exampl of a straightforward teaching film that will b useful to schools, particularly in the lowe grades. Commercialism is restrained—"Me rita" and "Taystee" bread wrappers are onl evident when normal to the action on th screen.

Walter Engel is a specialist at picturin bakery products—sharpens his lenses o bread and rolls with ever-loving care.

Picturing a "Land of Vigor"—

Atlantic City Electric's Film Tribute to Jersey

PONSOR: Atlantic City Electric Company.

ITLE: *Southern New Jersey, Land of Vigor,* 21 min., color, produced by Audio Productions, Inc.

Many travelers through New Jersey remember only the depressing scenery along the urnpike and the Pennsy railroad tracks. This unfortunate, for much of New Jersey is entirely different—particularly, as this film shows –in south Jersey, where industry, agriculture nd recreation merge gracefully into a very ice place to live, visit and work.

The story of this pleasant land is told in the lm by John T. Cunningham, a columnist on he NEWARK LEDGER. He guides the camera to hundred places of excitement, beauty and industrial strength: the farmlands—some of the chest gardens in the world; the incomparable eaches and resorts; and the busy industrial lants which blend handsomely into the environment.

The film goes on to look at the early roots f Southern New Jersey, the battlegrounds, he historical houses—Batsto Mansion, Hanock House—in a kaleidoscopic montage of onsiderable beauty.

Particularly fine are scenes of the unique ine Barrens—a million acres of mystery and hallenge—where wild orchids grow, if you now the right place to look.

Southern New Jersey will be used by the tlantic City Electric Company to show residents of the area—and interested outsiders, o, what is happening in south Jersey—how s fortunate location is leading to industrial xpansion, more jobs, and more recreational cilities for visitors.

A New Revere Film Shows—

Facts on Copper Tubing for Construction Men

PONSOR: Revere Copper & Brass, Inc.

ITLE: *Copper Tube in Building Construction,* 30 min., color, produced by Tiesler Productions.

This film is designed to interest men who ork in building construction, particularly rchitects and engineers who must specify ghter and stronger materials in order to tilize every available inch of space. It is also imed at contractors and mechanics who must anslate specifications into actualities, invariably on the basis of highly competitive bids.

The film shows how Revere copper tube as proven to be the ideal piping material in eeting contractual commitments efficiently nd economically in both commercial and residential building construction.

Beech-Nut Gives Buyers Market Facts on Baby Boom

Aiding All Marketers, Salesmate Slidefilm Shows Sales Growth of Baby Foods

SPONSOR: Beech-Nut Food Division, Beech-Nut Life Savers, Inc.

TITLE: *The Boom in Babyland,* 10 min., ssf, color, produced by Rossmore Productions.

Baby food is a big business. 380 million jars are sold every second—$265 million worth a year . . . by 1970 there will be a market for baby foods of over $400 million a year.

Beech-Nut's new Salesmate presentation is designed to tell this story dramatically to grocery buyers and buying committees of large chain stores. The film mentions its own brand name only once and pictures Beech-Nut products only as another supermarket shelf item. The film is a plug for all baby food items.

What is singularly important about baby food, says Beech-Nut, is that the baby food customer is also the best customer for just about every other product in the store. Give her enough stock, service and ample displays of baby foods and she'll be a steady customer.

Young Mrs. Mother usually buys once a week, and she buys in quantity . . . more than 67 per cent more food than other shoppers. Where non-mothers will spend $1,300 a year in the grocery store, the baby food buyer will spend $2,170.

The film says baby is becoming a gourmet! Pediatricians now recommend more and more varieties to tempt baby's palate. 50 new varieties introduced by Beech-Nut since 1955 now account for 33 per cent of sales.

The film has some cute bunny-rabbit art for identification with baby, while the grocery business angles are factual photography—made "live" at a 57th Street supermarket in New York.

Each Beech-Nut sales district has been equipped with a Salesmate projector for taking the baby food story directly to the buyer.

Beech-Nut Food Division men *are taking their slidefilm directly to buyers' offices.*

Helping Retail Sales People Sell Revlon Products

Two Top-Quality Slidefilms Help Introduce Sales System for Beauty Products

SPONSOR: Revlon, Inc.

TITLES: *Selling the Personal Way* and *The Color-Up Story,* both 10 min., ssf., color, produced by Van Praag Productions.

Sales people of Revlon products in department stores and specialty shops—"Beauty Advisors," they are called—are beginning to use a new sales system. Each customer, henceforth, will be charted in a card file, listing skin types, hair color, etc. Thus, the Beauty Advisors can do a more active selling job over the counter, or by telephone with various cosmetics appropriate to each customer's needs.

To help get the plan moving smoothly Revlon is distributing a new training slidefilm, *Selling the Personal Way,* which describes how it works. Properly, the film points up the advantages of the Revlon way of selling to the sales people themselves. It is told in conversational style by two beauty advisors as they recount their daily selling experiences.

Color Fidelity in Hair, Skin Tones

Being a Revlon product, the stripfilm has to be pretty as well as sensible. The producer went through exquisite agonies to match the delicate shades of skin and hair tones in the finished prints to reality, but the results seem well worth the trouble.

A second new Revlon slidefilm, *The Color-Up Story,* makes a convincing pitch for the firm's new hair coloring product, Color-Up.

It has a friendly, housewifey approach—narrated by Helen Darrow, who tells how her mother, her daughter, her sister, and even her sister-in-law—with the brassy-looking bleach job—find satisfaction in new hair beauty through Color-Up.

A Story of Specialization:

National Credit Office Shows Industry Service

SPONSOR: National Credit Office.

TITLE: *NCO Serves You,* 10 min., ssf, color, produced by Rossmore Productions.

The National Credit Office, now in its 60th year, attributes much of its success to concentration on a relatively few industries: textiles, leather, chemical, electronic, metal, automotive, aeronautical, appliance, bank services and mobile homes. Within these fields NCO specialists know their industries from every angle.

This story is now being told "personally" to prospective National Credit Office members by NCO President Bill Bennett. Mr. Ben-

Glen Canyon Dam, nearing completion, will bring power, water to this new frontier

"FRONTIERS"

Land, People of Idaho and Utah Reap Rewards as Their Resources Are Harnessed and Harvested . .

Construction worker *on Glen Canyon Dam looks to the future when his work will bring new opportunities to the people of this land*

SPONSOR: The First Security Corporation.

TITLE: *Frontiers*, 27½ min., color, produced by Dick Durrance Films.

☆ The First Security Corporation is one of the larger banks in the Rocky Mountain region. It provides services for all of Utah and Idaho and has taken a leading part in fostering the rapid progress of the area.

Frontiers pictures the background for this progress in the natural beauty of the two states, shows the resources that are just beginning to be adequately harnessed and harvested. It could be called a travelog but the film seems rather bigger and more important than "travelog" connotes.

Dick Durrance, who has long been known as one of the world's greater ski photographers, proves in this film that he is a photographer-director-producer with a much wider horizon. *Frontiers* has not only beauty but a consistent character. It comes across in revealing faces of farmers and miners and sheepherders, and in the moods of the colors —deep, rich, sometimes sombre reds of the Utah canyons, the dark, dramatic skies and shadowed mountain valleys of Idaho.

Often the camera is restless—moving on almost every scene, as if to make the viewer feel the restless energy of this "youngest" part of the country.

Contrast of Cities and Far Country

Durrance shot 40,000 feet of film in over a year's time to make *Frontiers*. His itinerary included the growing metropolis of Salt Lake City; quiet, settled Boise; and a little bit of everything from the Navaho reservations of southern Utah to the cool apple country of northern Idaho. Sometimes the viewer might wish to stay awhile at one place or another but there is much to see and we must move on.

Complementing Durrance in the credits for *Frontiers* are a sterling group of New York production people: Jean Oser, with a master

Below: *Idaho farm land, made rich and productive through irrigation. Right: farmer Dale Stoller and son tour homestead fields.*

ul editing job; Robert Hertzberg, writer; Joe ulian, narrator; and Corelli-Jacobs, with a eautiful and particularly appropriate score.

Selected by USIA to Show Abroad

The film is currently playing "first-runs" in he Utah-Idaho area to guests of the First Se- urity Corporation. It has been picked up for oreign distribution by the United States In-

Farmer Dale Stoller *and his son pull a sugar eet to check for size and sugar content in this cene from the film "Frontiers."*

ormation Agency. And it has just been se- ected as one among 15 outstanding American ndustrial films for entry in the Second Inter- national Industrial Film Festival at Turin, taly, this June.

Supervising the successful *Frontiers* project or the First Security Corporation were Vice- President William Eccles, and Public Rela- ions Manager Mason Smith.

The Man Behind This Picture . . .

Dick Durrance has been a champion skier nd ski photographer since his undergraduate days at Dartmouth. He began his motion pic- ure career as a test photographer for Boeing Aircraft during the war.

Now located in Aspen, Colo., Durrance has ecently shot several series of "mountain" ommercials for Busch Bavarian Beer, and wo films for Pan American World Airways. He is represented in New York by his old riend and college roommate, Joe Dunford, ow president of his own company, Pelican Films, Inc.

Films of the Year Reviewed!

The consensus of all 1961 film award programs to date, highlighting the outstanding sponsored films of last year, will be presented in your next issue of BUSINESS SCREEN. The feature includes winners of 1961 National Safety awards.

Time-lapse photography enables Dr. Moon to show days of camellia growth within seconds.

Those Inspiring Sermons from Science

Moody Institute of Science Films Get Wide Industry Audience

By Weldon D. Woodson

A REPRESENTATIVE FROM Moody Institute of Science, Los Angeles, California, approached an executive of a big industrial plant concerning the showing to the employees of inspirational films produced by MIS. He explained that the films were a unique combination of natural science phenomena and basic religious concepts. Employees seeing them would have more wholesome attitudes and could be expected to be more subject to direction and control on the job.

The executive said that he liked the material of the motion pictures, but that he was skeptical and doubtful about their reception in his plant. He pointed out that some of the other executives and employees might show resentment because of the "religious" side to the films.

The caller suggested a preview for a representative group of employees including supervisors and union executives.

Man's Progress Prefaced by Nature

The picture was entitled, *The Prior Claim*. As these men looked at the film, there unfolded before their eyes the fact that some of the most modern inventions of man operate on the same principles that lowly creatures of nature have been using from the time of creation. Throughout the film they saw that even in the inventions and developments which characterize this modern age man does not have the prior claim, but that wherever he may delve he finds that God has been there first!

The film had barely ended when a man from the shipping department blurted out, "This is something the whole place should see!"

The Prior Claim was shown in this plant, as well as *God of Creation, Dust or Destiny, Hidden Treasures, Voice of the Deep, God of the Atom, Of Books and Sloths, Windows of the Soul* and the other MIS epics.

Men of the assembly line viewed each picture with awe and reverence. All of the films appealed to their reason, stimulated their thinking and reached their hearts. At each showing, the workers left the projection hall with nothing but gratitude toward their employers.

Founded by Dr. Irwin Moon in 1941

The founder and manager of Moody Institute of Science is Dr. Irwin A. Moon. Its inception dates back to 1941.

Dr. Moon at that time had been pastor of the Montecito Park Union Church in Los Angeles. A physicist and an ardent movie-maker, he had used illustrations from science to point up his talks with the young people of his congregation and found them eager listeners. Other groups were fascinated with his demonstrations to the extent that he finally resigned his pastorate to devote his full time to presenting, as he phrased it, "Sermons from Science."

When the Golden Gate Exposition at San Francisco opened, Moon tried a daring experiment. He rented space near the Gayway

Using inverting spectacles, *Dr. Moon prepares for scene in "Windows of the Soul" that shows seeing is done in the brain as well as eyes.*

INSPIRING LESSONS IN SERMONS FROM SCIENCE:

(CONTINUED FROM THE PRECEDING PAGE)

and designed a special show to compete with the carnival attractions. More than two tons of equipment, most of it homemade, went into the production of a spectacle that covered various aspects of science.

Dr. Moon permitted a million volts of electricity to flash through his body. The audience gasped in amazement. Then he fried an egg on a cold stove, lighted a lamp bulb with his bare fingers, time-compressed the growth of a camellia into a few seconds and gave his voice a "helium accent."

The show was a whopping success. Crowds came to look and to listen.

Moody President an Exhibit Visitor

One visitor to this incongruous show next to the Midway was Dr. Will H. Houghton, president of Moody Bible Institute. Subsequently, the Moody Institute of Science, a department of Moody Bible Institute, was established.

The *Sermons from Science* films have been shown the world over. They have been praised by persons in such diversified walks of life as the late Albert Einstein, Lowell Thomas, Walt Disney and Captain Eddie Rickenbacker.

They have been used in churches, youth groups and civic group meetings. They have served effectively on military bases, on the mission field and on television. These uses, along with their employment in business and industry, have influenced for the good the lives of millions.

Management and labor are discovering a need to improve not only the working conditions and the physical environment of their plants and offices, but also a need to foster the remedying of those things that are wrong in people themselves—things that make them unsatisfactory and dissatisfied workers and deter them from attaining their highest capabilities.

The Spiritual Essence of Good Work

Employers and employees need to be encouraged to replace a superficial approach to their work with that which is fundamental, lasting and of spiritual essence.

Business and industrial officials have discovered that MIS films contribute toward this need. They have used them for:

Supervisory training, general educational programs, executive development, safety and special occasions, public relations, dealer conferences, foremen's meetings, sales meetings and employee activities.

The films when shown have:

Changed attitudes, stimulated constructive thinking, improved relations between employees and informed and entertained.

Films Are Used in Variety of Ways

MIS films can be used in a variety of ways in plants, on or off company time. One typical plant did this:

Arranged to show one of the films three times a day: at 10 A.M., 2:30 P.M., and 4 P.M. In this plant, it was possible to schedule work so that production was not interrupted. The plant men each lost only one hour and five minutes from their work at the most.

The screen not only shows the wonders of science that can be perceived through natural vision, but it presents things solely visible to the aided eye. It does this by means of time-lapse photography, microscopic photography, the telescope and other scientific and photographic equipment.

This Moody *science film maker is capturing the beauty of snow crystals for "Hidden Treasures."*

The films make the viewer aware of the power, precision, beauty and design of nature. A talk at the end of each brings out the relationship between science and human problems.

One employee said after seeing a film, "We should all each day do the most with what w have been given."

Another employee stated, "Our emphas on material improvements, such as produc tion methods, etc., is good, but there is some thing much more important—the improve ment of men's thoughts and spirits."

A third expressed it this way, "The film help us to realize that each person fits int God's plan and that we should treat each on as a human individual and as a person."

Favorable Comments by Employers

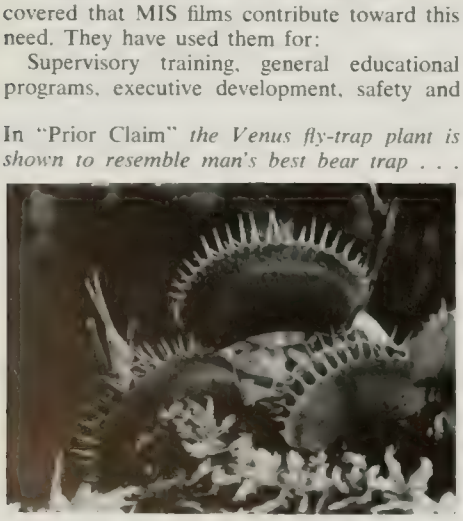
Employers also have made favorable com ments on the films, as the following example indicate:

"I was really amazed at the very fine com ment that we received on every showing," a executive of the Pet Milk Company reporte after a series of presentations in plant an station towns to a combined audience of a most 4,000 persons. "In fact, in all my year with the company, I heard during the las week the highest compliments paid to the Pe Milk Company that I have ever heard before.

"We in Fisher Body have found these film to be an excellent method of promoting em ployee good will and stimulating attitude within the organization," a spokesman said "It is almost impossible to convey the enthusi asm with which they have been received i our plants."

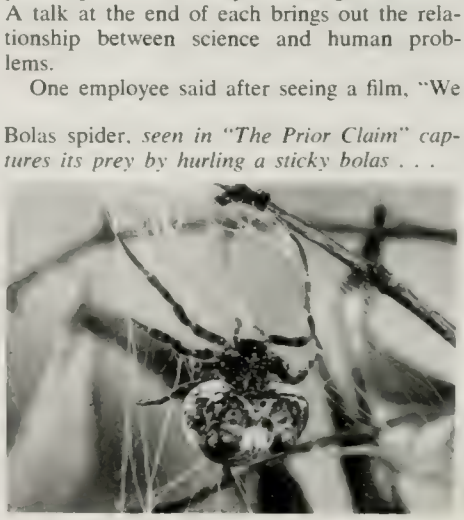
"Today we are returning your film *Th Prior Claim*," wrote a representative of the Kel logg Company, Battle Creek, Michigan. "I was shown January 31 to Kellogg families i the W. K. Kellogg Auditorium here in Battl Creek. Approximately one thousand person were in attendance.

"We certainly appreciate your making thes films available to us. Audience reaction wa excellent, even small children were intereste enough to remain very quiet while they wer watching your film."



Film Received With "Intense Interest"

"As you know, we have just recently show the film from the Moody series *Sermons Fro Science* entitled *The Prior Claim* to approxi mately 125 members of our managemen group," commented an official of the Victo Adding Machine Company. "This film was re ceived with the same intense interest as th previous films."



"We have shown a number of the *Sermon from Science* films, produced by Moody In stitute of Science, to our Management Club,

Fashion Forecast by the Garment Workers

Nationwide Women's Audiences View New Colors, Styles

PONSOR: International Ladies Garment Workers Union.

ITLE: *Fashion—Spring and Summer, 1961,* 15 min., color, produced by Eleanor Lambert.

Watch for the new "hothouse" olors in women's clothes this pring. Pink and orange and the xe will be in strong favor, acording to this new film recently leased by the ILGWU.

The new colors and fashions en in the film have been deigned by such leading names as assini, Fogarty, Trigere and ndheim. The film is aimed at e average American woman and prises her of basic fashion anges, here and incoming, and w the changes will affect her oice of new clothes in coming seasons. It also highlights the importance of the Union label in the American woman's clothes economy.

According to Eleanor Lambert, fashion coordinator of the film, it covers a wide range of trend information from the shape of the new suits and coats to the prophetic flare silhouette. Prices represented in the film range from the little-or-nothing up to the height of the couture range and are interpreted in their fashion significance and application to various types of figures.

The film is being made available to women's clubs, colleges, churches and women's industrial and commercial organizations through Modern Talking Picture Service, 3 E. 54th St., N. Y.

Improving Your Home With Western Pine

PONSOR: Western Pine Association.

ITLE: *Operation Attic,* 20 min., b/w, produced by Photo-Art Commercial Studios.

Beginning in a retail lumber rd, this is a documentary film ory of how a young couple finds ore space for living by transrming their unfinished attic into useful upstairs.

It shows how the lumber dealer sists his customers in selecting e materials—in this case, handme wood paneling from the estern Pine region. Then it unches into a description of the reparation of the materials and tic for paneling and carefully details the installation procedures. Important points in construction for the home carpenter are explained: nailing and sawing, as well as methods of staining and final finishing. Flooring, trim, moulding, paneling, patterns, furring and many more important points are considered.

In finale, the viewer is shown the room delightfully furnished—a perfect example of what can be done through combining good materials and the advice and service of a competent retail lumber dealer.

Operation Attic is available to TV stations for public service use through Modern TV, New York.

Prescription Aid for the Modern Dentist

PONSOR: Schering Corporation.

ITLE: *Prescription Writing in Modern Dentistry,* 25 min., color, produced by Kevin Donovan Films.

This film stresses the impornce of specific, individualized rescription medication in dental erapy. A recent survey of the merican Dental Association has sclosed that more than eleven illion drug prescriptions are ritten annually by dentists roughout the United States.

The story line involves a young entist, in practice for only six onths, who visits his uncle, a well-established practitioner, for a "dentist-to-dentist" discussion of professional problems. Through a series of flashbacks, inserts and other special effects, modern dental techniques, practices and responsibilities are explored.

Intended for viewing by memberships of regional, state and county dental associations, *Prescription Writing in Modern Dentistry* is also suitable for instruction of undergraduate and graduate students in dental schools.

Prints may be borrowed from either Schering Corp., Union, N. J., or the American Dental Association, 222 Superior, Chicago.

Illustrative art sequence shows early exploration of the Delta.

A Colorful Saga on "The Delta Orinoco"

History and Lore of Fabled Land Shown to Venezuelans

SPONSOR: Creole Petroleum Corporation.

TITLE: *The Delta Orinoco,* 25 min., color, produced by Willard Pictures, Inc.

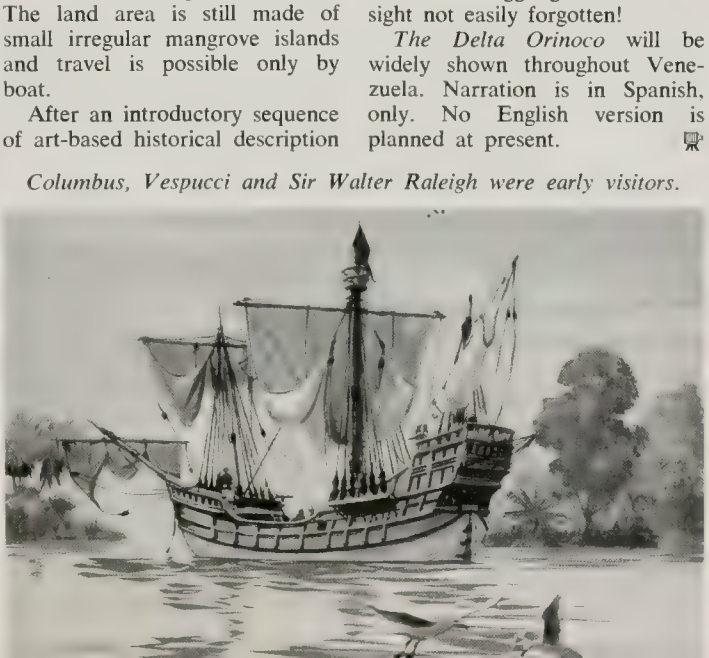
☆ Creole Petroleum Corporation, a Venezuelan oil company affiliated with Standard Oil Company (N.J.), has made excellent use of news and information films for many years. In addition to a regular newsreel about activities of Creole people, which plays in theatres and on television, Creole has made useful films on conservation and Venezuelan wild life.

Typical of these films, and the best to date, is *The Delta Orinoco,* which pictures a wide variety of flora and fauna of one of the world's wildest areas—the 7,000 square mile Orinoco delta.

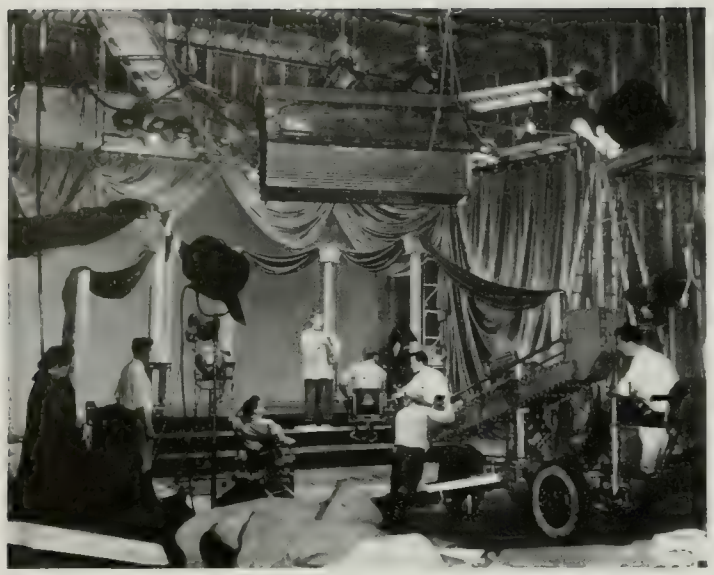
Columbus entered the delta in 1498 and named many of the channels: Mouth of the Serpent, Mouth of the Dragon, etc. Later both Amerigo Vespucci and Sir Walter Raleigh explored the mouths of the great river.

Little has changed since then. The land area is still made of small irregular mangrove islands and travel is possible only by boat.

After an introductory sequence of art-based historical description of the region, *The Delta Orinoco* concentrates first on bird life—toucans, parrots, egrets, jacanas, herons—photographed with immense patience by photographer Robert C. Hermes from a blind set up in a small channel.



Tropical fish, barnacles and anemones come next to our attention . . . and the most curious anableps, a fish that swims on the surface of the water and has divided eyes for seeing both below the surface and in the air.



Insects to be seen are the walking stick—looking exactly like a twig, the familiar praying mantis, click beetle and ant lion, which captures its prey by throwing sand at small insects so they may lose their footing and stumble into the ant lion's trap.

Throughout the entire Orinoco delta there are only two or three Capuchin mission settlements for the Indians. The film shows the Indians to be quite friendly. They have a partiality for fat, caterpillar-like worms called Moreeche. A small boy eating a handful of these wriggling worms is a sight not easily forgotten!

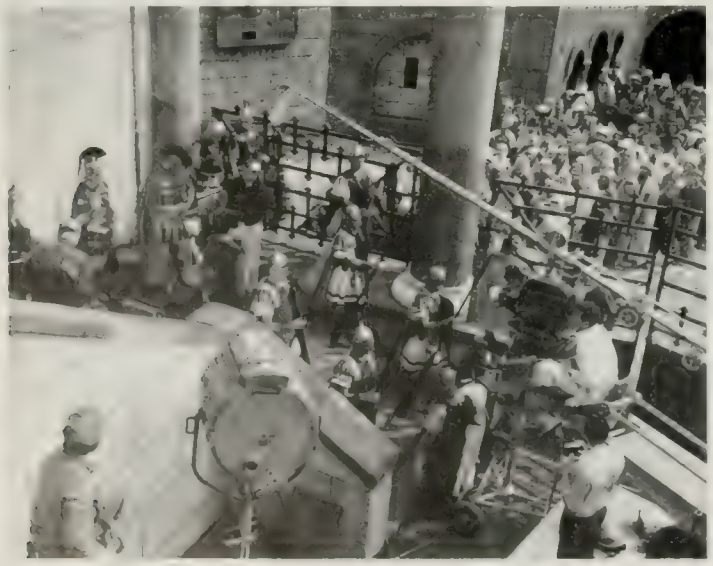
The Delta Orinoco will be widely shown throughout Venezuela. Narration is in Spanish, only. No English version is planned at present.

Columbus, Vespucci and Sir Walter Raleigh were early visitors.

Sacred music productions *such as "Heavenly Harmonies" and "Vesper Melodies" are filmed with stylized scenery and dramatic lighting effects for which the Division of Cinema has most complete facilities.*

"Angel With a Camera in His Arms" Brings Bob Jones' Films to World Audience

Teacher and Producer of Religious Films, Cinema Division of Bob Jones University Observes Tenth Year in the Field



OBSERVING its tenth anniversary as a producer of religious and educational motion pictures is Unusual Films, the Division of Cinema of Bob Jones University at Greenville, South Carolina.

During the past decade, the motion picture ministry of the Bob Jones University has been extended to every continent, and fulfilling part of its aim, literally thousands of conversions have resulted from showings of the religious films produced on the campus.

Director of Unusual Films is Mrs. Gilbert Stenholm, who has held the post since the department was established by Dr. Bob Jones, Jr., president of the University. She is responsible not only for directing all the films, but also for the business operations of the studios, including distribution of all the productions.

Other key members of the staff are Robert Craig, cinematographer; George Jenson, chief editor; Miss Alice Cromley, photographic technician; Wade K. Ramsey, photographer; William E. Phillips, sound engineer; Charles Applegate, screen writer and make-up artist; and Mrs. Melvin Stratton, make-up technician. Most of the members of the staff also teach academic courses in the Division of Cinema.

This set for Unusual Films' *"Wine of Morning" shows the courtyard of the palace of Pontius Pilate, where Jesus Christ was judged before his crucifixion. The production staff is preparing to shoot the scene.*

Among Best in Country

The facilities of the Division, both for the teaching of film technique and for the production of Christian and educational films, are recognized as among the best in the country. The department also operates a complete laboratory for still photography.

Setting the lights *for a scene in "Fortress of Faith," the film which tells University's story.*

A survey by the Society of Motion Picture and Television Engineers listed Bob Jones University as one of the three outstanding schools in America offering motion picture training.

Evidence of the performance of the department are the numerou honors bestowed on it. Amor them is the Screen Produce Guild Silver Medallion for Inte Collegiate Film Competition, ar nine awards for excellence fro the National Evangelical Fil Foundation.

Winner of Top Awards

Four of the NEFF awards we given for *Wine of Morning*, th first film ever to capture all of th top awards of the Foundatio This film was selected by the Un versity Film Producers Associ tion to represent America at International Congress of Cinem School Directors, held at the Ca nes Film Festival and in Pari France.

Wine of Morning was chose deliberately because the UFP committee felt the contrast b tween its Christian message an the atheistic philosophy of th communist entry would be "mo revealing." Unusual Films' dire tor represented America as a del gate to the Congress and delivere a key address.

These Typical Productions

Unusual Films has produce several feature-length story pi tures, three Christian musical film two documentary travel films, an educational, television, short sub ject and special productions. Th films are available for showin in churches, schools, civic grou and TV.

All Unusual Films releases a designed to carry a Gospel me sage. This is the purpose exempl fied by the trademark of the d partment—an angel bearing camera in its arms. As Dr. Bo Jones, Jr., puts it: "An angel is messenger, and our films are film with a message." §

A Sound Editing Film for Production Groups

For production groups interested in editing motion picture sound, the Audio-Visual Center, Indiana University, has produced a 10-minute motion picture titled *Editing Synchronous Sound*, as part of its series on photographic topics.

The film presents a step-by-step procedure for editing sync sound: the story line of the various sequences explains the shooting phase of a sound motion picture and its relationship to sound editing.

These Are Main Points

At an editing bench an editor explains the selection of sound takes, the marking of the film, and the breakdown of the picture foo age. Three main points are d veloped in the film: (1) establish ing synchronization cues durin shooting, (2) re-establishing thes cues during editing, and (3) mai taining synchronization betwee picture and sound track through out the editing process.

How to Get This Film

The film is available in colo ($100) or black and white ($50 Preview, purchase or rental in formation concerning *Editin Synchronous Sound* may be ob tained by writing to Gene Hinto Coordinator of Film Informatio Audio-Visual Center, Indiana Un versity, Bloomington, Indiana. §

"Now we can train new salesmen with movies anywhere, any time...in just an hour"

Our training movie provides trainees with more thorough comprehension of our way of selling than training manuals ever did, and it's less expensive and more efficient than traveling training experts," says J. O. Kaplen, Executive Vice President of Atlas Sewing Centers, Inc., headquarters, Houston, Texas. "It works so well that we've given each of our 7 store managers a 16mm Kodak Pageant Sound Projector so that any one of them can train new men when they want to.

"Our choice of projector, we knew, would be important, because store managers, like everyone else, are too busy to worry about machinery that's complicated to operate or too much trouble to keep in running order. After many 'loaner' demonstrations of various makes, and after asking others who use movies, we decided the Kodak Pageant would be easiest to operate, and would have the stamina to take inexperienced handling.

"Our movie was professionally produced. And it, along with this uncomplicated Kodak Pageant Projector, makes a training session smooth, interesting, and understandable. The demonstration is ideal. The trainee sees and hears not only what to say and when to say it, but also how to say it, even to the proper inflection, emphasis, and gestures.

"None of the precisely worked out message is ever omitted or diluted. And outside pressures have no interfering influence. Our trainee is 'captive' in a darkened quiet room—the right atmosphere for concentration."

If you would like to learn more about the way movies are being used by business and industry, or if you would like literature about Kodak Pageant Projectors, mail this coupon to us now.

You may see a Kodak Pageant demonstrated by calling your Kodak audio-visual dealer.

MOTION PICTURES & SLIDE FILMS FOR SAFETY EDUCATION

16mm Motion Pictures

☆ These sound motion pictures and slidefilms for safety education, all produced or released last year, comprise the 1961 Contest Entries currently being judged for the annual awards given by The National Committee on Films for Safety. This check-list is presented as a useful reference source for your safety program.

OCCUPATIONAL

Day With Maintenance-of-Way, A, 30 min., color. Sponsor and Producer: Missouri Pacific Railroad Co. Illustrates safe work practices of railroad maintenance-of-way employees.

Electrical and Electronic Safety, 9 min., b/w. Sponsor: U. S. Air Force, AACS-MATS, Scott AFB. Producer: Air Photographic & Charting Service, Orlando AFB. Depicts circumstances of a fatal accident on electronic equipment.

Flame Propagation, 20 min., color. Sponsor: American Gas Assn. Producer: Kennedy Productions, Inc. Demonstrates hazards associated with misuse of explosion-proof equipment.

Flammables Engineering, 26½ min., color. Sponsor: Protectoseal Co. Producer: Audio Productions, Inc. Presents fire prevention principles applied to flammable substances.

Hard Hats and Thinking Caps, 29½ min., color & b/w. Sponsor: American Bridge Div., U. S. Steel. Producer: Mode-Art Films. Emphasizes the necessity of alertness to safety for structural iron workers.

High-Low Bid, The, 27 min., color. Sponsor and Producer: Employers Mutuals of Wausau. Tells importance of safety performance to management in construction industry.

Man Who Didn't Believe in Accidents, The, Sponsor: Packaging Equip't. Div., Ex-Cell-O Corp., with Milk Industry Foundation. Producer: Robert J. Enders, Inc., MGM Studios. Personal aspects of accident prevention for dairy employees.

115 Volts—Deadly Shipmate, 19 min., color. Sponsor: U. S. Navy, Bur. of Naval Weapons. Producer: Depicto Films Corp. Re-enacts accident situations of Navy personnel on low-voltage equipment.

Propellant Plus Heat, 20 min., color. Sponsor & Producer: Thiokol Chemical Corp., Redstone Div. Shows precautions required in handling to prevent ignition of solid propellants.

Quota, The, 25½ min., color. Sponsor: Clark Equipment Co., Construction Machinery Div. Producer: Pilot Productions, Inc. Dramatizes accidents that occur to construction equipment operators.

Safety in Highway Surveying, 25 min., color. Producer: Bur. of Public Roads, Dept. of Commerce. Explains hazards of working in timber land and mountainous country.

Safety is Always Our No. 1 Business, 12½ min., color. Sponsor & Producer: Caterpillar Tractor Co. Instructs new employees in the importance of safety in company operations.

Safety Wise (series), 10 min. ea., b/w. Sponsor: Nat'l Safety Council. Producer: Cal Dunn Studios. *Help Yourself to Safety,* employee responsibility in recognizing and correcting unsafe acts and conditions; *Not Even One Chance,* how a worker changes his attitude toward chance-taking; *Safe As You Know How,* how a worker can develop safe personal work habits.

Static Electricity, 22 min., color. Sponsor: American Gas Assn. Producer: Kennedy Productions, Inc. How static electricity is generated and its control.

Tactical Air Command Programmed for Safety, 27½ min., color. Sponsor: U. S. Air Force, DIG/Safety, Norton AFB. Producer: Air Photographic & Charting Service. Follows importance of training to overcome in-flight problems.

TRAFFIC AND TRANSPORTATION

Auto, U. S. A., 27 min., color & b/w. Sponsor: Perfect Circle Corp. Producer: Dynamic Films, Inc. Reviews reduction of traffic congestion and accident problems through planning.

Can You Stop In Time, 9 min., color. Sponsor: Nat'l Assn. of Automotive Mutual Insurance Cos. Producer: Dallas Jones Productions, Inc. Describes need of professional drivers to know stopping distance factors.

City Driving, 22 min., b/w. Sponsor and Producer: Ford Motor Co. Demonstrates city driving techniques—especially for driver education students.

Driving Under Special Conditions, 19 min., b/w. Sponsor & Producer: Ford Motor Co. Stresses hazard factors during adverse conditions—especially for driver education students.

Emergencies in the Making, 14 min., color & b/w. Sponsor: AAA Found'n for Traffic Safety. Producer: Calvin Productions, Inc. Outlines types of traffic emergencies and how best to combat them.

Expert Driving (series), 10 min. ea. Sponsor: Nat'l Safety Council. Producer: Gilbert Altschul Productions. *Experts Count 'Em All,* b/w, stresses value of professional drivers making reports of even minor accidents; *In Case of Accident,* b/w, for professional drivers, proper procedures at time of an accident; *Preventable Or Not,* b/w, explains meaning of preventable accidents to professional drivers; *For Experts Only,* color, emphasizes excellence of driving performance through Safe Driver Awards.

For the Road, 13½ min., b/w. Producer: WJZ-TV, Baltimore, Md. Designed for voice-over open and close, film shows consequences of drinking at bar before driving.

Highway Driving, 17 min., b/w. Sponsor and Producer: Ford Motor Co. Shows basic safe habits for highway driving.

In Step With Safety, 14 min., color & b/w. Sponsor: Divco-Wayne Corp. Producer: The Carson Co., Inc. Portrays to students right and wrong conduct on school buses.

Intersection Safety, 10½ min., color. Sponsor: Nat'l Assn. Automotive Mutual Insurance Cos. Producer: Dallas Jones Productions, Inc. Basic rules for handling certain types of intersection accident situations.

It Takes Two to Crosswalk, 6½ min., b/w. Sponsor: Pedestrian Safety Committee, Toronto, Can. Producer: Chetwynd Films Ltd. To inform Toronto pedestrians of new crosswalk system.

Jerks That Irk, 11 min., color. Sponsor & Producer: MFA Insurance Cos. Illustrates some driving habits and discourtesy that irritate other motorists.

Look—Stop Backing Accidents, 10 min., b/w. Sponsor: Nat'l Safety Council. Producer: Gilbert Altschul Prods. Demonstrates professional drivers' backing problems and how to avoid them.

Produced For You, 3 min., color & b/w. Sponsor & Producer: Acorn Films of New England, Inc. An accident strikes close to a person who condones violations.

Safety Through Seat Belts, 13 min., b/w. Sponsor: U. S. Public Health Service & Univ. of Calif., L. A. Producer: Charles Cahill & Assoc., Inc. Documents collision tests proving value of seat belt use.

Security Clearance, 21 min., color. Sponsor: Marshall-Eclipse Div., The Bendix Corp. Producer: Robert Fisher Prods. On importance of proper checking and installation of brakes.

Silent Witness, The, 28 min., b/w. Sponsor: Wm. S. Merrell Co. Producer: Dynamic Films, Inc. Case study of use of intoxication tests in traffic courts.

To See Ourselves, 14½ min., color & b/w. Sponsor & Producer: Aetna Casualty & Surety Co. Portrays average motorist who thinks other driver is always wrong.

Using Your Traffic Records, 21 min., color. Sponsor: Highway Traffic Safety Center, MSU. Producer: A-V Center, MSU. Use of traffic records system for better enforcement and engineering.

Winter Driving, 24 min., color. Producer: Bur. of Public Roads, Dep of Commerce. Illustrates drivin techniques for safer driving on sno and ice.

Witness to An Accident, 11 mi color and b/w. Sponsor: Insuran Institute of Indiana. Producer: A- Center, Indiana Univ. Police officer method in accident investigation.

You And Your Bicycle, 14 mi color and b/w. Producer: Robe M. Carson Productions, Inc. Ou lines a bicycle safety program, wi helpful hints for all riders.

HOME SAFETY

Electrical Safety in the Home, min., color. Sponsor & Produce A-V Center, Stout State Colleg Menomonie, Wis. Proper preventi or correction of common home ele trical hazards.

Poison in the House, 10½ mi color. Sponsor: Bur. of Matern & Child Health, New Hampshir Producer: Poison Information Ce ter, Mary Hitchcock Memorial Ho pital. Puppet with ordinary hous hold products that can be poisono to children.

Pound of Prevention, A, 11½ mi b/w. Sponsor: Dr. Gordon D. Je sen, Univ. of Washington, Seattl Producer: U. S. Air Force & D Jensen. How a small child ge burned, and subsequent hospit treatment.

Safe at Home, 29½ min., colo Sponsor: Merck Sharp & Dohm Merck & Co. Producer: Advanta Enterprises. Many ways childr can have accidents around the hom

GENERAL SAFETY FILMS

Accident Investigation Board, Th 52 min., b/w. Sponsor: U. S. A Force, Norton AFB. Produce Leonard Anderson Assoc. How investigation board functions; fo lows actual procedure.

Be Water Wise—Boating, 20 mi color. Sponsor: U. S. A. F., No ton AFB. Producer: Air Phot graphic & Charting Service, O lando AFB. Safe use of boat marine regulations.

Be Water Wise—Swimming, 20 mi color. Sponsor: U. S. A. F. Pr ducer: Air Photographic & Chartir Service, Orlando AFB. Good rul for swimming activities at beac lake, pool.

Better Boating, 10 min., color. Spo sor & Producer: Anthony La Film Studios, Inc. General rules f safe use of boats.

Danger—High Voltage, 16 mi color. Sponsor: Omaha (Neb Public Power District. Produce Walter S. Craig Film Prods. Ha ards of flying kites and climbir trees near electrical wires—for el mentary grades. *(Cont'd on P. 4*

VITALIZE Your Safety Programs! ENLIST THE DISNEY SAFETY TEAM!

Using color, animation, music and humor, Walt Disney makes a major contribution to both on-the-job and off-the-job safety education.

His unique ability to capture audiences of all ages — teaching most effectively as he entertains superbly — makes these films ideal for use in every type of safety program.

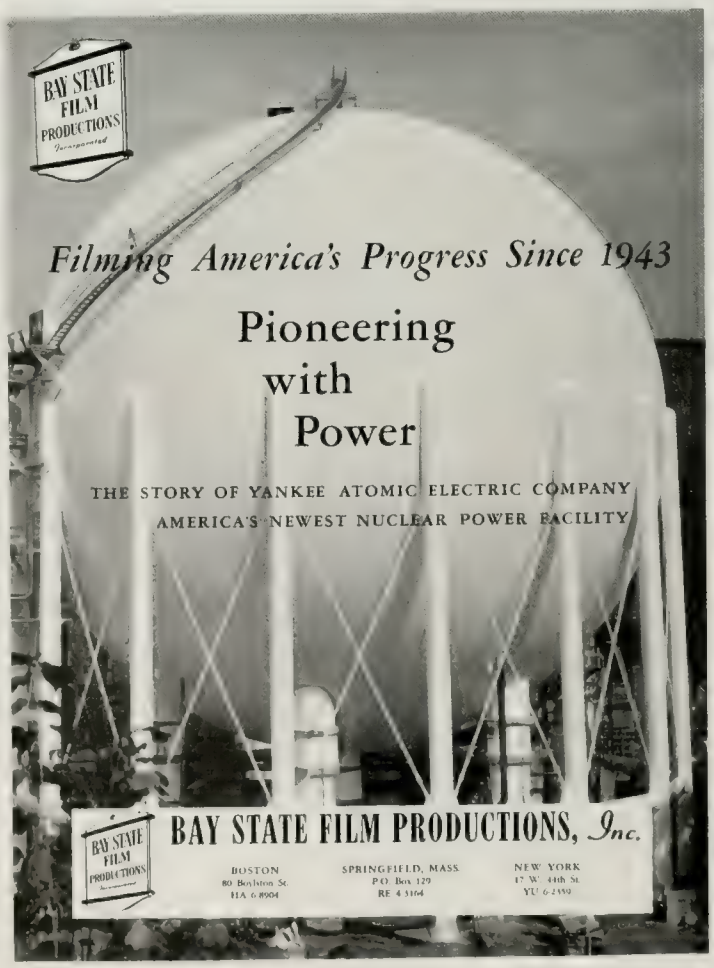
OCCUPATIONAL SAFETY

Everything Under Control, 15 min., color. Sponsor: American Gas Assn. Producer: Kennedy Productions, Inc. Safe methods and procedures at gas sites for gas utility workers.

From a Bed of Pain, 17 min., color. Sponsor: Consumers Power Co. Producer: Martin B. Kies. Re-enacts electric shock accident and follows victim's progress through surgery and hospitalization.



Lift With Your Head, 6 min., color. Sponsor: Firestone Tire & Rubber Co. Producer: Close and Patenaude. Cartoon characterization of right and wrong ways to lift merchandise.

Precaution, 14 min., color. Sponsor: Phillips Petroleum Co. Producer: Centron Corp. Informs of proper use of equipment and safe handling of anhydrous ammonia.

Judged by National Committee

• Leaders of national organizations directly concerned with all phases of safety education comprise the National Committee on Films for Safety. The National Safety Council's Bill Englander is the permanent secretary.

Final selections of winners of the coveted bronze plaques for 1960's outstanding motion pictures and slidefilms for safety education will be presented in Issue Three (next) of BUSINESS SCREEN. Watch for it!

Seattle's Citizens Look to Their Water Resources

SPONSOR: Seattle Water Department, Seattle, Washington.

TITLE: *Seattle's Heritage: A Community Resource,* 24 min color, produced by Rarig Film Productions.

Surveying their own communit to acquaint residents of th Greater Seattle Area with the lo cal watershed operations th benefit their homes and industr this color film is an informativ look at how one area of ou country handles its resources.

A visit to the Seattle watershe shows how the water is protecte and its purity preserved with min mum chemical treatment. Othe aspects show how modern forestr and logging practice aids i watershed development, and ho limiting public access to the wa tershed is essential in preservin the water's purity.

Seattle's Heritage: A Community Resource is being distrib uted by the producer, Rarig Film Productions, 5510 University Way, Seattle 5, Washington.

Conveyor Systems Film for the Plant Manager

SPONSOR: Conveyor Equipmen Manufacturers Association.

TITLE: *It's Your Move,* 24 min color, produced by Biofilms.

The premise is that a continu ous flow of materials is an abso lute fundamental to America mass production system and t the highest standard of living i the world.

It's Your Move says that goo industrial planning today require that plants be built around th conveyor—and the film shows ex amples of such planning—in production rhythm that bring men and materials together i efficient harmony.

The importance of conveyin systems in saving time and makin work easier for millions of peopl is illustrated in transportation, dis tribution and agriculture, as we as in manufacturing.

The movie is being offered t vocational and senior high school colleges, groups in business an other community organization through Modern Talking Pictur Service (3 East 54th Street, Ne York). Prints may be borrowe from any of Modern's 30 film libraries in principal cities

National Cowboy Hall of Fame Honors

Authentic Picture of the Cattle Business

"Outstanding Documentary" Wins Western Heritage Award for Story of South Dakota's Cattlemen Through the Years

THE STRUGGLES and accomplishments of South Dakota's livestock ranchers, from pioneer days to the present, are realistically portrayed in the recently released, award-winning motion picture, *Four Seasons West*.

During the March, 1960 quarterly meeting of the South Dakota Stockgrowers Association, it was decided to produce a motion picture to tell the people of that state and others the saga of the South Dakota cattle industry and its people.

Max Howe Film Productions, Rapid City, S. D., was contracted for the film undertaking, and work began immediately.

100 Years in 29 Minutes

"The big, big problem was to condense a one-hundred-year story into the usual twenty-nine minutes," said Max Howe.

"We engaged a local research expert of no small talent, Polly Weedman, program director at station KOTA in Rapid City, who furnished us with ten thousand true words which realistically told of the Texas trail herds and pioneers to the present modern rancher, his problems, hardships, and economic status as a modern businessman and third largest cattle producer in the nation."

With staff writer Cynthia Maeder setting up structure and sequence, filming began.

Tale of Three Generations

The film tells of a young man leaving agricultural college. Through his, his father's and his grandfather's eyes is shown the scope of the livestock industry of South Dakota, from feedlots east of the range country to cash grain farming operations closely associated with livestock production.

Local people are featured in the film's leading character roles, and family homes and ranches in the state were used for authenticity of locale.

These Were Real Pioneers

Early pioneer days are recalled by the Grandfather in the story . . . the days when the settlers headed west in covered wagons. A sequence shows a pioneer family "ninety miles from nowhere" building a "soddy," a four-wall shanty made of slabs of the very sod which fed the livestock.

Cattle roundup and herding is shown, with shots of cowboys in action, working in the familiar chaps and ten-gallon hats.

The producer's son, Alan Howe, who is art director and assistant cameraman in the firm, doubled in a "special" role. He was "hanged" on Hangman's Hill

In the past century, *quick punishment was meted to rustlers.*

at Rapid City in a swinging scene depicting former measures taken against cattle rustlers. Typical of the realism created throughout the film, Alan sported rope burns on his neck for some time after!

Antique collections throughout the area were called on for props, and the film's set would have brightened the eye of most any collector. The covered wagon and team were provided by the South Dakota couple playing the film's pioneer family.

Of Ranchers and Problems

The purpose of *Four Seasons West* is to tell the story of the cattle industry and the problems of the ranching people under conditions of South Dakota environment.

But it's the human aspect that's stressed in the story line, Howe points out. "It's the story of a people, a straight-from-the-shoulder account of their trials and tribulations as well as their happier times."

Howe traveled far and wide across the state to shoot historical and modern scenes, to film western square dances, interiors of ranch homes, a Directors Meeting, and scenes of the many ranching activities in all seasons. Total miles traveled in production—12,000!

This chuck-wagon scene *from "Four Seasons West" was filmed on location in Lawrence County, South Dakota, by producer Max Howe.*

Acting as liaison to the producer was Jack McCulloh, executive secretary of the South Dakota Stockgrowers Association.

Wins Award in January

In January, *Four Seasons West* won the Western Heritage Award as the Outstanding Western Documentary of 1960. The award is sponsored by the National Cowboy Hall of Fame and Western Heritage Center, now under construction near Oklahoma City, Oklahoma.

The Western Heritage Awards are designed to encourage authenticity in western fact and fiction, and annually honor achievements in motion pictures, television, magazines and music.

An award winner is cited "for an outstanding contribution to a greater understanding and a better appreciation of our nation's great Western Heritage."

Has Three Big Premieres

Four seasons after authorization of the production by SDSGA directors, the full-color motion picture was released. The film was premiered statewise in Pierre, the capital of South Dakota, at the Stockman of the Year Banquet, and nationally at the American National Cattlemans Association annual convention in Salt Lake City, Utah, in January.

Solid Bookings to Mid-Year

According to Howe, *Four Seasons West* is booked solid through the middle of this year, with requests coming from all over the United States. Information can be obtained by writing Max Howe Film Productions, 910 St. Cloud St., Rapid City, South Dakota.

Come September, fall branding operations *at a northwestern Dakota cattle ranch make a colorful sequence for this award-winning picture.*

Film Testifies at Rail Labor Hearings

Illinois Central Film Viewed by Presidential Committee

Shown with IC prints *(l to r) are: attorneys Howard Neitzart, James Wolfe; witness Ernest Hallmann; Joseph McCool (who presented the film); producer John Hawkinson.*

FEATURED RECENTLY as an integral part of a legal presentation before the 15-man Presidential Commission investigating railroad wage and work practices was a specially produced, hour-and-three-quarters motion picture reinforcing the testimony of the Illinois Central Railroad with the visual effectiveness obtainable only through a motion picture.

The Commission has been conducting hearings over the proposal that management be allowed to determine when firemen should be used on diesels and other non-steam locomotives in freight and yard service.

Use Model Board and Film

The railroad's presentation in March was given by Joseph J. McCool, assistant division superintendent for the Reading Railroad, whose testimony incorporated use of a lighted board showing track layout in the Philadelphia area where commuter trains are operated with one man in the cab, in addition to the motion picture showing how the Illinois Central's Chicago commuter service also operates with only an engineer.

Mr. McCool contended that "these heavy traffic areas, with complex track layouts and signal masts with as many as nine indicators, were the places to measure the difference between operating with or without a fireman."

105-Minute Film in Color

The film, *The One-Transportation Story*, was produced in color and sound by John T. Hawkinson, manager of audio-visual services for the Illinois Central. The picture was made on the Illinois Central because its one-man operations are typical of all others in the country and evidence submitted through the picture was typical for the country as a whole.

The second part of the film was also made in the Chicago area—showing one-man operations in effect on the metropolitan elevated, subway and bus operations of the Chicago Transit Authority . . . "all with heavy traffic loads and all being safely handled," said Mr. Hawkinson.

Produced at 16 F. P. S.

The motion picture, in production for nearly a year, was originally 10,000 feet long. To reduce length for the Washington hearings it was cut and edited to 3,000 feet. The film is unique in that it was produced at amateur speed of 16 frames per second, and contains ten minutes of lip-sync cinematography of the witness, Mr. McCool, taken at 16 fps with the new Nomad recording system.

"The reason for producing *The One-Transportation Story* at the silent speed of 16 fps," said Mr. Hawkinson, "was that we were required to photograph the Chicago Transit Authority operations in color, which would include passengers boarding and alighting from trains at subway stations, show headway of trains, speed of trains enroute through subway, track layout and curvature, signals, etc., and all in existing lighting available throughout the subway system.

Subway Scenes Were Problem

"Only by using high-speed Ektachrome film, fast lenses, obtaining the equivalent of an additional lens stop opening by photographing at 16 fps, and finally by obtaining a 16mm print from the originals by forced printing (a[illegible] we had to hunt for a film labo[illegible]tory that could do this for [illegible] were we able to obtain excell[illegible] motion pictures of the subw[illegible] operations in color for our p[illegible]duction," Mr. Hawkinson said.

When the film was edited [illegible] final form in synchronization wi[illegible] the Nomad double-system magn[illegible]ic sound track, a magnetic str[illegible] was applied to the motion pict[illegible] film and the sound track was tra[illegible]ferred from the Nomad system [illegible] the magnetic stripe on the film.

In this manner the film w[illegible] sound could be readily shown [illegible] the widely available and porta[illegible] 16mm magnetic motion pict[illegible] projectors.

* * *

16mm Film in Salesman's Pock[illegible] Provides "Hard Sell" for Firm

A picture may be "worth a thousand words," and a mot[illegible] picture can be worth more th[illegible] a thousand sales calls, accordi[illegible] to the sales executive of a C[illegible]cago company.

"Motion pictures are amo[illegible] the best of our sales tools," sa[illegible] Louis L. Crawford, vice-presid[illegible] of The Allbright-Nell Compa[illegible], a Chemetron Corporation subsi[illegible]iary, "and we've been proving t[illegible] to ourselves each year for [illegible] years."

His firm, the leading produ[illegible] of equipment for the meat pa[illegible]ing and allied industries, curre[illegible]ly has a library of a dozen film[illegible] running from 5 to 30 minu[illegible] and accumulates 1,000 feet of usable footage a year. They sh[illegible] all operations of Anco process[illegible] machinery at actual installatio[illegible]

"In our business, we can't c[illegible]ry samples, even on a truck. Bu[illegible] if we can make an appointm[illegible] with the potential customer, [illegible] projector rented locally and [illegible] small can of our own 16mm f[illegible] offer the best 'hard sell' approa[illegible] we've found," he said.

Sound films? Not always, Cra[illegible]ford said. "Sound-on-film [illegible] value in training company peo[illegible] but experience has taught that [illegible] ecutives in the industries [illegible] company serves prefer silent fil[illegible] —with a top-flight engineer [illegible] hand to answer questions a[illegible] provide some live description.

"When the prospect is stim[illegible]lated by film to visit an insta[illegible]tion, sale of that equipment [illegible] well on the way to successful completion," Crawford said.

Allbright-Nell shows its fil[illegible] to 500 potential customers a ye[illegible] in their plants and at conventio[illegible]

News Along the Film Production Lines

Animation stand designer *John Oxberry (left) describes unit to Reid H. Ray; art director Gordon Ray and cameraman Andy Chandler.*

Reid H. Ray Installs Oxberry Electronic Animation Stand

A new unit of equipment at Reid H. Ray Film Industries, Inc., St. Paul, Minn., is a 1,700-pound, $27,000 Oxberry animation stand.

The electronically controlled unit has eight computers which enable accuracies of one-thousandths of an inch when movements of the camera and table enable travel from a 36-inch layout of art work down to segments of only 3 inches. With the use of an electronic "joy-stick," movements of the table carrying the animation cells and art backgrounds may be controlled throughout a 360-degree arc.

The new equipment will be used to produce cartoon animation, technical animation, photomontages, creative title designs, optical effects, as well as slide-film photography. One of the unique features is that the Oxberry camera can be used for either 35 or 16mm film and requires only a few minutes' time to replace the complete film transport system within the camera itself. Three lenses of varying focal lengths are also interchangeable and used for both sizes of film.

The animation stand was used for the first time on a sequence in a film being produced for the Air Reserve Record Center of the Air Force at Denver.

MPO Videotronics Report Shows 1960 Sales of Nearly $8 Million

The annual report of MPO Videotronics, Inc., issued on February 3rd of this year, and covering the firm's activities through the fiscal year ending October 31, 1960, shows increased volume of business and earnings over the three previous years.

Sales for 1960 amounted to $7,865,971; as compared to $6,047,570 in 1959; $4,957,956 in 1958; and $3,440,619 in 1957.

Net earnings before taxes were $677,499 in 1960; $534,014 in 1959; $208,002 in 1958; and $171,630 in 1957. Earnings per share of 410,000 outstanding shares was $.85 in 1960. (MPO, which is traded on the American Stock Exchange, has been selling in the range of $8\frac{1}{4}$ to $25\frac{3}{4}$ in 1961, thus far.)

MPO's finished film production last year, the report says, was equal in length to more than 26 full-length feature films.

During 1960, MPO purchased 50% of the capital stock of Eastern Effects, Inc., New York, at a cost of $214,318.

MPO hopes to continue its growth in the television commercial and industrial film fields in 1961 and is investigating production possibilities in TV programs, theatrical feature films and educational films. The company has developed an 8mm continu sound projector, with manufact expected to start some time year.

1962 Ford Dealer Introduction Program to MPO Sales Subsidiary

MPO Sales and Training Programs, Inc., has been awarded the production of the big 1962 Ford dealer introduction show for the second year in a row. Ira Marvin will produce and direct the show out of New York, while Tommy Thomas will supervise production in Detroit.

INVESTORS' PROGRAM:

(CONTINUED FROM PAGE 26)

foreseen have a way of popping up. "When they do," he says, "we can provide visual presentations in a matter of a few minutes to help make our answers more easily understood."

The questionnaire approach now can be used in sales training sessions. For example, a 10-question poll might be presented on the screen, the answers collected and quickly tabulated and then put on a transparency for all to view.

If those present want copies of the information presented verbally, it's a simple matter to run off the required number on the copying machine.

A recent case in IDS where this flexibility was graphically demonstrated involved the presentation of an investment program to a director's session.

"The report was 20 pages long," Johnston said. "The typist didn't finish it until 9:45 and the meeting was set for 10 o'clock, but we made projection transparencies and ran off extra copies on the copying machine in time for use at the meeting."

With some 3½ billion dollars under its management, Investors Diversified Services, Inc. ranks among the largest investment companies in the world. It maintains offices throughout the country, with additional locations in Hawaii and Frankfurt, Germany.

Kawneer Products for Builders Introduced Via Films and TV

☆ Utilizing both closed circuit TV and individual showings of three motion pictures produced by Fred Niles, Chicago, the Kawneer Company recently introduced three revolutionary new architectural products simultaneously in its 48 key markets.

Some 5,000 architects, contractors, chain store executive dealers, building managers and trade editors saw the presentation of Kawneer's new Core System, Zipperwall and Concealed Overhead Closers through the Niles-produced films.

Each of the films covered all aspects and details of one of the products, and at the same time, Kawneer's story of its technological pioneering in the field was presented.

Robert J. Offringa, vice-president for sales at Kawneer, said this method of introducing new products should help overcome the problem of presenting products quickly and simply to the architect, contractor and owner.

Direction of the product series was under Lou Marlowe, who worked closely with Kawneer's technical experts. Two weeks of morning to midnight film shooting produced 36 minutes of technical footage selected from more than 9,000 feet of exposed film.

The importance of motion pictures for Kawneer products lies not only in exposure of product information, but also the possibility of dramatically illustrating results of these products in finished buildings. Formerly, drawings and photographs were used for this purpose.

Challenge of Nursing Career Presented in "Future Nurse"

SPONSOR: National League for Nursing.

TITLE: *Future Nurse*, 18 min., color, produced by Dephoure Studios, Inc., through Bill Hodapp.

☆ The challenge of a career in nursing, and how the Future Nurses Clubs in high schools are helping to prepare girls for this career is the subject of an informative film written for a teenage audience, and narrated by Pat Boone.

Many young people today are undecided about their future. To help those who are considering a career in nursing, Future Nurses Clubs are being organized throughout the country.

The Wide World of Sponsored Pictures

Leadership Theme in Marine Corps' Film Series

THE MARINE CORPS is now presenting four new 4½-minute, b w motion pictures which describe the function of leadership as it exists in the Marines. The films are not concerned with upper echelon aspects of leadership, but rather right down through the ranks to the newest recruit, who begins to learn qualities of leadership on his first day in the Corps.

The films, which were shot on location at Quantico, Va., and Parris Island, S. C., were produced by Wondsel, Carlisle & Dunphy, Inc., and written and directed by Tom Dunphy. The four short subjects are concerned specifically with (1) training for leadership, (2) leadership in action, (3) leadership in professional specialty, and (4) leadership in the carry-over to civilian pursuits.

Tom Dunphy, during pre-production script research, found an amazing thing: there is no exact syllabus for teaching leadership in any branches of the armed forces. There is no step by step approach, nor even a specific definition of leadership.

The Marine Corps has always used a pragmatic system in training recruits for leadership. It works, but it is carried on with no definable yardstick. The Corps, for some reason, has never set up leadership goals which allow it to say we've accomplished so much at a time. It might thus seem that Marines are born leaders rather than systematically trained leaders, but, of c
this is not so.

Dunphy's job as writer w
therefore complex—first i
fining military leadership a
then in correlating it to the i
ian experience. In seeking a a
stick of measurement for l
ship he pored over technical
uals for days, went back t
words and maxims of such
as John Paul Jones, Nap

ıgement Improvement Film ıced for Navy by Depicto

Depicto Films Corp. recently i·red to the Navy Department aimated 16mm color film en- *Management Improvement Your Business.*

Produced and directed by C. V. glale, the film emphasizes the nuing and pressing need for en effort by all levels of man- ent—top, middle and first to find a better way of do- nings.

We live in a dynamic environ- Military requirements ge rapidly. Those of us who rch, develop, produce and ort these requirements must ntly search for better meth- because we are unable to have me and resources we feel are ed.

Management Improvement— Your Business summarizes ver-all management improve- needs of the Navy and ne Corps. It emphasizes spe- problem areas and highlights Navy and Marine Corps or- ed approaches to manage- improvement. The film s organization principles, au- rtion, paperwork management, gement sciences, information ms, and office and industrial ods.

It is not a training film, but r a film designed to stimulate embers of Navy's vast man- ent team. It is not the pana- or mis-management but it will out specific areas that need gement improvement and af- some general guidance.

Management Improvement . . . olor, music, sound effects and clever modern animated car- s. The treatment of subject r is balanced—the light to maintain interest and gh serious thought to make a ibution to management.

"Film Within a Film" Tells Why Jobs Specify Cycolac Plastic

☆ Showing visual proof of the unique combination of properties offered by Cycolac, a Borg-Warner plastic, *The Cycolac Story* presents each of the reasons why Cycolac brand polymers have been specified for a broad spectrum of industrial, commercial and consumer applications.

The title of the motion picture covers the story of the many current uses of the unique ABS plastic produced by Marbon Chemical Division of Borg-Warner Corporation.

Demonstrations in the film give evidence of the plastic's tough, hard and rigid characteristics, its durability and strength, retention of rigidity in high heat, resistance to impact even at sub-zero temperatures, freedom from corrosion and chemical resistance.

The Cycolac Story uses a "film within a film" technique. The opening sequence, presenting a Marbon salesman discussing the plastic's processability and performance advantages with a prospective customer's executive group, is followed by the salesman's showing of a film demonstrating the uses of Cycolac for a broad range of products.

Shots are included of actual production, using Cycolac, of Western Electric telephones, Philco refrigerators, Victor adding machines and other products.

The half-hour, 16mm color film was produced by Academy Film Productions, Inc., Chicago. It is available on loan to individual companies, professional or technical associations and educational groups. For further information, or to preview or borrow a print, write Cycolac Films, Dept. C-2, Marbon Chemical Division, Borg-Warner Corp., Washington, West Virginia.

TEL-Animastand® with Electronic Zoom
ANIMATION and SPECIAL EFFECTS CAMERA STAND

Greatest Value in the Low Cost Field!

TEL-Animastand is world famous—the most economical solution to all animation and special effects problems in Motion Pictures and Television. Embodies features of photo enlarger, movie cameras, micrometer, railroad roundhouse and all movements associated with much higher priced stands. Every type of variation for trick photography and optical effects such as pans, angle shots, montages, zooms, matching zooms, spins and quick closeups are accomplished by simply raising or lowering the camera—as well as Animation, Special Effects, Titles, Stills, Film Strips, Cartoons, Enlarging, Etc. Operator can also work comfortably in sitting position.

A camera fitted to a movable, counterbalanced vertical carriage photographs the art work. Will accept even the heaviest 16mm or 35mm camera (Acme with stop motion motor illustrated). Accuracy is assured through precise registration of art work. The only difference between TEL-Animastand and the very expensive models is primarily a few rarely used special features.

TEL-Animastand with TEL-Anima sliding cel board, rotated at 45°

Electronic Zoom Control
Features:
Adjustable Dynamic Braking
Constant Motor Torque at any speed
Instant Response at any position
Infinite Variable Speeds

Videotape Productions Names Fagan Industry Sales Director

☆ Charles R. Fagan has been appointed Director of Industrial Sales for Videotape Productions, New York.

Fagan, who has a background in television production and sales at CBS-TV, joined Videotape Productions several months ago, along with several other CBS producer-directors.

Videotape Center will produce industrial presentations which will utilize both film and tape facilities, making use of videotape television techniques.

* * *

Redell Vice-Pres. at ARTS

☆ Donald W. Redell has been appointed vice-president of ARTS (Advertising, Radio and Television Services, Inc.). He will be responsible for live industrial shows, closed circuit television programs, and films for industry.

Prior to joining ARTS, Redell was an executive at TelePrompTer Corporation, with whom he was associated for ten years. He has also been with the William Morris Agency, MGM Records, and RKO Radio Studios.

Appelson to Direct Live Films at HFH Productions

☆ Len Appelson has been appointed Director of live-action films at HFH Productions, Inc., New York. He has been chief editor at the company for the past two years.

Appelson recently finished an assignment as editor for the John Cassavetes production of the film *Shadows*, which is to have a general art theatre distribution shortly. The picture received an award at the Venice Film Festival, and it is distinguished by its unorthodox editing techniques.

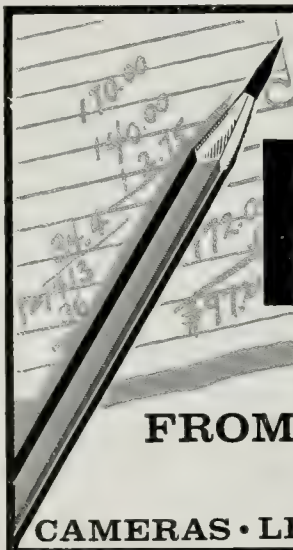
Prior to joining HFH, Appelson was an editor and assistant director at ABC-TV.

Movies for All Affiliates With U. S. Productions, I...

☆ A new company, Movies for All, Inc., has been formed as an affiliate of United States Productions, Inc., with the purpose of (1) developing a new, lightweight 8mm sound projector, (2) developing new production methods and equipment for use in 8mm sound film projects, and (3) undertaking research work on a new film stock specifically designed for 8mm use.

Movies For All, Inc. is headed by Richardson K. Wood, formerly a managing editor of FORTUNE Magazine, and a shareholder in United States Productions, a New York industrial and television film producer.

According to Mr. Wood, progress thus far indicates that a projector which weighs under 12 pounds, and which can be marketed for under $100 will be a reality, and for sale on a modest scale, in about six months. The company is confident of being able, within the next year or two, to deliver 8mm color-sound prints on an industrial basis with a cost of less than one dollar a minute in running time.



Mr. Wood believes that a limiting factor in industrial film production is that each film—in most companies—is made on a special budget appropriation. Yet, the quantity of printed material (catalogs, brochures, technical manuals, advertising direct mailing pieces)—produced by the average corporation on existing budgets is enormous. Mr. Wood thinks that the 8mm sound film can be the most efficient and inexpensive working tool of all, and should be readily available to industry on the same basis as printed material.

Movies For All, Inc. is at research and development company in its present stage. The film projector design has been licensed to a manufacturer with exceptional facilities for producing audio-visual equipment. Newly developed production techniques and equipment are being utilized by the affiliate company, United States Productions.

ice Project Films Reach 0 tates, Overseas Audiences

series of films produced n the scientific project, Hori- of Science, has reached its of distribution to every state is country. In addition to the tates, an international mile- was passed with the sign- of overseas television con- s with Australia, Belgium, da, Holland and Nigeria.

major factor in reaching a -to-coast audience was a re- grant by the United States Foundation, making possible t of Horizons sets to key au- isual centers in each state. 45 other major corporations foundations have also spon- Horizons in areas where have main operations.

lms Feature Noted Scientists

he series of ten films, each ring a scientist of national e, were initiated with the as- ice of the National Science dation and produced by Edu- nal Testing Service, Prince- New Jersey. They were com- d in July, 1960, after two of research and develop- . Since then the films have ved wide acceptance in edu- nal circles.

"We have had many reports schools and colleges where zons has been used," reports y Chauncey, president of ational Testing Service, "and indicate that the films do students to read more in science areas and to develop cts for science fairs. This vational factor was our main pse in producing Horizons in irst place, and we are de- d that it is having this ef- ."

h Is a 20-Minute Field Trip

ch 16mm color and sound is a twenty-minute field trip dramatic scientific activity— e Admiralty Islands with an- ologist Margaret Mead, to khaven National Laboratory nuclear physicist Donald es, to Palomar Observatory astronomer Allan Sandage, e Edge of Space with Air balloonist Colonel Simons, into the world of micro- gy with Dr. Roman Vishniac. her subjects are visual per- n, "thinking" machines, ematics, the "Mohole" proj- nd medical research. The sci- is featured as narrator, and resentations are equally ap- ng to students and adults. though over $400,000 worth lms have been sponsored across the country, Educational Testing Service hopes to expand the program far beyond this beginning. Corporations and foundations have found Horizons an excellent way to make an educational contribution to schools, colleges, PTA's and civic groups in areas where they have operations.

A project such as Horizons helps Americans understand important scientific developments and motivates youngsters to be interested in scientific careers. Schools find it a valuable supplement in enriching their science curriculum.

The award-winning films were produced by a team of professional film journalists, directed by Alfred Butterfield. Citations include awards by the American Film Festival in New York, Scholastic Teacher and the Film Council of Greater Columbus.

One of the titles was selected for showing at the International Conference of Education at Geneva, Switzerland, and four were shown at the United States Army Dependents' Schools European Science Fair in Germany in March.

Information on the Horizons of Science program may be obtained from Educational Testing Service, Princeton, New Jersey.

NEWS OF STAFF APPOINTMENTS AND A-V INDUSTRY DEVELOPMENTS

Pell is Sales Manager at Byron

Robert Pell has been appointed sales manager of Byron Motion Pictures, Inc., Washington, D. C., motion picture film laboratory. He will develop and direct an expanded national sales program.

Pell was formerly an account supervisor with Music Makers, Inc., New York, before which he was sales manager of Precision Film Laboratories, and sales manager of Color Service, Inc.

* * *

Frank Stephan, Vice-Pres. for Nat'l Sales at Van Praag Prods.

Frank Stephan is the new vice-president in charge of national sales for Van Praag Productions, making his headquarters in the New York office.

Stephan, since November 1959, has been vice-president in charge of the Detroit office, servicing Van Praag automotive accounts in that area.

The transfer and promotion is in line with the expansion policy now in effect in the documentary and industrial department of Van Praag Productions. Andrew Pastula, office manager and assistant production head in the Detroit office, will assume top duties there.

* * *

Benjamin to Association Films

Donald A. Benjamin has been appointed Assistant Advertising and Promotion Director of Association Films, Inc. He was formerly assistant to the Advertising and Sales Promotion Manager at WBZ-TV, Boston.

* * *

Norton Gretzler, Jos. Fiorelli Join Staff at On Film, Inc.

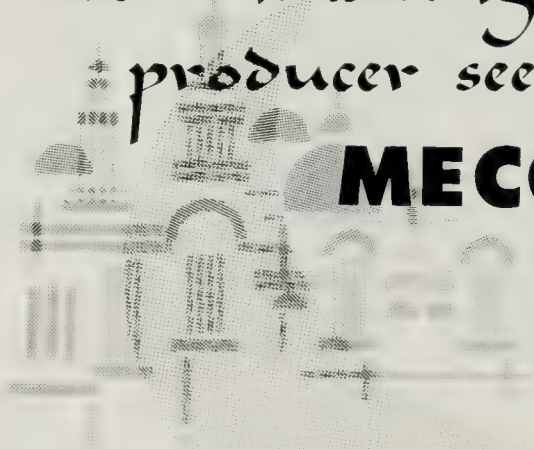
On Film, Inc., of Princeton, N. J., producers of commercial television and industrial motion pictures, have announced two staff appointments.

Norton T. Gretzler was named television commercial coordinator. He was previously associated with Ketchum, MacLeod and Grove advertising agency, successively as a television and radio producer, broadcast account executive and broadcast business manager, and was also with NBC.

Joseph A. Fiorelli becomes a motion picture producer on the staff, with a background in art and art education. He has written, filmed and edited two films for the Stamford Board of Education on the life of the high school student.

Tom Willard

Willard Joins John Bransby



Thomas W. Willard, formerly of Willard Pictures, Inc., and recently film program head of American Bosch Arma Corp., is now the executive vice-president of John Bransby Productions, Ltd., N. Y. The move unites two motion picture producers with wide experience in the field of creating industrial, travel, scientific and technological films.

In his new position, Tom Willard will utilize more than 25 years' experience in the creative and management phases of film production; he founded Willard Pictures in the 1930's.

During the past five years with American Bosch Arma, he has been responsible for the production of 16 motion pictures dealing with the design and manufacture of the Inertial Guidance System for the Atlas missile. He also inaugurated and managed American's motion picture program as a "film specialist."

Michael Kraft

Michael Kraft is Sales Manager at Pelican Productions, N. Y.

Pelican Productions, Inc., live-action division of Pelican Film, Inc., has appointed Michael Kraft sales manager. Kraft comes to Pelican Productions from Wilfur Streech Productions, where he was vice-president in charge of sales and creative director.

Prior to that association, Kraft was president of his own advertising agency, Michael Kraft, Inc., in Boston. He has a wide background of experience in television copy, marketing and account management gained in association with such advertising agencies as Young & Rubicam, Ruthrauff & Ryan and others in New York.

* * *

M. Templeton at Florez Inc. Director of Visual Presentations

Marshal E. Templeton has been appointed director of the Visual Presentations Division of Florez Incorporated, Detroit-based sales training agency. Templeton formerly headed his own marketing firm and for a number of years was director of merchandising for Campbell-Ewald advertising agency.

He is a director of Fenton, Incorporated, Detroit builder of product fabricators, a member of the American Management Association, and a trustee of Detroit's Michigan Artists Memorial, Inc.

* * *

Marshall Stone to Filmex, Inc.

Marshall Stone has joined Filmex, Inc., New York, as production Manager and Director.

Beginning his career as an NBC Guide, Mr. Stone has been on the production staff of NBC in various capacities since 1951. More recently he has been a producer at Kenyon & Eckhardt, producer-director at Elliott, Inger and Elliott, and producer-director at MPO.

New AUDIO-VISUAL Equipment

Recent Product Developments for Projection and Production

lefilm & Slide Projectors, viewers, from Viewlex, Inc.

Two new slidefilm and slide jectors and two previewers for lefilms are available from Viewlex, Inc., of Holbrook, Long nd, N. Y.

The Viewlex V-25P is a combination projector, accommodating 35mm slidefilms, either single double frame, for either vertical or horizontal projection, and 2" x 2" slides in any type of unt.

The most advanced Viewlex lefilm and slide projector is the 00P. For all types of 35mm lefilm and 2" x 2" slides, the 00P is equipped with simple, h-in threading. The automatic e-up accepts film from the proor channel and winds it neatly. er features include the latest n-type" lamp and "pop up" p ejector for easy lamp reement, and a magnifying nter which enlarges any area in a frame for emphasis. Price he V-500P is $114.50.

Both the V-25P and the 00P feature the new Viewlex i-Hesive Aperture Plates ch eliminate slidefilm sticking. The Viewlex Previewer Sr. has " x 9" screen which "pops" inview when the carrying case is ned. Designed for desk-top viewing of 35mm slidefilms, Previewer Sr. threads itself antly. Has single-knob focus trol and click stop advance reverse. Priced at $59.50. For her information, write New ducts Desk, BUSINESS SCREEN, cago 26.

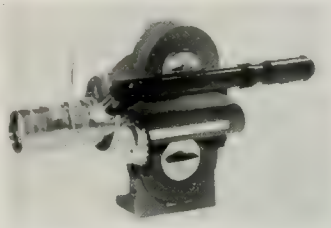
New Line of Mark III Tripods Announced by Florman & Babb

Florman & Babb has announced a new line of imported tripods called the Mark III—a medium-weight standard type which will accommodate all friction or fluid drive heads.

Mark III comes in two sizes: the "standard" (40-70 inches, 9 lbs.) at $49.50, and the "baby" (20-37 inches, 4½ lbs.) at $47.50.

Also available are leather and vinyl carrying cases for both tripods. These feature full-length zipper and removable, snap-on top for easy packing and a padded leather shoulder carrying strap. The leather is finished in black. The "standard" size case is $12.50 and the "baby" case is $11.50.



A special combination has been made up to include a Vision-Matic fluid drive head and adapter. The entire outfit sells for $139.50. For further information write New Products Desk, BUSINESS SCREEN, Chicago 26.

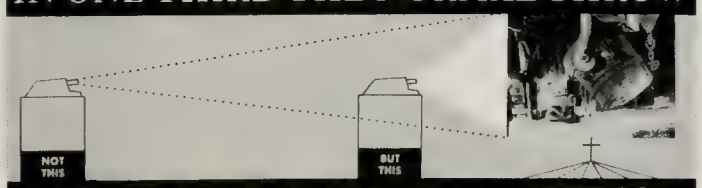
Traid Corp. Has Variable Focal Lens with Built-In Viewfinder

The versatile Twenty-Eighty lens by Traid Corporation, Encino, Calif., now has a built-in viewfinder, providing an exact view of the scene being shot.

Fitting any "C" mount 16mm camera, the Twenty-Eighty Variable Focus lens provides focal lengths from 20mm to 80mm, for wide angle, normal or telephoto shots. Iris is constant at f/2.5 and focusing scale is 48" to infinity.



Traid "Twenty-Eighty" Lens has built-in viewfinder, here mounted on B&H 70HR 16mm film camera.

The finder may be positioned for any spot in the 360° range around the camera and framing mask can be rotated for horizontal positioning. The eyepiece closes to prevent feedback of light.

For further information and complete specifications, write New Products Desk, BUSINESS SCREEN, Chicago 26.

Here's the all-new Model 542 Filmosound Specialist projector.

Bell & Howell Unveils New, Lightest Filmosound Specialist

The Model 542 Filmosound Specialist was designed specifically for the industrial, religious and educational fields. Weight is only 29 pounds, 8½ pounds lighter than previous Bell & Howell models. Lightness is due to magnesium castings, miniaturized electrical components and a fiber glass case. It is as compact and portable as a small suitcase.

Bell & Howell's exclusive Proximity reflector lamp with built-in reflector provides ideal brightness and the Super-Proval 2-inch f/1.4 lens allows a maximum of light to reach the screen. The Presence amplifier carries sound of high-fidelity clarity and quality to all parts of the screening room at equal strength. The built-in speaker is full-range, and without distortion. Included in the projector line is an auxiliary speaker for use in large rooms.

An added feature is the still picture control. A clutch stops the projector on any frame in either forward or reverse position. Controls are conveniently located on an illuminated finger-span panel.

The shuttle and exclusive lower-loop restorer work together to keep the film properly moving through the aperture even though as many as three consecutive sprocket holes are faulty. Permanently attached, gear-driven reel arms swing out for operation and lock firmly in a position which permits rewinding without changing reels.

For quick and easy changing of the projection bulb, the lamp housing swings open on hinges and the bulb pops out at the touch of a lever. The exciter lamp also is loosened quickly by a release lever.

The Specialist has been engineered to require almost no maintenance, and its modular or building-block construction permits components to be removed and

(CONTINUED ON NEXT PAGE)

NEW A-V PRODUCTS:

(CONTINUED FROM PAGE 57)

replaced easily, quickly and inexpensively.

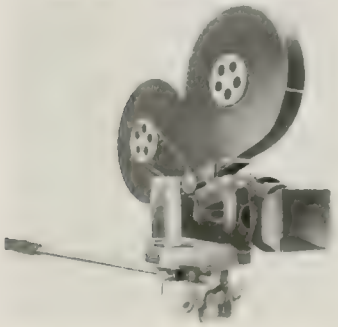
"The Specialist is the result of the largest single photo product research program in Bell & Howell's 54-year history," said Peter G. Peterson, an executive vice-president of Bell & Howell.

Final features of this new 16mm sound projector were determined through exhaustive field tests as well as in the engineering labs. Field tests were conducted in nine states recommended to Bell & Howell by the U. S. Weather Bureau for their wide range of climatic conditions, and films of all ages and of varying qualities were run through the Specialist at more than 100 meetings in industrial, religious and educational settings.

The new Filmosound Specialist projectors are now available from Bell & Howell audio-visual representatives.

* * *

Slide Projector With Zoom Lens



Bausch & Lomb announces that its new 2" x 2" slide projector, the Balomatic 655, is now available with a zoom lens. The new lens permits up to 175% change in projection distance or picture size, effectively a whole battery of lenses in one. Focal length is continuously variable from 3¾" to 6½", allowing instant adjustment for small room, large room, family group or large audience. The lens telescopes to fit the standard carrying case of the Balomatic 655, and the price of the complete projector with zoom lens is $149.50. For further information write New Products Desk, BUSINESS SCREEN, Chicago 26.

CECO Designs Motor Base for Better Balance of Arriflex 35

Camera Equipment Co., Inc., New York, has designed and produced a special Motor Base #75400 for the Arriflex 35mm Vari Speed Motor.

35mm Arri With Motor Base

Up to now, in order to mount the camera with the Vari Speed Motor on a tripod, it was necessary to use an auxiliary Hi-Hat mounting arrangement to clear the motor. This resulted in an overweight condition in the operation of tilting due to the center of gravity of the camera being far apart from the tilting pivot of the tripod; the effect was a constant unsteady tilting from fighting the overweight.

The new CECO motor base overcomes this problem by relocating the motor in an adjacent upright position to the camera, permitting base mounting without the use of a Hi-Hat. The center of gravity is then lowered by bringing the camera closer to the tilt pivot point of the tripod.

For further information and prices, write New Products Desk, BUSINESS SCREEN, Chicago 26.

Transparencies for Overhead Projection Made on New Printer

Ozalid Division of General Aniline and Film Corp. has introduced a new two-process printer for making transparencies for overhead projection.

The Projecto-Printer 40 produces sharp transparencies up to 9½" x 12½" from bound books, material printed on both sides, or individual illustrations.

It is simply operated, and its portability makes possible in-the-field production of transparencies for any presentation. Two reproduction processes are used—the dry-developing diazo (direct copy) method producing transparencies from a master transparency, or the reflex photocopy method, producing a transparency from an original.

The Projecto-Printer 40 is 12½" x 15¾" x 19½", and weighs 35 lbs. The impact-resistant plastic case has storage space for developer supplies and up to 100 sheets of sensitized material. It operates on 110-volt AC.

For further information and prices, write New Products Desk, BUSINESS SCREEN, Chicago 26.

* * *

Automatic Attachment Adapts Slide Projector to Slidefilm Use

An attachment for the "S" series of Selectroslide projectors by Spindler & Sauppe of Los Angeles adapts the automatic slide-changing projector to the use of slidefilms.

The 35mm film is placed in a holder atop the focusing mount with the leader coming from the center of the roll of film in a clockwise direction. After the strip has passed through the Selectroslide, it is automatically rewound during the projection, and is ready for the next showing without unrolling or rewinding.

Further information on the slidefilm attachment for "S" Series Selectroslide projectors can be had by writing New Products Desk, BUSINESS SCREEN, Chicago 26.

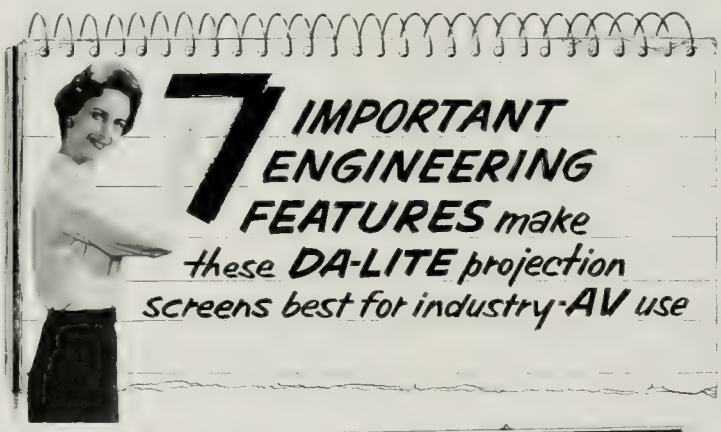
New 24-28V DC Variable Speed Motor for Arriflex 35 Camera

A new addition to the seven different types of motor drives already available for Arriflex 35 cameras is announced by Arri Corp. of America.



The new 24-28 volt DC Variable Speed Motor, stock number 9A744, will drive the Arriflex 35 at frame rates ranging from approximately 12 to 36 FPS. The motor will make operation of the camera possible directly from the power supplies of aircraft, ships and boats and other vehicles, a feature useful in military and industrial applications.

Other motor types for use with Arriflex 35 include 12-16V DC, 24-28V DC, 115V-60 cycle DC and 220V-50 cycle AC and other sources on special order.

For further information and prices, write New Products Desk, BUSINESS SCREEN, Chicago 26.

WONDERS OF SCIENCE FILMS:

(CONTINUED FROM PREVIOUS PAGE FORTY)

testified an associate of the Eastern Airlines. "They are enjoyable, thought-provoking and inspiring."

"We have used all the Moody films in our supervisory and crew leader development programs," witnessed a spokesman for Owens-Illinois Glass Company. "We find them excellent with our supervision."

These Companies Have Shown Films

Moody Institute of Science films have been shown in such plants as:

General Foods Corporation, Goodyear Tire and Rubber Company, United States Steel Corporation, Remington Rand, Inc., General Motors Corporation, Cleveland Twist and Drill Company, Grayson Controls, Victor Adding Machine Company, Club Aluminum Company, Pan-American Air Lines, Dow Chemical Company, Johns-Manville Research Center, Eastern Airlines, Bethlehem Steel Corporation and National Paper Box Manufacturers Association.

The Moody films alone do not provide a full answer to the problem of bringing out the best in people. They do, however, encourage management and labor to seek a better, deep-down inside approach to their work. They definitely are a "foot in the door" in improving human relations between employer and employee.

ON COPPER IN CONSTRUCTION:

(CONTINUED FROM PAGE THIRTY-SEVEN)

stallation of a complete residential plumbing and heating system, including underground water service and forced circulation hot water heating;

. . . job-site pre-fabrication of water, waste and drain assemblies with copper tube, effecting considerable savings on a project of 1400 units;

Shows Large Building Installations

. . . plumbing and heating systems installed in large commercial buildings and various industrial installations of process piping to carry fluids and gases at high or low temperatures and pressures;

. . . the installations of radiant panel heating systems and snow melting systems;

. . . practical demonstrations and recommendations for good piping practices on flare-type compression joints, soldered joints and brazed joints.

EXECUTIVE NOTES

William Sturdevant, Director and Writer, Joins Northwestern, Inc.

William H. Sturdevant, director and writer, has joined the creative staff of Northwestern, Incorporated, Portland, Ore., producer of television commercials, slidefilms and industrial motion pictures.

Sturdevant has been engaged in Hollywood for the past seven years in theatrical and industrial

William H. Sturdevant

film production, most recently with Norman Wright Productions of Hollywood. In 1958, he was instrumental in developing a film process that enabled subliminal information to be incorporated in theatrical and television pictures. While at Telepix Corporation of Hollywood, he wrote and directed television and industrial films, winning national awards for the studio at the American Film Festival in New York and at the Western Advertising Associations annual awards.

Waddington to Produce Business Shows at Transfilm-Caravel Inc.

Lester E. Waddington has joined Transfilm-Caravel Inc. as an executive producer in its Business Program Services division, it was announced by Joseph F. Kilmartin, vice-president in charge of the unit.

Waddington was formerly a convention show producer at Young & Rubicam, Inc., and an account executive in radio-TV programming. In his new position at Transfilm-Caravel he will handle live business show production.

He is a member of the Society of Motion Picture and Television Engineers; Broadcast Pioneers; Radio-TV Executives Society of N. Y.; Acoustical Society of America; and the American Society of Mechanical Engineers.

General Labs' Jack West

J. West Manages Central Div., Keehn is Sales V-P at General

Jack West has been named manager of General Film Laboratories' Central Division in Kansas City, Missouri. He joined General Film as Producer Services manager with the formation of the Central Division two years ago.

In his new capacity he will be in charge of the Hollywood laboratory's sales and service to motion picture producers east of the Rockies.

In taking over the direction of the Central Division, West succeeds Neal Keehn, who has been named vice-president in charge of sales and transferred to the Hollywood home office where he will coordinate and supervise all sales activities for General Film.

* * *

Jeri Sopanen Joins Production Staff at Henry Strauss, N. Y.

Jeri R. Sopanen has joined the production staff at Henry Strauss & Co., New York City.

Sopanen has a ten-year background in the film field; prior to joining Strauss he was with the motion picture department of Western Electric, working with outside producers and supervising company newsreels and technical films.

He was formerly with Allend'or Productions of L.A. During the fall of 1958, he was engaged in shooting documentary coverage of the Cuban revolution later seen on the NBC Television network.

ıowings of "Communism on the Map" raw Ire of Socialist's Norman Thomas

Norman Thomas, former Socialist candidate or President, asked Defense Secretary Robert McNamara, on April 19, to halt showings American military installations of the mo- on picture, *Communism on the Map,* which as produced by the National Education rogram, of Searcy, Arkansas.

Mr. Thomas, who spoke at a press confer- nce in Socialist Party headquarters in New ork, declared the film was "false and mis- ading," and that because it made "sweeping harges of nations and leaders being either ommunist or being infiltrated by communism" would "embarrass us in our relations with ur allies."

The Socialist leader said the picture had een shown at various naval stations around he country, including Floyd Bennett Field, in rooklyn. He said the Navy has 50 prints of he 60-minute film.

Floyd Bennett's commander, Capt. William . Bonvillian, denied the allegation, said he'd ever seen the film and it had not been shown naval personnel on the station.

A Defense Department spokesman, in Wash- gton, said its Armed Forces Education Office ad previewed the film but was not using it any educational courses, and did not plan do so.

The National Education Program is headed y Dr. George S. Benson, who is also presi- ent of Harding College in Searcy, Ark. Dr. enson, and Harding College, have both been dentified in the past with highly conservative conomic and political viewpoints. He com- ented on Mr. Thomas' charges by saying hat was exactly what he expected to hear. He pointed out that Khrushchev had linked ocialism and communism awfully close to- ether.

Dr. Benson said the National Education rogram is not connected with the John Birch ociety, although its former production man- ger, Glen Green, has recently left to become member of the Birch organization.

The National Education Program, Dr. Ben- on said, is backed by such responsible indus- rial firms as United States Steel Corp., Lone tar Cement Co., Lion Oil Co., Humble Oil o. of Texas, and Monsanto Chemical Co. It has only one aim, he said—"fighting communism and trying to support the American way of life."

MPO Offers a New Business Technique: Invites You to Play "The Sales Game"

A new idea coming out of MPO's Sales and Training Programs division lies in the sales training technique of sales simulation. As presented by MPO, the technique is contained in a new business game played on a board, and called *The Sales Game.*

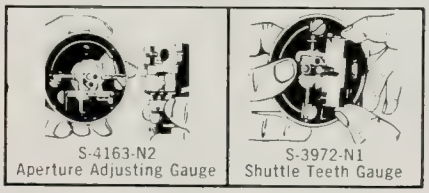
This game is used to involve salesmen in actual sales situations while in a training session. It is fun—and work, too!—and can be used by groups of from 4 to 400 and can be tailored to almost any selling problem. It can be used at sales meetings, training sessions, even at home.

MPO vice-president Irving Zuckerman, who developed the game, demonstrated it recently at a seminar on simulation of the American Management Association. He showed how salesmen can arrive at solutions to selling problems within the safe confines of the training session, instead of at the possible risk of a lost sale. He pointed out how simulation gives management a chance to observe a salesman's technique in action, how this cuts down on costly on-the-job training, and increases the salesmen's desire to compete for profitable customers.

Irv Zuckerman is now demonstrating the game to major industrial firms. He is also working with MPO producers Murray Lerner and Lloyd Ritter on a sales education film.

THE NATIONAL CREDIT OFFICE:

(CONTINUED FROM PAGE THIRTY-SEVEN)



nett appears in and narrates a new Salesmate presentation which is carried right to the prospect's desk by NCO new-business solicitors.

The meat of the presentation is a series of case histories telling how NCO service had saved a textile mill from shipping a large order of goods to an almost-bankrupt dress manufacturer. Conversely, and more happily, an NCO report encouraged another firm to fulfill a much larger order from a small firm with only a minimum of capital, but with an inventory of over a half million dollars.

In addition to credit reporting, the film shows, NCO offers an extensive market planning service, management service, a specialized claims department, and courses on credit and financial analyses.

our man in Hong Kong chooses Ansco

Cameraman: Tom Priestly. *Reporter:* NBC's David Brinkley. *Assignment:* Hong Kong. *Objective:* TV color documentary "Our Man in Hong Kong." There's color in Hong Kong—vibrant, dynamic, pulsing shifting color of crowded humanity in a far-off place. Priestly wanted to bring back all of it. That's why he chose 16mm Anscochrome® Professional Type 242 film. Super Anscochrome®, E.I. 100, was the film for tough lighting situations and night shots. The result—the faithful translation of color, right from Hong Kong to your TV screen. "Our Man in Hong Kong" chose Anscochrome Professional film—and so should you. Whether you're shooting in Hong Kong or Hoboken, you'll get better, brighter color footage if you do. For full technical information write Ansco, A Division of General Aniline & Film Corporation, Binghamton, N. Y.

Ansco

Anscochrome Type 242

Norton's Complete Film Program Benefits from Trouble-Free Kalart/Victor Projectors

It is quite a tribute to the performance of Kalart/Victor projectors when they are first choice of a firm with as much audio-visual experience as Norton Company.

Norton Company, a leading producer of abrasives, has been using motion pictures for 35 years. Ever since 1926 when Norton's first film was made, motion pictures have played an increasingly important role in the company's sales promotion, training and public relations activities. For example, the Norton School of Grinding uses a series of 16mm sound films especially produced to help in training the firm's own sales personnel, its distributors' salesmen, and foremen and supervisors of companies who work with Norton abrasives.

If you have an active film program such as the one at Norton Company—or are now building up to it—Kalart/Victor projectors have a lot to offer. Here are a few specifics.

They feature forward and reverse projection, and stop-on-frame for a brilliant still picture. Such complete control over film movement is especially valuable when showing training films. They are built for maximum dependability with minimum maintenance. Lubrication is required only once a year. Kalart/Victors also safeguard valuable film from damage. They are the only projectors with Safety Film Trips, a patented device which detects trouble and automatically stops film movement *before* damage is done.

Kalart/Victors are outstanding on other counts, too. They run quietly, without distractions. Picture quality and sound reproduction are superb.

Compare Kalart/Victor with other leading 16mm sound projectors and see for yourself. Call your Victor Dealer for a demonstration soon.

New York Investors Acquire Camera Equipment Co., Inc.

Camera Equipment Company, Inc., has been purchased by a group of New York investors headed by Robert B. Bregman.

The company, which manufactures, sells and rents cameras and other professional photographic equipment for the motion picture, television and photo-instrumentation industries, will continue with the same operations and policies as before.

Alcoa's Ralph Hoy, *new leader of ANA's Audio-Visual group.*

Frank C. Zucker, president of Camera Equipment Company, announced that he and other members of the present management group will continue as officers and employees of the acquiring corporation.

Plans for the expansion of the present business of Camera Equipment Company in the camera and electronics fields, both through internal growth and acquisition, have been formulated.

Robert B. Bregman is Chairman of the Board of Venture Capital Corporation of America, listed on the American Stock Exchange.

Twenty-five-year veterans *of The Jam Handy Organization receive gold watches at the company's recent annual meeting. (l to r) Jamison Handy, president; Joseph Artz, exhibits construction; George Jacobs, projection; Charles Nasca, set designer; William Selmeier, exec. asst.; Frank Goldman, writer-producer-director (medical); Frank Reynolds, arts planning head; Elmer Voltz, motion picture dept. head. Absent: Roger Fenimore, Pierre Mols, Rose Mullenbach, Mary Parr, Ed Sonntag.* *(More Newsreel Items on Page*

FOCUS ON PEOPLE AND EVENTS FEATURED IN THE NEWS

THESE EVENTFUL MONTHS included the recent Annual Meeting of the Industrial Audio-Visual Association, in Chicago, and the American Film Festival proceedings, in Manhattan. Pictured on this page are new officers and recently-elected members of IAVA as well as scenes from the Film Festival's active program.

Next month, this department will report events at the Industry Film Producers' annual meeting in Santa Monica, Cal., held on June 23, and other notable events. But this month's "picture-of-the-year" nomination goes to Cliff Hanna's valiant try in Detroit (below) . . .

Above: *Fred C. England of The John Handy Organization accepts the Blue Ribbon Award from Elliott H. Kone, past president of the Educational Film Library Assn. at the American Film Festival where JHO filmstrips won two first awards in Arts and Science & Mathematics groups.*

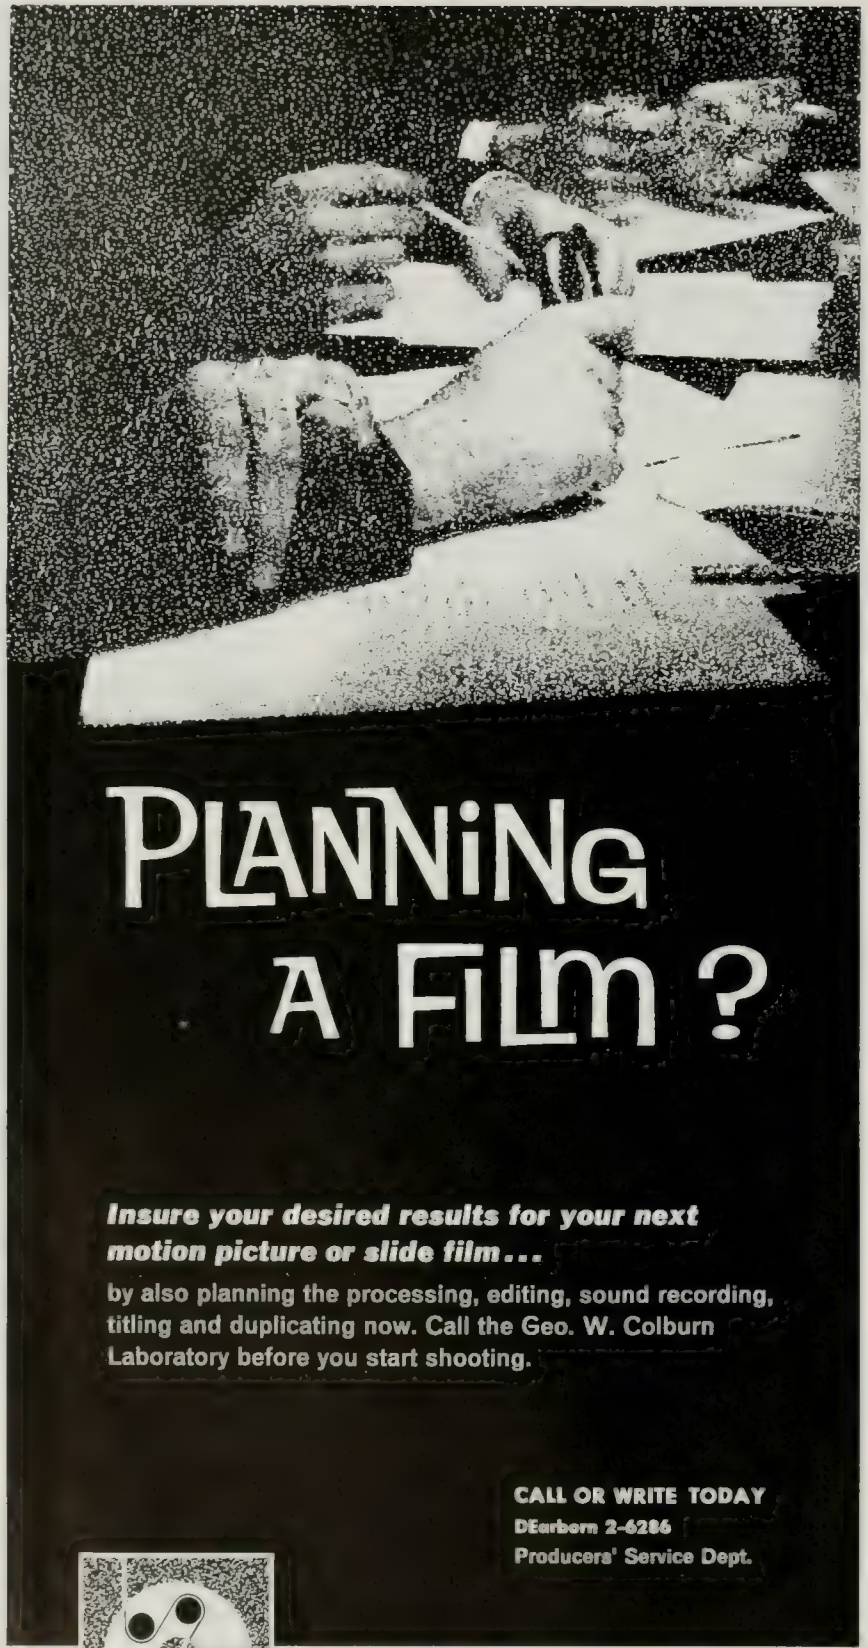
Industrial Audio-Visual Association officers-elect *(l to r): Harold Daffer, Minneapolis-Honeywell (secty.); Don Peterson, Caterpillar (asst. secty.); W. H. Pratt, Jr. A T & T (first vice-pres.); Ken Penney, Minn. Mining (president); Jim Craig, GM (second vice-president).*

Left: *IAVA president Penney (l) at annual dinner with program chairman Frank Greenleaf and vice president W. H. Pratt, Jr.*

IAVA president *Ken Penney (l) receives congratulations from retiring president Al Morrison of the Socony-Mobil Oil Co.*

Above: *Walt Hardy of Autonetics tells IAVA members how closed circuit TV reaches 25,000 employees at his company.*

Below: at the recent American Film Festival in New York, *a program on "The Filmstrip—Cinderella of the A-V Field" was witnessed by a capacity audience which heard leading producers, saw their work. Winners of the evening pictured (l to r) were: Hy Schwartz, Kalart Co. Inc.; panel chairman Irene Cypher, New York University; Peter Yung, of Elektra Film Studios; Anne E. Cotter, of Filmscope; and Hans Moeller, of the National Film Board of Canada.*



Above: these new IAVA members *(l to r) are: Robert L. Applegate, Burroughs Corporation; B. D. Gill, American Oil Co.; W. A. Smith, U. S. Steel (Research); Milton W. Sebring, Norton Company; and Walter V. Hardy, Autonetics Div. of North American Aviation Co.*

At right: *Close the gates of mercy department: Producer Cliff Hanna of Video Films, Detroit, holds mike as announcer Jim Garrett, recovering from hip operation in a Detroit hospital, narrates slidefilm for Monroe Auto Equipment Co. P. S. The Monroe dealers loved it, Cliff says.*

MOTION PICTURES AS EVIDENCE

MOTION PICTURES, when relevant and properly authenticated, are admissible in evidence to help establish the scene or events they depict. They are competent evidence, not subject to the objection that they are hearsay or that their admission violates the best evidence rule. Their admission is a matter within the discretion of the trial court. He may decide that they will confuse, rather than aid, the jury, or that they are prejudicial to an extent which outweighs their usefulness in proving an issue. On the other hand, an improper exercise of this discretion to exclude such evidence may be ground for reversal.

Motion pictures, like any other evidence must be relevant to be admissible in evidence; they must tend to prove or disprove some issue in the case. Where a film contains irrelevant and prejudicial matter, the trial court is generally under no duty to separate the good from the bad, and in its discretion may exclude the entire film.

Witness Must Authenticate the Picture

A motion picture is not admissible in evidence unless a witness identifies the persons, objects or places pictured and testifies that the film fairly and accurately depicts a scene or events that he personally observed. This intrinsic evidence is the indispensable authenticating element necessary for the admission of motion picture films. In addition, it is customary to show the circumstances of the taking, developing and projection of the films as part of the authentication. In this connection there may be evidence of the skill and experience of the photographer; the position of the camera; the type, adjustment (i.e., lens setting, etc.) and functioning of the equipment used; the lighting and weather conditions in which the pictures were taken; the custody of the film; the manner of development and printing and the equipment used and conditions of the exhibition to the jury.

The extent of the authentication required in any given case varies with the form and subject matter of the films to be shown, the purpose behind their introduction, and the willingness of the trial judge to exercise his discretion to admit such evidence. Detailed testimony on the matters outlined above is not always necessary, but is often presented nevertheless in order to avoid quibbling and to impress the jury with the importance and accuracy of motion picture evidence.

Similar to Evidence of Still Photos

It has been said that the preliminary proof required for the authentication of motion pictures is similar to that required for still photographs. (As to the authentication of stills, see *Photographs, Am Jur Proof of Facts;* also 9 *ALR2d* 899.) On the other hand, it has been

Develop Better Supervisors and Managers With

Modern Management Films

Make your supervisors better leaders with Modern Management Films, produced in full color and sound by The Bureau of National Affairs.

These 16-mm films present typical supervisory situations and suggest solutions to supervisory problems in an interesting and stimulating way. They are designed to precede and encourage group discussions.

Each film is about 10 minutes long, and is supplemented by a discussion leader's guide. A 95-member advisory panel of leading industrial executives suggests subjects and reviews scripts to make sure they are realistic and sound in principle.

More than 1,000 firms have successfully used the first Modern Management film, "LISTEN, PLEASE." We now offer the following films:

LISTEN, PLEASE... a series of situations in a supervisor's typical day which emphasize the importance of *listening* and *communicating*.

THE CASE OF THE MISSING MAGNETS... showing how a supervisor can motivate employees for better teamwork and production.

INSTRUCTIONS OR OBSTRUCTIONS... Dr. Paul Pigors of M.I.T. demonstrates the primary task of supervision: *giving orders and instructions to others.*

THE CHALLENGE OF LEADERSHIP... a dramatic demonstration of leadership. Designed to stimulate supervisory thinking about leadership skills.

Available for purchase or rental.

SIGHT & SOUND

Joseph Burger Featured Speaker at NAVA Convention, July 22-25

Joseph E. Burger, Director of Public Relations for H. V. Nootbaar & Company, Pasadena, California, will be a feature speaker on the program of the 21st Annual National Audio-Visual Convention at the Morrison Hotel, Chicago, July 22-25, 1961.

Burger's presentation, "How To Get Better," is the first Convention program feature to be announced. The announcement was made by General Convention Chairman Mahlon H. Martin, M. H. Martin Co., Massillon, Ohio.

"Packing thirty years of personal experience into a dynamic presentation," Martin said, "Mr. Burger will show convention delegates how to do a better job of persuading others . . . how to sell audio-visual ideas, A-V services and A-V products to customers in schools, churches, and industrial and business firms."

With a background covering fourteen years in sales promotion with the Ralston Purina Company of St. Louis, and later as vice-president and sales manager of two other companies in the seed and chemical industries, respectively, and as a former president of one of the largest automobile dealerships in the Mid-West, Burger draws upon an extensive heritage of selling, merchandising and customer-employee relations. He has spoken before groups in forty-eight states and Canada, and his travels have taken him into practically every European country, including Russia.

Further details on the NAVA Convention or the 1961 Audio-Visual Exhibit are available from the sponsoring organization, National Audio-Visual Association, 1201 Spring Street, Fairfax, Virginia.

CINE Selections Go Abroad:

Announce Titles of Pictures for International Festivals

MOTION PICTURES which will represent the United States at various international film festivals this summer have been announced by the Committee on International Non-Theatrical Events (CINE), following recent final screening sessions held in Washington, D. C. last month.

Festivals in Europe where CINE selections will be shown include West Berlin, Edinburgh and Venice. Two Canadian events, at Stratford, Ontario and Vancouver, B. C., have also been provided with films.

These Business Films Were Selected

Among the business-sponsored films going abroad are *Frontiers*, the Dick Durrance production for The First Security Corporation (scheduled for both Edinburgh and Venice); *The Land of White Alice*, produced for the Western Electric Company by Willard Van Dyke (showing at Edinburgh, Venice and Stratford); and animated color films titled *Kleenex Symbol X-Periments*, produced for Kimberly-Clark by Morton Goldsholl Design Associates.

Submitted as candidates for the Venice Chamber of Commerce "Golden Mercury" award are the Gulf Oil Company's film, *Unseen Journey*, produced by MPO Videotronics; a Bethlehem Steel picture, *Profile in Steel*, produced by Mode Art Pictures, Inc. and *Color Collage*, produced by the Eastman Ko Company.

Another Bethlehem-sponsored film, *cuum Pouring for Better Forgings*, produ by Audio Productions, is going to Edinbu with *Profile in Steel. Seconds for Survival*, produced by Audio (for the American T phone & Telegraph Co), is showing at St ford.

"Bowling" and "Ballads in Blossoms"

Bowling, sponsored by Brunswick Inter tional and *Mural, Midwest Metropolis*, a S ry & Hutchinson film, will represent Fred Niles Productions at the Venice and Stratf festivals, respectively. Also sent to Venic the Pasadena, California-sponsored film, *lads in Blossoms*, a colorful documentary the 1961 Rose Parade produced by the Fr erick K. Rockett Company.

The North Dakota state-sponsored f *Durum: Standard of Quality*, produced by Snyder Films is among the scientific-techn entries for Venice. A number of medical fil including *Aldosterone and Its Control Edema*, produced by The Jam Handy Orga zation; *The Inflammatory Reaction*, produ by Sturgis-Grant Productions; and *Muscle laxants in Anesthesiology*, produced by Mr vin W. LaRue, Inc., are bound for festiv including professional showings at the Univ sity of Padua (Venice).

Among the non-sponsored documenta going abroad are Potomac Films' *A Time Migration;* NBC-TV's *The Coming of Chr* TIME's *Primary;* and two Nathan Kroll tures, *Night Journey* and *Casals*.

*ANNUAL INDUSTRIAL FILM AWARDS-
conducted by the publishers of
Industrial Photography magazine.

Of the fifteen 1960 Industrial Film Awards, **ten went to films shot with Arriflex 16mm and 35mm cameras**...a record unmatched by any other camera! A record approached only by Arriflex's winner-majority showing last year.

Why Arriflex? Simply because the Arriflex does the job better and more easily, faster and more economically! You ought to try one of these world-famous motion picture cameras soon.

U. S. Steel Reports Audiences, Favorite Films in 1960 Progra

Audiences totalling more th 31 million—about one-sixth t population of the country—s United States Steel Corporati films in 1960.

A total of 59,000 showings we made to a wide variety of organi zations and the general public d ing the period. In addition, the were presentations in 25 forei countries.

Of the 42 U. S. Steel films c culated, three were introduced 1960. They are *Curtain Tin* produced by John Sutherlan which tells how an architect us curtain wall steel construction an industrial building; *Mode Steel Making*, also a Sutherla production, depicts basic pro esses in producing steel, and *T Movable Bridge*, which featu the construction of a large vertic lift bridge at Houghton, Michig

Most popular film for no theatrical showing was *Mackin Bridge Diary*, produced by T Jam Handy Organization, a viewed by 812,000 persons 4,460 showings.

The top drawing card for U. Steel during the year was the i ternational award-winning *Rha sody of Steel*, another Sutherla production, seen by more than million persons in the natio theatres. This animated Techn color featurette tells the story primitive man's discovery of m teoric iron, gives highlights in t history of steel, and ends with t metal from heaven returning outer space in the form of rocket.

Motion picture subjects co steel operations, research, fabric tion, construction, agriculture a industrial safety. Some are topics of general interest, such U. S. Steel's role in the recove and production of coal chemical and others are on highly specia ized topics, such as how to bui a modern steel fence. Distributi of the films is handled by fi film centers around the countr

VICAUDIO® SOUND 8 Carryall PROJECTOR with Foolproof continuous operation

No other rear projector offers all these features for use in

- business . . .
- school . . .
- home . . .
- church

- Self-contained 9 x 12 rear projection screen
- Conventional projection—no need to change the lens
- Up to 30 minutes continuous magazine with smooth, trouble-free magnetic striped 8 mm prints
- Standard 400 ft. reels
- Threading and running within seconds
- 16 & 24 frames per second
- Separate controls for motor and lamp
- Forward and reverse projection, "still," fast power rewind
- Timed, repetitive projection, optional
- Sound reproduction of high fidelity not often surpassed, even in 16 mm sound
- Sparkling sound recordings on magnetic striping, unmuddled by distorted lows and highs
- Easy-to-use recording controls
- High-impedance microphone and phono inputs
- Microphone and phono cord optional
- Safety erase lock
- 10" x 2" oval speaker in projector case
- External speaker or home sound system outputs
- Microphone and phono outputs may be used separately or together for recording commentary or music
- Projector can be used as public address system
- New 500 watt internal reflector lamp
- Approx. 150 hour lamp life
- 100 lumens output
- ¾" f/1.6 projection lens, coated
- For the 500 times magnification required on the rear projection screen an entirely new patented, wide-angle system has been added, with magnificent edge-to-edge sharpness
- Full light—no visible fall off
- Greater depth of focus—no refocusing—
- High and low control of lamp brilliance
- Cooling capacity fan is capable of dissipating up to 100 watts

Film for Surgeons Introduces a New Operative Technique

SPONSOR: Don Baxter Laboratories.

TITLE: *Intermittent Peritoneal Dialysis*, 25 min., color, produced by Parthenon Pictures.

The film medium, as a means of presenting information to many people quickly, is being utilized for the first time by Don Baxter Laboratories to acquaint surgeons with a new emergency operative technique employing certain Baxter products.

Intermittent Peritoneal Dialysis is described in the film by Telfer B. Reynolds, M.D., of the University of Southern California School of Medicine, who is a nationally recognized authority on the procedure, and who also performs the operation as it appears in the picture. The procedure, the necessary equipment, applicable situations and precautions are fully covered.

Intermittent peritoneal dialysis replaces the older continuous method and is used in acute renal failure and in certain instances of barbiturate and other poisoning cases. Prior to the perfection of this technique, such situations required the use of rather complex artificial kidney machines, generally found in only the larger medical centers.

The new technique can be performed by any physician without resort to complicated equipment and with little more than basic instruments. The dialysis does not require the use of even an operating room, and once the correct procedure has been established by a doctor, competent nursing help may conduct the treatment.

The film was shot in Ektachrome by Parthenon Pictures, Hollywood, with "Cap" Palmer, executive producer; Duane K. Wacker, director, and Robert J. Martin, cameraman.

Parthenon's production coordinator Shirley Hartman comments, "Actually, as straightforward medical films go, this probably has more production value than most—and we were lucky in that our doctor was sort of the Jeff Chandler type."

16mm color prints of *Intermittent Peritoneal Dialysis* are available on a free loan basis to interested surgeons or groups from the sponsor, Don Baxter, Inc., Glendale, Calif.

WASHINGTON FILM COMMENTARY

by Mary Finch Tanham

Washington Correspondent for Business Screen

ACCORDING TO Leon Goure of the RAND Corporation, probably the most knowledgeable man outside of the Iron Curtain about the Soviet's tremendous, relatively-unknown civil defense program, audio-visuals are constantly in use for training the Russians to survive.

Since 1938, films and slides have been used in increasing numbers in cities and communal areas and in the many mobile exhibits and projection units which are sent to rural areas to acquaint the population with survival and post-attack procedures.

All USSR citizens in good health, between 16 and 60, are required to take four courses in civil defense. It's a way of life over there, which experts believe has put the Russians in an enviable position at the conference table.

Video Crossfire: FCC Chairman Blasts Programs While Educational TV Grows

☆ Washington is still rocking over the fireworks displayed at the 39th annual convention of the National Association of Broadcasters. On one hand, the Secretary of Health, Education and Welfare announced his endorsement of Federal aid for educational TV, saying, "We shall recommend legislation to make available Federal funds to assist states and regions in their educational television planning and to aid in the purchase of equipment."

On the other hand, broadcasters were bludgeoned by FCC Chairman Newton N. Minow who charged that commercial TV was a "vast wasteland" and that, in the words of the WASHINGTON POST, "there is nothing permanent or sacred about a broadcast license!"

Those who deplore "mayhem, murder and treacle" on the networks are urging average citizens to write to Minow and to report at public hearings on the status of local TV. Despite the fact that old-timers say the excitement is bound to shake down, many in the capital city are wondering whether the regular, routine renewal of licenses will continue as in the past . . .

New Procedure in Effect as Air Force Streamlines Sponsored Film Program

☆ The Air Force's big sponsored film program, in which over $850,000 worth of industry-sponsored educational and informational motion pictures are already in production or distribution, has been, in part, re-organized to further expedite streamlined procedures.

Henceforth, when a subject for a film is under consideration, is being held as "exclusive," is being covered by a "letter of intent" or is in the initial scripting stage, the Office of Information Services, Pictorial Branch, will handle the sponsored film. After final approval of scripts and after production has begun, the Air Force Services and Support Division will monitor the project as usual.

Rodney B. Radford, Chief, Motion Picture Section, AFOOP, who is well known in fi circles for his organizational ability in getti industry-sponsored film programs off t ground, will now turn over his extensive file subjects "under consideration" to the c and file of the Deputy Chief, SAFOI, Hea quarters, USAF, Washington 25, D. C., w should be contacted in the future for all inf mation about this program.

* * *

1,000 Prints of "Operation Abolition" Sold; "Pattern for Conquest" in Work

☆ Whether or not you liked *Operation Abo tion,* the fact remains that this controversi film has spread its message from one end the country to the other. George F. Johnst of Washington Video Productions has sold *thousandth* print and a follow-up film, titl *Pattern for Conquest,* is now in the final scri stage. James E. Magee has written this h torical film, which will document the cou of Communism from 1924 until today. thesis will be, "let us again call ourselves Yankees."

National Export Expansion Program Outlined in "Exportunities" Slidefilm

☆ In 1960, America's export tab totaled 19 billion dollars—mostly manufactured goo It seems like a lot, yet such exports reflect efforts of only about 12,000 exporting manufacturers, or just about four percent of 30 000 companies.

To boost this total at a time when Americ international balance of payments is so alarmingly unfavorable, the government is endeavoring to explain to the American businessm that opportunities in world trade can enlar the scope of marketing operations and increa sales and profits. Government's concept—t National Export Expansion program—is bei communicated through a new 14-minute, col sound slidefilm titled *Exportunities,* sponsor by the Bureau of Foreign Commerce.

The new slidefilm is available on fr

Coordinator for the oject was Al Seares, president Associates in Management, ew York City, and a former ce-president of the Remington nd Division, Sperry-Rand Corration.

James Gibson

m Gibson to Peace Corps Asst. Dir., Public Affairs

For those in the factual film ld, one of the most interesting n d heart-warming announceents of the new administration s been the appointment of Jim ibson of USDA to the Peace orps.

Effective May 14th, Gibson left s post as Chief of Agriculture's lotion Picture Service and Astant to the Director of Informaon to become Assistant Director Public Affairs for President ennedy's new peace program.

The new post for this well- nown speaker, writer, pr and udio-visual specialist will entail aison work with civic groups, rm clubs, women's organizaons, etc. Additionally, he will ordinate with film and TV proucers on all matters relative to ture film requirements for the eace Corps.

Gibson is a graduate of Duke niversity and a career civil servht of 26 years with government gencies, including the National ureau of Standards, National rchives, Department of Army nd the Department of Agricultre. During World War II he was charge of training films for the rmy Signal Corps and, as a vilian, was Chief of Production the Army Pictorial Service om 1946-1953. For the past ght years he has been in Agriulture, heading the huge film rogram of that agency.

Al Carrello Becomes Acting Chief of Agriculture's MPS

Al Carrello, former Chief of Production, Office of Information, U. S. Department of Agriculture, has been named Acting Chief of that department's Motion Picture Service.

"One Hoe for Kalabo" Wins Wide and Varied Audiences

Case study statistics of good business films are one best way to "sell" potential sponsors on this medium. For example, *One Hoe for Kalabo,* produced by Reid H. Ray Film Industries of St. Paul for the National Machine Tool Builders Association, has been requested by 88 associations, 300 churches, 324 clubs, 94 government agencies, 58 hospitals, 381 industries and six museums.

In addition, 3,899 schools have asked to see the $27\frac{1}{2}$-minute color picture which shows, in a brief but memorable introductory sequence, how long it takes villagers in Kalabo, Africa, to make one hoe—and what U. S. industry can do in the same length of time. Since 1959, when Reid Ray produced the Oeveste Granducci-scripted film, it has been shown on television 534 times.

NASA Announces Four Films for "Space Biology" Series

The Space Biology Series is the title of four new National Aeronautics and Space Administration films, specifically produced to meet a current need in the space agency's Office of Life Sciences. These filmed interviews with famed scientists include: *How Did Life Begin?* with Dr. Sidney Fox of Florida State University; *Chemistry of Life,* with Dr. Melvin Calvin of the University of California; *Life on Other Planets,* with Dr. Joshua Ledderburg of Stanford University; and *Decontamination of Space Probes,* with Dr. Charles Phillips of Ft. Deitrich, Md.

These highly-educational, informative films, which will be s h o w n to scientific societies, among other groups, were written and directed by Eddie O'Brien and produced by Norwood Studios of Washington for NASA.

"HOW TO PREVENT OBJECTIONS IN SELLING"

a "must" film for every salesman facing today's tough sales climate!

Many sales objections can be prevented if salesmen themselves do not plant them. This exciting, new Borden and Busse hit, "How To Prevent Objections in Selling" shows salesmen how to avoid the 5 most common mistakes made in selling presentations:

...by pointing out the prospect's needs without needling him.

...presenting sales points smoothly.

...avoiding excess verbage.

...avoiding "chip-on-the-shoulder" words.

...preventing routine objections by creating a stronger sales desire.

Here is a file film addition for your sales training program . . . one that puts real meat into your sales meeting . . . one that's sure to jolt salesmen out of bad selling habits.

This 30-minute, 16mm. b&w motion picture is available for outright purchase or rental.

Three-Hour United Delco Show for Wholesalers Tours U. S.

Watch for national publicity this summer on the success of those carefully scripted, audio-visually slanted sales and promotion programs for business. At the present time, General Motors is touring cities with a highly-acclaimed, three hour extravaganza announcing the $12 million changeover of 13 brand name replacement parts to one, new "image" called United Delco. This three-hour wholesaler's meeting was written, produced and directed by Eddie O'Brien of Washington and is titled, *The Sight and Sound of Sales.*

New ETL Sound Film Shows Aid for Speech Handicapped

Five to 10 percent of our American schoolchildren — and six million adults—have imperfect speech. Many suffer severely from the handicap. Speech pathologists are scarce and learning to speak well is often a long, hard road for the afflicted.

But the age of electronics has brought new hope to parents, teachers and children in the form of a "teaching machine" type console called the Monitor E5. Developed and marketed by the Electronic Teaching Laboratories, Inc., of Washington, a booming new electronic-educational business, this machine aids, not replaces, the speech pathologist.

Details of this new boon for schools, institutions and hospitals have been filmed in a fascinating new 15-minute color-sound educational-sales film, *The Next Voice You Hear.* In a very human way, it describes how the Monitor E5 helps "the next voice you hear" to be "a better one."

The film was written and produced by Stanley Schneider and William Naud. Narration is by Dr. William Graham of Catholic University's Department of Drama. Photography, editing and sound were provided by Koster Film Facilities.

U. S. Army Band and Chorus Filmed for "The Big Picture"

Army's "Music Men" will be on parade in a half-hour film presentation to be televised this fall in *The Big Picture* series sponsored by this branch of our armed forces. The U. S. Army Band and Army Chorus are presenting music "down through the years" of American history in this tuneful episode.

The program is being filmed in and around the nation's capital, including historic Fort Myer, Virginia, by Norwood Studios. Producer Phillip Martin is personally supervising. Captain John Swee, Chief of the TV Section, Office of Chief of Information, Department of Army, is the co-ordinator.

Trends in the BUSINESS of Audio-Visuals

Expanded Audio-Visual Field Reflected in New Company Name

A new corporate name and new officers have been announced by S.O.S. Cinema Supply Corp. Established in 1926, and having gone through a series of names to comply with the business, the firm is now known as S.O.S. Photo-Cine-Optics, Inc.

Originally a theatre equipment distributor, the firm's clients now include television stations, film producers, film services and government. Recently S.O.S. has expanded in the fields of ground and airborne photo instrumentation, medical photography, X-ray and cinecardiology.

S.O.S. has also become a primary supplier of motion picture devices for use in Aeronautics, Space and Rocketry programs. Theatre equipment still accounts for a considerable sales volume, especially overseas.

S.O.S. Photo-Cine-Optics, Inc., now serves the industry as a manufacturer, distributor, importer and jobber, with headquarters in New York and a Hollywood branch office. New officers are J. A. Tanney, president; W. H. Allen, vice-president; M. E. Tanney, secretary, and D. J. Capano, treasurer.

Viewlex Buys Sonic Recording; Will Expand in Audio-Visuals

Viewlex, Inc., of Holbrook, L. I., N. Y., has executed a contract to purchase all of the outstanding capital stock of Sonic Recording Products, Inc., with plant facilities at Hicksville, L. I. The acquisition is effective June 6, 1961.

The record company, which had sales of over $1,000,000 in its fiscal year ended January 31, 1961, is to be operated as a wholly-owned subsidiary by Viewlex, Inc., according to Louis A. Peirez, president of Viewlex.

Sonic will continue under the same management which has operated it since 1947—Alvin Snyder, president; Herbert Bregman, vice-president, and Joseph Zweigenthal, secretary-treasurer.

Peirez said that he hopes to use the combined facilities and production reputation to develop into many new areas of sales and operations.

Annual Report Notes Increase in Non-theatrical Release Prints

A 25 percent increase in non-theatrical release print footage contributed to improved earnings and sales for 1960, according to the annual report just released by Technicolor, Inc., and its wholly owned subsidiaries, covering the fiscal year ended December 31, 1960.

Plans for 1961, as outlined in the report, include further diversification, particularly in the Consumer Photographic Products Division, which recently revealed its intent to market a mass-produced motion picture projector, "Instant Movies," as well as a new film for amateur photographers.

Accompanying the report was a letter to the shareholders by Patrick J. Frawley, Jr., chairman and chief executive officer of Technicolor, Inc., which noted that consolidated 1960 sales increased by approximately $1,208,000 over those of 1959, with consolidated net income of $345,943 representing an approximate increase of $109,000 over 1959.

The report stated that net sales for 1960 totaled $28,458,945 against $27,250,407 for 1959. Net profit for 1960 was $345,943 compared with $237,160 in 1959. Net per share on 2,211,679 shares outstanding at year-end was $.16.

. . . ABOUT FILM WRITERS

There are film writers who boast a salty talent for bubbly ideas. This unharnessed talent floods the conference room, spills on to the set, drenches the moviola, and gushes all over the screen. If you live through the brainwash, you may get a new wave of art. Your message is often drowned in the confusion and you could end in tears. We say only—BEWARE!

Then, there are the cool dependable boys in icy white shirts. They invented the word deadline by hacking out frozen stenographic reports that are certainly mis-labeled as film scripts. Always on time, they will burden you with a narrative avalanche of worn cliches ponderously sliding from ennui, to tedium to oblivion. We say strongly—CHILL THEM!

Once in a while you will discover a writer who works your message with experienced skill, with warm humor, with thrifty artistry. Thoroughly dependable and with native talent, he builds films that charm the audience. He delivers your message with a completely new and enduring viewpoint. This is a rare individual. We say, forgoshsake, HIRE HIM (at his price—he's worth it!)

Eddie O'Brien - The Writer

U. S. Steel, Employers Mutuals, Ford, Aetna and Merrell Company Share High Honors With Bronze Plaque Awards by National Committee on Films for Safety

BRONZE PLAQUES have been awarded to nine outstanding safety films of 1960, both instructional and inspirational, by he National Committee on Films for Safety. he committee, representing 23 national or-anizations, annually recognizes new films on ccupational, traffic and transportation, gen-ral and home safety in an effort to improve he public's knowledge of safety through vis-al means.

In addition to the nine Bronze Plaque win-ers in the various categories, twelve note-orthy films were presented Awards of Merit n recognition of their achievement.

Steel's "Hard Hats" Wins a Plaque

Two motion pictures received top honors n the Occupational category with messages to ndustry. *Hard Hats and Thinking Caps*, pro-uced by Mode-Art Pictures, Inc., for the merican Bridge Division, United States Steel orp., attempts to establish a constant aware-ess of the many and varied hazards of steel onstruction in the minds of ironworkers. howing that practically all accidents result rom thoughtlessness while those resulting rom equipment or method failures are very are, the film points out that the *hard hat*, long ymbolic of mechanical safety, must give way o the *thinking cap* as the emblem of future afety accomplishment.

The High-Low Bid, sponsored by Employ-rs Mutuals of Wausau, also won a Bronze laque for Occupational Safety. The message n this film is aimed at building contractors, uperintendents and foremen, to convince hem that accident prevention is essential to eep job-bidding costs down to a competitive evel—and shows that safety performance has great bearing on over-all success.

Ford, Safety Council Share Honors

Traffic and Transportation category pro-uced four winners of Bronze Plaques, two of hem series titles. The Ford Motor Company ponsored the *Driver Education Series—1960* specially for driver education students, dem-nstrating safe driving habits under various ircumstances; titles in the series are *City Driving, Driving Under Special Conditions* nd *Highway Driving*.

The *Expert Driving Series* of the National afety Council, produced by Gilbert Altschul roductions, has as its audience the class of rofessional drivers. Stressing safe driving per-ormance, explaining what "preventable" ac-idents are, and informing on proper proce-dures at time of an accident, titles in the 4-ilm series are *Experts Count 'Em All, In Case of Accident, Preventable or Not*, and *For Ex-perts Only*.

Another Bronze Plaque winner covering the opic of driving practices is the Aetna Casual-y & Surety Co.'s *To See Ourselves*. By hold-ng a "self-revealing mirror" up to a driver who has bad traffic habits, he is allowed to see himself as other drivers do, and he sees his driving mistakes. Not only his manipula-tion of the auto, but his attitude behind the wheel is held up for self-criticism.

Plaque Award to "Silent Witness"

A case study of the use of intoxication tests in traffic court is the subject of the fourth Plaque winner in this category, *The Silent Witness*, produced by Dynamic Films, Inc., for the William S. Merrell Company. Discussing the medical and legal aspects of tests for al-coholism, the film reviews the arrest of a drunken driver, the various tests to determine his state, and the introduction of this evidence, especially the breath test, at his trial.

Named as recipient of the Plaque in the Home Safety category was the color motion picture *Safe At Home*, produced for Merck Sharp & Dohme by Advantage Enterprises; this inspirational film emphasizes the many ways children can have accidents around the home and advises precautionary actions for parents.

Shows Fire Hazards in Our Schools

A dramatic message on the fire hazards in many outmoded schools is presented in *Our Obligation*, the General Safety Plaque winner produced by the Los Angeles City Fire De-partment. Using an "amateur" cast, it is a realistic presentation of children trapped in a burning school showing how outmoded build-ing construction and absence of fire safety de-vices endangered their lives. It includes a dramatic climax of fire fighting, rescue and evacuation, and a flashback reveals the build-ing's fire faults and recommends preventative measures.

In a separate category of Television Spots and Shorts, a 3-film series of 20-second animated

SCHOLASTIC AWARDS TO BUSINESS FILMS

★ The 12th Annual National Film and Filmstrip Awards program, conducted by SCHOLASTIC Magazine, has named the following business-sponsored motion pictures as award-winners:

"California & Its Natural Resources"
Sponsored by Richfield Oil Corp.
Produced by the F. K. Rockett Co.

"Citrus, the Golden Fruit"
Sponsored by the Sunkist Growers
Produced by Haeseler Pictures

"Education Is Everybody's Business"
Sponsored by the Council for Financial Aid to Education
A John Sutherland Production

"Rhapsody of Steel"
Sponsored by United States Steel
A John Sutherland Production

"The Thread of Life"
Sponsored by the Bell System
Produced by Warner Bros.

"The Twentieth Century"
Sponsored by Prudential Insurance Co.
Produced by C.B.S. News

CANADIAN AWARDS

★ *Universe*, a film on space produced by the National Film Board of Canada, is that country's "film of the year."

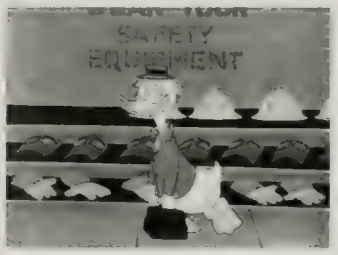
Other awards presented in the 13th annual Canadian Film Awards include:

"Take Four Giant Steps"
Produced by Pageant Productions

"Epidural Anesthesia for Vaginal Delivery in Obstetrics"
Produced by Chetwynd Films Ltd.

"Waters of the Whiteshell"
Produced by Crawley Films Ltd.

"Grey Cup Festival '60"
Produced by Chetwynd Films Ltd.



"Hors D'Oeuvres"
Produced by the Nat'l Film Board

"Marsh Harvest"
Produced by William H. Carrick

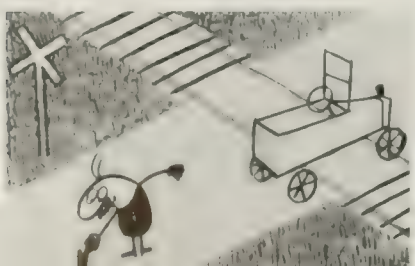
Top: *scene in "Our Obligation."*
Below: *Donald won merit award*

NATIONAL SAFETY FILMS:
(CONTINUED FROM PRECEDING PAGE)



films on traffic safety won a Plaque; titled *Safety Clips*, the shorts were produced by the National Film Board of Canada, and show the dangers of highway fatigue, and the importance of alertness at crossings and of maintaining a safe distance in driving.

Awards of Merit for Occupational Safety

An Award of Merit was presented to each of four films in the Occupational Safety category. *Propellant Plus Heat* by Thiokol Chemical Corp. shows precautions required in handling to prevent ignition of solid propellants; *The Quota*, produced by Pilot Productions for Clark Equipment Co., Construction Machinery Div., dramatizes accidents that occur to construction equipment operators, with convincing shots of accidents involving heavy machinery—tractors, cranes, bulldozers; *Safety Is Always Our No. 1 Business*, which won for the Caterpillar Tractor Company, instructs new employees in the importance of safety in company operations; *Static Electricity*, produced by Kennedy Productions, Inc., for the American Gas Association, describes how static electricity is generated and how to control it, an important subject in industry.

Runners-up in Traffic and Transportation, each receiving an Award of Merit, were: *Auto, U.S.A.*, produced for the Perfect Circle Corp. by Dynamic Films, Inc., with emphasis on *planning* to reduce traffic congestion and accident problems; *Look—Stop Backing Accidents*, a National Safety Council film by Gilbert Altschul Productions, demonstrates professional drivers' backing problems and how to avoid them; *Safety Through Seat Belts*, produced by Charles Cahill and Associates for the U. S. Public Health Service and University of California, L. A., documents collision tests proving the value of seat belt use; *Using*

Below: *a scene from "Railroad Crossing," one of NFB "Safety Clips."*

Your Traffic Records is an outline of the use of traffic records systems for better enforcement and engineering by the Audio-Visual Center and the Highway Traffic Safety Center of Michigan State University.

In the General Safety category, two films were given the Award of Merit. An explanation of how an investigation board operates in an actual procedure is presented in *The Accident Investigation Board*, produced for the U. S. Air Force by Leonard Anderson Associates. Entering the area of water safety, *Be Water Wise—Boating* demonstrates the safe use of boats and outlines marine regulations in a film produced and sponsored by the United States Air Force.

"How to Have An Accident at Work"

A cartoon favorite, Donald Duck, is featured in the theatrical motion picture given an Award of Merit; *How to Have an Accident at Work*, dealing with occupational-industrial safety, was produced by Walt Disney Productions.

Runner-up for TV Spots and Shorts was a series of eleven 50-second films on traffic safety, the *Buckeye Safety Parade*, produced and sponsored by the Ohio Department of Highway Safety and Ohio State University.

American Airlines Shows Its People Facts of Jet Age

SPONSOR: American Airlines.

TITLES: *Jet Age—Stage II*, 20 min., color, produced by Audio Productions, Inc.

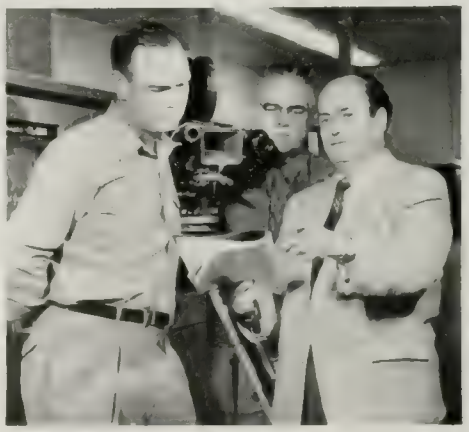
☆ Last year, American continued to be the country's favorite and leading airline. But profits are slim or non-existent for the entire airline industry. American is buckling down to compete more sharply then ever before. Particularly on those routes where more Civil Aeronautics Board authorized service exists than can be justified by public need.

In this sharp—to the point—film, American Airlines President C. R. Smith lays it right on the line, sweeping no troubles under the rug. AA, he says, had troubles with its Electra airplanes, had fierce competition, but the company is 100% sound, and it has licked 90% of its problems.

Backing up Mr. Smith with personal appearances in the film are G. Marion Sadler, vice president-personnel; and R. L. Fitzpatrick, vice president-sales and services. They point out that the Electra has always been an airplane in which people enjoy flying, and the beefed-up Electra II is better than ever. Substantial improvements have been made in other

American Airlines' Astrojet in flight

AA aircraft, as well, while the company newest Astrojets will fly more passenge faster, more comfortably and with better pa loads of freight.



The key to American's future, however, w continue to be its people, who are the best the industry, Messrs. Smith, Sadler and Fit patrick conclude.

Jet Age—Stage II was an important part American Airlines' internal sales and servi training sessions last spring.

RCA Pictures Computer's Role in "Space Age Administration"

☆ The role of the computer, its functions and use, will be the subject of a new color motion picture, *Space Age Administration*, currently being filmed at the Air Reserve Records Center in Denver, Colorado. The film is bei sponsored by the Radio Corporation America with the cooperation of the Reco Center and is being produced by Reid H. R Film Industries of St. Paul, Minn.

Below: *producer Reid H. Ray (at right) explains camera angle to Major Becker (left) and Howard Cress, cameraman.*

An earlier film, *Manpower Bank of the A Force*, described the Center's mission and o eration. It was completed in April.

The latest subject is a computer case stud starring the Center's RCA 501 computer sy tem, covering the history and progress of t Center's computer and automation program. will be used for Air Force Reserve trainin computer course training, Air Force publici in colleges and schools and in training sessio of the American Management Associatio RCA will also use the new picture in systen analysis and similar training.

Project officer for Air Reserve Reco Center is Major Marvin J. Becker, of t Directorate of Statistics. Supervising the pr duction, which began May 15th, are produc Reid Ray, first cameraman Howard Cress, a sistant cameraman Russell Croft and ele trician Don J. Quinn.

FILM'S ROLE IN SPACE PROBE

Simulated Flights in Alpha Trainer; Cameras' Record of Man and Capsule

THE RECORD of man's exploration of his earth has been covered by motion picture cameras going far beneath its surface and at both the poles. The archives are replete with filmed documentation out of cameras carried aloft by unmanned missiles* but a truly important "first" was achieved by the cameras on Freedom VII, the Mercury capsule which lofted Lt. Commander Alan B. Shepard on his brief but historic arc into outer space.

Even though Commander Shepard registered surprise and delight with his famous words, *"what a beautiful sight,"* America's first man in space found his first view of the world little different than expected.

Film Simulates World of Astronaut

For months before the Mercury's launching, Shepard and other astronauts spent countless hours controlling a space capsule over a simulated film of the world he was to traverse. Couched in an Alpha Trainer, an air-bearing device similar to the Link Trainer for pilots, he and his companions trained by sighting through a periscope at a 12-foot screen on which color strip films, produced by the Art Chart Information Service in St. Louis, were slowly projected.

And during the 116-mile-high flight itself, a specially-developed 16mm motion picture camera, mounted on the instrument panel only four feet from the astronaut's face, recorded his skin color change and expressions during acceleration and re-entry.

Fast Film Developed for Space Program

This 16mm film, which recorded Astronaut Shepard's reactions during the flight, was a special Ansco color film and is said to be the fastest color film yet produced. Anscochrome FPC-132 was developed especially for the space program and more than nine months' research and testing preceded its use during the flight. Plans call for offering it for the benefit of all industry in the near future.

Another 16mm camera inside the dimly-lighted capsule, used black and white film to record the flickering lights and dials on the instrument panel. These cameras, developed over several months by the D. B. Millikin Company of Arcadia, Calif., used a 25mm Wollensak Type C lens. The fixed lens opening of the camera was f. 1.8 to compensate for the dim light conditions and such illumination as there was came from two neon lamps on either side of the pilot.

Earth-View from Manned Space Capsule

A third camera, the "earth-sky" recorder, took a similar picture to that which Commander Shepard had expected from experience in the Alpha Trainer. This mechanism, about the size of an old box camera, resembled a Rube Goldberg invention but—nevertheless—successfully recorded man's first view of his earth from outer space from a manned space vehicle.

Anscochrome FPC-132 is essentially a daylight type film (6000-degrees K), but may be used under tungsten illumination in special cases. Like other color films, the speed of FPC-132 is considerably reduced by the films required when it is used under artificial light. For this reason, Ansco recommends the use of Super Anscochrome Tungsten type under these conditions.

The new film (FPC-132) has a wide range of potential application in industrial research for flame study and instrumentation.

Simulated conditions of flight for the Project Mercury were provided by the Alpha Trainer.

Couched in his Alpha Trainer seat, *each astronaut spent countless hours learning to control the space capsule while projected scenes (right) showed him the world he was traversing.*

*The original "Space Camera" which was the first to take motion pictures of the earth from an altitude of 300 miles and the first to be so stabilized on a space flight as to provide directionally steady pictures is now in the Smithsonian Institution's Space Flight Collection. Used on May 12, 1959, from Cape Canaveral, the camera was developed jointly by General Electric's Missile and Space Vehicle Dept. and the ACR Electronics Corporation. 35 feet of 16mm motion picture film were processed to provide for the first time a stabilized photographic image of the earth as it appears from beyond the atmosphere.

A particularly significant result of the first flight was the proof it provided that ordinary photographic emulsions can be used in unshielded cameras at altitudes to 300 miles without deterioration from radiation, even though the Van Allen belt extends down to about 200 miles in the latitude involved.

This is Pennsylvania: State on the GO

The Dynamic Story of a Statewide Economic Development Program Is Focal Theme in This Bell-Sponsored Picture

SPONSOR: Bell Telephone Company of Pennsylvania.

TITLE: *Pennsylvania: Keystone of the Nation*, 33 min., color, produced by James Love Productions, Inc.

Presenting Pennsylvania, one of our older states, in the light of its many advantages, this film reveals its vast wealth of natural and human resources and the indomitable spirit of its people.

For the general public, the film will be informative and educational. For State and local government organizations, and civic groups, it will be helpful in attracting industry to build new facilities and expand existing ones in the State by capitalizing on the many advantages demonstrated in the film.

Show Legislature in Action

History was made during the shooting—for the first time, motion picture cameras were permitted inside the State Legislature during an actual session to document the Senate and House of Representatives at work.

Producer Love and the writer, James Schute, concentrated on the dynamic story of Pennsylvania's statewide Economic Development Program to give the subject dramatic backbone. Launched by private citizens and backed by the State government, it is one of the most striking examples of cooperative enterprise in America's industrial history.

Towns Bid for Industry

Rural areas and small communities are at work to promote and build industrial tracts; urban areas have launched spectacular redevelopment programs which involve clearing of vast areas of industrial slums, and erecting new office buildings, hotels and apartment houses, all planned around open plazas, with access to underground garages and express highways.

A cast of literally thousands is included in the film's story, with real-life actors playing their parts as community leaders from business and industry, from banks and labor unions, workingmen at their benches, teachers and pupils in their classrooms, construction crews and telephone linemen, scientists, men of medicine and government officials at state and local levels.

A Task With Imagination

With such lively and authentic documentation, the film builds up a stirring industrial drama which succeeds in evoking the qualities of imagination and daring to make Pennsylvania one of the great industrial states of the Union.

An original score was composed for the film by Kenyon Kopkins, who has worked in numerous Hollywood productions. Widespread distribution is underway through Bell Telephone Company of Pennsylvania offices.

Governor David Lawrence *(left) studies film role with producer James Love (right) and H. S. DeLong, of Penn. Bell Co. (ctr.)*

Hawaii: Sugar State

SPONSOR: California and Hawaiian Sugar Refining Corp., Ltd.

TITLE: *Hawaii—The Sugar State*, 22 min., color, produced by Pat Dowling Pictures.

Starting with the volcanic eruptions that formed the island chain millions of years ago, this film shows how weather, erosion and plant life all played a part in transforming a molten rocky mass into a subtropical paradise.

It shows the leading part sugar has played in the economic growth of Hawaii and how this crop is largely responsible for the cosmopolitan nature of the islands in which people of different ethnic backgrounds live in harmony—an example for the rest of the world.

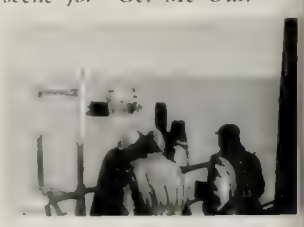
Hawaii—The Sugar State is being distributed to school and adult group audiences by Modern Talking Picture Service, 3 East 54th Street, New York.

Broad Employee Development Program Explains Oil Business

Thru "Our Company" Series of Film-Discussion Meetings Pure Oil Employees See Their Role in Complex Industry

Inherently a far-flung and complex business, the oil industry involves distant sources of raw material; must provide refining operations close to its consumers. Involved throughout these processes are thousands of employees in highly-specialized jobs. Relating *each man* to the *total picture* is the present concern of The Pure Oil Company. For this task Pure is using a series of film-discussion meetings titled *Our Company*. The first three pictures in the series were produced by Wilding, Inc. and deal with exploration, production and refining. A fourth film, on transportation, was produced by the Atlas Film Corporation.

by W. E. Bright, Jr., Manager, Employee Development



THE *Our Company* series of film-discussion meetings expresses one aspect of The Pure Oil Company's desire to enable each of its more than 10,000 employees to understand and achieve their full share in the Company's future. An integrated oil company is a complex of widely diverse business activities. Few employees can hope to experience directly more than a small proportion of the Company's many operations.

Thus each of the *Our Company* films orients employees regarding a major function of the oil industry. Beginning with *Exploration* and following with films on *Production*, *Refining* and *Transportation* the series will also cover the *Marketing*, *Research* and *Gener* *Administrative* components of th integrated oil company.

See Relation of Jobs

When the series of films is con plete, each employee will have r ceived orientation in each of th related operations to which h own work contributes. He will b better able to see how importa

Camera crew *works on a scene for "Get Me Out."*

work is to the success of the tal enterprise. Many of the mments received regarding the ns already shown to employees sess these values they find in the ogram:

Build Sense of Belonging

1. Employees say they feel a onger sense of belonging in the ganization as a result of the n meetings.

2. They indicate the films have lped them to discover how to operate more effectively with ployees in other parts of the ganization.

3. They say they have gained a w respect for the extent and undness of the Company's op- ations.

4. They express appreciation this effort in their behalf as idence of the Company's inter- in its employees.

5. New employees for whom e films provide orientation re- ark their effectiveness as a aphic introduction to the nature of work in an integrated oil company.

A large measure of the films' effectiveness stems from the conditions under which they are shown. Employees meet in small groups (about 15 persons) to view the film. They then engage in a business game built around operating problems in the organizational segment the film has described.

Showings to New Employees

Meetings average about an hour and three-quarters in time and occur about once each year for employees who were on hand when the series started. New employees participate in the full program soon after they are employed, often seeing the films at one-week intervals.

The reactions of employees at all echelons of the organization indicate the *Our Company* film-discussion meetings are one of the most effective of the Company's personnel development activities.

Brief Synopses of Four Films in the Pure Oil Program

NIT 1—Exploration

TLE: *Come and Find Me*

It takes a great number of peo- e working as a team to pinpoint probable area for drilling an oil ell. From the oil field scout to e geophysicist, it takes time and rd work to analyze rock forma- ons and surface characteristics determine whether a geographi- l location might contain a sub- rface reservoir. And then only drilling is it known whether e reservoir holds oil and gas, rmed millions of years ago from ried animal and vegetable mat- r.

NIT 2—Production

TLE: *Get Me Out*

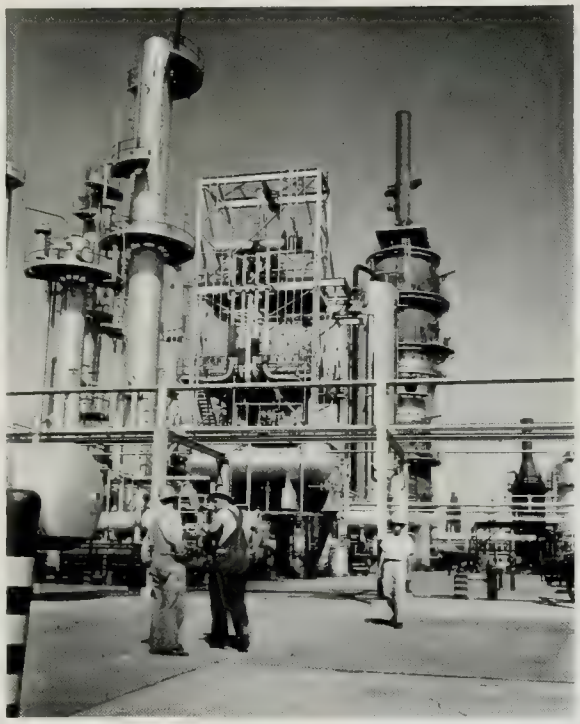
The process of drilling is shown this second film. Highly-trained gineers, special heavy-duty uipment and precise testing de- ces combine to get down through e rock formations, sample the aterial brought up and set up e well for production. The peo- e involved and the methods and equipment used in maintaining production are all explored.

Production of oil *is discussed in Pure Oil's "Get Me Out."*

UNIT 3—Refining

TITLE: *Make Me Useful*

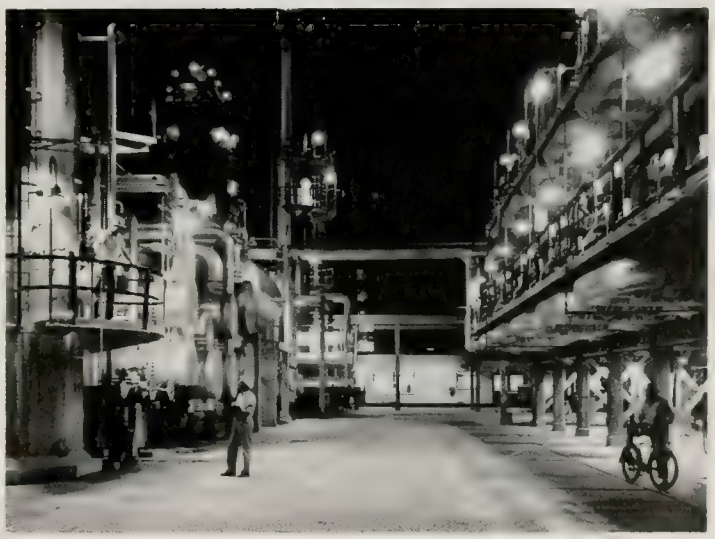
Once the raw oil and gas are extracted from the underground reservoirs, its next important stop is at the refinery, where science and human skill convert crude oil into hundreds of products we use every day . . . everything from motor fuels to medicine, asphalt to aircraft fuels, propane to petrochemicals. All of the complex units that make up a modern refinery, all of the various processes through which the crude oil is put to produce usable products are explained and demonstrated in this film.



UNIT 4—Transportation

TITLE: *Get Me There*

Pipeline . . . tank car . . . transport truck . . . river barge . . . ocean tanker . . . each method of oil transportation has advantages of its own, under the right conditions. The hundreds of products that crude oil yields are sent to numerous markets located at far distant points; the split-second timing in scheduling shipments and the skilled workers connected with each phase of the system are all introduced and their importance shown in this "epic" film on oil transportation.



Butane spheres were lensed at Pure Oil's Lemont, Ill., refinery.

A "street scene" taken at the Smith's Bluff Refinery.

HONOR 30 FOR BEST AMERICAN TV COMMERCIALS

Jury of Advertising Executives Selects Winners in 30 Product Categories as 1,352 Entries Compete for Awards at American TV Commercials Festival

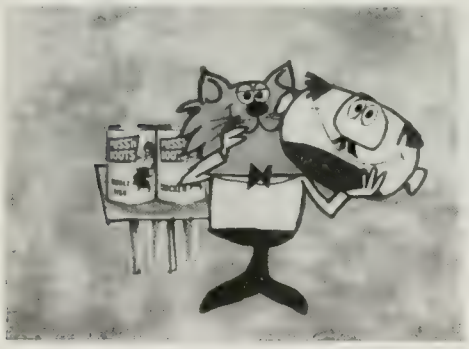
A CAPACITY AUDIENCE of 700 advertising and film production executives turned out for the Awards luncheon of the second American TV Commercials Festival at the Roosevelt Hotel in New York on May 4th.

The annual awards, selected by a TV Commercials Council of 80 prominent advertising men, were given in 30 product categories from an entry list of 1,352 commercials.

Standards of selection were made according to professional advertising criteria: *impact, believability, tastefulness, copy, demonstration, audience involvement* and *skillful employment of television techniques.*

The 80-member TV Commercial Council, which judged the entries, was formed by Festival Director Wallace A. Ross, and was under the chairmanship of John P. Cunningham, Board Chairman of Cunningham & Walsh, Inc.

In addition to the 30 product category plaque awards for winners, certificates were given to runners-up in each category, seven citations were made for "Advertising Achievement in Specific Areas," and 14 citations were given for "Craftsmanship." Among the latter, two were sponsored—the award for "Best Cinematography" by the Eastman Kodak Company . . . and the award for "Best Videotape Production" by the Minnesota Mining and Manufacturing Company.



All awards presented bear individual creative credits. In 1960, over 2,000 duplicates of the award certificate were requested by individuals who were credited.

Best-Cake Mixes: *Duncan Hines Cake Mix (Procter & Gamble) film.* Agency: *Gardner Advertising.* Producer: *Wilding, Inc.*

Best-Laundry Soaps & Detergents: *Ivory Flakes (P & G) film.* Agency: *Grey Advertising.* Producer: *MPO Videotronics, N. Y.*

Best-Canadian Market: *a Puss N' Boots Cat Food (Quaker Oats) spot.* Agency: *Spitzer, Mills & Bates.* Producer: *Elektra, N. Y.*

Best-Automobiles: *Chevrolet Corvair film.* Agency: *Campbell-Ewald Company.* Producer: *American Films (Alexander Film Co.).*

Best-Cosmetics & Toiletries: *BAN spot. (Bristol-Myers & Co.)* Agency: *Ogilvy, Benson & Mather.* Producer: *WCD Productions.*

Best-Beers & Wines: *Jax Beer (Jackson Brewing Co.).* Agency: *Doherty, Clifford, Steers & Shenfield.* Producer: *Pelican Films.*

Originality Prevails Over "Technique"

Measured qualitatively, the 1961 commercials seemed somewhat better than 1960's entries. More true originality was in evidence and less reliance was made on "fancy" production technique for its own sake.

Statistically, the 1,352 entries were made by 97 advertising agencies, 51 production companies, 11 television stations and three advertisers. Awards, including special citations and runners-up, were made to a total of agencies, 46 producers and six stations. Most frequent agency mentions were garnered by Batten, Barton, Durstine & Osborn with (three firsts); Doyle, Dane & Bernbach, (no firsts); Benton & Bowles, nine (six firsts); Young & Rubicam, eight (four firsts); and Walter Thompson, six (all firsts).

MPO, TV Graphics, Elektra Win Firsts

In mentions among producers, MPO Videotronics had eight (four firsts); Television Graphics, seven (four firsts); Elektra Studio, six (three firsts); Elliot, Unger & Elliot, (no firsts); and VPI Productions, five (one first).

There is no Best of Show Award.

A special citation for "perspective" was made by Festival Director Ross to a short film called *The Cliche Family in Televisionland.*

"This bit of inspired foolery, produced for advertising trade digestion rather than public airing, was screened for the assemblage of festival judges at their orientation meeting. As much as any one other single force, it influenced judgments against the trite and the conventional . . . inspired members of the TV Commercials Council to search out the pace-setting concepts . . . reduced cliche to absurdity and substituted for it freshness and creativity as judging criteria."

Credits on *The Cliche Family* go to Gordon Webber (Benton & Bowles) for idea and script, Marvin Rothenberg (MPO Videotronics) for production, Roy Eaton (Benton & Bowles) for music and effects, and Roger Price for narration. Roger Price and Lo Prentis played the parts of Mr. and Mrs. Cliche.

The winning commercials are going on tour again this year. On May 11, Wallace Ross showed the films and was featured speaker at Canada's First Commercials Festival, sponsored by the Advertising and Sales Club of Toronto in conjunction with the American TV Commercials Festival.

Other dates completed recently were May 9th to the National Association of Broadcasters, in Washington. Also in Washington on May 30th to the Advertising Federation of America.

World's Theaters and Their Audience

Informative, Entertaining Sponsored Pictures Can Reach Millions in the U. S. and Overseas

SURVEY TABLES FROM THE U. S. DEPARTMENT OF COMMERCE

THE WORLD'S motion picture theaters, some 154,852 of them equipped to show 35mm films in 130 countries and territories around the globe, provide an immense, organized audience for informational, sponsored short subjects. These theaters also comprise more than 50 percent of the entertainment film industry's revenue from foreign markets.

These 154,852 theaters have a seating capacity of 73,826,439. They have increased in number from January 1, 1955 to January 1, 1960 by 34,870 or about 29 percent. Seating capacity around the world has increased 13,963,053.

Note Theaters Open Abroad

According to Scientific, Motion Picture and Photographic Products Sections of the U. S. Department of Commerce, the agency responsible for the compilation of statistics presented in these pages, the increase in theater facilities is notable in several regions—Europe, especially West Germany, Italy and Spain; the Far East and Middle East, with Japan and India noteworthy; and Africa.

In Canada and the United States, a sharp drop occurred in the number of auditorium-type theaters but the number of drive-in theaters increased. Figures for the U. S. show 12,291 auditorium theaters in operation in 1960 with total seating capacity of 8,000,000. Drive-ins account for another 4,700 facilities and add seating capacity of 3,300,000 persons.

Canada has 1,495 auditorium-type theaters and 232 drive-ins with a combined total seating capacity of 972,000.

State Department Clearance

Subjects going abroad for any kind of showing must be cleared by the Department of State but truly informational films which treat fairly and honestly the image of the U. S. will have little difficulty in getting clearance.

Arrangements for overseas bookings may take one of two roads: the most desirable appears to be the facilities of motion picture companies with extensive foreign exchange facilities and experience. There are notable cases where an outstanding sponsored short subject has been sold outright for foreign rentals. But experienced hands, like the Alexander Film Company which has extensive connections in Latin America, can place commercial

(Continued on following pages)

WORLDWIDE SURVEY OF MOTION PICTURE THEATERS:

shorts as well as traditional screen advertising in a multitude of cities and countries in that export market.

Screen advertising, brief 30- to 90-second colorful commercials of a *direct* product advertising nature, is a very important medium abroad. With television commercials a comparative late-comer in Europe and other parts of the world, producers and advertisers have combined to use their finest creative talents and techniques with notable effect. The Annual Screen Advertising Festival in Europe is a showplace for Europe's best in this field. The 8th International Festival will be held in Cannes, France on June 12-16.

Both the International Screen Advertising Services (see 11th Annual Production Review of BUSINESS SCREEN, page 30) and the International Screen Publicity Association are representative of worldwide interest in this widely-popular and well-accepted phase of the film medium.

Japan Leads Growth Figures

Most impressive gain of any country in the world in 35mm theater facilities was registered in the 5-year survey period by Japan. On January 1, 1960, Japan had 7,401 houses, almost doub its 1955 total of 3,734. Seati capacity rose from 1,900,000 3,122,702.

South America, with its i portant trade areas for U. goods, led the Latin Americ with 6,973 theaters in 1960 compared with 6,611 in 195 Seating capacity rose 8 percent a total of 4,518,187.

Overall screen time for U. S produced motion pictures was a proximately 60 percent of the t tal, an 8 percent decline fro 1955. The growth of television Europe and Japan as well as pri restrictions also contributed m terially to this decline.

Improve Accuracy of Data

The Department of Commer survey* noted that "some of t increases in the 1960 statisti are attributable to increased a curacy of data and survey cove age. Data for Eastern Europe countries were difficult to obta and were usually based on offici Government publications of t countries concerned. These pu lications frequently show total e hibition outlets and probably i clude theaters showing 16m films."

On January 1, 1960, Afric had an estimated 2,168 motio picture theaters with a seati capacity of 1,459,760, compare to 1,683 theaters with seating 1,080,563 in 1955. The Unio of South Africa, Algeria, Niger and Ghana reported sizable gai in theater facilities. Screen tim for all U. S. films was 60 percen

Mobile Vans Reach Africans

Here again, the showing sponsored advertising films an public interest short subjects is familiar practice throughout the lands. A sizable operation f this purpose makes its headqua ters in the Sudan (Sudan Pul licity Co., Ltd.) and Factu Films Limited in Kenya serv both formal theaters and operat mobile cinema vans in that regio (see 11th Annual Production Re view, BUSINESS SCREEN, pag 165 for reference).

In Spain, Estudios Moro Madrid is a prominent supplie to theater screens of that countr and neighboring lands; England France and West Germany hav

*Prepared by Earl H. Young, Scien tific, Motion Picture and Photo graphic Products Division, U. S Department of Commerce; based o information submitted by U. S Foreign Service posts and other ma terial on file in the Department o Commerce and the United State Information Agency.

ny specializing producers and
stributors as has Italy.

What about subject matter?

An important clue may be
und in the selections of the U. S.
formation Agency for overseas
n showings. But the same gen-
al rule of good taste, extremely
oft-sell" (for longer short sub-
jcts) and excellent screen quality
e equally with genuine public
terest for the intended audience.

The medium is a powerful one.
ne success of straight-sell adver-
ing film playlets in overseas
nds is largely based on their
gh quality, unusually good use
cinematic techniques and a
ong flavor of entertainment in
th visual and sound. The popu-
rity of sample reels of such
eatrical ad shorts among U. S.
encies (winners of the Advertis-
g Film Festivals) indicates the
nd of quality involved.

Quality Is an Essential

It is appropriate to stress these
ualities as essential to the suc-
ss of short subjects offered U. S.
nd Canadian theatrical audi-
nces. Such outstanding produc-
ons as U. S. Steel's *Rhapsody of
leel* and *Mackinac Bridge;*
nited Fruit's *Chiquita Banana*
nd others have been well re-
ived by theater managers.

Active in this specialized field
distribution have been such
aders as The Jam Handy Or-
nization, Inc. and Modern
alking Picture Service, Inc.
heir booking experts point out
at subject matter must be time-
, interesting, and useful to the
otential audience. Despite some
cent adventures in "pay for
lay" the largest number of these
orts are booked theatrically on
eir merit. Cost involved narrows
own to distributor charges.

Help Show America Abroad

35mm is the medium em-
loyed; color is a major asset
ough a hard-hitting safety sub-
ct has played well in black &
hite. The shortage of rental-free
horts on such widely-popular
emes as world travel, etc.,
akes anything good of that type
xtremely desirable to theaters.

There's a cue in this for Ameri-
a as the nation looks to attract-
ng a larger share of world travel
oward our own shores, helping to
everse unfavorable trade bal-
nces. The picture on the theater
creen is big, it can be beautiful
nd most often it is projected with
rofessional skill.

It's a far more important and
ccessible medium than overseas
elevision at present.

A FOUR-PART MOTION PICTURE PROGRAM FOR PERSONNEL MANAGEMENT

Filmed Case Studies to Aid Job Evaluation

"How's It Going?" Provides Both Principles and Techniques for the Interviewer

FEW AREAS OF MANAGEMENT have received more attention than evaluation of job performance. Methods for appraising employee strengths and weaknesses are devised and revised. Techniques for communicating the appraisal are discussed and debated. Yet the "moment of truth" when man and manager come face-to-face across the desk continues to pose serious problems for both interviewer and interviewee . . . and in both individual and organizational terms . . . concrete results are often disappointing.

Four recently filmed "case studies" take a *new* approach to some of the factors basic to such interviews irrespective of the differing formal ground rules under which they may be conducted. Collectively titled *How's It Going?*, these episodes (produced and made available for print purchase by Henry Strauss & Co.) start from the premise that if the appraisal interview is going to be truly meaningful and productive it must often touch on "sensitive" areas.

Interviews Have "Conflict" and "Agreement"

The interview contains seeds of misunderstanding as well as understanding; conflict as well as agreement; frustration as well as progress. Incorporating a study guide for each case, *How's It Going?* films are designed to permit study of interview *principles*, training in interview *techniques*. They help make possible attainment of benefits without side effects.

Each discussion session in the program is a self-contained training unit approximately one hour long—with films and course outlines devoted to exploring a principal goal of the interview and specific methods for attaining that goal. Here are the basic subjects:

The Subject Matter of Case One

This first case, *More Than Paperwork*, brings out, as an important goal, the creation of mutual *understanding* about the purpose of the interview—the functions of the job on which the employee is being rated—standards of performance expected—and how well he is meeting those standards.

Since man and manager frequently expect different things from the interview and come to it with different emotional outlooks, the film and discussion material stress techniques of adequate advance preparation and of an opening that will set up a favorable "climate" for the interview.

Case II: The *Give and Take* focuses on the second interviewing goal: getting *agreeme* This is a genuine meeting of minds which c only occur when the interviewee is convinc that the interviewer is objective about him a his performance, fair in comparing him w others, competent to make the evaluation. T interviewer's use of reasonable evaluati standards and recommendations that are line with the employee's own self-interest a other factors. This is a place for *two-w* communication.

Concealed Resentment Can Block Action

Case III: In *Means to An End*, the stu dramatizes the fact that an apparently smoo running interview can develop under-the-s face resentments that *block* action instead stimulating it. Need is shown for planning t discussion so as to arrive at specific goals a specific methods for reaching them. The goals are defined from both the interview and the interviewee's points of view. Flexibi ty is an important asset when the initial pl hits a snag.

And in Case IV: *The Way Ahead* poi out that what can be *learned* from the int view may stimulate *both* parties to mo ahead on their own. It is shown that the int view can contribute to the growth of the ma ager as well as the man. Reasons why t may fail to occur are examined. And by w of summarizing the program, this session e phasizes the sometimes over-riding impact the interviewer's personality and attitudes a the emotional barriers that can unconscious rise to block understanding, agreement a action.

Shows Understanding of Emotional Value

Filmed throughout with understanding the impact of the motion picture medium a training tool in inter-personal relations Strauss forte), the series employs good use gestures, facial expressions, voice tone a unconscious mannerisms that are nearly important as "what is said" in determini success or failure. The effect further sen tizes the viewer to the emotional elements th lie beneath the surface in such contacts.

The *How's It Going?* casebook is availab to business, government and educational ins tutions on a sale basis only. Set of the fo cases and accompanying Leader's Guide priced at $125.00 and may be obtained fro Henry Strauss Distributing Corp., 31 We 53rd Street, New York 19, N. Y.

Without adequate preparation, *achievement of understanding is nearly impossible. The interviewee's face reflects his confusion in this scene from "More Than Paperwork."*

Is he really agreeing *or merely going along for the sake of appearances? An older, more experienced interviewee presents a communications problem in Case II: "Give and Take."*

The interviewee's reaction *makes it seem dubious that there will be action in this episode from Case III: "Means to an End."*

Ready and willing to learn—*but is he able? It depends on the interviewer as much as on the interviewee in Case IV: "The Way Ahead."*

The S. S. Hope Begins Its Journey for Peace

SPONSOR: Project Hope (People to Peop Health Foundation).

TITLE: *Voyage of the S. S. Hope*, 27 mi color, produced by MacManus, John Adams, Inc., through the facilities of Kla ger Film Productions.

S. S. Hope is the first of a projected fleet white hospital ships which will carry a me sage of peace to the world.

This dramatic film is a documentary d

s iption of the 230-bed hospital ship which is sting out to carry new medical skills and thnology to nations in need of this help. It sows the dedication of the ship by Vice Presi-nt Nixon, last fall, before the *Hope* sailed d for its first stop in Indonesia.

Bob Considine, well-known newsman, is rrator. Producer and director for Mac-Nnus, John & Adams was Frank P. Bibas. Istribution will be to schools, adult and tele-vion audiences through all offices of Modern Tlking Picture Service, 3 East 54th Street, Nw York, and Association Films, Inc., 347 Nadison Ave., New York.

Blending the Old and New—

Volkswagen of America Pictures Scenic Austria

SONSOR: Volkswagen of America, Inc.

TTLE: *Four Seasons of Austria,* 23 min., color, produced by Marathon International Productions, Inc.

This beautiful travel film relives an auto-bile tour of modern Austria. Amidst breath-king scenery it shows how old and new are nding in a country famous for castles, festi-ls, Mozart and mountains.

The festivals are especially colorful. In the cient Festival of Winter's End the villagers on grotesque costumes and dance about isily to frighten away the Demons of Winter d awaken the Spirit of Spring. Other ex-ing scenes show horse racing on an ice-vered mountain lake and the famed Vienna by's Choir.

Distribution is to adult groups through odern Talking Picture Service, 3 East 54th reet, New York.

A Mecca for Surfcasters—

North Carolina Lures the Ardent Fisherman

PONSOR: North Carolina Department of Con-servation and Development.

ITLE: *From Kitty Hawk to Calabash,* 13½ min., color, produced by Haycox Photo-ramic, Inc.

Over 30 varieties of game fish can be found -and perhaps hooked—in the coastal waters f North Carolina. It is a mecca for surfcasters om all over the country. And for those who ke to take things a little easier there are 30 iers jutting out into the ocean on the 300-ile coastline.

This beautiful new film describes the excel-nt fishing opportunities for any and all kinds f fishermen in the Old North State. While he huge blue marlin might seem to be the eal star of the film, opportunities for fresh vater fishermen are not left out, either. Within ound of the pounding surf the largemouth ass and many other fresh water fish are found n abundance.

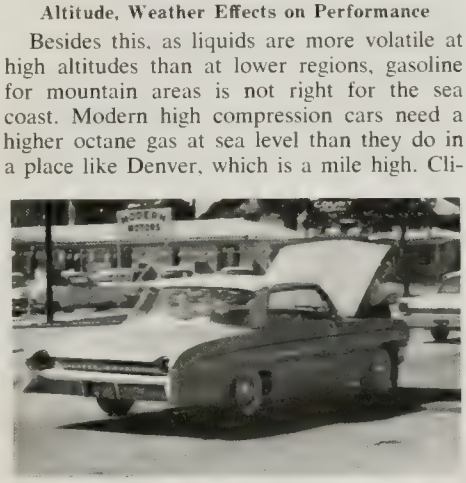
Distribution is via Modern Talking Picture ervice, 3 East 54th Street, New York, to ishermen—women and children of all ages.

Dealer drivers hit Florida highway on last lap of 2,100-mile Denver-Miami test.

Texaco Shows Meaning of "Climate Control"

Altitude, Weather Effects Clearly Shown in Film of Denver-Miami Test Run

SPONSOR: Texaco, Inc.



TITLE: *Climate Controlled Gasolines,* 25 min., color, produced by Audio Productions, Inc.

☆ Television newscasters Chet Huntley and David Brinkley take leading parts in this new Texaco dealer film. As spokesmen for Texaco commercials they are, of course, familiar with the company's "Climate Control" gasolines. But Bill Malone, jet pilot and sports car racer, is an expert. He explains that gasoline performance is affected by two very important considerations: temperature of the air, and altitude above sea level. If gas is too volatile in hot weather it may cause vapor lock in the gas line, and pre-ignition. If it is not volatile enough in a cold clime it starts hard.

Texaco's solution to climate differences is the 28 Climate Control areas in the company's distribution system. Each area receives the exact blend of both Sky Chief Supreme and Fire Chief that matches the expected weather. And this blending is changed 12 times a year.

Altitude, Weather Effects on Performance

Besides this, as liquids are more volatile at high altitudes than at lower regions, gasoline for mountain areas is not right for the sea coast. Modern high compression cars need a higher octane gas at sea level than they do in a place like Denver, which is a mile high. Climate Control is also Texaco's answer to these problems, as well as temperature differences.

Emergency break: *as temperatures rose the Denver-fuel car died in traffic (vapor lock) near Daytona Beach. Then they called it quits.*

To show what Climate Control can mean to car performance, the film documents a test run from Denver to Miami using two identical cars, but with one using Texaco "Denver" Sky Chief Supreme all the way (from a following tank truck) while the other car also used Sky Chief, but Climate Controlled to each area the route passed through.

"Denver" Gas Knocks, Causes Vapor Lock

Result: the car with the "Denver" gas all the way used about 20% more fuel than the other car. It knocked from St. Louis on south. At Orlando, when the thermometer hit 80 degrees, the car with the "Denver" gas conked out two or three times with vapor locks. Knowing it would take a week to get to Miami at that rate, the "Denver" gas car finally filled up with Florida Sky Chief Supreme and whizzed on to Miami knock-free.

Driving the two test cars for the film were two actual Texaco dealers—gas stations along the route were actual stations—the amounts of gas used were the actual amounts—the weather along the route was the real weather, not weather according to a script.

Well Received at Spring Dealer Shows

All this actuality rings absolutely true in the film, which was received with more than usual enthusiasm at Texaco's recent nation-wide spring dealer meetings.

The Facts About 8mm Sound

☆ A detailed analysis of all that's new and useful in 8mm sound projection will be featured in the next issue of BUSINESS SCREEN.

Facts gathered by our experienced staff people in all sections of the country will give readers the *complete* story of this new sight/sound dimension.

An American Company Views "The Challenge"

S. C. Johnson's Provocative Film Probes Overlooked Aspects of Business

SPONSOR: S. C. Johnson & Son, Inc.

TITLE: *The Challenge*, 27 min., color, produced by Metro-Goldwyn-Mayer.

☆ Does business offer a challenge comparable to that of other worthy professions?

Is it selfish, concerned only with its profits and not with employee conditions or customer benefits from its products or its role in the community?

Some surveys show that many young people today would answer "no" to the first question, and "yes" to the second.

To these questions, S. C. Johnson & Son, Inc., better known as Johnson's Wax, has devoted a new film that sets itself up as the "guinea pig" in seeking answers.

While the film's release coincides with Johnson's 75th anniversary, it is not a back-patting anniversary picture in any sense, but a thoughtful probe into aspects of business that are sometimes overlooked.

With the Frank Lloyd Wright-designed buildings of Johnson's Wax in Racine, Wisconsin, as a setting for the film, an inquiring "graduate student" concerned about the misconceptions his fellow students have about business, probes into profits, production and people. He finds that such corporate virtues as respect for individual dignity and initiative, pride in work, civic responsibility, social consciousness and service to customers are the rule and not the exception.

Profit, the need for it and what is done with it, is explained in terms of reinvestment for growth and new jobs, fair stockholder return on investment and sharing with employees. Johnson's Wax was one of the earliest profit-sharing companies, and the film notes that thousands of American firms now distribute part of their earnings to employees.

Profits, production and people *are concerns shown in "The Challenge."*

"But business is not all sweetness and light," says the film. "Like everything else business has its defects and there are areas where it can and must be improved. That's the challenge."

The film is narrated by Dr. Frank Baxter of the University of Southern California, a noted educator, and a television and film personality in his own right. It will be distributed nationally to schools, fraternal and service clubs and other community organizations by Sterling Movies U. S. A., 375 Park Ave., New York.

Hammond Organ Premieres a New Sales Picture

SPONSOR: Hammond Organ Company.

TITLE: *Happy Is the Home*, 15 min., color, produced by Fred A. Niles Productions.

☆ A visual presentation for use in Hammond Organ Company's new merchandising program was introduced at this company's recent biennial Western Hemisphere management meeting in Chicago.

"Happy Is the Home" *with a Hammond organ.*

The 15-minute color motion picture, titled *Happy Is the Home*, features the Hammond "chord organ," which is the hub of the company's entire line. Created and produced by Fred A. Niles Productions, Inc., Chicago, the film entertains as well as answers most consumer questions about the easy-to-play instrument.

The story line of *Happy Is the Home* involves a harassed father who finds refuge and peace in the home of a neighboring family. The tranquillity, he learns, stems from the neighbor's new chord organ. How the instrument is played without knowing music notes or taking lessons is unfolded as sequences dramatize the organ venture in the lives of others.

The Niles' production as directed by Tom Rook with photography by Jack Whitehead. Hammond will make prints of the film available as a sales tool to all representatives.

"Menu for Growth" Proves

Lunch for the Millions Takes Efficient Planning

SPONSOR: G. S. Blodgett Company.

TITLE: *Menu for Growth*, 20 min., color, p- duced by Bay State Film Productions, I.

☆ The planning, preparation and serving of million lunches a day has a featured role ir new 20-minute color film released in May f national 16mm audience showings.

The National School Lunch Program, ins- tuted in 1946, is described in *Menu Growth*, sponsored by the G. S. Blodg Company and produced by Bay State Fi Productions, Inc. In this picture, which Low Thomas narrates, the camera takes audienc into lunchrooms and cafeterias of some of c

Motivating Officers, NCO's—

A Human Relations Film for Army Re-Enlistment

SONSOR: The United States Army.

TLE: *The One That Got Away,* 26 min., b/w, produced by MPO Productions, Inc., through Dancer-Fitzgerald-Sample.

Promoting re-enlistment through motivation officers and NCO's is the theme of this new ining film produced for the Army by PO's West Coast Studios. The picture was ide on location at Fort Ord, California.

The story, which utilizes 10 professional ac-'s and 500 GI extras, emphasizes the hu-n approach the Army takes toward its re-uits and expects its training officers to use. he conclusion pulls no punches in showing st mishandling of the problems of one sol-er, but it points the way towards improving e human relations of trainers and recruits. he film gives the viewer the impression that is watching real people in real situations. he camera probes into and develops insight o the personality of the main characters.

For MPO, Mel Dellar produced and Dave onahan directed. Capt. Matt Irvin, U. S. A., s technical consultant.

This Lederle Film Shows

How Chemotherapy Aids in Treatment of Cancer

ONSOR: Lederle Laboratories Division, American Cyanamid Company.

TLE: *The Roles of Chemotherapy in Mam-mary Cancer,* 40 min., b/w, produced by Willard Pictures, Inc.

When signs and symptoms of cancer recur, nich sometimes happens several years after eatment, the patient despairs. But diabetes, rnicious anemia and most heart diseases are ronic incurable conditions—yet the sufferers these diseases most often live comfortably a full life span.

The similitude of conditions caused by these ronic diseases with cancer is pointed out in is new Lederle film for professional au-ences. "Today we do *not* have a cancer cure the true sense of the word," the film says. We do *not* know the cause of this disease.

"Regard Cancer as a Chronic Disease"

"If, however, we could gear our thinking regard cancer as a chronic disease instead a fatal terminal state unless completely rned or cut out, both the patient's and the ctor's morale would improve. There are a owing number of ways in which many un-red cancers can be treated and we have the ght to anticipate not only more anti-cancer ents but also a true cure in the not too dis-nt future."

The Roles of Chemotherapy in Mammary ancer is a filmed version of a seminar for e medical profession which has been conducted at many medical societies throughout the country. It is one of several seminars underwritten by Lederle Laboratories to present outstanding professional authorities speaking on new medical techniques.

Speaking on *The Roles of Chemotherapy in Mammary Cancer* is Dr. Jeanne C. Bateman, of Washington, D. C., one of the nation's foremost specialists on this subject. With an extensive practice of her own, Dr. Bateman, who has spoken to hundreds of medical groups in past years, found that demands on her time were becoming too heavy. As a result, the filmed version of her message is now being widely used.

One More Approach to Control of Cancer

Dr. Bateman's experience is that chemotherapy has been successful in her practice, under certain conditions, but not to the exclusion of other methods. Her case histories, in which maintenance chemotherapy has been used, are most impressive, and should serve to widen the horizons of many of her colleagues.

Ring of Valor: Symbol of the Naval Academy

Symbol of Honor, Strength and Power, the Academy Class Ring Brings Meaning to Film Designed to Encourage Young Men to Enter Annapolis

SPONSOR: The United States Naval Academy.

TITLE: *Ring of Valor,* 27 min., color, produced by Audio Productions, Inc.

The opening scene of this film is a beauty shot of a Naval Academy class ring lying on blue velvet. "This ring is worn proudly by every officer who has been graduated from the United States Naval Academy. It is truly a ring of valor."

Commander Alan B. Shepard, Jr.—on being asked if he carried any personal belongings with him in the Mercury capsule: "I had only my Naval Academy ring."

Ring of Valor is a picture designed to encourage young men to aspire to an Annapolis education. It shows the Academy class ring as a symbol of honor, strength and power in every part of the world.

How does a man acquire this symbol of skill and honor? The film takes us back to arrival day for young plebes. It follows their daily life as they go about Academy life, watches them in class, at sports, and everlastingly studying. The curriculum is on a par with the nation's leading universities, while Naval professional subjects provide an additional 25% of training.

Scenes show the Academy's sub-critical nuclear reactor, its labs for study of orbital mechanics, and its elaborate trainers for simulating actual situations in naval activity. Social sciences and the humanities are equally important to Naval officers, and the Academy has strong courses in these subjects.

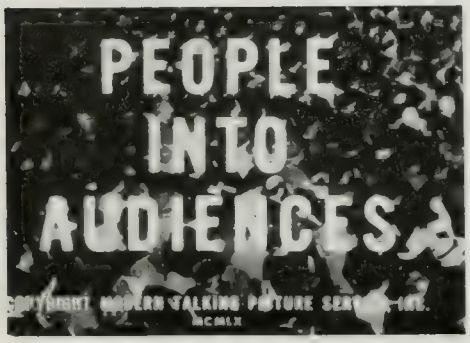
In the summer, Midshipmen can practice the old adage—"Join the Navy and see the world"—on training cruises with Liberty in foreign ports—a pretty fair way to spend a summer. Other summer sessions are spent in submarine service, and in firsthand training at Naval air stations.

Academy Superintendent Rear Admiral C. L. Melson sums up the spirit of the film:

"We have tried to give you an overall view of a Midshipman's life—where and how he lives—what he does and what he learns. In summation I can only say that each man wearing the Academy ring—each graduate of the United States Naval Academy—goes forth to a splendid, worthwhile career; richly rewarding and in the highest tradition of honor of America and its Navy."

Tradition and intensive study *both help to prepare the Midshipman for his future . . .*

And this officer-in-training *for the Navy will soon earn a cherished "Ring of Valor."*



HOW FILM DISTRIBUTION TURNS PEOPLE INTO AUDIENCES

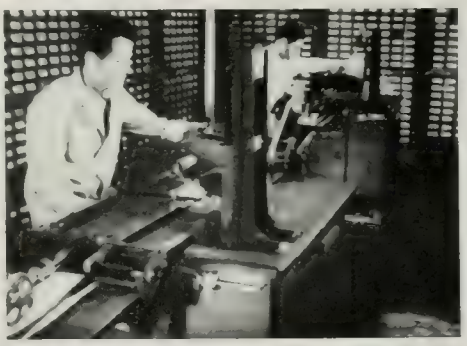
An Informative New 13-Minute Sound Motion Picture Provides Useful Facts About the Opportunities and Requirements of Sponsored Film Distribution

GROWING POPULATIONS, a larger labor force, more students in schools and colleges . . . all these present an ever-increasing challenge in communication. Answering this challenge for both mass *and selective* dissemination of needed information are the large number of factual motion pictures produced annually to reach specific groups of people. And reaching those people is the task of the specializing, professional film distributor with facilities to *move* this great medium.

Today's nationwide groups require efficient, close-at-hand facilities to serve them; well-produced films need professional film handling to assure their perfect presentation on the screen. How all of this takes place is described in a new 13-minute sound film titled *People Into Audiences*, sponsored by Modern Talking Picture Service, Inc., a 23-year veteran of the distribution business with 30 regional offices in the U. S. and Canada. T picture takes viewers inside exchange ope tions, shows automated tabulation and repo ing methods; electronic film handling equ ment standard in this network. It also sho extensive promotional operations.

Scenes on this page are brief glimpses fr *People Into Audiences*. The complete pictu tells the story in depth of the "opportuniti and the requirements of sponsored film dist bution." Every company and trade group co cerned with more effective use of the fi medium should see this useful film.

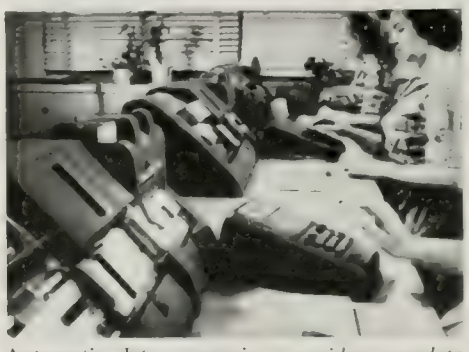
No matter how well made, *a sponsored film is successful only when it reaches its audience—when it's distributed to the people who will buy your product, services or point of view . . .*



Successful distribution is as complex *as any means of communication today. You need a professional film distributor like this Modern Talking Picture Service account executive . . .*

He represents an organization *with over . years of experience . . . with 30 regional o fices throughout the country to provide on-th spot cooperation with your district offices .*

The account executive works with you, *planning that distribution which will present your film with most effect . . . within the budget which you set . . .*



And above all, *he'll deliver your audiences. Audiences chosen from active and comprehensive lists on file. Who are these audiences? Formative citizens . . . adult citizens of today . . .*

Into each of our 30 field offices *come reques for film bookings. Convenient locations perm personal pick-up, as well as phone and m orders . . . courteously and promptly handle*

On return, *each print of your film is electronically inspected, cleaned and, if necessary, repaired. Proper maintenance lengthens print life, assures screen success.*

Automatic data processing *provides complete control. Film booking cards are transferred to IBM punch cards. Punched cards are verified to eliminate manual error . . .*

Whatever combination of facts *are needed . machines are set up to supply them. Matchi of audience report cards with booking car provides you monthly certification . . .*

"These Kodak Pageant Projectors can record sound as well as play it back. We use them to transfer sound from magnetic film to duplicate prints . . . saving time and recording expense, and providing flexibility."

Movies communicate in minutes what would otherwise take hours or days to learn"

s producer Charles Probst, President, Cine-ics Inc., a Division of Cook Electric Company, cago, Illinois:

ur movies speed the interchange of technical rmation—create an understanding vitally ded among engineering teams widely sepa-ed by place, time, or technology. These mo-h pictures also help the layman understand ntific advances, especially in nuclear and ce age projects.

'Cinefonics film reports, we've been told, can interpret and communicate—faster than personal talks or visits.

"One way we meet our 'crash' deadlines—when vital information must be filmed with sound and rushed to many places for viewing simultaneously—is with the Kodak Pageant Projector setup (above) for recording magnetic sound tracks.

"We use many Kodak Pageant Sound Projectors because they're compact and quiet, because their performance flatters the motion pictures we make, and because they don't get in the way of what we're showing."

Smooth presentations

. . . that's the Kodak Pageant idea. A projector that takes distractions out of screened instructional, sales, educational, and business motion pictures.

A Kodak audio-visual dealer will demonstrate. Or, write for detailed booklet.

Kodak Pageant Projector **EASTMAN KODAK COMPANY, Dept. 8-V, Rochester 4, N. Y.**

Combining live action and animation, *this early Bray cartoon features studio character, Col. Heeza Liar, in "Treasure Island."*

J. R. Bray *(center) directs filming of an early technical motion picture. Bray Studios has specialized in this field for a half-century.*

A Visual Pioneer Observes His 50th Year

J. R. Bray Was One of First Americans to Produce Films for Industry

J. R. Bray, founder of Bray Studios, Inc., New York, and the pioneer producer of animated cartoons and educational motion pictures, was also one of the first Americans to produce films for sponsors in industry.

Mr. Bray, then a cartoonist for Life, Judge and other magazines, conceived the idea of making cartoons move on the screen in 1910, and his first film was released theatrically in 1912. In the first 10 years of its existence the Bray Studios turned out such sponsored films as *Fighting Waste With Movies*, for the National Cash Register Company; *Machines That Think*, for the Burroughs Adding Machine Company; *Black Sunlight* for the Anthracite Coal Commission; *The Man at the Throttle* for the New York Central Railroad; *The Mystery Box*, for Radio Corporation of America; and *Treat 'Em Right*, for the Pennsylvania Telephone Company.

Made Training Films in First World War

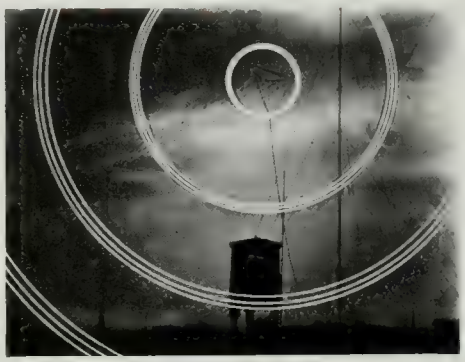
Much has been written about the part played by films in training soldiers, sailors and industrial workers in World War II, but less is generally known about training films in the first World War. Films did their bit toward winning that war, and their part was decidedly more serious than that of showing an occasional parade or the behavior of the men in the trenches.

The Bray Studios was among the first to apply motion pictures to intensive military training. The technical animation methods originated by Mr. Bray enabled hundreds of thousands of military men in 1917-1918 to become practiced, not only in tactics and drill, but in such necessary details as map-reading, "bomb throwing" and machine gun operation in a fraction of the time usually required.

Health Pictures of 1921 Still in Use

In 1920, Mr. Bray produced an experimental animated cartoon in color. In 1921, he brought out the *Science of Life* series of educational films for the United States Public Health Service, some of which are still actually in use today.

Among the pioneers on the Bray staff in the early years were Max Fleischer, animated cartoonist for Paramount; Paul Terry, for Twentieth Century Fox; Walter Lantz, lat of Universal; and John A. Norling, whose o firm, Loucks & Norling, was a leading fac in the industrial field for many years.



Three generations of Brays are still act in the Bray Studios organization. In addit

Filmed Case History of a Sales Meeting

Taking a Leaf from Its Own Book, Centron Corporation Shows How It Met Challenge of Phillips Sales Program

WHY IS IT that the barber who pushes hair-tonic is always bald-headed? And why is it that usually the last firm to make a film about its product is the motion picture company?

Centron Corporation of Lawrence, Kansas, recently decided to reverse this tendency. With all the attractive footage from a successful production available, why not utilize parts of it to show what a good producer-client relationship can accomplish?

The result is *Case History of a Sales Meeting.*

The 22-minute color film shows how the company met and handled a particular challenge. In this case it was a national sales meeting for the Phillips Petroleum Company.

Sought "Local Level" Touch

The problem involved a desire on the part of the client to give its national sales meeting the intimacy of a division-level presentation. Yet, it had to have the quality and impact of a company-wide meeting.

Important new products, technical information, and promotional plans required the active participation of Phillips' national officers. This meant that they must appear simultaneously at each of the company's 18 sales divisions.

Case History shows how the Centron group, working closely with Phillips officials, conceived the idea for a combination live-motion picture-slide film presentation, the various parts to dovetail into a fast-moving, 2½-hour show.

Rear-projection was employed to eliminate the distraction of projector noise and operators. The screen was incorporated into a portable set designed for easy adaption to any size room. The set folded into a single shipping crate, and the crate itself was utilized for speaker platforms. Eighteen duplicates of the set were made.

In *Case History,* entertaining use of stop-motion photography shortens this venture to chuckle-length.

The film enables the Centron staff to show their talents for creating music and comedy numbers as well as sales and educational material. Top talent, such as singer Anita Bryant and the comedy team of Rowan and Martin, enliven the production.

The set-up at a division meeting is duplicated to show how the pieces fitted together to tell the company story at the "local" level.

One portion of the film portrays a division sales manager and his staff conducting the meeting and introducing the "Six Keys to the Sixties." An example of the verbal exchanges between personnel on the screen and the live narrators demonstrates the over-all unity that was achieved.

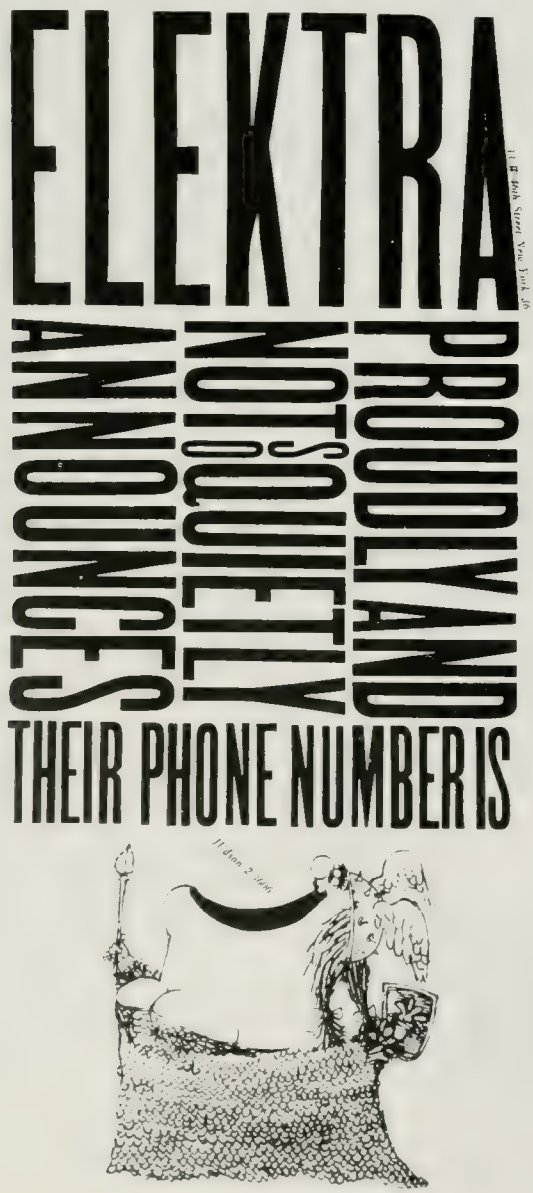
It shows how each division enjoyed its own, personalized sales meeting. Through filmed tours t the Phillips plant, company o cials explain the latest facilit and new products, and disc company objectives. Slidefilms a shown introducing dealers to t new look at various service s tions and giving them their fi look at the new Phillips uniforr They are told what has been a complished and shown the opp tunities ahead.

Pantomime, frozen action, a

Production and actual field experience *in the 1960 Phillips Petroleu Company's nationwide sales meetings are pictured in Centron's fil*

a bongo background are amo the innovations Centron emplo in its film.

In essence, it is a lively explan tion of the way the film produc and the client can work togeth to meet a specific need in an effe tive manner. Throughout, it stre es the close co-operation and a tention to quality that can be e pected from the film company.



Available for Company Use

Prospects interested in sal meetings get a capsule view of t Phillips show. (Described in BU NESS SCREEN, Volume 21, 1960 They also get a visual presentati of the business communicati services available at Centron.

Case History of a Sales Meeti may be borrowed by interest firms upon request. Results so f the company reports, indicate th the best mailing-piece a film pr ducer can send out is a good fil . . . its own.

To Err Is Human: We Find It's "Autopia" Not "Utopia"

The title of a new Budd Cor pany film reviewed here last iss was mistakenly given as *A Tr to Utopia.* The actual title is *Trip to Autopia.*

ualscope Offers Sample el Showing Its Technique

A sample reel that demonstrates the best of many special production techniques is currently being shown to prospective sponsors by Visualscope, Inc., a New York film production firm.

Capsulized in a concise seven-minute film are examples of filmography, semi and full animation, special squeeze, picture rhythm and night photographic techniques. Films serving as models for the demonstration were taken from Visualscope productions for Borden's, Four Roses, Lever Bros., Dow Chemical, Ladies' Home Journal, and others. Production facilities were in both Hollywood and New York.

Kitchen designed *for use in outer space is featured in new film . . .*

Food in USAF Space Kitchen Simply . . . "Out of This World"

☆ An unusual motion picture about an unusual subject—a kitchen designed for use in outer space—is currently in production at the studios of Wilding, Inc.

In order to show what cooking and eating in outer space will be like, the set is a mock-up of the original kitchen designed and built by Whirlpool for the United States Air Force. The lack of props is apparent; no knives, forks or dishes, no pots and pans or sinks—these would all be useless in space. Nothing will pour, it has to be forced; everything must be anchored or it will float away.

Bob Barron, in space suit and helmet, manipulates the kitchen in this film and appears as though he were in outer space. According to the producer, "It's not Grandma's home cooking, but it will be the closest thing to it in concentrated form."

The film will be used by Whirlpool for public relations purposes in industry, schools and civic groups.

Filmstrip Trains Personnel for Equipment Investment Analysis

☆ This 35mm color filmstrip dealing with equipment replacement and factors essential to any systematic analysis of investment has been produced by the Machinery and Allied Products Institute. Designed as an instructional aid for salesmen, engineers, financial personnel and executives responsible for the preparation of analyses on which investment decisions are made, the filmstrip can be used by any company as a training aid regardless of the system of equipment analysis employed.

Prints of *A Practical System of Investment Analysis—The MAPI System*, with printed script and guide, are available from Machinery and Allied Products Institute, 1200 18th St., N. W., Washington 6, D. C.

The Sports Parade: "World Series of 1960" on Film Is Sponsored by Coca-Cola for Nationwide Showings

The annual motion picture record of World Series' baseball play, depicting highlights of the 1960 championship classic, has been announced by the American and National Leagues of Professional Baseball Clubs and The Coca-Cola Company, sponsors of the widely-popular film.

A 43-minute color film, *The World Series of 1960*, was directed by Lew Fonseca, head of baseball's motion picture division and photographed by five camera crews under the direction of Dick Borden. Bob Prince narrates the action which includes all the dramatic, decisive action of the seven games from the opening pitch to Bill Mazerowski's Series-winning, ninth-inning homer.

Among highlights is a slow motion sequence showing Tony Kubek being felled by Bill Virdon's freakishly bounding drive, Mickey Mantle's 14th Series homer and Mazerowski joyously rounding the bases after that decisive home run hit.

Local bottlers of Coca-Cola have prints for nationwide distribution to youth and adult groups, clubs, business and industrial audiences and the myriad of other places where this "classic" among sports films builds million-fold audience totals during the year. The 1959 World Series picture was nominated for Baseball's Hall of Fame and viewed by 12,000,000 persons.

Latest Miller Sports Film is Football's '61 Pro Bowl Classic

☆ The excitement of football's greatest stars battling it out in a great game is captured on film in the Miller Brewing Co.'s latest sports title, *1961 Pro Bowl*.

The Best in Pro Football

The Pro Bowl classic, played before 63,000 fans in Los Angeles' Coliseum, features the finest professional players brought together for the eleventh annual east-west encounter. Highlights of the game include Baltimore's Johnny Unitas passing for 190 yards, running for 54 more, and making one of the most exciting plays of the season—a 44-yard touchdown pass to Lenny Moore made under what can easily be called impossible circumstances.

Plays like this, along with the patented one-man stampedes of Green Bay's Jim Taylor, earned Vince Lombardi's western conference team a 35-31 victory.

How to Borrow the Picture

The game abounds with stars and the Miller camera crew catches them all in action. Narrated by Chris Schenckel, the color motion picture runs 25 minutes on 16mm. Free use of this latest entry in the Miller sports film library can be obtained by writing Film Section, Miller Brewing Co., 4000 W. State St., Milwaukee 1, Wis.

Tabletop Viewer Aids Sales for Manufacturer of Women's Wear

Once again, use of the popular attache case slidefilm viewer has enabled the manufacturer of a line of women's apparel to roll up a major success story within the past several months.

L. Gidding & Co., Inc., manufacturers of Chubbettes and Trim-Teen apparel, which is sold to department and specialty stores by 12 sales representatives who cover the United States, used the Viewlex "Salestalk" sight and sound presentation to sell store management on the specialized line, and to teach sales personnel how to sell store customers.

"Salestalk" combines slidefilm or slide projection equipment with a synchronized high-fidelity phonograph, which fits into a lightweight attache case with a built-in screen. It can be set up in seconds on a desk or table top for presentation.

The Chubbette story was prepared on a 35mm slidefilm in an 11-minute color cartoon format, with correlated audio on a phonograph record. Chubbette representatives called on old customers, to show the training film to the salesgirls, and on prospective customers, to introduce the specialty line to the store management.

The fact that the film could be shown to sales personnel without setting up an elaborate meeting, or involving them in overtime was especially impressive to store managers.

Chubbette's "Salestalk" drive resulted in the opening of new accounts across the country. It created volume sales for stores and steady reorders, and in stores which already stocked the Chubbette line, the education of the salesgirls invariably led to marked increases in volume.

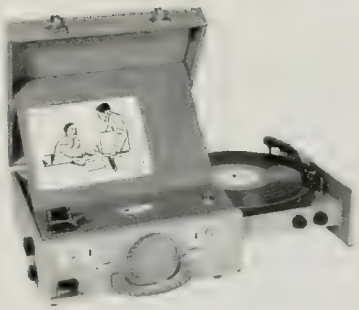
* * *

Slidefilm Series to Stimulate Sewing Interest Due This Fall

A series of four sound slidefilms on the Bishop Method of clothing construction developed by the Advance Pattern Company are now in production for release in the early fall of 1961.

The films, which are being produced by TFI Productions, are in color and are being sponsored by Talon Educational Service, Coats & Clark, Inc., John Dritz & Sons, J. C. Penney Company, and Advance Pattern Company. They are being prepared for use by home economics teachers and are designed to stimulate interest in sewing as a lifetime skill of economic and creative value.

The films include the following subjects: *Sewing Fundamentals, How to Make a Simple Skirt and Blouse, Cutting-to-Fit and Fitting,* and *How to Make a Simple Dress.* Major emphasis in each film is placed on simplifying the learning process. The Visual Materials are planned so they can be used by teachers after the film has been shown—for detailed instruction—or as a basis for class discussions.



The program is designed primarily for beginning students but can also be used with advanced students who wish to improve their methods and quality.

The complete kit contains four color filmstrips, two double-faced recordings and teachers' manuals.

Chubbette's Leonard Uman (ctr) shows apparel line to sales group.

FROM TEXAS TO EUROPE VIA K.L.M.

Scenic view of Amsterdam canal pictured in "Gateway to Gateway"

With a Theme of international travel via the "gateway to gateway" itinerary, KLM Royal Dutch Airlines is currently showing a color motion picture with a unique approach to regional travel promotion.

Gateway to Gateway succeeds in avoiding the conventional travelogue treatment while picturing a spectacular tour of the Continent by air and car. The 24-minute film opens at the Houston International Airport with feeder lines funneling traffic into the Southwestern gateway. The advantages of planning the tour with the aid of a travel agent are shown, and the camera takes the trip from there. Texas Industrial Film Company, Houston, was the producer of *Gateway*.

Touring the Continent

Royal Dutch hospitality aloft is covered, and the film then emphasizes the advantages of touring the Continent by car with Amsterdam as a base. The Netherland city's location as the gateway to Europe completes the gateway-to-gateway theme.

The tour covers the European capitals in gay style, and focuses on the historic contrasts in each of them. The pleasures of visiting the foreign shops (and the advantages of tax-free shopping) are described, and the holiday ends with the return to the American Southwest.

Let Camera Tell Story

Texas Industrial Film, as the producer, used an off-beat angle in shooting the film. A director-cameraman team was sent to Europe via KLM, where the director allowed the camera to tell its own story—and the script was prepared *after* the rough footage was processed. Background music was then selected to underline the charm of the European cities.

Special emphasis was given to the short time required to make the journey by DC-8 jet. The result is a motion picture production specifically tailored to the regional audience, and one that extols the advantages of using recognized travel agents in planning foreign travel.

Gateway to Gateway may be booked by contacting Regional Manager, KLM Royal Dutch Airlines, Mellie Esperson Building, Houston, Texas.

Mr. and Mrs. William Chanslor, *who appear in film, at premiere with KLM Regional Mgr. Cornellise and Al Tyler, Texas Industrial Films.*

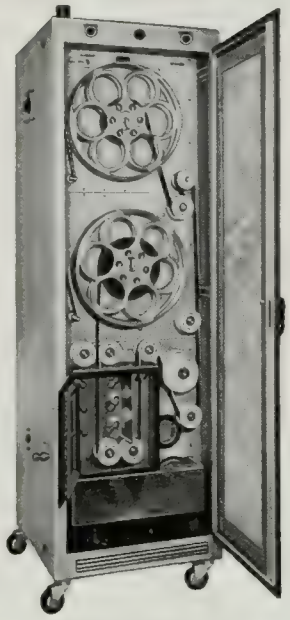
AEC Technical Report Filmed by University Production Unit

Atomic Energy Commission offices overseas and throughout the United States will make use of a new color motion picture produced by the Iowa State University film production unit.

Metals Frontier is sponsored by the Iowa State University Institute for Atomic Research, which includes the Ames Laboratory, a major installation of the AEC. Dr. F. H. Spedding is the director of the Institute and the Laboratory.



The 21-minute film illustrates the teamwork involved in research at the Ames Laboratory which led to the production of pure yttrium for use in nuclear reactors. Writer and director was Richard H. Kraemer of the film production unit, managed by O. S. Knudsen; technical advisers were W. E. Dreeszen and Burton J. Gleason of the Ames Laboratory.

Metals Frontier is available for showings by scientific groups, schools and other interested organizations through the AEC and the Iowa State visual instruction service.

TEL-Amatic® Neg. & Pos. 16/35mm Film Cleaner

Assures Better Results Than Machines Twice the Price!

The ultra-modern method to clean films safely! You cannot damage film with this highly advanced TEL-Amatic JET-SPRAY film cleaning machine. Extensive laboratory tests using films with the softest emulsions have proven excellent results. Also features silent timing belt drive, 3,000' capacity, speed in excess of 10,000' per hour and fine precision workmanship. *One person can handle a battery of TEL-Amatics—a great labor saver.*

Just a Few of the Many Features:

- Jet-Spray Film Wash for BOTH 16 and 35mm Film
- Curved Air-Blast Squeegees (pat. appled for)
- Special Non-Scratch Buffers
- Requires Only 15 feet of Leader
- Automatic Operation—Pushbutton Control
- Designed for Originals and Release Prints
- Continuous Air and Solution Filtering
- Take-Up Torque Motor, Adjustable, Reversible
- Electric Solution Level Indicator
- Complete operation VISIBLE at all times
- Variable Speed DC Drive

BUSINESS SCREEN EXECUTIVE

NEWS OF STAFF APPOINTMENTS AND A-V INDUSTRY DEVELOPMENTS

Niles' Merchandising Division to Service Business Communications

Keeping pace with its expanding diversification program, Fred A. Niles Productions, Inc., Chicago and Hollywood, is setting up a complete new Merchandising Division in the Chicago communications center.

Appointed to head the Division are Howard Scaman, as creative director and Robert Foster as sales director. They both come to Niles from the former Knipchild-Robinson merchandising agency.

In making the announcement, Fred Niles, president of the organization, said that the purpose of the new division will be to service industry in greater depth within the whole range of marketing and merchandising programs. "Sales communication projects have always been part of our services along with motion pictures, film and tape commercials, slidefilms and meeting presentations," he said.

"However, we have decided that the growing need for more thorough communications all along the marketing chain from the manufacturer to the retailer coordinating all levels of distribution, calls for a special division to concentrate solely on the developing and producing of this vital service to industry."

* * *

Borlek in Film Producer's Post at Fuller & Smith & Ross

Robert Borlek has been appointed to the newly-created post of producer of visual communications in the public relations division of Fuller & Smith & Ross, Inc., Chicago.

A veteran actor and director of Chicago stage, screen and television productions, he will be responsible for producing closed circuit television, motion pictures and sales meeting shows for client firms. He will also direct activities of the FSR Speaker's Bureau.

* * *

Worcester to Ted Bates Agency

Phillip L. Worcester has joined the commercial broadcast production department of Ted Bates & Company, Inc., as a television producer. He was formerly with Fuller & Smith & Ross, Inc., as a production supervisor, and previously director of television, radio and films.

* * *

Wylde in New Manhattan Studio

Wylde Films, Inc., has opened new production facilities and executive offices at 155 East 24th Street, New York city.

Zapel Studios, Chgo., Expands Operations in Firm Merger Deal

Zapel Studios, Inc., has bought the assets of Ross Wetzel Studios, with staff and equipment intact to operate at the same address, 615 N. Wabash Ave., Chicago.

Owen A. Zapel, who is taking over the administration, has been associated with Ross for four years since he closed his studio to share space and work with Ross. The arrangement permitted both corporations to operate together while remaining separate corporations at lowest cost to clients.

Zapel has been known for his presentation technique using Cellomatic animated projection. Zapel Studios has a franchise to use the Cellomatic animation technique in the midwest market area and has been providing these services for the past eight years. The affiliation with the Cellomatic Corporation in New York and Canada has been one of mutual cooperation and client servicing, even though there are no legal or financial ties at present.

According to Zapel, the studio will stress a policy of creating and producing high-quality art design, television animation and live action commercial filming. With the motto "Better Visual Communications," the studio has been active in the educational motion picture and slidefilm field, serving top producers in this area.

* * *

Gryphon Productions Formed by Ray Favata, Carlton Reiter

Ray Favata and Carlton Reiter, formerly known as Ray Favata Productions, Inc., announce a change in company name to Gryphon Productions, Inc., and a new location for their offices at 49th Street, New York City.

Ray Favata, creative director, is well known in animation. For 11 years his work has appeared frequently in top publications and exhibits such as Graphis, Art Directors' Annual, Society of Illustrator's Show and The TV Commercial Festival.

Carl Reiter has been in the film industry for 15 years following a career in illustration. In film he has been associated with the Signal Corps and later with Academy Pictures.

* * *

Edward Ettinger Now Executive Vice-President at Technicolor

Edward E. Ettinger has been elected executive vice-president of Technicolor, Inc., according to an announcement by Patrick J. Frawley, Jr., chairman and chief executive officer of the company.

* * *

Wagner to Head International Division of Bell & Howell Co.

Bell & Howell's International Division has announced three executive appointments:

Everett F. Wagner, a vice-president of the company and head of international activities, has been named president of the International Division; he was previously responsible for manufacturing in the company's Photo Products Division.

Werner Salzmann is now regional director of the European area for the International Division and managing director of Bell & Howell S. A., a subsidiary in Fribourg, Switzerland; he was formerly general manager of Diethelm & Co., Ltd., in Bangkok, sole distributors of Bell & Howell photo products in Thailand.

Ernest L. Schimmel has been named overseas marketing manager for the Business Machines Division, a vice-president of the International Division, and a director of Bell & Howell S. A. The International Division represents all of the company's diversified product lines overseas—photographic, optical, electronic and business machines.

New Officers, Plans Announced by Atlas

James Kellock Elected President of Communications Firm; Board Announces Expanded Services and Nationwide Offices

The newly-elected board of directors and officers of the Atlas Film Corporation was announced on Thursday, May 9, following the recent acquisition and reorganization of the business communications and film production company by a group of Chicago business men. James A. Kellock, veteran of more than 25 years in the field, was named president and chairman of the Atlas board. Other Atlas officers include Lawrence P. Mominee, as executive vice-president, and William J. Naftzger, attorney and former Howard County, Indiana, jurist,

James A. Kellock
President and Board Chairman

Lawrence P. Mominee
Atlas' Executive Vice-President

who is the corporation's secretary. Founded in 1913, Atlas is America's oldest industrial film company. Its only previous management change in 48 years occurred in 1946 when I. R. and A. B. Cohn, founders of the pioneer Oak Park studio, retired.

Other Atlas vice-presidents confirmed by the Board are Albert S. Radish, in charge of production, and James Herman, in charge of the Bloomfield Hills (Detroit), Michigan, office.

Active in Civic Affairs

The new chief executive officer is a former vice-president in charge of operations at Wilding, Inc. Mr. Kellock was also a founder and past president of Chicago Unlimited, a member of the board of directors of the Uptown Chicago Commission and is on the board of trustees of Monticello College.

An announced program of expanded communications services will include additional branch office facilities in Ohio and St. Louis, supplementing present Atlas offices in Chicago, Detroit, Washington, D. C., and Hollywood. Plans include the acquisition of personnel for the creation and production of business shows and sales meetings, rounding out the company's present activities in the field of motion pictures, slidefilms, and television commercials.

Full Scope of Services

In a policy statement following his election, Mr. Kellock noted, "We are building on a foundation of experienced personnel, to provide business with the full scope of modern communication tools. Research and creative talents, as well as already existing production and processing facilities, must be further implemented to serve management on all levels, from the president's concern with shareholder and employee relations, to everyday training and motivational needs.

"Group communications, utilizing the full range of today's audio and visual techniques, have become an integral part in all phases of business and labor relations, the Federal defense establishments, and throughout the Government's civilian agencies."

Atlas is presently a prime contractor to the Air Force and Navy, engaged in training film programs and has also recently completed a number of motion pictures and slidefilms for such national concerns as General Motors, B. F. Goodrich, General Tire & Rubber, Pure Oil, Dole Valve, Elkay Manufacturing Company, Chrysler, and others.

Coming Event! The Annual Review of Film Production Services will be announced in June for early fall publication. An "extra" for *all* subscribers and *the most complete* Buyer's Guide in the industry!

New AUDIO-VISUAL Equipment

Recent Product Developments for Projection and Production

15 Pound "Theatre-in-a-Suitcase" Makes Debut as Fairchild Unveils "Cinephonic 200," an 8mm Magnetic Sound Projector

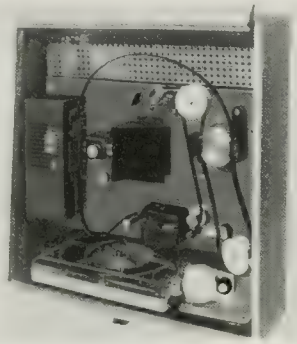
Kalart's "Soundstrip" *projector uses light to scan the sound.*

Revolutionary New Approach as Kalart Shows "Soundstrip"

☆ An entirely new approach in sound slidefilm projection equipment, called "Soundstrip" by its manufacturer, The Kalart Co., Inc. of Plainville, Conn., was unveiled recently at the National Convention of the Department of Audio-Visual Instruction, N.E.A., in Miami Beach.

In development for several years, the "Soundstrip" projector has been demonstrated to users of slidefilms and is presently being tested in programs for training, promotion and self-study.

The new device utilizes a rotating light beam to scan an optically recorded sound track on a still picture filmstrip. All other sound slidefilm projectors currently in use require a recorded disc for sound playback, synchronized either manually or automatically to the 35mm strip.

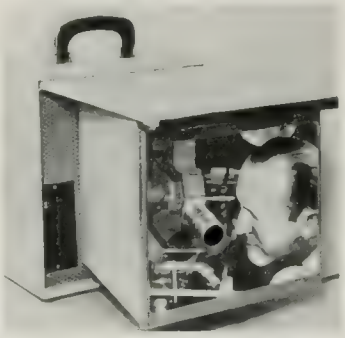


A "Soundstrip" program produced on standard 35mm motion picture film (either color or black & white) contains a series of pictures arranged alternately with recorded sound material in synchronized relationship. As each picture is projected on the screen, its related sound message is scanned and reproduced through a built-in amplifier and speaker. Each sound message can contain up to 18 seconds (or less) of program time. At the end of each sound unit, the film is automatically advanced to the next picture and sound frame.

Additional features permit interruption of the program at the end of any recorded message to add remarks about the program and repeat of any picture and its related sound message. Operator controls permit skipping portions of the film or rewind and review without loss of synchronization.

The "Soundstrip" also projects existing single-frame (captioned) 35mm filmstrips and with an accessory slide changer, it can project standard mounted 35mm slides. For additional information write directly to The Kalart Co., Plainville, Conn.

☆ What is billed as the lightest sound motion picture projector yet offered to American business was introduced to shareholders of the Fairchild Camera and Instrument Corporation on May 5th.



The new projector is an 8mm, magnetic sound rear-view instrument weighing slightly less than 15 pounds. Designated as the "Cinephonic 200" it provides projection on a self-contained rear-screen 11 x 8½ inches and can play continuously without reload or rewind from a 200-foot capacity magazine. Price is noted as "less than $400." The new

Interior view *of the compact "Cinephonic 200" projector . . .*

equipment was also demonstrated during an "8mm sound" seminar at the recent Society of Motion Picture & Television Engineers' convention in Toronto.

The "Cinephonic 200" which resembles a portable typewriter in its compact package will also have a 400-foot capacity counterpart, weighing about two pounds more. In describing the equipment, R. G. Hennessey, general manager of Fairchild's Industrial Products Division, said "the electronic amplifier uses printed circuitry and

How "Cinephonic 200" *appears with extended screen in use.*

precision Fairchild silicon transistors throughout.

"Initially," he pointed out, "the 'Cinephonic 200' will be marketed in select areas of interest, principally to sales organizations, direct by Fairchild. Although marketing plans are not yet completed, it is possible that the product will be available through franchised Fairchild Audio-Visual dealers some time late in 1961."

Camera Eyepiece Adapter Takes Prescription Spectacle Lens

☆ A special adapter making it possible for cameramen to have their prescription spectacle lens fitted in the eyepiece assembly of the Arriflex-16 is available from the Arriflex Corporation of America.

The prescription lens is permanently placed in a small subassembly, which may be slipped on and off the finder eyepiece. This slip-on assembly comes complete with its own cover door, and is machined to take 17mm diameter prescription lenses.

In cases where the same camera is to be used by other cameramen, a special blank slip-on is also available. The prescription lens holder (without lens) for $28.00, and the blank sells for $8.00. The adapters available on special order through franchised Arriflex dealers.

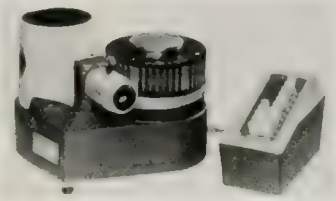
New High-Speed Editing, Rapid Inspection Table from CECO

A new high-speed editing table and viewer for rapid film scanning has been introduced by Camera Equipment Co.

The new unit, available in both 16mm and 35mm models, is ideal for television stations and film libraries where rapid inspection of prints, insert spots, and commercials is required before release. Features are high-speed, scratch-free operation from 0 to 250 feet per minute in both forward and reverse, and capability of stopping the film action on a single frame instantaneously without damage to the film.

Ceco's New Editing Table



The unit has a 4″ x 6″ screen and is equipped with a footage counter and optical sound head. Dimensions are: 60″ long, 30″ deep, 36″ table height, 54″ total height with 3,000 ft. reel. Price of the 16mm table is $2,500; the 35mm table is $1,750. For further details and specifications, write New Products Desk, BUSINESS SCREEN, Chicago 26.

New Projector Permits Random Selection of Circular Magazine

A new improvement in projection by Spindler & Sauppe of Los Angeles, makers of Selectroslide equipment, is the random access projector, Model SLS-750.

The Standard Selectroslide automatic projector uses circular magazines with up to 48 slides arranged radially, which can be interchanged in seconds. The new selection system consists of a remote push-button control unit equipped with fifteen illuminated push buttons. By pressing the appropriate button, the projector rotates the magazine, selects the desired slide, moves it into position and projects it.

Selectroslide's Model SLS-750

On the average, selection takes only three seconds. Five seconds are required for the magazine to make one complete rotation, and one second for the slides to move in and out of the magazine.

For further specifications and price, write New Products Desk, BUSINESS SCREEN, Chicago 26.

New Optical Multiplexer for Telecasting Films Is Unveiled

A new approach to optical multiplexing of television film projectors—to further improve broadcast studio film telecasting—was unveiled at the National Association of Broadcasters annual convention in Washington, D. C., May 7-10.

The revolutionary optical multiplexer, designed for General Electric by Eastman Kodak Company, uses front-surface mirrors, a new method that projects the best possible image from film and slide projectors into the film camera.

While designed to work with all standard projectors, the new type PF-11-A multiplexer can be combined with G-E's latest continuous motion television projection system for highest-quality film telecasting. The continuous motion system, which injects new life into old film, was first introduced to telecasters at the NAB show a year ago. It uses a projector developed by Eastman.

The 1961 version is designed so that the center line of the projector output is horizontal and 48

inches above the floor. While fitting the projector to work with General Electric's new multiplexer, the changes also allow stations to install the continuous motion projector while retaining existing optical multiplexing equipment.

The Type PF-10-B projection system, which can be used for telecasting all types of film programming, incorporates a diffused light system that practically eliminates the effects of scratches and dirt particles on 16mm film. The improved images are achieved through the projector's unique optical system; tilting, rotating mirrors follow the film as it passes easily over the projection gate, thus projecting an immobilized, stable image into the system.

For general studio operations, the system contributes to long film life by guiding the film over the projection gate without clamping, and film motion can be reversed for cueing or stopped for "still" projection at any time without harm to the film.

G-E broadcast equipment is manufactured in Syracuse, N. Y., by the Technical Products Operation of the Communication Products Department.

SMPTE Hears Eastman Speaker on Night Effects in Color Film

Simulated nighttime effects in color motion pictures using daytime photography were described by George T. Keene of Eastman Kodak Company's color technology division at a meeting of the Society of Motion Picture and Television Engineers in Toronto.

Night effects photographed during the day are important in motion pictures to enhance story lines and to add a touch of realism to more normal scenes, Keene said. Color motion picture films are not yet sensitive enough for use at night, he said. He also demonstrated with still pictures that photography at night does not actually simulate what the eye sees.

Previous methods for obtaining night effects on color reversal films relied on under-exposure. But improved films have made this method impractical because underexposing them gives a bright blue sky and unrealistic colors in the photographed scene.

Keene described experiments with exposure values, filters, and printing of reversal films to give the desired effect. The most successful method was overexposing the color film and then printing it on a film master to get the required density. A compromise of between normal and three stops overexposure will render artificial lights correctly while maintaining the color and tone scale that most observers associate with night vision.

Czech Describes Novel Picture Techniques

"Magic Lantern" Uses Live Actors With Filmed Images

A NEW AVANT GARDE motion picture technique was introduced to persons attending the 81st Semiannual SMPTE Convention. . . . a technique currently in use in Europe in which live actors act their roles side-by-side with their own or other actors' filmed roles.

Frantisek Pilat, Czechoslovak Film Corp., Praha, Czechoslovakia described *Magic Lantern* (*Laterna Magica*) to the Society of Motion Picture and Television Engineers meeting in Toronto, Ontario, Canada. *Magic Lantern* is the new art entertainment form in which, for example, a living ballet dancer might dance with a filmed partner. According to Pilat, the actor's action is "inseparably combined with the motion picture," giving the impression that both are live performers.

Won Brussels' Grand Prix

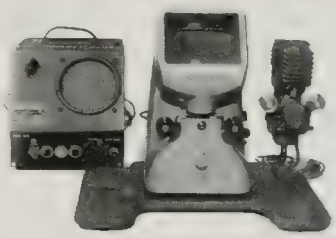
First shown at the Brussels World Fair where it was awarded the Grand Prix, *Magic Lantern* is now touring several European countries.

Pilat also described *Polyecran*, another technique closely akin to *Magic Lantern*. *Polyecran* involves simultaneous exposure to the viewer of eight screens, each displaying a different image related to the central theme of the presentation.

According to Pilat, "The new technology of wide-angle and panoramic motion pictures renders it impossible for the artists to use a quick composition of shots, large close-ups or rapid panning movements of the camera, i.e., to take advantage of the principal and specific means of motion picture art. Experience has shown, that the more the spectator is surrounded by the projection screen, the narrower is the choice of dramatic material which can be reproduced with the aid of these new technical devices."

The simultaneous projection system employs screens which, though variously arranged in space, are in direct connection with one another.

Screens of Different Sizes



The screens are of different size and differently inclined towards one another. On these screens the image from the motion picture or slide projector is thrown; the picture is accompanied by sound, which is reproduced over loudspeakers placed behind the various screens and around the auditorium. The projected picture, which completely fills the spectator's field of view, creates interrelated impressions and their synthesis produces in the spectator's brain a unified image.

To suit the action shown, at times only one screen is used for a projected image, with the action gradually spreading later to farther screens. At other times identical pictures are shown on several screens; or an overall picture is on the main screen and closeups are on the flanking screens. Black-and-white film can be combined with colored film, still projection with motion pictures, and a variety of other combinations and effects can be used.

Numerous shows produced for the *Polyecran* system have proved that it is an unusually adaptable means of expression for a new form of motion picture art. "It has also been proved," said Pilat, "that the spectators, who number more than 2 million so far, have no difficulties in grasping the artist's aims and the structure of the action or story, even if it proceeds on several screens simultaneously."

THE MOTION PICTURE IN LEGAL EVIDENCE

(CONTINUED FROM PRECEDING PAGE TEN)

contended that the possibilities of distortion, misrepresentation and prejudice are greater in the case of motion pictures, through control of camera speeds and editing, and that therefore more detailed authentication should be required for the admission of motion pictures than for still photographs.

Motion picture evidence may be put to a variety of uses in both civil and criminal cases. Except in litigation where the motion picture itself is the subject matter of the action (suits for infringement of copyright, libel and invasion of privacy, and prosecutions for obscenity, none of which are within the scope of this article), it must be remembered that the motion picture speaks as a witness. The picture describes, or redescribes, more fully and accurately, something that a witness could describe, or has already described, from the witness stand.

Films Can Re-Create the Actual Event

The primary use of the motion picture is to describe an event as it actually occurred, or to show a scene as it existed at the time of the events in controversy. No matter how well a witness recalls and describes a place or action that he has viewed, he may overlook some of the details. No matter what words he uses, they will not conjure up in the mind of the listener the precise picture that the witness wishes to paint. It is true that the camera does not record on film the same picture that the eye transmits to the brain, but it is also true that less distortion is likely to inhere in a photographic representation of a scene than in a verbal one. In this respect the motion picture has advantages over the still photograph, for it may travel, like the eye, over the scene. It is not limited to the representation of a single instant in time. A motion picture camera may pan over the scene of an accident showing the positions and relationships of various objects and the nature of the terrain; it may show the activities of persons, such as pickets involved in a labor dispute; or it may picture the plaintiff participating in activities which negate his claims of serious personal injury. In the criminal field, a sound motion picture of an accused confessing a crime not only is a record of that confession as reliable as a signed writing, but also indicates the conditions under which it was made and the physical and mental state of the maker in a way more convincing than would be the testimony of persons present during the confession.

Time May Vary from Issue at Litigation

Motion pictures may also be used to show a scene or action as it exists or occurs at a time different from the time at issue in the litigation. Thus, the appearance of an intersection to an approaching vehicle; the manner in which machines operate and are customarily operated; the field of vision available to a person in a moving locomotive cab; and a voluntary re-enactment of a crime by the accused may all be shown by motion picture evidence. Re-enactments, posed pictures and depictions made at a different time from the time in issue when used as direct proof of conditions or occurrences, are viewed with suspicion and received with caution. Not only must there be testimony that the film is an accurate representation of places or events actually observed by a witness, but there must also be proof that those places and events are the same or similar to the places and events in issue at the time. If there are any differences, they must be fully explained. However, such later views and reconstructions are valuable in giving the jury a clearer idea of the places and occurrences in question and in testing the accuracy of the witnesses to the crucial events.

Practical Means of Showing Experiments

On a different footing are motion pictures taken of experiments conducted by an expert and explained by him. Experiments illustrate and prove, to a level of scientific certainty, a number of valuable facts, and make intelligible the testimony of expert witnesses. It is often desirable for an expert witness to conduct an experiment for the benefit of the jury. However, the lawyer will recognize the impracticality and danger of conducting such experiments in the courtroom. It is difficult to remove and assemble the equipment often required, and disruptive to orderly proceedings. Worse, mechanical or human failure, in the tension of a trial, held in a courtroom designed for other purposes, may cause an experiment to backfire—with disastrous results. It is more practical, and equally impressive, to show a motion picture of an experiment conducted elsewhere. The foundational requirements for motion pictures of experiments are the same as for films generally. The experiment must be relevant to the issues, helpful to the jury and not unduly prejudicial. The film must show a fair and accurate record of the experiment as it was actually conducted by the expert.

It has been said that motion picture evidence will have its greatest effect if shown to the jury at the end of the trial day. Testimony, no matter how important, given after the showing of a film will not receive the full attention of the jury. Further, the jury will look forward to a variation in trial routine and their close attention will be assured. If cross-examination pertaining to the film is begun the next day, it will serve to re-enforce the impression made on the jury.

The attorney should strive for a smooth

presentation of the motion picture. To this end, the film may be first exhibited to the judge and opposing counsel to eliminate all objections that might interrupt the showing of the film to the jury. The opponent's experts may also view the film at this time, giving them a basis for commenting on it. Even though it is decided, in the in-chambers showing, that the moving picture is admissible, the attorney should still go through the steps of authentication before the jury in order to provide an introduction to the film, to increase their attention, and to impress them with its scientific accuracy as a reproduction of the matters shown. An effective presentation will be enhanced by close cooperation, based perhaps on a rehearsal, between the witness explaining the film, the projectionist and the attorney proposing its admission.

Court May Allow Jury to Study Film

When the film has been received in evidence, depending on local practice, the trial court may allow the jury to take it with them for further viewing during their deliberations. Counsel should see that the projector and screen also go into the jury room. This may create a problem —one trial judge is known to have required the screen and projector to be qualified and admitted as evidence—but the court should recognize that the projector and screen are merely mechanical aids for viewing the evidence just as are a juror's eyeglasses. A projectionist will not be allowed to accompany the jury, but counsel can set the film on the projector and should be allowed to show a juror how to focus; how to run and rewind the film.

It Takes People to Produce Winners

☆ Pictured above (in front of the Alexander Film Company's Colorado Springs studios) are some of the 30 company employees who had a hand in the production of *Oasis*, a two-minute TV commercial produced for Chevrolet-Corvair through the Campbell-Ewald Company, advertising agency.

The film was awarded a "first" in the automotive product category at the recent American TV Commercials Festival in New York (see page 38). It was filmed on location at the Great Sand Dunes National Monument in southern Colorado.

VIEWPOINT

Let's Have Better SOUND in Our Slidefilms

From Long Experience, Philadelphia's Albert Borkow Believes That the Word Is as Important as Pictures

Albert L. Borkow, Jr., founder and general manager of Philadelphia's Magnetic Recorder Reproducer Corp., believes that the *sound* is as important as the pictures in a sound slidefilm.

To prove his thesis he brings to bear an imposing array of supporting arguments, not the least of which is a substantial record of accomplishment and recognition in the production of sound slidefilms, or "sound/filmstrips," as he and some other producers identify them.

"Teach Best Through the Ear"

"You teach best through the ear and not through the eye," Borkow holds, "and an effective sound/filmstrip proves the point dramatically. Our experience in the field demonstrates that the 'word' is as important as the 'picture.'"

Borkow's dedication to the importance of the sound track is a natural outgrowth of an extensive background in sound reproduction. "From the beginning of our business," he says, "it was apparent to us that a good, punchy sound track was the key to the effectiveness of a multi-actor sound/filmstrip.

"The effort spent in creating and producing the visual part of a filmstrip may be wasted if the sound track recording becomes a rushed, last-minute affair. And with deadlines we're up against in this business often put producers in this position.

"Time is of the essence, granted," Borkow states, "but the producer who 'short changes' his audio work invariably sacrifices quality, believability and dramatic impact. There are no short cuts."

A Pioneer in Tape Technique

Borkow's theories spring from a solid background of experience in both the audio and visual fields. In 1947 Magnetic Recorder & Reproducer Corp. was a young but aggressive factor in the field of developing professional tape recording equipment and techniques. Borkow was a pioneer in developing the high-fidelity, low-velocity tape recording system and received signal recognition for his progress in this area from the Columbia Broadcasting System, for which, in 1948, he recorded two special sessions of the world-renowned Philadelphia Orchestra. These tape recordings were judged superior to the best commercial disc recordings being made at the time.

Other Borkow "firsts" included producing and recording the first stereophonic radio broadcasts in Philadelphia, as well as supplying material for the first tape recorded musical programs in the city.

Since 1951, Magnetic Recorder & Reproducer Corp. has produced all of the sound tracks, recordings and sound/filmstrips for Westminster Press, official publication arm of the United Presbyterian Church of America. All of these were major productions which have been seen or heard by millions of people in small, large and diversified audiences over the country, and some have been in continued use for ten years.

Programs for Human Relations

Other Borkow productions include sound/filmstrips dealing with human relations problems. These presentations have received critical acclaim from special audiences in many major cities.

Recently his organization produced a sound/filmstrip for the Helene Fuld Hospital in Trenton, N. J., dramatizing that institution's student nurse curriculum and health programs. Underwritten by the Helene Fuld Foundation of New York, the production has been hailed by hospital authorities, vocational guidance personnel and recruitment people alike.

Magnetic Recorder & Reproducer sound tracks incorporate many of the basic recording techniques developed and popularized by the company during and since pioneering days in the radio field.

Borkow serves as executive producer for every sound/filmstrip his organization produces. Under him, an audio director is directly responsible for the sound track. Following the cutting of the track it is "rough edited." Then follows a two-to-three-week period of editing, cutting and synchronization with the picture track.

Editing for Added Impact . . .

"This is the heart of our technique," Borkow explains. "Skillful sound track editing fashions the ultimate product we want. Where we need added impact, we get it. We may pick up or accelerate lines, build up the intensity for situations not anticipated in recording sessions, which might otherwise be too costly and time-consuming to re-record."

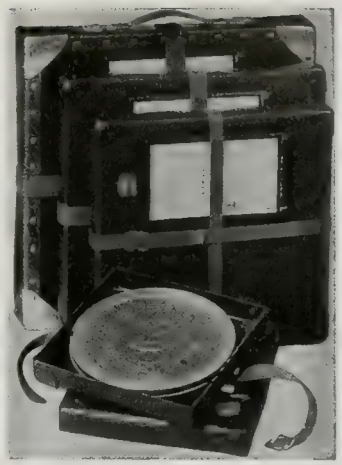
Along with his numerous refinements in the sound end of filmstrip production, Borkow has pioneered in significant advancements on the visual side. Magnetic was one of the first producers to adopt the rapid frame change technique. In sequence shots, frames are sometimes changed as often as every half second.

"With 200 to 250 frames in each of our sound-filmstrips," Borkow points out, "we are far above average. But our large cast sound recording and picture-sound track integration techniques enable us to use a larger number of frames with considerable impact. We produce a fast-moving vehicle which immediately secures audience interest and holds it to the very end."

Borkow's confidence in his techniques is matched by his faith in the medium in which he employs them. Thus, he takes sharp issue with producers who sell the sound/filmstrip as a "poor man's substitute" for the motion picture.

Sell on Merit, Not Economy

"The sound/filmstrip should be sold on the basis of merit, not economy," he says. "While it may cost less than the motion picture, this is not a primary consideration. As a medium, it is, in many applications, superior to the motion picture. It is often more adaptable to the subject, and it avoids many of the limitations of the motion picture."



Borkow believes that his chosen medium and his specific techniques hold great promise for many commercial applications, such as sales promotional and training efforts and special industry projects.

And he thinks it only a matter of time before many commercial users discover the merits of his theories on sound tracks, rapid frame change and co-ordination between sound and picture tracks.

Kalart/Victor Projectors Help Sell Porter-Cable Suburban Riders

Porter-Cable Machine Company chose Kalart/Victor as the best possible 16mm sound projector for use by its distributors in presenting an important new sales film on riding mowers and tractors. Here's why:

1. Simple threading a key requirement. Porter-Cable needed a projector that can be threaded and operated by people with no previous experience. Kalart/Victor meets the need perfectly. It is threaded in 3 simple steps, with a color-coded path to show sequence and location.

2. Film safety important to Porter-Cable. No projector guards against film damage more effectively than a Kalart/Victor. Safety Film Trips—an exclusive feature—stop the projector in emergencies, before film is damaged.

3. Can it be set up anywhere? Porter-Cable likes the top-mounted reel feature of Kalart/Victor projectors. With both reels out of the way on top of the projector, any level surface may be used for setup. Projectors were made suitable for use even in small rooms since they were purchased with 1½" lenses instead of the standard 2" lenses.

What features are you looking for in a 16mm sound projector? Great picture quality? Magnificent sound reproduction? Outstanding durability? Adaptability for magnetic recording and playback? Kalart/Victor has them all—and more to boot. Call your Victor Dealer for a demonstration.

Close-Ups and Long Shots on Noteworthy Names & Events

Cinema Labs Expand Activity: Name Bergin Exec Secretary

The Association of Cinema Laboratories has embarked on an expanded program of activities, retaining Preston B. Bergin of Washington, D. C., as its Executive Secretary.

Byron Roudabush, association president, and head of Byron Motion Pictures, Inc., Washington, D. C., notes that the expanded activities are designed to enhance the consumer and public relations of the motion picture film laboratory service industry.

ACL president Byron Roudabush (l) with exec. secty. Preston Bergin.

The annual volume of domestic laboratory services is estimated at upwards of $100 million, Roudabush said.

The Association, which is seven years old, comprises some 60 laboratories throughout the United States engaged in supplying commercial motion picture laboratory services, including the processing and printing of motion picture film.

Long Record of Experience

A former newspaperman, Bergin has engaged in public relations and trade association activities in Washington for the past 15 years. He also serves as Executive Secretary of the National Association of Blueprint and Diazotype Coaters.

According to Roudabush, the Association's expanded activities will include programs to improve the industry's technical practices, quality and performance of its products, and its relations with government in such areas as product specifications and taxation.

Standing Committees Named

The Association's programs will be shaped by a series of Standing Committees, composed of industry representatives, subject to the approval and direction of the Board of Directors.

Committee chairmen include: James A. Barker, Government Affairs; William E. Gephart, J. Nominating; Sidney P. Solc Trade Practices; Garland C. Mi ner, Product Specifications; S Jeffee, Membership; Reid H. R. Publications; Fred Scobey, Tec nical Practices; and G. Carlet Hunt, Program.

Announcement of the Assoc tion's expanded activities result from action taken by the AC Board and its membership meetings held May 11-12 in T ronto, Canada, during the conve tion of the Society of Motion P ture and Television Engineers.

Develop Better Supervisors and Managers With

Modern Management Films

Make your supervisors better leaders with Modern Management Films, produced in full color and sound by The Bureau of National Affairs.

These 16-mm films present typical supervisory situations and suggest solutions to supervisory problems in an interesting and stimulating way. They are designed to precede and encourage group discussions.

Each film is about 10 minutes long, and is supplemented by a discussion leader's guide. A 95-member advisory panel of leading industrial executives suggests subjects and reviews scripts to make sure they are realistic and sound in principle.

More than 1,000 firms have successfully used the first Modern Management film, "LISTEN, PLEASE." We now offer the following films:

LISTEN, PLEASE... a series of situations in a supervisor's typical day which emphasize the importance of *listening* and *communicating*.

THE CASE OF THE MISSING MAGNETS... showing how a supervisor can motivate employees for better teamwork and production.

INSTRUCTIONS OR OBSTRUCTIONS... Dr. Paul Pigors of M.I.T. demonstrates the primary task of supervision: *giving orders and instructions to others.*

THE CHALLENGE OF LEADERSHIP... a dramatic demonstration of leadership. Designed to stimulate supervisory thinking about leadership skills.

Available for purchase or rental.

Screen Directors Re-Elect Willard Van Dyke as President

Willard Van Dyke, well-known industrial and documentary film director, creator of *The City* and other celebrated films, has been unanimously re-elected to serve a second term as President of

Willard Van Dyke

Screen Directors International Guild.

Other officers elected to serve for a one year period are: Don Hershey, First Vice-President; Jack Glenn, Second Vice-President; Joseph Lerner, Secretary; and Robert J. Kingsley, Treasurer.

The new executive board will include: Robert Anderson, Herman J. Engel, Paul V. Falkenberg, Ben Bradus, Lewis Jacobs, Howard T. Magwood, Sidney Meyers, Harry Randall, Leo Seltzer, Shepard Traube and Nicholas Webster. Leo Hurwitz, Fred Pressburger, George C. Stoney and Al Wasserman will serve as alternates.

New members of the Auditing Committee are: Julius Edelman, Chairman, Stanley Ackerman and David Reisman.

George L. George will continue as Executive Secretary and Erwin Feldman as Guild Counsel.

Peter J. Mooney

Elect Mooney Vice-President; Gansell is Secretary at Audio

Peter J. Mooney has been elected vice-president of Audio Productions, Inc., as announced by Frank K. Speidell, president. Alexander E. Gansell becomes secretary of the company. Both Mooney and Gansell have been with Audio more than 25 years—Mooney as secretary-treasurer and Gansell as one of Audio's producer-directors.

Pete Mooney is a past president of the Film Producers Association, and has been a constructive leader in the sponsored film industry for many years. Alex Gansell has earned many credits for award-winning pictures, among them last year's *Seconds for Survival*, for the Bell System, and the recent *Where Mileage Begins* for General Motors.

KNIGHT TITLE SERVICE
145 West 45th St., New York, N.Y

Mr. R. E. Morton, Executive Vice President, Morton Manufacturing Company, uses a Kodak Sound 8 Projector to add his voice to the sound track of an 8mm movie made in his plant.

lesenting ideas for custom machine tools, materials ndling equipment and other custom industrial achinery by talking from blueprints and models ives too much to the prospect's imagination, ac- rding to the Morton Manufacturing Co. of Mus- gon Heights, Michigan.

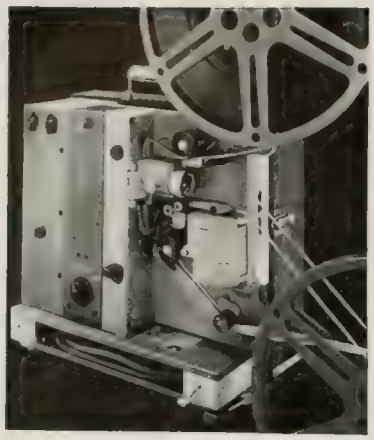
Sound movies, they felt, could show more and tell ore in a more understandable way. *But what out costs?*

Then they heard about the new Kodak Sound 8 rojector—the portable machine which has raised *w-cost* 8mm movies from a home hobby to a prac- al tool for industry.

With the Sound 8 Projector, Morton could: 1) ep their movie-making costs low; 2) add their own sound to the film and change it at will by using this projector's built-in recording system; 3) be sure of a professional movie presentation, since this projector enlarges tiny 8mm movie frames to fill room-size screens with optimum detail and definition and plays back with excellent sound quality.

Make movies themselves

By photographing scale action models and piecing this film footage together with scenes of actual working machinery of designs similar to those they want to demonstrate, Morton can assemble a very informative movie.



Then comes the sound. Voices, machine noises on location, even background music are first tape-recorded, then transferred to the 8mm film magnetic sound track through the Kodak Sound 8 Projector recording system.

The Sound 8 Projector works like a tape recorder, even has its own microphone. Recording, erasing, re-recording (a different sound track for each audience, if need be) is simply a matter of "recording" while projecting the film.

Morton keeps a Kodak Sound 8 Projector in offices at Philadelphia, Muskegon, and San Francisco, so that demonstration films can be shown at every opportunity.

If this example gives you ideas, call your Kodak Audio-Visual dealer for a demonstration, without obligation, of the Kodak Sound 8 Projector and its low-cost movie potential.

Kodak Sound 8 Projector 〉 **EASTMAN KODAK COMPANY,** Dept. 8-V, Rochester 4, N. Y.

RCA 16mm "Life-Tested"* Projectors make it their business to please business people

How? Simply by serving them best with features that matter most to everyone in business and industry who uses 16mm projectors constantly.

You'll find RCA the easiest to operate of any 16mm projector, thanks to thread-easy film path, one-side controls, one-switch operation.

You'll spend least on maintenance, because RCA's induction-type motor lasts the projector's lifetime, slower claw mechanism of abrasive-resistant "stellite" doesn't wear itself out.

You'll give films maximum protection, with RCA's big sprockets, feather-touch aperture, plate, oversize cooling blower.

. . . *plus* sharp, square-corner picture, built-in lubrication, power to spare amplification of sound, finest-fidelity reproduction of both highs and lows. *Reverse models* available, too.

See and hear them at your RCA Audio Visual Dealer's — a worth-knowing specialist you can easily locate in the Classified Directory under "Motion Picture Equipment and Supplies."

*Rigid endurance standards have been set for RCA "LIFE-TESTED" Projectors. Individual components as well as finished projectors are subjected to continuous testing to evaluate the durability and efficiency of all operating parts. "LIFE-TESTED" at RCA means better, more reliable performance from RCA Projectors.

Camera Eye

THE EDITORIAL VIEWPOINT

New Means of Projection Challenge to the Creators and Sponsors of Films

Today's rapid advances in the technology of audio-visual communication are to be welcomed and *worked with:* 8mm sound, Videotape, automated slide and slidefilm equipment and even a new Italian-made rear-screen 16mm sound projector that gives the viewer push-button choice of 40 different film titles!

All of these devices, fortified within a year or two by satellite-bounced transmission of images and sound across the oceans, will bring sight/sound communications to enormously-expanded potential audiences. The urgency of better worldwide understanding is highlighted today by tensions over the status of West Berlin; tomorrow it will continue critical in the underdeveloped areas and among the uncommitted nations of the whole world.

But we cannot, as J. W. Krutch has warned in his book, Human Nature and the Human Condition, accept "the delusion that the mechanical techniques of communication are interesting in themselves, no matter what it is we wish to communicate."

For *ideas are still paramount* and the future belongs to the creative, original maker, director, writer and sponsor of meaningful, useful pictures. In this vein, two pieces in this current issue stand out as *lighthouses* of what business can and must do to meet the skepticism of a new Administration as well as the challenge of *doing good* for good, basic and, in the long view, *profitable* reasons.

The contribution of Johnson & Johnson toward annual exhibitions and the international exchange of medical knowledge through the film medium is described on page 25; it is logically followed by the story of Ford International's excellent film on rural youth activities in Latin-America (pages 26-27).

Wake up, business! The aftermath of the price-rigging scandals, the attack on television's network programming, the negative and often-hostile attitude of the new Administration toward business in general calls for vigorous, clear-thinking, honest assessment of our basic economic system and aggressive, helpful delineation through the powerful, compelling visual media at hand.

Parke, Davis; Kimberly-Clark Films Win Top Honors at Turin Festival

The 15 sponsored motion pictures sent Second International Industrial Film Festiv at Turin, Italy (held June 25-28) brought tw first prizes to America. The Parke-Davis-spo sored film, *Better Medicine for a Better Worl* produced by The Jam Handy Organizatio was one of these winners. The other first pri went to *Faces and Fortunes*, an imaginati Kimberly-Clark film produced by Mort Goldsholl Design Associates, Chicago.

A special prize was awarded to Walt Di ney's *Circarama* presentation, a program pr pared for the "Italy '61" celebration of th nation's 100th year of representative gover ment. *Better Medicine* won top honors in th Scientific Research category; *Faces* was fir among Sales and Marketing films.

* * *

Business Will Find the "Initiators" Among Groups Viewing 16mm Pictures

Speaking of corporate public relations, th respected Opinion Research Corporatio notes that "traditional thought leaders wooe by corporations—such as doctors, lawyer politicians—are not the real 'influentials.' "

In its recent Public Opinion Index for It dustry, the ORC says "public relations shoul be aimed at what it calls 'initiators' who ar identified by such things as interest in con munity affairs."

Business will meet these people best in the community organizations—clubs, lodges meeting halls, churches, etc. It will find ther in PTA groups, Grange halls, Legion posts— in the places where 16mm sound films cor tinue to go in ever-increasing numbers. Th service clubs count the "initiators" amon their members and it is these audiences wh will be stirred to action and decision by trul useful, meaningful, original films.

ARRIFLEX PRESENTS...

NEW DIMENSIONS TO THE VERSATILE ARRI SYSTEM

FOR THEATER-QUALITY SOUND FILMING...

SYNCHRONOUS SIGNAL GENERATOR*

Lip-synch recording with ¼" tape

The most desired portable professional motion picture camera in the field achieves a new dimension... new production versatility...with this Synchronous Signal Generator. (Illustrated on Arriflex 16—similar installation also available for Arriflex 35.)

Standard battery operates the governor-controlled DC motor on the Arriflex—**no need for generators or invertors to supply AC.** As camera runs, the Synchronous Signal Generator produces a 60-cycle current, which is fed to a special recording head mounted on a tape recorder. This puts a control signal on ¼-inch tape at approximately 90 degrees to the audio signal. In re-recording to film—magnetic or optical—this control track is amplified and controls speed of playback, maintaining frame-by-frame synchronization.

This unit can be installed on all Arriflex models.

*Licensed by and compatible with "Rangertone," Newark, N. J.

The Wide World of Sponsored Pictures

Millions View "Petrified River" in U. S. and Overseas

The Petrified River, a film about peaceful uses of uranium, sponsored by Union Carbide Corporation, has proved to be one of the more popular pictures among community groups, according to Modern Talking Picture Service, distributor of the picture.

More than 1,500,000 people have seen the film in showings given by some 27,721 clubs, employee groups and other adult audiences in the United States, and school figures are even higher. More than 60,000,000 people are estimated to have seen the film on television. It recently received its 1,000th telecast.

In addition, *The Petrified River* has returned dividends of good will for the United States from overseas. Translated into 24 languages, it has been shown in 72 countries by the United States Information Agency. Its international reputation has been enhanced by film awards won in both the Edinburgh and Salerno film festivals.

The film gets its name from the prehistoric rivers whose beds lie buried under the mesas of the Colorado Plateau. Over 150 million years ago the precious uranium was deposited in these ancient river beds. Much of the film footage was photographed in that colorful region of flat-topped mesas and strange rock formations.

The United States Information Agency uses the film to show America's intention to use uranium for peace and to illustrate the numerous benefits which atomic energy can give the world when used for constructive, peaceful purposes. Other government agencies distributing the film include the United States Bureau of Mines and the Atomic Energy Commission.

The Petrified River was produced by MPO Productions with the technical assistance of t Atomic Energy Commission.

Niles Crew at Auto Class as Dow Comaradi Team Wi

A Fred A. Niles Productio film crew secured action-pack material for a motor racing moti picture when the United Sta COMARADI team won top hono at Germany's Nurburgring 1,0 kilometer sports car classic May 28.

Driving a "time 61 Maseratt the COMARADI drivers finished t race in seven hours, 51 minu and 39.02 seconds, providing G don Weisenborn, director of t Niles' film, with a dramatic clim as the winning team of Mast Gregory and "Lucky" Lloyd Casner crossed the finish line.

This is the second consecut year that the U. S. COMARA team, sponsored by the D Chemical Company, Midla Mich., producer of the film, h won the Nurburgring classics. T team's winning drivers last y were Sterling Moss and D Gurney. That victory marked t first time in 34 years that American team has won a Eu pean motor race.

The Niles' crew plans to sh the Vingt-Quatre Heures de Mans classic for sports and "gr turismo" cars in France bef returning home to edit the fil Weisenborn, with Andy Costiky at the camera, has also tak footage of the Targa Floria ro race held April 30 in Sicily a the Grand Prix de Monte Ca for Formula I cars held in M

Florman & Babb to Hold Second Animation Film Workshop

FLORMAN & BABB, Inc., will again sponsor a workshop-seminar in animation film techniques.

The program will feature 30 leading animation experts in different aspects of animation film production, both basic and advanced. Practical workshop demonstrations and practice sessions utilizing the latest types of representative animation equipment will be an important part of the program.

Also scheduled are round-table discussions, frame-by-frame technical analysis of animated films, special equipment exhibits, visits to animation film studios and screenings of the latest in animation techniques.

The workshop-seminar will run for four full days (including evening sessions). There is no charge for the course.

The F & B seminar will be directed to the needs of the animation film producer as well as the industrial, university and government agency motion picture departments. Over 100 persons attended the first Florman & Babb workshop-seminar held in June, 1960.

Those attending represented such industrial firms as Ford, General Motors, Thiokol, Kodak, Lockheed, Boeing, North American Aviation, Martin, General Electric, IBM, Republic Aviation; such government agencies as Redstone Arsenal, U. S. Public Health Service, N.A.S.A., U. S. Army Air Defense Command, Federal Aviation Center; and studio personnel from Jam Handy, Holland-Wegman, Centron, Robert Lawrence, plus many universities and colleges.

Due to the overwhelming response to the first workshop-seminar, many applicants had to be turned away. But thanks to expanded facilities, the second F & B seminar, this year, will accommodate 200 or more. Those interested may write to Charles Lipow, Coordinator, Florman & Babb, Inc., 68 West 45th Street, New York 36.

Arthur Florman commends Ted Nemeth's Mary Ellen Bute on her 1960 Workshop presentation.

New GM Version of "Where Mileage Begins"—Study of Automotive Engine

SPONSOR: General Motors Corp.

TITLE: *Where Mileage Begins*, 25 min., color, produced by Audio Productions, Inc.

This is a film with a pre-conditioned ready-made audience. For 19 years, schools all over the country used and appreciated a General Motors motion picture showing how a typical six-cylinder engine is constructed. Its title was *Where Mileage Begins*, and it was made by Audio Productions in 1940. The new version, just released, has a new engine, color instead of black-and-white film, and it will probably be one of GM's most popular subjects in 1980.

As with its hoary old counterpart of the same name, *Where Mileage Begins* is simply an engine (a Chevrolet V-8 this time) putting itself together in the timeless stop-motion movie-magic technique of the marching beer cans, etc. Pistons waddle in and dive into the cylinders all by themselves, bolts march up in smart precision and whirl themselves into place. It isn't a new technique, of course, but it is thoroughly well done, and nothing could tell the story with more clarity.

Technical animation sequences are introduced at various points in the film to show how the four cycles of internal combustion operate, how the flow of electrical current produces ignition, and how cooling water circulates throughout the block and radiator.

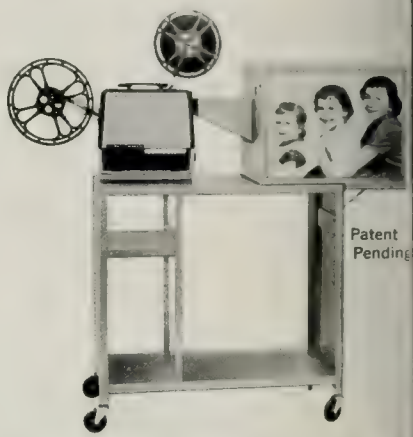
Where Mileage Begins will take its place in the GM Film Library, which has branches in Detroit, New York and San Francisco.

Trout Fishing in Ireland is Theme of Charming New Pan American Picture

SPONSOR: Pan American World Airways.

TITLE: *Fishing in Ireland*, 6 min., color, produced by MPO Productions, Inc.

The special magic of Larry Madison with a fish framed in his viewfinder is evident in this charming little film about trout fishing in Ireland, in May.



Working with a fine broth of a script by Jack Rowles, Madison's film is aimed dead-on at the thirty million Americans who like to fish—and this Irish fishing is something special.

Mayflies, delicate winged creatures, hatch in Southern Ireland in May, and live but a day. The Irish angler puts two flies on a very fine, short-shanked hook. Downwind, the twin Mayflies float—or fly. They soar above the blue waters of the lakes and streams as naturally as can be—until hauled down to tantalize a trout. It's called blow-line fishing—or "dapping." Three, four—up to twelve pound brown trout are plenty for the taking in these beautiful Irish lakes.

The film suggests that your wife will probably come with you—only to take an embarrassing number of fish that really belong to you. But her interests will surely turn to the peculiar Irish charm and beauty—the greenness, yellow gorse, white thorn, thatched cottages and castles.

And, of course, we're all only a day away—as the big bird flies. Pan Am, that is.

A rolling theater that shows big, clear films in rooms sunshine bright . . . or anywhere.

The Wilson Movie-Mover RP is the on rear projection unit that uses your present 16mm projector—any make.

IT'S NEW AND CHALLENGES THE IMAGINATIO

Sound Head Threading Is Gone for Good

with the All-New GRAFLEX Galaxy®

IMPORTANTLY ADVANCED in every aspect of its operation and performance, the *all*-new Galaxy established many new criteria in 16mm projection.

For example, you'll never need to thread another sound head. Slide film into a slot, flip a lever, and film is positioned, sound loop formed, and sound head threaded —all accurately, instantly, *automatically!*

Galaxy, throughout its entire operation, is easy, positive, and fast. Grouped pushbuttons provide exclusive new full fingertip control of start, still, stop, and *both* light levels of its unique new high-intensity lamp. At normal brightness, equivalent to 800 watts, lamp life is extended a remarkable 10 times—to a minimum of 150 hours! For dense prints, long throws, or minimum room darkening, you don't change lamps—just push the "Hi" button for the equivalent of 1200 watts—a brilliance surpassed only by carbon arcs!

Galaxy's smooth, rapid rewind is also pushbutton controlled—without handling reels, reel arms, belts or gearing. And, take-up reel and reel arm are always ready for your next film.

Add to all this the outstanding quality of a new sound system incorporating an exclusive phototransistor for hiss-free sound pickup, plus a full 15-watt high-fidelity transformer-powered amplifier. And, for the first time, separate bass and treble controls give you *full* control of the acoustically designed speaker system . . . provides richest music and most natural speech. It is the finest projector ever available to the 16mm field—brightest, coolest, quietest and by far the easiest to use. For a demonstration of the all-new Galaxy, call your Graflex AV dealer or write directly to Graflex.

WASHINGTON FILM COMMENTARY

by Mary Finch Tanham

Washington Correspondent for Business Screen

NASA Film, Freedom 7, a Thrilling Flight Into Space

According to reports from the Second Annual National Convention of the Industry Film Producers Association, there were "hundreds of favorable comments" about the off-the-cuff Space Agency presentation which included the first historic premiere of *Freedom 7*, NASA's magnificent documentary film accurately dramatizing in color Commander Shepard's historic space flight. The 28-minute film, soon to be released to the public, highlighted the actual sound track and "on board" photographic recording made during the suborbital flight.

Powers Stresses Time Factor

The National Aeronautics and Space Administration's Bob Hemmig and Project Mercury Information Officer, Lt. Col. John ("Shorty") Powers, USAF, led off the program with informal questions and answers about the utilization of engineering photography and data for documentary films. Colonel Powers stressed the fact that technical films, such as those of man's first flight into space, must be used *at once* to be of real value to science, industry and the public.

"This film of a milestone event was one of the most emphatic uses of documentation" said the Air Force Colonel, whose phrase "everything is A-O.K.," was heard with relief by millions of anxious radio and TV audiences during Commander Shepard's flight and on the following journey by Captain Gus Grissom.

You Are Orbited in Space

The color two-reeler, which was scripted by Clifford Peacock, subjectively orbits the viewer into space as surely as if he were there. You, in the audience, go through two years of grueling training with the astronauts, learning to handle every possible simulated condition which might confront you in space. You practice controlling the pitch, roll and yaw of the capsule; you float through weightlessness like Martian fish; you study, and dream, and become an integral part of an unbelievable "system." And then, early one morning, you walk out to the dark launch pad, look up in awe at the beautiful, manmade "bird" which will blast you off the face of the earth—and . . .

NASA Astronaut Alan B Shepard, Jr. shown in Mercury spacecraft before sealup. A scene from "Freedom 7."

Even though the results of that May 5, 1961 flight are history for the audience, the actual films inside Commander Shepard's space capsule are so dramatic that almost unbearable tension is built up in the viewer. You, again, watch with apprehension when the astronaut's eyes flicker across the instrument board; when he is descending, the "G" forces are felt in the pit of your stomach; afterwards, the relatively quiet calm of a helicopter ride is anticlimax.

One of Year's Best Films

Thanks to NASA, millions of earthmen will take this once-in-a-lifetime trip to space via film. Without doubt, *Freedom 7* is a fine example of the way in which historic events can be documented for the public in a memorable way.

* * *

Major Walker Now Chief of Air Force-Sponsored Program

"Chief, Sponsored Film Program" is the brand-new title which has been created for the key man in the big Air Force industry-sponsored film program. Major "Johnny" Walker, formerly with the Office of Information in the Strategic Air Command and the Information Plans and Programs Division in the Pentagon, is filling the new post.

Major Walker will handle all inquiries and script approvals; he may be reached in Washington by phone at Oxford 7-4425, or by mail c o SAFOI-38, Washington 25, D. C.

600 Prints of "Challenge of Ideas" to Armed Forces

The armed services have ordered more than 600 prints of the new Defense Department film *The Challenge of Ideas*, dramatizing the struggle against communism. As narrators, the film features Edward R. Murrow, head of USIA; Helen Hayes, John Wayne and Hanson W. Baldwin, military editor of THE NEW YORK TIMES.

* * *

Don Baruch New President of Washington Film Council

Donald E. Baruch, Department of Defense film specialist and U. S. delegate to the Venice Film Festival, is the new president of the Washington Film Council for the 1961-62 terms. Ashley Beattie of CIA and Mabel LeFevre of OEEC will serve as vice-presidents.

* * *

Federal Aviation Agency Films in Production, Script

The Federal Aviation Agency, which has developed one of the most active programs in the Government, has just awarded two new film contracts and one script for a big "p.r." film.

Holding Pattern Procedure will be filmed by Creative Arts, Inc., of Washington, and *ATC Radar Terminal Procedures, Part II*, will be produced by the DeFrese Company, Philadelphia. The public information motion picture, which will cover the whole spectrum of Air Traffic Management Services for the public, is being written by Coe-Peacock, Inc. of Washington.

Tony Jowitt, Chief of the Motion Picture Branch of FAA, also announces that *In These Hands*, an orientation film for electronic maintenance technicians, produced partially by FAA and Wilding, Inc., is nearing completion. *Path From the Sky*, a part animation, part "live" film, being produced by Norwood Studios, Inc. of Washington, is in this same stage.

* * *

Sgt. Queen Joins Red Cross Following Army Retirement

Stuart A. Queen, for eight years host-narrator of the Army's weekly television series, *The U.S. Picture*, has joined the public information staff at American Red Cross headquarters in Washington.

Known to millions on TV as "Mister Army," Queen recently

red with the rank of Master Sgeant after 20 years of service, th last 15 as a public information epresentative, specializing in ra-o and television programs. In H new position, he will work vh national organizations, inter-peting Red Cross programs to tir memberships with the ob-jtive of increasing their partici-ption.

* * *

ternational Trade Fairs' ble Shown in New Picture

Since 1954, 63 million people ound the world have viewed merican exhibits at International de fairs. Jointly sponsored by ilustry and the U. S. govern-ent, the objective of this educa-onal, good-will program has len "to tell adequately the story our free and competitive enter-ise system and to provide effec-e trade promotion coopera-on." It has been most successful. Business leaders have said: "I lieve the Office of International ade Fairs is of great assistance American manufacturers in omoting sales in foreign mar-ts," and, "Don't hesitate to call us if we can supply any mate-al to make the U. S. trade shows ore valuable."

Inter-Agency Group Plans

Each year, an Inter-Agency ade Fair Committee, consisting representatives from Com-erce, State and the USIA, guides e program and accepts invita-ons to show. This group is re-onsible for preparing exhibit emes appropriate to the loca-on and to U. S. foreign policy bjectives in specific areas. Indus-y donates services and products support the themes.

A fourth, annual film about this roject, designed for business ex-cutives and community leaders, has just been completed for the Office of International Trade Fairs. Titled *The Trade Fair Story* it will also be shown at 13 overseas exhibitions, among them Poznan, Poland; Zagreb, Yugoslavia; Accra, Ghana, Colombo (Ceylon), Cairo and West Berlin.

"The Trade Fair Story" gives business a vivid picture of this program.

Opening Message by President

U. S. exhibition viewers will be greeted by the following message from President Kennedy:

"You will see here the manner in which myriads of small businesses are woven into the fabric of the American economic system and how effectively this system works to enrich the lives of the individual citizens who make up our nation."

Chet Huntley narrates this 14½-minute, 16mm color film which accompanies the highly-animated, showmanship-like exhibits sent abroad—and which contrast sharply with the "showcase" or static displays of other lands.

Four Pictures Now Available

The ITF program is administered by Harry B. Lyford, Chief of Public Information; for those who wish to learn why American leaders enthusiastically support this program, information may be obtained from his Office of International Trade Fairs, U. S. Department of Commerce, Washington 25, D. C. And you can ask for the free loan of *The Trade Fair Story* or any of the three other color films, *Tradeways to Peace, Showcase for Freedom, Uncle Sam Goes to the Trade Fairs,* each 14½ minutes in length.

Projector Makers in News at Nat'l Audio-Visual Convention

☆ An impressive line-up of the latest in audio-visual equipment, new films and upcoming "teaching machines" greeted some 3,500 registrants at the National Audio-Visual Convention and Trade Show which closed July 25 in Chicago.

News of the acquisition by the Kalart Company, Inc., of Technical Service, Inc., manufacturer of continuous and other special-purpose projectors was announced, effective September 1st. That company's facilities and offices, now headquartered in Farmington, Mich., will be moved to Kalart's home in Plainville, Conn.

Pageant's Solid-State Sound

Star of Eastman Kodak's exhibit at NAVA was the new Pageant Sound Projector (16mm), Model AV-126-T, which features a transistorized sound system, said to be the first with a completely solid-state sound setup. Featuring a seven-transistor, high-fidelity amplifier and a one-switch control, the new Pageant goes into operation immediately, without a warm-up period.

Other equipment drawing visitor attention was the Gray Audio-slide sound projector; Litton Industries' tape-slide "teaching machine" developed for production line instruction and a myriad of other purposes.

See pages 29-40 for the special feature: Audio-Visual Equipment Trade Fair.

CORRECTION

In Issue Three of BUSINESS SCREEN MAGAZINE, we inadvertently omitted an all-important asterisk (*) from the *Arriflex* ad on Page 15. The ad refers to the fact that *"of the fifteen 1960 Industrial Film Awards, ten went to films shot with Arriflex . . . cameras."* The missing asterisk should have appeared above the word "Awards," thereby directing the reader to the "*ANNUAL INDUSTRIAL FILM AWARDS..." caption directly under the Arriflex camera illustration.

Cal Dunn *(l) and Joe Betzer show studio model to player Jo Boyle.*

Efficiency Keynotes the New Chicago Studios of Cal Dunn

The Cal Dunn Studios, now located at 141 West Ohio Street in Chicago, reveals a "new concept in film studio workability."

The studio, which recently took over the entire fourth floor of the La Salle-Ohio Street building, just outside the Loop, was "designed from scratch to speed up production and get rid of costly time and budget waste," Cal Dunn, president, explained.

An unusual feature of the new studio is its Central Stage Area, around which all other film work will flow.

"Ideas starting in the creative department will move directly into our art and animation departments, then straight to camera, editing and screening," Dunn said.

"A client shooting live-action photography on the central stage can check on every other phase of his job in seconds," he added.

The central stage, on which four sets at a time can be constructed, was designed to avoid light-stands-and-cord clutter on the floor. Opportunities to shoot "in the round" cut down time-waits in moving from one stage to another.

It's the "KNOW-HOW" *that counts . . .*

CRAFTSMEN at Knight Studio, Chicago have produced title typography for many award-winning films; for national publications; and specimen showings (the most exacting work in the typographic field) for one of the most progressive producers of typefaces. All this experience is yours without premium prices.

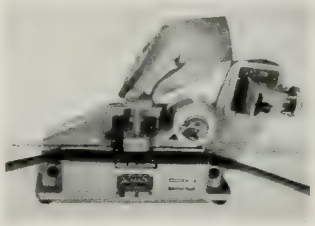
AUTOMATIC BUTT SPLICER

Cuts, Splices, Applies Magic Mylar Automatically!



The first practical, speedy and efficient automatic splicer and perforated adhesive tape (Magic Mylar) applicator on the market. Now, with no fuss, mess or waste, it is possible to splice, repair, butt-splice, or strengthen splices on all types of film—positive, negative, magnetic—even duPont Cronar or other bases.

The cutting arm, shown in operating position, is used by pressing the chrome button for cutting both sides of the film simultaneously. The film, of course, has been registered on pins in the horizontal channel. The cutting blade is easily replaced when necessary.

The splicing tape is registered on precision pins and held in place until automatically applied to the film by swinging the arm over and pressing the chromed button. This action simultaneously cuts the adhesive and applies it — in perfect register to the film.

Model 35 for 35mm
Model 16 for 16mm

S-K-F Producing Film on Heart Arrest Emergency Care

A training film demonstrating emergency treatment for heart arrest is being produced for physician-directed rescue squads by Smith Kline & French Laboratories of Philadelphia.

The techniques, called "external cardiac massage," involve non-surgical first aid in cases of heart stoppage. The procedure was developed by a team of physicians at Johns Hopkins University in Baltimore. The team recently won the American Medical Association gold medal for its scientific exhibit on the procedure.

The new film is based on a motion picture now being circulated to medical audiences. It is designed as a teaching device for police and fire department rescue teams and various health agencies.

An earlier film, produced in cooperation with the Johns Hopkins faculty members who developed the technique, has been seen by about 30,000 physicians since its release three months ago. It has been credited with saving a number of lives by preparing medical personnel to meet cardiac emergencies encountered in their work.

The new film will be distributed through the SK&F Film Center to physicians who want to show it to rescue teams and to other physician-directed groups. Such groups may purchase prints of the film at cost.

Modern Handles 16mm Prints of "Right Man" for Travelers

The Right Man, a film which appeared on the Garry Moore television show last fall, is now being distributed to school and adult audiences by Modern Talking Picture Service on a national basis. Travelers Insurance Company is the sponsor.

The b w film, which is 40 minutes in length, captures the color and excitement of presidential campaigns of the past from the torchlight parade era to the jet age. It combines the lighter side of political campaigning with its great historic moments.

Above: *Tom Bosley as Throttlebottom; Ed. G. Robinson as Teddy Roosevelt; Art Carney as FDR; Martin Gabel, Wm. Jennings Bryan.*

Historical consultant for production of the picture was Dr. Allan Nevins, professor emeritus of history, Columbia University. Stars appearing in the films include Richard Boone as Abraham Lincoln, Celeste Holm as Virginia Woodhull, the first woman presidential candidate, Thomas Mitchell as Grover Cleveland, Art Carney as Franklin D. Roosevelt, Edward G. Robinson as Theodore Roosevelt and Martin Gabel as William Jennings Bryan.

Magic of Push-Button Cans Shown in New Aerosol Film

A spritely boy, posing as a magician, carries a bagful of tricks in the form of push-button aerosol products as he performs a series of household chores in the 16m color sound motion picture, *The Magic Button.*

Originally produced by the Aerosol Division of the Chemical Specialties Manufacturers Association for television use, the film is now available on a free-loan basis to companies, businesses, industrial associations, and civic and social groups.

Running seven minutes, the film shows a variety of hazardous household push-button aerosol product types in use by inhabitants of a typical American town.

Prints in either color or black and white may be obtained on letterhead request from the Aerosol Film, Chemical Specialties Manufacturers Association, 50 East 41st Street, New York 16, N.Y.

International Medical Film Exhibition Points Road to Better World Relations

A.M.A. President, Surgeon General Terry, Outline Need to Facilitate International Exchange of Medical Pictures

MEDICAL FILMS from eight lands abroad shared screen time with a notable selection of 54 medical and surgical motion pictures shown to doctors attending the 110th annual meeting of the American Medical Association in New York City from June 25 through the 30th.

The foreign-made medical pictures were among 14 shown at the Second U. S. International Medical Film Exhibition, sponsored jointly by the A.M.A. and medical products maker, Johnson & Johnson. Two English films were cited for honors at the Exhibition.

Requests from 67 Countries

In his welcoming address to the Exhibition, Dr. E. Vincent Askey, retiring A.M.A. president, cited many requests received by the Association's film library from physicians, medical schools, societies and government groups in 67 foreign lands. Reviewing the irksome delays, time-consuming detail and complicated forms required to serve these scientific groups abroad, he said:

"To encourage and stimulate the international flow of scientific films, present procedures must be simplified by government officials throughout the world. Some efforts have been made, but much more needs to be done if we are to break down existing barriers to the easy exchange of medical motion pictures."

Need for Organization

Dr. Luther L. Terry, Surgeon General, U. S. Public Health Service, delivered the principal luncheon address at the Exhibition. He added this challenge:

"There has been great progress in experimentation and production of scientific audio-visual aids. This has not been paralleled by organizational progress to facilitate the international exchange of these materials."

Cites Work of A.M.A. Dept.

Outlining possible solutions to this problem, Dr. Terry noted:

"The A.M.A.'s Department of Medical Motion Pictures and Television comes closer to being a national clearing house of information on these subjects than any other organization."

Participating in the Exhibition program were "authors" of the foreign-made films including Prof. Dr. Ernst Navratil of Graz, Austria, who took part in a film symposium on lesions of the cervix, and Dr. A. Minkowski of Paris, who discussed the neurological examination of children.

A highlight of the program was the premiere showing of the first two films ever made on cancer cells in the bloodstream. One was filmed at the University of Illinois Medical School and the other by Prof. Dr. Gerhard Domagk, Wuppertal, Germany (a Nobel prize winner) and Prof. Dr. G. Hermann, Munich, Germany. Dr. Warren Cole of the University of Illinois narrated and discussed both films.

Above: *Dr. A. Minkowski (right), Paris, France, receives Exhibition award from A.M.A. President-elect Dr. Leonard Larson.*

The award-winning English medical films were *Hospital Cross-Infection*, authored by Keith Thompson of Little Bromwich Hospital, England and *The Sully Concept of Complicated Primary Pulmonary Tuberculosis*, filmed at Sully Hospital, Penarth, England.

Thanks to the cooperation of Johnson & Johnson, similar international medical film exhibitions have been held in Mexico, Copenhagen, Berlin and Japan. This September another film program will be presented at the 15th General Assembly of the World Medical Association in Rio de Janeiro.

Acknowledging the "wholehearted support and cooperation" of Johnson & Johnson in these programs, Dr. Askey concluded his welcoming remarks with this tribute:

"It is with its help and financial support that many of these international medical film exhibitions have been made possible. I commend Johnson & Johnson's foresight, leadership and interest in matters concerning international understanding in this field."

In addition to the 14 foreign medical films, a total of 54 other medical-surgical motion pictures were presented through the four meeting days in Room C of the Coliseum in Manhattan. Capacity viewing audiences attended most of the daily screenings.

"The 1961 program was without a doubt the most outstanding and educational we have ever presented," summarized Ralph Creer, director of the A.M.A department of medical motion pictures and television.

International Medical Film Exhibition *participants pictured (l to r) are: Surgeon General Luther Terry; Philip Hofmann, Chr. Executive Committee, Johnson & Johnson; Dr. Leonard Larson, President-elect of the A.M.A.; Dr. Ernst Navratil, Dean of Faculty of Medicine, Graz, Austria; Dr. E. Vincent Askey, immediate past president, A.M.A.; and Dr. Gunnar Gunderson, Council Chairman, World Medical Association.*

Capacity audiences attended *the presentation of 14 medical films from abroad shown at the Second U.S. International Medical Film Exhibition.*

This fruit tree project *of 4-S Club "La Rosa" in Honduras is typical of self-help programs inspired by this growing rural youth movement.*

Rural Youth Clubs and their memberships in Latin America in 1959.

SEEDS OF PROGRESS

A Documentary Film on the Work of Rural Youth Clubs in Latin America Sets a Shining Example

THE CONCERN OF AMERICANS in both hemispheres with a better future for the people of Latin America has been reflected in recent aid programs of the United States. But the destinies of our neighbors to the South must be evolved by their own hands and hearts, by ideas as well as funds, by understanding and by application of technical skills as well as by machines and money.

Dr. Guillermo Sevilla-Sacasa, Ambassador to the U. S. from Nicaragua and dean of the diplomatic corps in Washington, says:

"Land, agriculture and rural programs are basic elements in the economy of our nations. Yet our land requires action; our agriculture, technique; and our rural programs, incentive. The dynamic impact of these factors leads to productivity and well-being."

Premiered in the Capital

The occasion for these remarks was the premiere in Washington, D. C., on June 27th, of a 25-minute documentary essay on the work of a small but potentially mighty corps of rural youth clubs in 20 American Republics. Titled, *Seeds of Progress*, the film is sponsored by the affiliated Ford Motor Companies of Latin America as part of a broad inter-American communication program that began with publication work in 1959.

"Through this film we hope to reach millions of people in the Western Hemisphere with a most exciting story," declared Ford International Vice-President Tom Lilley in a premiere introduction. "With English, Spanish and Portuguese sound tracks, it will be distributed in the nations of Latin America and in this country. We think this film may help to spread enthusiasm and generate support for the rural youth movement."

Millions Depend on Farms

Of the 30 million rural boys and girls between the ages of 10 and 18 in Central and South America and the Caribbean countries, only 250,000 are activ organized in the 7,500 exist rural youth clubs. Similar to own 4-H Clubs, these yo people are banded together un the leadership of the vari Ministries of Agriculture for purpose of learning and excha ing new techniques in the fields agriculture and home-making.

Seeds of Progress, produced MPO Productions, is an atten to build a bridge of communi tion between the excitement work on club projects and the tential it offers to those w should know and participate.

Ambassador's Preview Notes

Dr. Sevilla-Sacasa, who p viewed the film before be called to Nicaragua for consul tion with his government (a whose remarks were deliver with enthusiastic fervor by Hi Excellency Fernando Berc meyer, Ambassador of Peru, the premiere), had these co ments:

"The camera has taken us on journey through valleys and vines; visited a ranch where v ambitions are taking shape; amined at first hand a little co try school where farming sk are taught to eager pupils; scal the mountain ranges to capture landscape dominated by t haughty llama; it recorded t dedication of a vast labor for It has brought us accurate pr of the work of rural clubs and t progress of our people towa prosperity . . .

An Example of Brotherhood

"I am greatly pleased to s how the nations of the Americ are responding to this example brotherhood. I am deeply sat fied to see how groups of your sters are being trained to le purposeful lives and how unc tivated fields are being tra formed into fruitful lands."

MPO cameramen shot t Dutch Holstein story in San Caterina between gusts of rain; 14,500 feet in the Andean A plano of Bolivia, one of the cr

orked so strenuously on a story 4-S Clubs and their cooperative eep and chicken program that ran out of oxygen and collapsed for two days.

In Brazil, to get a hybrid corn ory, editors and photographers ittled tropical heat and drought.

Among the 400 guests who attended the film's premiere in

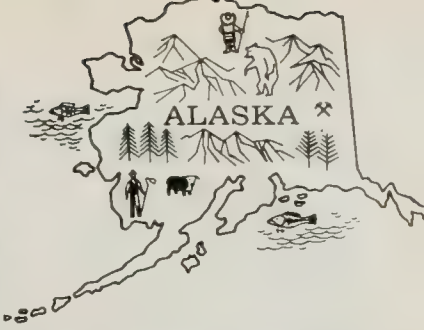
4-S Club project *that's sure to rosper. These young Central mericans are raising rabbits.*

Washington's Statler-Hilton were he Ambassadors of Argentina, hile, Ecuador, Guatemala, Haiti, anama, Peru and Uruguay and he Counselor and Charge d'Affaires of El Salvador. Assistance n production planning was given ord by representatives of the rganization of American States, he United Nations, State Department, the Extension Service of the U. S. Department of Agriculture, the American Institute of Agriculture in Costa Rica, the National 4-H Foundation and the Ministries of Agriculture in every country in Latin America.

The first step in this inter-American communications program was the publication (early in 1960) of a 176-page "Yearbook for the Rural Youth of Latin America." Printed in Spanish and Portuguese, reaction to the book was extensive and enthusiastic.

Among the many comments received, the most frequent was the suggestion that some way be found to give the program wider visibility. The Ford program of 1961 was planned in light of these suggestions and, it is hoped, *Seeds of Progress* (which is entirely non-commercial excepting for its modest credit title) will carry the rural youth story to a far wider audience via television, theaters and through 16mm showings.

Enlightened Self-Interest



The challenge to communications that can help lead our friends and neighbors of the American Republics to a better way of life is enormous. At the premiere, which the Editor of BUSINESS SCREEN attended, we came away with the feeling this is the kind of challenge which many American business leaders must take up. *Seeds of Progress* is a milestone which marks the way to a future which intelligent, far-sighted companies must help make possible. —OHC

Ambassador Fernando Berckemeyer of Peru *(right) accepts a print of "Seeds of Progress" on behalf of Organization of American States from om Lilley, Vice President, Ford International Staff.*

ALASKA
& ITS NATURAL RESOURCES

A New Bureau of Mines' Film on the 49th State

☆ Alaska, the nation's 49th state, a vast, colorful frontier with a potential of varied and valuable natural resources, is the subject of a new motion picture now released for public showing by the Bureau of Mines film library.

Alaska and Its Natural Resources depicts both the promise and the challenge of the new state through the eyes of a young tenderfoot who seeks his future in the North.

Viewers of the film accompany this central figure as he talks to a salmon fisherman, farmers, oilwell drilling crews, lumbermen, geologists and miners.

With him, the audience visits some of Alaska's cities—Juneau, Fairbanks, Kodiak, Ketchikan, Nome and Sitka—and its forests, farm lands and mountains. The viewers learn of Alaska's history and traditions, and of the young state's rich potential in minerals, fuels, fisheries, agriculture, timber, water and other natural resources.

Highlighting the 16mm film, which runs for 27 minutes, is an historical sequence recalling the time when America's purchase of Alaska from Russia was referred to jeeringly as "Seward's Folly." Scenes typifying the early Gold Rush days along the Yukon dissolve into scenes of present-day gold, silver, platinum, mercury and coal operations.

The new motion picture provides an informative look at the North Land's timber resources as well as agriculture depicted in scenes of the lush Matanuska Valley.

Alaska and Its Natural Resources was produced by La Brea Productions, Inc., Hollywood, Calif.

Prints of the film can be obtained from state depositories listed in the Bureau of Mines film catalog or directly from Graphic Services, Bureau of Mines, United States Department of the Interior, 4800 Forbes Avenue, Pittsburgh 13, Pa.

North Dakota Promotes Its Quality Wheat

☆ *Durum . . . Standard of Quality* is the first important public relations motion picture to be sponsored by the North Dakota Wheat Commission, an agency set up to promote the use of wheat products grown in North Dakota.

The 16mm color film, which deals with durum, a hard vitreous cereal grain from which macaroni and spaghetti products are made, was produced by Bill Snyder Films of Fargo.

The story of quality macaroni begins in the greenhouses and laboratories of the North Dakota State University of Agriculture and Applied Sciences. A good portion of 28½-minute film looks over the shoulders of plant breeders and cereal technologists as they endeavor to create new and better strains of durum wheat.

In one sequence a plant breeder demonstrates how he crosses and recrosses the various types of durum to produce new hybrid plants.

The film shows that all it takes to make macaroni is durum semolina flour and water. The quality of the grain determines the quality of the end product. The exact method of making macaroni products is demonstrated in the miniature mills and presses of the cereal laboratory.

Several cinematic devices highlight the motion picture and take it out of the run-of-the-mill film category. A time-lapse sequence of growing grain, a cropspray pilot in flight, a manufacturing and packaging montage, and an animated "dance of macaroni products" add color to the story of durum.

Below: *Art Director Norm Selberg works on "Durum" setup . . .*

Adventure-Preview for Theater Audiences:

Auto Trek Down the Pan-American Highway

Jam Handy Cameras Follow Corvair Safari on a Rugged Ride to Panama

The signs warned, "End of Road." But this was merely a challenge to a motion picture caravan that started out to show what it takes to drive to the Panama Canal.

While it will probably be late 1962 before the family can go on an exciting spin to Panama, Chevrolet has provided theater audiences with an eye-catching, 10-minute picture as a preview of what's coming in driving adventures south of the border. The title is *From Here to There*. Production and distribution is by The Jam Handy Organization.

"Here," in this case, is Chicago, and "There" is the end of the line—Panama City, 4,550 miles from the starting point. In between were six record-breaking weeks which started with the dunking of a new Corvair compact car in the Chicago River.

The crowds couldn't guess what was going on along Wacker Drive, but the trail breakers to Panama and the motion picture crew knew what they were doing. They had heard about the rainy season in the tropics, and the test was to see if the Corvair would sink. It didn't, and the caravan started off.

The safari of three bright red Corvairs, right off the line, and two supply trucks moved along at a fast clip to Laredo, Mexico City, on to Guatamala and to El Salvador and Nicaragua. The cameras recorded the beauties and the novelties all along the Inter-American Highway.

The travelers were prepared for roads that go up to two miles, then drop down to Pacific beaches; for temperatures that drop from 102 degrees to a chill 44 all in a single day, sudden fogs that reduce visibility to a few feet. But these were only preliminaries to the Costa Rican "Gap," a section of 134 miles that never before had been traversed by passenger cars.

The unfinished section is crossed by 41 rivers—and the bridges are not in yet. The Chiriqui River, to mention only one, was flooded to the depth of 12 feet and was 150 feet across. Here the Chicago pre-testing paid off. The drivers were sealed in the Corvairs and the cars floated nicely across, a cable keeping them from heading down to the sea. An even larger stream, 400 feet wide, was crossed on balsa rafts.

The adventures of the caravan were told in a series of Sunday magazine articles in THE CHICAGO TRIBUNE. But this was a venture that called for being on the scene and seeing —and that is why *From Here to There* is showing its audiences a trip that takes more than words to tell about.

The Corvair safari *crossed 41 rivers on its southward journey "From Here to There."*

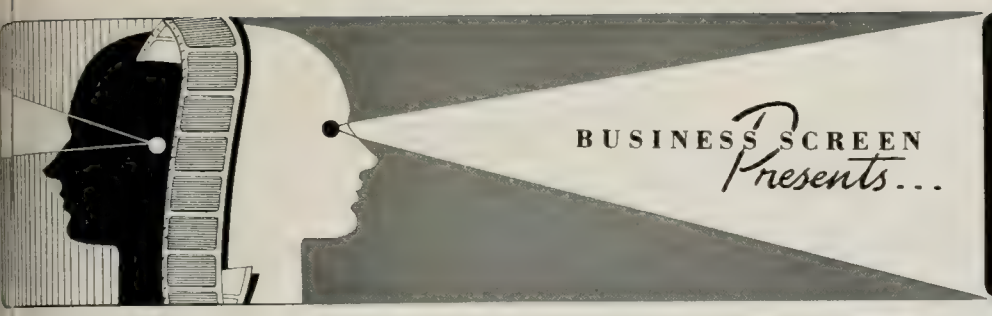
Paying homage *to an ancient culture, drivers visited this famous temple of the Toltecs.*

A landslide *blocked the Inter-American highway but it didn't stop the expedition.*

"Put it in *your glove compartment, Senor?" One of the drivers does some gift shopping.*

An Editorial Foreword to the A-V "Trade Fair"

THE MANY ADVANCES being made in th field of audio and visual projectio equipment, ranging from simplifie 8mm and 16mm sound projectors for bo conventional and rear-screen viewing to an i creasing number of automated sight/sound d vices utilizing still pictures with taped soun made an exciting and thought-provoking arra of exhibits at the recent National Audio-Visu Trade Show in Chicago.



Realizing that many thousands of busines industrial and institutional users of these a dio-visual tools were not able to see this e hibition, the Editors of BUSINESS SCREEN hav excerpted highlights of manufacturers' pro ucts through a special direct survey of th companies involved. A few that were n available for the early press closing of the "Trade Fair" pages will follow next month.

Included in this September supplement w be the "teaching machine" developments Applied Communications Systems (a Divisio of Litton Systems, Inc.); the remarkable ne Gray Audioslide projection equipment; mo details on Amplifier Corp. of America's pr cision-electronic sound slidefilm projecto (the Magnematic); and data about the "VIP desk-top salesman-in-a-suitcase which was di played by B. R. Gilbert & Associates.

A new plateau of design excellence an high-quality in both light and sound w achieved by the several new 16mm sound pr jectors introduced at the Chicago show. Th new Bell & Howell "Specialist" and the Gr flex "Galaxy" attracted large audiences. a did the new completely-transistorized Koda Pageant Sound Projector. RCA, Kalart-Victo also made trade show news, the latter an nouncing the acquisition on September 1st Technical Service Incorporated with its line 16mm repeater projectors, including the Duc lite and Moviematic models.

Sound slidefilm equipment featured a ne DuKane display unit and Beseler's "Salesma II" with several features noted in this sectio

To keep every major industrial and institu tional buyer completely informed throughou the year, the Editors of BUSINESS SCREE have perfected a complete Audio-Visu Equipment Reference System. Described o page 49 of this issue, the new Buyer's Refe ence book is the first to provide a continuou flow of data on new product developments du ing the year *exclusively* for key buyers.

BUSINESS SCREEN *Presents...*

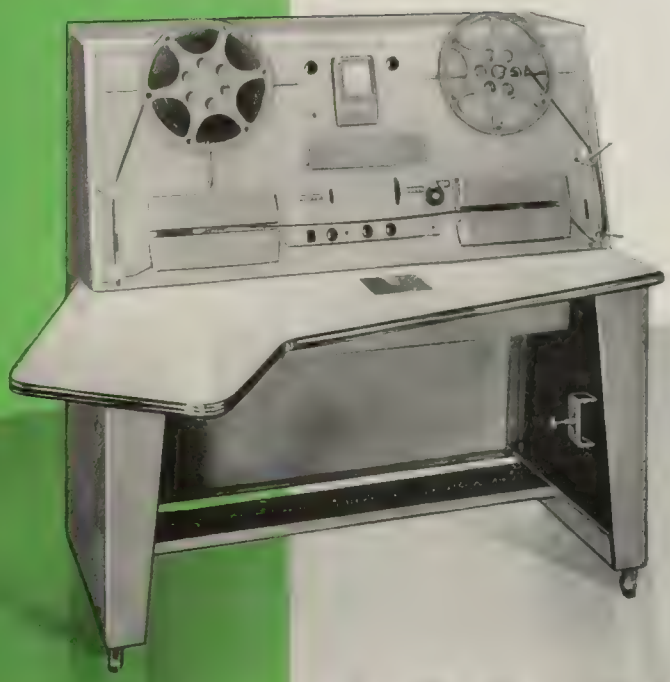
TECHNICAL SERVICE, INCORPORATED

Address TSI inquiries to Kalart Company, Inc., after Sept. 1 when facilities move to Plainville, Conn. headquarters plant.



• The widely-used "repeater projector" line of TSI is to be produced at the Kalart plant (after Sept. 1st). Victor will offer both the "Duolite" and "Moviematic" models.

TSI's Moviematic is a single-case model with TV type screen; repeater film magazine. Ranges from the STM-3 16mm sound model (shown at right) to 12-lb. Moviematic Jr. 8mm silent repeater projector.

Both models minimize room darkening; both have separate reel arms for conventional showings.

The Ultimate in Automatic Film Inspection

Now has Auto-Load and Electronic Scratch Detection with Automatic Recording and Splicing

MARK IV

...the Futurmatic-Styled Inspect-O-Film with amazing performance...

The Mark IV is the "ultimate" machine for those "who want everything". Designed as a research unit into the needs of the film libraries of the future, this unit has been put into pilot production because of the demand of leading commercial libraries who must furnish customers proof of print condition. The Mark IV retains from the past only what has been demanded by progressive libraries and could not be left out of a modern machine—features from the Mark II, such as eye-level loading, triple jewel sensitive low pressure detection, console and large work surface design etc. The Mark IV represents a technological breakthrough comparable to Harwald's invention of Automatic Electronic Detection. It gives an electronically written graph of the degree of film scratching by the foot so that libraries and sponsors can judge print quality on an objective basis. The machine also features "Auto-Load" the easy loading system that will be a part of all film equipment of the future. Other features include: Selective detection, radioactive plutonium antistatic protection, no-scratch vacuum cleaning of film and ultra smooth all direct drive system. The Mark IV is particularly suited for duplex and other multiple machine arrangements. Naturally, electronic liquid cleaning and conditioning are also available along with a host of other features, get full details and see demonstration at coming conventions.

MODEL "Q" MARK IV

A new concept of the famous Model "Q" Editing Machine. Ideal for TV Stations, Producers, Distributors, etc.

Here is the ultimate in film handling for professional film men in TV stations and for film distribution. This machine not only has all the features of the Mark IV, described on the front cover, including the availability of scratch detection, etc., but also has a viewer and sound reader arrangement so that films may be viewed, edited, cut and an entire TV Show put together with the greatest of ease, in a professional manner.

Often times users report cutting down their time as much as in half of that with normal complicated arrangements and this machine does a complete job. Not only inspects film and cleans it, but times the film and allows it to be viewed at an extremely fast pace. For instance an hour program can be completely previewed in less than five minutes. Complete smooth control over the film movement is possible and all the way from zero to 450 feet a minute, forward and reverse. No solenoids, easy service, no belts—a whole new concept in design!

No. 3J102 . . . . Price, depending on accessories, $4,495.00 to 7,995.00

The Harwald Protect-O-Film Machine applies PROTECT-O-FILM Cleaning fluid to 16mm film at speeds up to 1000' per minute. It guarantees excellent 4-way protection. 1 . . . provides cleaning action, 2 . . . prevents scratches, 3 . . . anti-static, 4 . . . knocks "greenness. The cleaning fluid is electronically controlled to provide uniform wetness regardless the speed of the film.

An efficient exhaust is provided to eliminate fumes from the working area. This unit is designed as an attachment to fit any senior type Inspect-O-Film Machine and is controlled by it. Also can be used on a developing machine or bench rewind. When ordering, please specify type of service intended so that the proper type electrical connectors are supplied. Ship. Wt., 100 lbs.

No. 17J103 . . . . $995.00

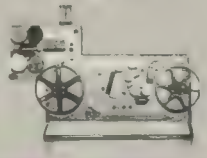

Illustration shows an actual installation used with an Inspect-O-Film (Fits any senior type Inspect-O-Film machine)

CEMENT-O-FILM

The Amazing Lightning-Fast Super-Speed Film Cement

Cement-O-Film is a radically new splicing fluid developed in Harwald's laboratory. Now, for the first time, an instant splice can be made—even without heat! Cement-O-Film not only is lightning fast, but it makes extremely strong long-lasting splices. The reason is a new solvent combination which makes a true weld on even the new triacetate film bases. Just order a pint today and *see for yourself*. Users tell us they save so much time and film, using Cement-O-Film, that they throw out their stock of older type cements. It is absolutely non-corrosive and actually helps to keep your splicer clean.

No. 10J147 One Pint Can $2.95
No. 10J149 One oz. Bottle with Brush 50

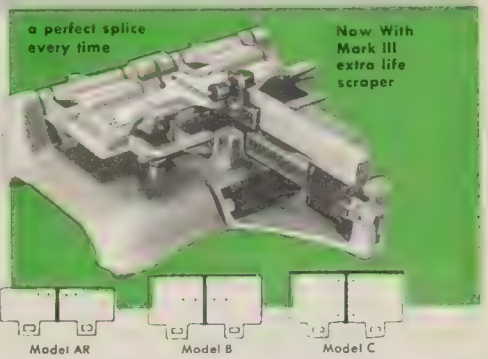
HARWALD'S SPLICE-O-FILM



World's finest splicer . . .

The major cause of film failures is poor splicing . . . and the major cause of poor splicing is improper scraping. SPLICE-O-FILM solves these problems with its electric heat and automatic scraper that takes off exactly the right depth of emulsion every time.

In just 9 SECONDS you can get a perfect splice—accurate within 1 10,000 of an inch. For laboratory use, SPLICE-O-FILM's registration accuracy makes it ideal for A-B roll preparation. (No. 4J106 recommended) and its preset scraper permits reliable splicing of raw stock in the dark. (No. 4J105 or 4J101 recommended).

The new SPLICE-O-FILM is equipped with special features not found on the earlier models. Among these is the Mark III scraper assembly with its extra long life tungsten steel blade which can be changed and adjusted perfectly without tools. You can put this unit on your older Harwald splicers if desired. (Part No. 4S3100 . . . . $12.50)

The main difference between the Model B and AR are size and pin arrangement. Model B is larger with pins in the center of the bed for fast working with both B-W and color films. AR is indicated where top quality splices are desired at a minimum cost. Model C is for 35 MM only. The Model B 4J105 is our most popular model for film libraries.
Ship. Wts., Model "AR" 5 lbs.; Models "B" and "C" 8 lbs.

Cat. No.	Description	Price
4J101	$\frac{3}{32}$" width splice for prints, 16mm	$ 99.50
4J102	$\frac{1}{16}$" width splice for negatives, 16mm	$ 99.50

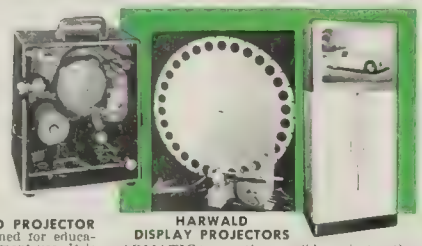
"Research and Engineering for Finer Film Handling Products"

MM SUPREME 16mm SOUND PROJECTOR
A highly successful unit designed for educational, industrial and entertainment use. It is compact, rugged, easy to carry, yet it performs with more massive and higher priced projectors. The MM Supreme has automatic *safety* trips which make film damage virtually impossible . . . even with non-professional operators. It has a self contained screen for desk-top presentations. Film capacity 2000 ft. 105-125 volts, 25-60 cycle AC-DC. Weighs only 28 lbs
No. 9J101 Ship. Wt., 30 lbs. $349.50

MOVIE-MATE AUTOMATIC REPEATER
16mm Sound Projector for Sales Use
A newly developed, highly reliable compact projector that requires no threading or rewinding. Accommodates 400 feet of continuous 16mm film. Only a flip of the switch is needed for an extremely effective and simple presentation. For 105-125 volts, 25-60 cycle AC-DC. Weighs only 23 lbs.
No. 7J104 Ship. wt., 26 lbs. . . $498.00

Compco Reels Split Reels



COMPCO REELS are the best projection reels and cans available. They are die formed of hard spring steel and the 800, 1200, 1600 and 2000 foot reels have die-cast aluminum hubs. This ensures that the reels run perfectly true, thus preventing damage to your valuable film

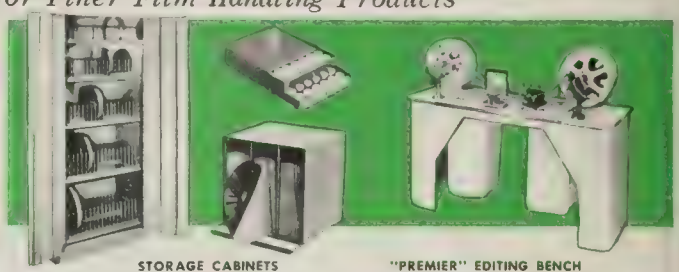
HARWALD DISPLAY PROJECTORS

ADMATIC is a continuous slide projector, that will give your product or story the impact of Kodachrome slides. Thousands of Admatics have been in use for a 12-year period. It is considered the "workhorse" of the advertising field. Ideal at conventions, trade shows and in your outer office. The mechanism is ultra-reliable and rarely requires service. Slide capacity 2"x2", projection size 16"x23", time every new slide shown, 6 seconds. Height 66", Depth 18", Width 28", Ship. Wt., 160 lbs.
No. 5J102 . . . . . $495.00

SONOMATIC is a continuous sound slide projector. It has all the features of the above unit, however it has fully synchronized sound. Ideal for showroom, convention or museum displays. The Sonomatic uses continuous magnetic tape for sound track and control. 1000 cps. inaudible tone controls slide change. Starts with push-button in front and presentation ends automatically. Tape size, ¼", tape cartridge capacity, up to 30 minutes Ship. Wt., 175 lbs
No. 8J101 . . . . . $895.00

CINEMATIC is a continuous sound motion picture projector. Styled same as above units. Its excellent picture quality and dependability provides an ideal display or daylight classroom projection. Built-in 800 ft. capacity magazine. Film size, 16mm. Lamp size, 750 watts. Ship Wt., 190 lbs
No. 7J101 . . . . . $1,195.00



STANDARD

Harwald power rewinds combine unusual convenience in use with economy. One important feature of these units is their very steady speed. Both rewinds take interchangeable shafts and are of 2000 feet capacity. The STANDARD model employs a foot rheostat speed control. The DELUXE model is unusually smooth, stable and works extremely well with sound reader and is absolutely safe for rewinding negatives. It uses a knee operated lever which controls a torque converter. This lever can be locked manually if desired. Other arrangements for speed control are available on special order.

Ship. Wts., "STANDARD" 65 lbs. "DELUXE" 75 lbs

Cat. No.	Description	Price
19J120	Standard rewind with 16mm shaft	$110.00
19J121	Standard rewind with 35mm shaft	110.00
19J122	Deluxe rewind with 16mm shaft	215.00
19J123	Deluxe rewind with 35mm shaft	215.00

STORAGE CABINETS

Harwald supplies a complete line of top quality storage cabinets for discs, tapes, films and film strips. These units are of double welded construction and hold a maximum of materials in a minimum space. For full information about these superior, yet competitively priced cabinets, write for complete catalog

"PREMIER" EDITING BENCH

VICTOR ANIMATOGRAPH: see listing under KALART and TSI names

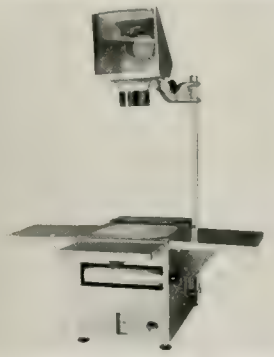
VICOM, INCORPORATED

70 Aberthaw Road, Rochester 10, N. Y. Telephone: LOcust 2-7574

Contact: Fred Aufhauser, President

• A top-quality 8mm sound rear-projection unit is the VICAUDIO. This continuous-repeater equipment has a self-contained 9″ x 12″ screen; features magnification by patented Vicom Visual Image Compensator. Built around basic Kodak "Sound 8" mechanism. Four 'Mark" models are available including console type with large screen and special display unit.

VICTORLITE INDUSTRIES, INCORPORATED



4117 West Jefferson Boulevard, Los Angeles 16, California

• Four Visual Cast overhead-type projectors range from the "Challenger" and "Traveler" (Fold-down) models to the familiar "Instructor" (pictured at right).

The "Instructor" Model 3000 has full 10″ x 10″ aperture opening; acrylic fresnel condensers, fully corrected head anastigmat; built-in double roll. Also available in wide-angle model. 1,000-watt lamp.

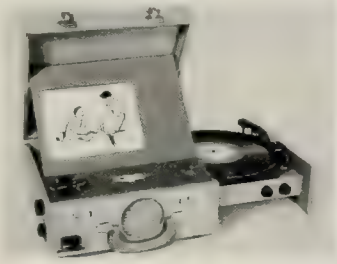
"Traveler" Model, with 500-watt illumination, has a 7″ x 9″ projection stage. An "Engineer" model rounds out the Visual Cast line.

* * *

Right: the Visualcast "Instructor."

VIEWLEX, INCORPORATED

Holbrook, Long Island, New York. Telephone: LT 9-6600



Sales Manager: M. R. Abrams Government Contract Adm.: R. C. Schmidt

• Out of its full line of slide and filmstrip projectors with remote control and manually operated; a range of sound slide and filmstrip models (both tape and disc) and desktop film viewers, there are two Viewlex "highlights" of note:

1. The "Tabletalk" is a portable large-screen sight-sound presentation unit which combines a rear-screen (7″ x 9″ viewing area), 35mm filmstrip projector and a 4-speed record player that takes up to 12″ discs. Weighs only 13 lbs. Carries in scuff-resistant, waterproof attache-type case.

2. Two Viewlex "Salestalk" models (V-6 for filmstrip only; V-2 combination slide-filmstrip) are being widely used in business and industry for sales work. A complete unit with screen inside cover (9″ x 7″) with 100-watt projection; convection cooled; 4-speed record player in suntan simulated leather attache case. Lists: from $104.50 to $134.50.

PROJECTION SCREENS

COMMERCIAL PICTURE EQUIPMENT, INC.

5137 N. Broadway, Chicago 40, Ill. Telephone: SUnnyside 4-0263

Contact: Herb Conrad, Don Smith, John Deger

• For conventions, meetings and similar purposes where portability and screen size require maximum versatility, CPE's "Fast-Fold" screens have proven most useful. This screen packs down into a small carrying case.

It is available in either Mat White Vinyl surface for front projection or with Pola-Vu surface for rear-projection use. Frames have exclusive Tilt-T legs; adjust in height and there is a "flannel hook" surface for use as display boards.

Sizes up to largest auditorium and for average sales meetings. Screens snap on to engineered, highly portable frame members for extremely quick setup time.

DA-LITE SCREEN COMPANY, INC.

Road 15, North, Warsaw, Indiana. Telephone: AMherst 7-8101

Contact: Robert Maybrier, Manager, Audio-Visual Dept.

• Three "new products" were of special interest in the Da-Lite line. A decorator's favorite is the new Pole-Screen; for overhead projection needs, a "Vidio A" model has a "keystone eliminator" bar which holds the top of the projection screen from 2″ to 18″ away from the vertical position.

This easy-to-use accessory eliminates the narrow-bottom, wide-top image distortion common to overhead projection on a vertical screen.

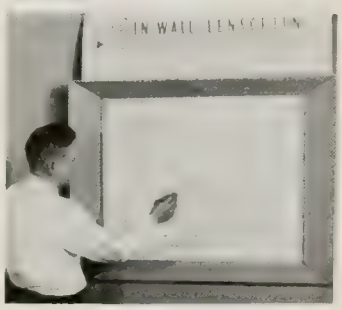
For the growing wide-screen field (either filmstrip, slide or CinemaScope motion pictures) a new Da-Lite Cine-King screen is available in portable, tripod size for 40″ x 96″ projected image. "White Magic" glass-beaded surface (seamless) and heavy-gauge extruded aluminum legs are other features.

Hanging (wall or ceiling) models in the Vidiomaster line are rounded out by three Electrol (electrically-operated) types: the big auditorium types; a new Jr. Electrol and the "Suburban" Electrol with ceiling closure.

Da-Lite also offers the Da-Tex rear projection screens (of translucent material) framed in chrome-plated seamless square tubing; typical size 70″ x 70″.

Pictured above is the new Da-Lite "Vidio A" screen for overhead shows.

* * *



POLACOAT, INCORPORATED

9750 Conklin Road, Blue Ash 42, Ohio Telephone: SYcamore 1-1300 (Cinn.)

Contact: L. M. Heath, Vice-President, Sales

• Specialists in the manufacture of rear projection screens, Polacoat's line features translucent screens made of glass in sizes up to 10 feet x 22 feet; in Plexiglas sizes to 100 x 144 inches and Flexible, grommetted screen sizes up to 40 x 80 feet.

Trade name LENSCREEN applies to special lens type translucent media which permits viewing of projected images in daylight conditions. Special screens for wide-angle viewing; directional or high gain types; neutral and color tints incl. blue, red and green.

Above: using in-wall, write-on type Polacoat screen with special pencil.

Spiral galaxy in Ursa Major is pictured in this scene from the film "Universe."

Man's first landing platform *in space? The pockmarked surface of the Moon is shown.*

. . . and the many moons of Saturn come vividly near as powerful lenses reach into space.

"UNIVERSE"

A 28-Minute Screen Journey Through Space, Beyond the Solar System, Has Won International Acclaim and the Honor of Being Canada's "Picture of the Year."

A 28-MINUTE "journey through space" through the medium of an exceptional motion picture titled *Universe* has won anada's National Film Board international claim. Named as that country's "Film of the ear" at the 13th annual Canadian Film wards ceremonies in May, *Universe* was the 960 diploma winner among science films at e Vancouver Film Festival; was cited at dinburgh and won a Cannes, France, jury ize for the "exceptional quality of the ani- ation."

Documentary honors in 1961 at the British ilm Academy Awards and top honors in its ass at the recent American Film Festival in ew York were followed by its May, 1961 ward from the SCHOLASTIC TEACHER Maga- ne.

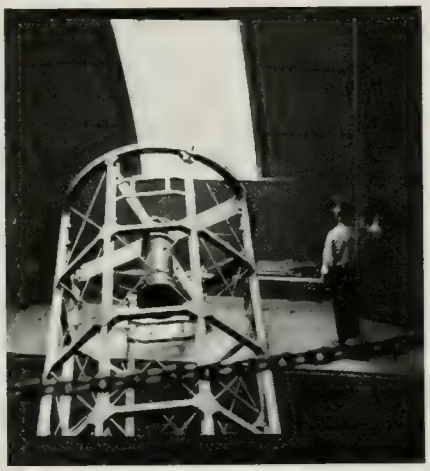
A Night's Vigil at the Telescope

Universe introduces the men who chart the nknown depths of space as viewers join Dr. onald MacRae, professor of astronomy at e University of Toronto, for a night-long gil at the David Dunlap Observatory. Ex- oration of the solar system as the telescope ews the pockmarked surface of the moon, the rings of Saturn and the gaseous geysers of the Sun is its fascinating theme.

But *Universe* takes its audience beyond the reach of the strongest telescope to marvel at the greater wonders in the repertoire of the night. Beyond our Milky Way, other galaxies swirling into infinity are encountered. The question rises, "Is it possible that the universe has no end?"

Animation and special effects give shape to theory, showing what the mind of man has conceived, "tempting you onward to probe the further limits of the uncharted night."

An Invitation to Visit Deep Space

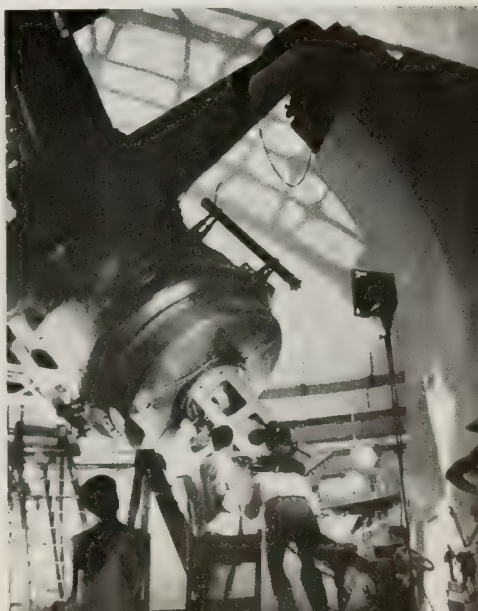


A descriptive paragraph in one of the excellent graphic pieces created for *Universe* provides an intriguing invitation:

"Today astronomers are 'listening' to stars hundreds of billions of miles away. Today enough is known of the heavens that men are being readied for physical journeys of exploration into space.

"*Universe* allows you to move with the freedom of a god, past old and familiar planets, the Moon, Mars, Venus, Mercury, to the dwarf Pluto four billion miles from the Sun. And then beyond, past the nearest suns to the end of the star clouds and nebulae, to an infinite sea of night dotted with islands of stars we call the galaxies."

Universe is available for preview and purchase ($130) from the National Film Board of Canada, 680 Fifth Avenue, New York 19.



Astronomer at David Dunlap Observatory and. . . telescope that brings stars into focus.

THE CANTON REPOSITORY

For 146 Years A Dependable Institution

HOMI EDITIO ★ ★ ★

Vol. 147, No. 88 | Phone GL 4-5611 | CANTON, OHIO, SUNDAY, JUNE 25, 1961 | 118 PAGES | 15c Single Copy | 45c Weekly by Ca Daily and Sun

Republic Hails Canton as World's No. 1 Center

Movie and Parade To Celebrate 'Stainless Steel Week

By JOSEPH M. KOREN
Repository Business and Industry Editor

Today is the start of the wee during which Canton pays tribute to a world-famous local specialty—stainless steel.

It is honoring Republic Steel Corp., whose Canton and Massillon plants have made this area the world's

(Photos on Page 16)

No. 1 producer of the shiny, rust-resistant metal.

Mayor Charles L. Babcock has proclaimed the week as "Stainless Steel Week" in Canton.

The high spot of the celebration will come Wednesday.

Republic will give its first commercial showing—the world premiere—of its color motion picture, "The New World of Stainless Steel," at the Palace Theater at 8 p.m.

It is a 14-minute film which shows how versatile the metal is—how it helps make things hot or keep them cold or how it can circle the world.

The film will be shown with the latest Walt Disney feature, "The Parent Trap."

Nearly a score of Canton merchants who handle stainless steel products will have special displays dur- g the week, emphasizing the Canton-made product.

Canton Chamber of Commerce and Canton Junior Chamber of Commerce are joining in the stainless steel celebration.

BEFORE THE SHOWING of "The New World of Stainless Steel," a reception and dinner will be held in the Onesto Hotel for 100 guests.

Joining Republic officials from this district and Cleveland headquarters will be industrial, business, civic, labor, religious and political leaders.

Short talks will be made by Norman W. Foy, Republic's vice president of sales, and L. A. Hemker, vice president in charg of executive who began h

An Example of Business Film Showmanship—

Canton Premiere for Republic's "New World of Stainless Steel"

THE CITY OF CANTON paid tribute to one of its "industrial stars"—stainless steel—at a Hollywood-like movie premiere of a new Republic Steel Corporation film titled *The New World of Stainless Steel*, held on Wednesday night, June 28th, at that Ohio city's Palace Theater.

The event climaxed Canton Stainless Steel Week which was officially proclaimed by Mayor Charles L. Babcock as a tribute to more than 11,000 Stark County men and women whose livelihoods are dependent upon the product which has made the Canton-Massillon area the nation's stainless steel center.

Foy Speaks at Civic Dinner

At a civic dinner held in the Onesto Hotel prior to the premiere, more than 100 representatives of business, industry, government and education, as well as motion picture executives from Chicago and New York, joined Republic Steel officials from Cleveland and the Massillon-Canton area to hear Norman W. Foy, Republic's Vice-President in Charge of Sales, and Mayor Babcock.

The event was held just two blocks away from the nation's first City Hall ever to feature stainless steel curtain wall construction—the new Canton City Hall scheduled to be dedicated on Labor Day, which has been referred to as "a monument to the stainless steel industry."

After describing the role stainless steel has played in Stark County's economy, Foy spoke confidently about the metal's f ture. "The long-range future f stainless is bright—in more wa s than one." Carbon steels will co tinue to be the "bread and butte of the steel industry, but an in creasing share of the sales dol r will come from the sale of speci ty steels and steel alloys, with heavy emphasis on stainless, he said.

Expects Good Year in 1961

"We expect 1961 to be a goo year for stainless, and we a working hard to assure that i

Canton's Mayor Charles L. Babcock *signs proclamation for "Stainless Steel Week" as (l to r) civic leaders Stan Ewing, Robert Haas and Ray Gilman join Republic District Mgr. Oscar Bamberger at the ceremony.*

tisfactory share of the year's tput will come from the Can-n-Massillon area," Foy said. All Republic's stainless steel is pro-uced in Canton and finished and ipped from the company's Mas-llon plant. In addition, there are ore than 20 stainless steel fabri-ting firms in the Greater Canton ea.

Canton's Mayor Babcock aised the city's industries for eir ability to keep up with the tion's ever-changing production eds which included pioneering the production and application stainless steel.

public employees at the Massillon plant.

After the dinner, guests were taken from the hotel to the theater in a "Motor Cavalcade of Stainless" featuring gaily-decorated 1961 cars pointing out applications for the product in the automotive industry.

Stark County automobile dealers as well as many of the Canton merchants are featuring displays of stainless steel applications as a part of the week's activities.

Showings in Three States

After Republic's new stainless film completes its premiere run in Canton, it will be shown in other Ohio cities as well as cities in Michigan and California. Wilding is planning to enter it in the annual Academy Awards competition later on in the year.

The film features an original musical score as well as the very latest in color photography techniques. Scenes showing the production of stainless were filmed in Republic's Canton and Massillon

larquee of Canton's Palace Theater *heralded the world premiere of New World of Stainless Steel" as highlight of the special week.*

Prom Etiquette Pictured for Teen Agers

New Coca-Cola Picture Filmed "on Location" in Mobile

A new color motion picture designed to answer many of the questions posed by today's teenager about social etiquette is being sponsored by The Coca-Cola Company.

The Prom—It's a Pleasure covers the etiquette involved in making a date for a high school prom and highlights situations encountered at the dance itself which require a knowledge of social etiquette.

Taking part in the picture, which is being filmed on location in Mobile, Ala., by The Jam Handy Organization, are the winners of the 1961 American Junior Miss Pageant. Heading the cast is America's Junior Miss, Mary Fran Luecke of St. Louis, Mo.

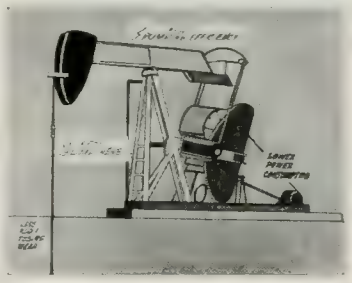
Also appearing in the production are Linda Sawyer, Louisville, Ky., first runner-up; Robin Kessler, New Haven, Conn., third runner-up and Judy Skipper, Jackson, Ala., fourth runner-up. A

America's Junior Miss *is Mary Fran Luecke who "stars" in the forthcoming Coca-Cola picture.*

number of teen-agers from the Mobile area are also taking parts in the production. Rounding out the cast will be professional actors who handle the adult roles.

Visualizing a Product for Oil Producers

Slidefilm's Multiple Techniques Help Clarify Product Benefits



A colorful and technically useful new sound slidefilm, produced by the Jamieson Film Company, Dallas, enables salesmen of the Oil States Rubber Company to demonstrate the features of a new, intricate product, even under the poor conditions of an ill-equipped tool shack at an oil well site.

Oilwell sucker rod guides are placed deep in oil wells, where neither the camera nor the human eye can observe the action. In addition this particular guide involves a new design concept as well as a new product material, and the manufacturer has had a hard time trying to explain it even to experts in the field.

Now engineers are taken "down in the hole" through the use of detailed drawings where they can observe the advantages of the new product over the conventional sucker rod guides.

The Oil Producers' Hidden Enemy, entertaining as well as informative, features many of the techniques used in motion pictures. Music, sound effects, a cartoon character named "Complacent Casper," intricate "down-the-well" drawings and photographs were combined with explanatory narration in this subject.

At the same time, its special form of presentation allows Oil States' salesmen to use it anywhere, any time.

Simplified drawing *of oil field equipment gives graphic punch.*

"Creative Communication Management" was Curtis Roberts' theme at this IFPA session . . .

Industry Film Producers Honors to 15 on Coast

Delegates to Second National Convention and Awards Program at Santa Monica Hear Project Mercury's Public Affairs Officer; View Premiere of "Freedom 7"

THE FIRST PUBLIC PREVIEW of *Freedom 7*, an historic documentary film account of Commander Alan B. Shepard's historic space flight, climaxed the keynote presentation to delegates at the Second National Convention of the Industry Film Producers Association at the Miramar Hotel in Santa Monica in June.

Keynoting the Space Age theme of IFPA's meeting and subsequent presentation of National Awards to film competition winners, was Lt. Colonel John A. Powers, Project Mercury Public Affairs Officer. Col. Powers was introduced by Robert Hemmig, Assistant to the Director, Office of Technical Information and Educational Programs, in the National Space Agency.

Dr. Raymond Fielding of the Motion Picture Division, Theater Arts, at UCLA, is the new President-elect of the Association, succeeding Robert S. Scott, Associate Director, Government Relations, Aerospace Corporation. Dr. Fielding stressed "Accent on Youth" in his inaugural address, picturing IFPA "as a young organization with fresh ideas for solving communications problems with film."

Other incoming IFPA officers are Carl N. Brewster, Aerospace Corp., Executive Vice-President; Ed Hunter, North American Aviation, Financial Vice-President and Treasurer; Jack R. Gabrielson, Douglas Aircraft Co., Editorial Vice-President; Ralph Hall, Convair, Chapters' Vice-President; Justin M. Purchin, Systems Development Corp., Secretary; and Tony Gorsline, Aeronutronics, Convention Vice-President.

IFPA President-elect, *Dr. Raymond Fielding, puts the "Accent on Youth" as he addresses delegates to second national convention.*

• Climaxing the regular daily convention sessions was the Second National Awards Banquet held in the Satellite Room of the Miramar. With George Murphy, prominent motion picture personality and production executive as MC and guest of honor, 14 IFPA film competition winners (see listing) were presented with the new "Cindy" (Cinema Industry) awards and plaques.

The special annual Jay E. Gordon Memorial Award was given for the first time at this year's ceremonies "for an outstanding contribution to the film communication field." The 1961 award went to Ott Coelln, pioneer in the field, and publisher of BUSINESS SCREEN.

The practical "working" theme of the Convention's many daily sessions followed a "H to Do It" outline with "Production Clinic interwoven with talks and film presentation Outgoing President Bob Scott contributed humorous feature, "How to Shoot Your Boss illustrated with cartoon slides showing the di effects of improper lighting, hasty work, ganizational clutter and photo mismanag ment.

In a more serious vein, Mr. Scott later d cussed "Selling Yourself With Service." firming that "our film communication contrib tion is basically a most valuable service to i

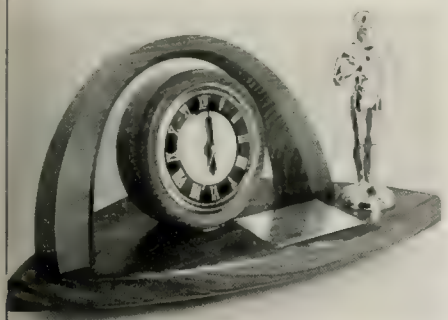
stry management and in our nation's best iterest."

A veteran of films, Richard Arlen, was the ssociation's luncheon guest of honor, as he escribed the dramatic progress made in aviaon photography since the 1927 production *Wings*, the first Oscar-winning film classic, which he played a starring role.

Some 300 delegates and guests attended the onvention program and the Awards' banuet. They also visited colorful displays of the test technical equipment in a special Trade how. 26 leading firms and organizations were mong the participating exhibitors.

NDUSTRY FILM PRODUCER AWARDS



Public Relations Winners

INDY AWARD: to Aeronutronic Division, Ford Motor Company for *This Is Aeronuonic*, 17 min., color. Executive Producer: R. ytle; Producer, J. J. Bernsen.

INALIST AWARD: to USAF Air Photographic and Charting Service (MATS), Lookout Mountain, AFS for *The Air Force Missile Mission*, 24 min., color. Producer-Director, eorge Pratt; Writer, William R. Lungren.

Recruiting and Indoctrination Films

Boeing's Films Help Sales Climate

With Impressive, Photogenic "Hardware" as Screen Subjects, Boeing Transport Division Has a Solid, Long-Range Program

WHEN THE EXECUTIVES and technical personnel of an airline view a Boeing sales film, they see a good picture.

But that's *not* the impression intended.

Neither is there any delusion at The Boeing Company that a convincing film, by itself, will result in multi-million dollar orders for jet airliners.

Instead, film producers for the Sales Department of the Boeing Transport Division aim toward audience reaction that achieves *searching* consideration of the subject matter.

Prospective Viewer Knows the Subject

Boeing Transport sales films are designed primarily to improve the climate for sale of the Division's products. It is always recognized that the prospective customer airline's top management already has basic knowledge about the film subject, that detailed technical information will be conveyed by other presentation methods and that the intensive sales effort will follow through flight demonstrations, technical conferences and negotiations.

The "hardware" for Boeing films is impressive and photogenic. Most familiar is the famed long-range 707, subject of the first films produced as the company prepared to enter the jet airliner market. *The 720 Story* depicted development of the more recently introduced medium range 720, and the new three-engine, high tail short-to-medium range 727 already is the subject of one film and will inspire others before it goes into service in about two and one-half years. The military KC-135 tanker-transport and proposed all-cargo air-

Boeing 707 jetliner *is framed in the window of photo-flight plane as air-to-air footage is made for an Air Transport sales picture.*

planes of the future provide additional material.

But swept wings, rakish tails and attractive interiors are not the only picture-worthy scenes which Boeing film producers use. They have a wealth of others—dramatic tests in the laboratory, in the factory, on the runway and in the air . . . pipe-smoking design engineers discussing aero-dynamic improvements . . . devel- mental activities in the wind tunnel . . sce models and full size mockups . . . vast ma- facturing facilities . . . celebrated personali traveling in Boeing jetliners . . . airpo around the world.

Film "707" During Its Prototype Phase

It wasn't always thus. The 707 was stil a paper airplane a decade ago, when initial c- tacts were made with the airlines to expl e their future requirements for jet equipme Boeing kicked off the jetliner sales parade n this country in 1955, and competition imm- diately became intense. It was still two ye s before the first production model would be n flight tests and three years until the airpla e would be in service. But Boeing salesmen w e in the field, and they needed film.

Good film advantage was taken of the 7 prototype, which had begun flying in 19 . Its passenger seating arrangement was limit , however, to accommodate many "black box " —the instrumentation equipment used in a long and extensive testing program. And, wh e fundamentally the same airplane as the which would be rolling out of the factory, t had configuration differences which were rea- ily apparent to discerning eyes in the airl e business.

Merge Flight Scenes With Mockup Shots

So shots of the prototype, flying out of Bo- ing Field at Seattle, Washington, were - quenced with footage taken in a mockup whi the company built in New York, a contine away.

Jet noise was a prime issue during th period, and Boeing was spending millions the development of sound suppressors. A do- umentary film was made capturing the actu sound of the prototype's suppressed jet e-

Pre-flight line at Renton provides a photogenic scene with its impressive line-up of Boeing jets in colors of various customer airlines.

ges while taxiing and taking off. This sound vs then compared under the same conditions vh that of a large piston-engine airliner to istrate that the noise of jets could be exted to cause much less concern than that vich had been voiced in some quarters up t that time.

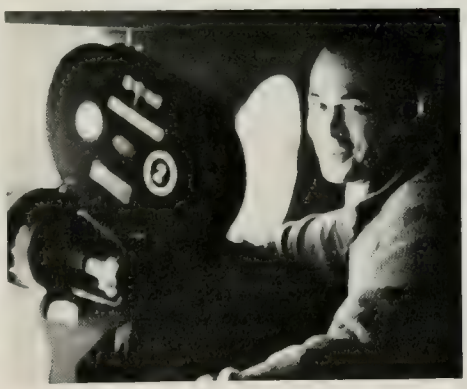
A challenging assignment early in the 707 ogram—still before there was a production plane to photograph—was the need of a fn for the International Air Show in Paris in 157. Since the film was to be shown largely t non-English speaking audiences, English dlogue was held to a minimum, and music, a an international language, had good applidtion. *The Jets Are Here* was shown not only d the air show in Paris, but Boeing sales engineers used it extensively for many months.

Producers Take Part in Sales Planning

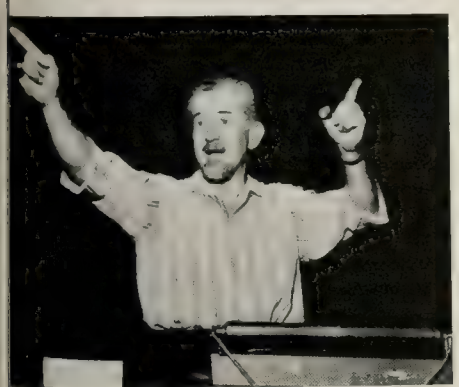
As personnel of the Presentations Unit in te Transport Sales Department, the producers d these films participate from the outset in the anning of sales programs. Wellington B. Duke) Groves, sales films supervisor, and ls assistant, Dwight Pinkerton, coordinate teir efforts with the sales managers and their desmen, with route analysts, with market researchers, with design engineers and with thers, including such personnel as those of te Spare Parts Department, Field Service ction, Customer Airline Training School and light Test Department.

Inplant film facilities and outside film companies are utilized for obtaining footage, writing, editing, creating musical scores and production. Concept and direction remain with the Boeing producers, while the other services toward the finished film print are obtained wherever the most effective work can be accomplished for the particular job. Among motion picture production companies with whom contracts have been placed from time to time are Forde Motion Picture Productions, Hansom & Associates and Rarig Film Productions. Footage also is obtained from independent cameramen, producers and newsreel firms throughout the world. Facilities of leading Hollywood production companies are used.

Here's the "star" of "The 720 Story" *as the first model 720 Boeing jetliner rolls out of the factory. A Transport Division sales film had already preceded its introduction.*



Extensive, Invaluable Footage Library



An extensive library of documentary footage, taken as events occur, has proved invaluable. The first model of any Boeing jetliner and the first airplane for each customer airline call for film upon factory rollout, first takeoff, air-to-air and customer delivery. Developmental testing and certification tests for the Federal Aviation Agency are followed closely on film.

A recent assignment took a cameraman to Tucson, Arizona, where the first Model 720 for Irish International Airlines was being flown in the carrier's pilot-training program. Footage was obtained for multiple use—for an annual "report" type film, for use by the Irish

BOEING SALES FILMS:

(CONTINUED FROM THE PRECEDING PAGE)

carrier and for other Boeing sales films still in the planning stages.

The same cameraman, thoroughly skilled and experienced in motion picture production, then went to Edwards Air Force Base in the Southern California desert to film FAA certification work on two other Boeing airplanes. These were a South African Airways Intercontinental 707 which was proving the installation on that model of advanced wing devices and an American Airlines 707 with the first of the new fan-type engines.

Again, the footage obtained will be drawn from the library for a yet undetermined number of future films.

"707 Year One" an Exceptional Film

While most of the Boeing Transport sales films run in the vicinity of the customary 20 minutes for industrial pictures, an exception is *707 Year One* of 45 minutes. Incorporating high entertainment value and emotional quality, it portrays how the introduction of worldwide "big jet" service brought peoples and cultures closer together.

Boeing sales teams issue engraved invitations for showings of the picture, which are included on each occasion as part of a full program marked by informative presentations, hospitality and social inter-change. In addition to showings in the United States, the film has played to invited groups in Hong Kong, Johannesburg and Mexico City. It is in both English and Spanish versions, as is also *The 720 Story*.

"Air Age Distribution" Widely Shown

Produced as sales aids, the Boeing films also have use internally for the information of personnel in other organizations of the company, and, occasionally, are shown to outside groups, such as scientific and professional organizations and service clubs. *Air Age Distribution* has had considerably wider release.

Using animation extensively, this current film is designed primarily for use by the cargo managements of airlines and cargo carriers, and its use by Boeing sales teams is additional.

Its appeal is pointed to the sharp-pencil types to show them how they can do a better job of filling cargo holds and thus build their cargo business toward a need for all-cargo jets. Boeing products received only incidental attention.

A Challenging Future for Sales Films

The job ahead for the sales film producers in the Boeing Transport Division is recognized by them as demanding an even greater accomplishment than any to date. Effectiveness of the pictures released over the past five years has been proved as a result of their careful conception and top quality production. With the company now selling a complete line of jet transports from short to extra-long range, films are being planned to support every phase of the sales efforts which will be required.

"What makes you think you've got so much time, Ben? *Germs develop resistance; drugs lose effectiveness." Scene in "Merry-Go-Round."*

Too Much Optimism About TB's Conquest?

Nat'l Tuberculosis Association Combats Complacency in "Merry-Go-Round"

TUBERCULOSIS—a disease that seemed on its way out as a major health problem—is once again the cause for serious concern. Two sets of findings give good reason:

Opinion surveys show increasing complacency about TB . . . stemming from the dramatic decline in death and long-term disability rates made possible by new drugs.

But . . . *factual* surveys show the drop in the TB death rate actually slowing down. More disquieting . . . the number of patients with infections *resistant* to the new drugs has *doubled*.

The Vital Mission of "Merry-Go-Round"

This epidemic of infectious over-optimism lies behind the release of a new motion picture, *Merry-Go-Round*, produced by Henry Strauss & Company, for the National Tuberculosis Association with the partial financial support of E. R. Squibb & Sons Division of Olin Mathieson Chemical Corp. The film is designed to give volunteer NTA workers a tool they can use with both lay and professional audiences to:

. . . revive a sense of urgency about the problem;

. . . create a feeling of personal responsibility for facing up to it;

. . . lay down guide lines for action by various organizations and individuals in areas where each can be most effective.

"Doctor, listen. *Do you have any idea what comes over my desk in a day? I haven't time.*"

Diagnosis: tuberculosis. *"How many times have I had to break this news to patient"*

No stranger to motivational problems, the Strauss organization found *Merry-Go-Round* a challenging assignment. Producing a film designed primarily to *inform* offered no solution . . . regardless of how clearly or forcefully the case was presented. Too many people, finding the facts unpalatable, would simply refuse to swallow them. On the other hand, a highly emotional film involved the danger of creating fears that would paralyze the will to act.

Human Tendency to Avoid Responsibility

The approach finally decided upon sets the problem in a wholly different perspective. The "merry-go-round" of the film's title is symbolic . . . representing the human tendency to shift hard responsibility around and around so that no one need hold on to it long enough to *do* anything. Development of this theme results in a film that deals with the *root causes of many different community problems* . . . not simply with TB . . . and suggests a pattern by which people can work together for *general* community betterment. Such an approach is psychologically sound on many grounds.

It appeals to those who may be deaf to warnings of personal danger, but have much greater difficulty in stilling the voice of conscience.

It tends to stimulate action by pointing

FILM FIGHTS OVER-OPTIMISM ON TUBERCULOSIS:

(CONTINUED FROM THE PRECEDING PAGE 48)

remedies simultaneously with problems. There is no need to soft-pedal unpleasant facts, because the audience is given practical ways of doing something about them.

It ensures a receptiveness among different kinds of audiences, by showing the mutual self-interest that unites them all.

In sum, the spur is positive rather than negative . . . the rewards of action are stressed over the dangers of inaction.

Uses Format of Modern Morality Play

The film's format is that of a modern morality play. Its protagonist is Dr. Lila Jennings . . . portrayed by Mildred Dunnock, as a devoted medical Cassandra. Her antagonists are the intangibles of apathy, fear and ignorance —something far harder to grapple with than the doctors, health officials, politicians, or men and women in the street who seem unresponsive to her warnings. Caught up herself on the "merry-go-round," she ends up pretty much back where she started. But though the answer still eludes her, the audience will find it difficult to escape.

Merry-Go-Round has a highly distinctive flavor in keeping with its message. The team of Director Bob Wilmot and academy-award winning Director of Photography, Boris Kaufman, sets and maintains the appropriate mood by novel use of the film medium.

Children's counting-out games . . . collisions between toy automobiles . . . and similar vignettes get key ideas across in a symbolic way likely to make them long remembered.

Hope and Despair in Light and Shadow

Rapid alternations of highlights and shadows emphasize contrasting attitudes of hope and despair. Action takes place against "limbo" backgrounds where conveying *feelings* has

"In the early stages, no symptoms. *You fe nothing. And unknowing, you go around infec ing others among neighbors, fellow workers*

priority . . . and against highly realistic on where *facts* need to be given added authorit These, and a progressively quickening pac build on each other for a climax of impact.

To make sure that the impetus generated this impact will not dissipate, *Merry-G Round* goes to TB association workers with Utilization Guide designed to help them g active audience involvement and participatio The Guide, for use in leading post-showi discussions, is divided into special sectio for professionals in the health field . . . grou devoted to specific community goals . . . a more loosely organized thought-leader group

Segments Aimed at Particular Groups

Each section provides material focus around those characters and situations in t picture of greatest interest to a particul group. Discussion for each aims at stimulati and outlining the kind of action for which th group is particularly well-equipped . . . areas where they have personal concern influence.

Development of a motion picture which c provide powerful audience motivation throu simple exposure (as via television) . . . and the same time furnish ample material for pr ductive group discussion . . . constitutes y another forward step in the field of publi interest films.

Local Tuberculosis Groups Have Prints

Use of *Merry-Go-Round* will link the o jectives of NTA to broader community obje tives . . . and improve lines of communicati with people who can get things done. Thus will create a base of public interest . . . unde standing . . . and acceptance that will ma the National TB Association's continuing ed cational efforts more meaningful and effecti At the same time it should help create a n and enduring pattern for joint action in ma important fields of community endeavor.

Merry-Go-Round will be made available f community showings upon request to loc Tuberculosis Associations.

"Silent Witness" Joins Medico-Legal Series

seful Merrell Film Delves Into Medical-Legal Problems of the Drinking Driver

PONSOR: The William S. Merrell Company.

TLE: *The Silent Witness,* 27 min., b/w, produced by Dynamic Films, Inc.

In one out of every three automobile accients at least one participant has been drinkg to excess. It is estimated that drunken drivg causes 40,000 deaths and a million and a lf injuries every year.

Yet, drunkenness is hard to prove. Symptoms dozens of medical problems are quite simir to those of excess drinking. It is difficult to n the label of drunkenness on the clear-eyed, ber man in court by eye-witness evidence one.

The Silent Witness shows how many police partments are coming to rely on tests made ith scientific instruments which measure the

efense counsel cross-examines *expert witness, r. Grant, on value of alcoholic tests.*

ntent of alcohol in the blood. Many legal des now define "under the influence" in specific terms of blood content, and an increasing mber of courts are accepting these tests as idence.

Depicts Handling of a Typical Arrest

The story, in *The Silent Witness,* is of a inking driver who is arrested for reckless iving, tested by the police and tried in court.

In the film, the instrument demonstrated is e Breathanalyzer, one of several reliable deces used for testing alcoholic blood content. ll are based on the fact that there is a conant ratio between breath alcohol and blood cohol, which can be measured by testing eath from deep in the lungs. Alcoholic blood ntent of over .15 per cent has been deterined by standards of the American Medical ssociation as indicative of being intoxicated.

Although the film shows that breath tests e finding increased acceptance, it makes no rticular brief for any commercial test.

Latest in Useful Medico-Legal Series

Citizens who may find themselves catapulted to court for the defense or prosecution of a se of drunken driving, doctors who may be lled to appear as expert witnesses, lawyers, lice and other public officials will all find cts for discussion in *The Silent Witness.*

This film is the latest in a series of medicogal motion pictures produced by Dynamic lms for The Merrell Company in cooperation with such authoritative groups as the American Medical Association, American Bar Association, and American Hospital Association. It is available for showing to any interested group.

Five Other Titles Are Also Available

Other films in the series, which are available for showing to medical and legal audiences, include: *A Matter of Fact,* which brings to light the serious consequences of inadequate post mortem examinations; *No Margin for Error,* which deals with the cause and effect of human mistakes in the modern hospital; *The Medical Witness,* which shows the doctor the right and wrong way to give medical testimony; *The Doctor Defendant,* with helpful suggestions on how to avoid professional liability action; and *The Man Who Didn't Walk,* presenting the difficult problem of traumatic neurosis.

The defendant *is being given a breath test after arrest in scene from "The Silent Witness."*

Details about print-loan may be had from The Merrell Company, Cincinnati 15, Ohio.

News Along the Film Production Lines

United Film, Motion Picture Ad Services Companies Merge

The merger of United Film Service, Inc., Kansas City, Mo., and the Motion Picture Advertising Service Co., New Orleans, has been announced by Carl J. Mabry, president of MPA and W. Hardy Hendren, president of United.

Operations will be conducted under the corporate name of Motion Picture Advertising Service Company, Inc., with Mabry serving as president and Hendren as chairman of the board.

Direction of all field representatives handling sales at the local level will be headed up by Mabry from the New Orleans office, while Hendren will direct activities of the national sales representatives and head up theatre relations from the Kansas City office.

In announcing the merger, Hendren said, "The two companies have cooperated closely for the past 31 years. With the merger, we can take better advantage of the renaissance in theatre attendance. We believe that unified direction and control of sales at the local and national levels will result in better service to our customers and supplemental income for our theatre partners."

Before the merger, United had been rendering service primarily in the northern and western sections of the country and MPA in the south and east. The merged company will serve advertisers and theatres throughout the entire continental United States. It will continue to handle the theatre screen advertising programs formerly served by one or the other of the two companies.

National sales offices will be maintained in Chicago, Detroit, New Orleans, New York and Kansas City with production facilities remaining in New Orleans and Kansas City.

The Kansas City production unit will operate as a subsidiary under the name United Film Productions, with W. J. Scrogin, former production vice-president of United, as its head. The film will produce TV commercials, documentaries, sales training films and slide films in addition to the production of theatre screen advertising films.

Another subsidiary, Intermission Films, Inc., which was organized by United and MPA jointly in 1960, will continue to operate under the merged company. It will be managed by a vice-president of the new company, E. S. Washburn, who was formerly a Vice-President at United. He will direct all sales effort in the west from the Kansas City office, while sales in the east will be directed by Joseph J. Lee, vice-president, from the Cincinnati office.

BUSINESS SCREEN EXECUTIVE

NEWS OF STAFF APPOINTMENTS AND A-V INDUSTRY DEVELOPMENTS

Oakley, Musson, Moran Named to Sales Posts at Bell & Howell

Three marketing executive appointments for Bell & Howell's Photo Products division have been announced by Carl G. Schreyer, Marketing Vice-President.

George L. Oakley has been named Director of Sales, succeeding George A. Eddy, recently appointed Director of Amateur Film Operations. Oakley was formerly Director of Audio-Visual Sales.

Charles A. Musson succeeds Oakley as Manager of Audio-Visual Sales. He was previously Manager of Industrial Sales, audio-visual department.

John B. Moran has been named Sales Promotion Manager, succeeding John H. Trux, who was recently appointed Manager of Amateur Film Merchandising. He was formerly Assistant Sales Promotion Manager.

Oakley joined Bell & Howell in 1946. He has served in a variety of marketing posts including Manager of Professional and Industrial Equipment Sales, Professional Division Manager, and Director of Audio-Visual Sales. Previous to his association with Bell & Howell he was with Westinghouse Electric Corp.

Musson came to Bell & Howell in 1943, joining the inspection and packaging department. He subsequently worked in the service and personal equipment departments and was named Texas District Manager in 1952 and Ohio District Manager in 1953.

Moran joined Bell & Howell as Assistant Sales Promotion Manager in 1959. Previously he was Assistant Advertising Manager, American Meat Institute, and Product Advertising Manager of the Sunbeam Corporation.

* * *

MacMillan Heads Camera Design for B&H Photo Products Division

David M. MacMillan has been appointed chief camera designer for the Photo Products Division of Bell & Howell Company. He has previously been with B & H as an engineer, and is a winner of the A. S. Howell Award for his participation in the development of the first 8mm electric-eye motion picture camera.

* * *

Hecht to Wylde Films, New York

Albert D. Hecht, formerly executive producer with Bill Sturm Studios, has joined Wylde Films, Inc., New York, as an account executive.

Reder Named Advertising and Merchandising Mgr. for Radiant

William R. Reder, of Deerfield, Ill., has been named Advertising and Merchandising Manager of Radiant Manufacturing Corp., of Morton Grove, manufacturer of projection screens.

Coordinated with this appointment, Adolph Wertheimer, President, has announced, are the advancement of B. J. Pilchen to Sales Promotion Manager and of M. J. Jensen to Advertising Supervisor.

Reder will be responsible for the Radiant consumer and trade advertising programs, merchandising and public relations programs. He was formerly Advertising Manager of the Dutch Brand Division of Johns-Manville.

* * *

Persons to Direct Advertising, Sales Promotion for Van Praag

Hal Persons has been appointed director of advertising and sales promotion of Van Praag Productions, according to an announcement by the firm's president, William Van Praag.

Persons has assumed his new post in addition to his position as director of sales.

Barrie O'Daniels . . . to Niles

Barrie O'Daniels Joins Niles to Head Up "Business Theatre"

Former Broadway producer Barrie O'Daniels has joined the Fred A. Niles organization, Chicago, heading up Business Theatre, a new post in the communications firm. He was formerly with Wyling, Inc.

* * *

Buckeye Appoints Marilyn Gold to Direct T. F. P. Pub Relations

Marilyn Gold has been appointed Public Relations Director of T.F.P., Inc., the Entertainment Division of Buckeye Corporation.

Formerly Director of Advertising and Publicity for Flamingo Telefilm Sales, Inc., Miss Gold, in her new capacity, will handle advertising, publicity and promotion for Transfilm-Caravel, Inc., Flamingo and Pyramid Productions, the three of which comprise T.F.P., Inc.

Combined, the three companies in T.F.P. produce and distribute filmed programs for television, commercials, industrial films and live business shows.

Miss Gold joined Flamingo two years ago as Director of Promotion. She was previously associated with Kappa Enterprises.

Albert Boyars, formerly public relations director of Transfilm-Caravel, is now in a similar capacity for the Buckeye Corporation.

* * *

Transfilm-Caravel New V.P.'s are John Fenton, S. Kambourian

John J. Fenton has been named vice-president in charge of production for Transfilm-Caravel's Film Production Division, according to Robert H. Klaeger, president of the division.

* * *

Steven Kambourian has been named vice-president in charge of motion picture completion, a new post in Transfilm-Caravel's Film Production Division. He was formerly supervising editor of Klaeger Film Productions, Inc.

Alexander's Howard Olds

Alexander Names Howard Olds Resident Producer in New York

Howard F. Olds, Creative Director of the Alexander Film Co., Colorado Springs advertising and industrial film producer-distributor, has been appointed to the newly-created position of Resident Producer in New York and has been elected a vice-president of the firm.

Prior to his promotion, Olds served at Alexander's Colorado Springs studio. Under his direction the firm received a number of creative awards, including the Grand Prix at Venice.

* * *

Bausch & Lomb Appoints Bex Director of Merchandising

Thomas A. Bex, 415 Kimberly Drive, Brighton, New York, has been named Director of Merchandising for Bausch & Lomb Incorporated, Rochester.

In his new position, Bex is responsible for the development and coordination of major sales, promotional and merchandising activities for the firm's ophthalmic and consumer goods lines.

A native of Syracuse, New York, and a graduate of Syracuse University, Bex was formerly vice-president and general manager of the Rochester office of the L. M. Harvey industrial public relations agency.

* * *

MPO Videotronics Appoints William Susman Vice-President

William Susman has been appointed a vice president of MPO Videotronics, Inc.

After joining the company in 1956 as a production coordinator, Susman served later as studio manager. He was recently made executive producer, and will continue to serve as producer in MPO's television commercials division.

* * *

Ed Rinker Becomes an Account Exec at Columbia-Screen Gems

Edward Rinker has joined Columbia-Screen Gems Commercial-Industrial Division as an account executive, according to Joe Swavely, Director of the division.

Rinker, a former Chicagoan, has long been a producer of TV commercials and industrial films in the East. He was previously Vice-President of Consul Film Corp., Vice-President of Fred Niles and Kling Film Productions, and an Account Executive with Sarra, Inc.

* * *

Atlas Names Thomas Peterson as Vice-President for Sales

Thomas H. Peterson, former Columbia Broadcasting System radio sales executive, has

Thomas H. Peterson

joined the Atlas Film Corporation as Vice-President in charge of sales. President James Kellock made the announcement for the Oak Park studio.

SPONSOR: Allergy Foundation of America—as a public service presentation by Schering Corporation.

TITLE: *Nothing to Sneeze At*, 13½ min., color, produced by Film Graphics, Inc., in cooperation with Film Counselors, Inc.

☆ The Allergy Foundation, organized by many of the leading medical specialists in the field, needs support and understanding for its continuing research in allergy problems. Allergy, though not a killer, is a mighty serious business—one out of ten Americans is allergic to something—enough incapacitated sneezers and wheezers to rob industry of a billion dollars a year in lost man-hours.

Meets Need for Education

What has been needed is more general education for the public on what allergy is and what medical science is doing about it. The need has now been capably filled by a new film which tells the background of modern allergy therapy and urges sufferers to undertake proper treatment.

The film is purposely planned as a light, palatable public service television feature. Steve Allen serves as introductory narrator, Turk Murphy's jazz band provides fine sounds from an original musical score, and the picture is a cowboy cartoon with way-out-west animation by Film Graphics.

The allergy information is set in an allergy specialist's office—for Slim, the marshal, has a powerful sneeze, and it just might come from an allergy to his trusty horse, Calico.

Goes With TV's "Westerns"

The allergist explains what allergy is in good understandable western terms—an allergic reaction is like an irritated sheep rancher who musters his kinfolk to protect his land against the cowpokes who drive yearlings through his property, and winds up with the traditional noisy gun battle and corpse-strewn landscape.

In the same way, the doctor explains, antibodies rally within the human body to fight back against the allergens. The antibody is a law-abiding citizen, so to speak. However, when allergen and antibody come in contact, the disturbance is created.

Nothing to Sneeze At was underwritten for the Allergy Foundation by the Schering Corporation. Film planning and production supervision were by Film Counselors. Distribution—to both television and general 16mm audiences—is via Sterling-Movies.

Bissell, Inc., presents:

An Integrated Program on Art of Housecleaning

☆ An audio-visual promotion package on housecleaning was recently produced for Bissell, Inc., by Victor Kayfetz Productions, Inc., of New York City.

The completely-integrated package, consisting of several 16mm sound motion pictures and 35mm color theatrical commercials, was devised by both the film production company and Ruder & Finn, Inc., public relations agency for Bissell, as a full year's public relations program using visual media.

Three Films in Program

The promotion included the production and distribution of a newsreel for TV, a 5-minute feature story for women's TV programs, a 13½-minute film and study guide for high school Home Economics classes and TV distribution, and theater screen trailers on new Bissell products.

The 16mm color-sound motion picture, entitled *Housecleaning With a Winning Team*, deals with father who has been leading a bachelor's life at home while mother is in the hospital having a baby. With his house in a state of chaos and disarray, he is suddenly faced with the dilemma of getting everything cleaned up before his wife comes home with the new baby. He enlists the aid of his fourteen- and ten-year-old daughters. They show him how, with the proper housecleaning tools and modern methods that they learned in their Home Economics classes, housecleaning can be done quickly and effectively.

Distributed by Association

Showing proper procedures, tools and cleaning aids in the different parts of the home, *Housecleaning With a Winning Team* is being distributed on free loan by Association Films, Inc., to high school Home Economics classes as well as clubs and women's groups.

Assignment Homework, a minute, 16mm film, covers a teenager preparing a school report on a comparison between the old-fashioned and modern methods of housecleaning. After using some of the latest household cleaning tools, her report concludes that today's modern equipment really takes the drudgery out of housework and makes

BUYERS READ BUSINESS SCREEN

mother's job less painful and a lot easier.

TV Prints from Kayfetz

Free loan TV prints of *Assignment Homework* are available to TV stations for use with women's programs, and may be obtained from the Golden Snowball Department, Victor Kayfetz Productions, Inc., 1780 Broadway, New York 19, N. Y.

In addition, four 10-second, 35mm color theatrical commercials were produced, featuring part of the Bissell line and including the carpet sweeper, rug shampooer, floor scrubber and combination vacuum cleaner and floor scrubber. These theater screen commercials will be made available to Bissell dealers throughout the United States for use as part of their 1961 local advertising program.

"The Sounds of Industry" Shows Blind Doing a Job

SPONSOR: National Industries for the Blind.

TITLE: *The Sounds of Industry,* 27 min., color, produced by Bert. L. Coleman Associates.

This is a film about the blind and their constant efforts to make a place for themselves economically amongst seeing people. Without asking for sympathy or pity they do ask for an opportunity to hold jobs they can do and to compete with others on the basis of quality of goods produced while meeting all standards of a competitive market.

Thirty states and the District of Columbia have authentic workshops for the blind where quality, dependability and skill are factors which are built into every item bearing the Skilcraft trade mark. Skilcraft products range all the way from mattresses to mops.

The Sounds of Industry is reaching adult audiences through all offices of Modern Talking Picture Service, 3 East 54th Street, New York.

* * *

Aviation to the Jet Age Presented by Air France

SPONSOR: Air France.

TITLE: *Five Steps to the Jets,* 17½ min., color, produced by Richard de Rochemont.

This film deals with the history of aviation from its primitive beginnings to the present day of fast, efficient and safe jet travel. Actual film clips of some of the great scenes of aviation history are used.

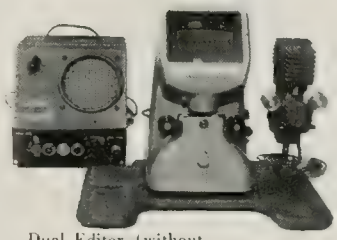
Distribution to television, school and adult groups is through Modern Talking Picture Service, 3 East 54th Street, New York.

* * *

Career in Commercial Art? Film Shows What It Takes

SPONSOR: Art Instruction, Inc.

TITLE: *How A Commercial Artist Works,* 14 min., b/w, produced by the Calvin Company.



This film shows how a professional artist works with an advertising agency on a particular advertisement, from a rough layout through finish. It also includes an analysis of types of material best suited for art uses.

It is available to school and adult groups through Modern Talking Picture Service, 3 East 54th St., N. Y.

If you want the IMPACT of new ideas we have the creative hands to produce resounding results . . . in the largest, most complete new facilities between Detroit and New York.

Case Histories of Current Business Films

Shopping for Husky briquets

Husky Shows Wholesalers Facts About Briquet Line

SPONSOR: Husky Oil Company.

TITLE: *The Husky Briquet*, 13½ min., color, produced by Watson Film Productions.

☆ With heavy emphasis on laboratory work that goes into the testing of the Husky product, this film—aimed at wholesalers to promote a new barbecue briquet—shows what's behind that fuel used by the backyard chef.

The whole story is covered, from the establishment of the housewife's concern over quality products for family use, to the steps taken in overcoming technical problems in the creation of an improved briquet made from lignite, a wood by-product used principally as an inexpensive commercial fuel.

Glamorization is spread on generously, giving the effect that the briquet is born, bred, beautified and bunsen-burned in the clinical confines of the Research Control laboratory and conference room throughout its entire life cycle.

The film is being distributed by the sponsor, Husky Oil Company, Cody, Wyoming.

* * *

Action at Indianapolis in "Driving With Champions"

SPONSOR: Champion Spark Plug Company.

TITLE: *Driving With Champions*, 27½ min., b w, produced by Dynamic Films, Inc.

☆ This film goes behind the scenes at the Indianapolis 500-mile race. It shows the careful pre-race indoctrination which both new and veteran drivers undergo in order to qualify themselves to race the "500." Safety and courtesy are stressed.

Highspots of the 1960 race are featured in the film.

Television distribution is through Modern TV exchanges.

Sohio's Film Series Has Key Role in Dealer Training

There's *No Substitute for Salesmanship* says the Standard Oil Co. of Ohio in one segment of a new motion picture series designed to show Sohio dealers how to take advantage of Sohio's seven-step driveway service designed to help sell more needed services and merchandise to station customers.

The films were produced by Reynolds & Howe of Cleveland to add key impact to the Sohio Dealer Training Program. Other titles include:

It Looks So Easy depicts a cocky new dealer who takes over a Sohio station and encounters the many problems involved.

A third motion picture in the series, *The Peoples Choice*, spells out the procedure and advantages of the Sohio 7-step driveway service as the vehicle for getting new customers and making regular satisfied customers of them.

The three 16mm, black and white films are each 20 minutes in length.

* * *

Reader's Digest Pictures Dayton Printing Operation

SPONSOR: Reader's Digest Association.

TITLE: *Dayton Printing*, 8 min., color, produced by United States Productions.

In Dayton, Ohio, a big printing plant of McCall's Corporation runs 27 days nonstop every month turning out completed copies of the READER'S DIGEST.

This is a fabulous printing operation, well deserving of this interesting photographic study undertaken by USP director Fine Bras as an informative background film for R D readers and advertisers.

Dayton Printing follows the printing, collating, trimming and gluing of the magazine, winding up with a paper wrapping process that provides individual wrappers at the rate of 30,000 an hour.

The film drops a few such statistical gems as that each issue of the READER'S DIGEST will be read 168,000,000 times—calculated at three readers per copy, and five reading sessions per reader.

* * *

Film Trek to Puerto Rico for New York Youngsters

SPONSOR: Topps Chewing Gum, Inc.

TITLE: *A Baseball Vacation*, 13 min., color, produced by Rona Productions.

☆ A group of New York youngsters got a real treat last winter when they were flown to Puerto Rico as barnstorming ballplayers, good-will ambassadors and movie stars, by Topps Chewing Gum Company, prominent bubble gum manufacturers.

The film which was made of the trip is a lively document of the on and off-diamond activities of the Topps All-Star Baseball Team during its one-week Christmas-New Year tour of the Caribbean island. The squad was invited by the Puerto Rico Department of Recreation to participate in a tightly-packed schedule of contests with other junior championship clubs in cities and towns throughout the baseball-mad commonwealth.

Despite a hectic itinerary which kept the boys on the go during every waking hour of the trip, the camera faithfully follows all the highlights—from the moment the team was greeted by a police motorcycle escort at San Juan Airport to their happy but reluctant departure for home.

A happy group of players . .

Tree young Broadway stars en-rcte to Hollywood for filming of ne Ford show . . .

P O "in Production" on ord's 1962 Dealer Show

The Ford Motor Company's ig 962 dealer introduction show ow in production at MPO al and Training Programs, Inc., ner Producer-Director Ira Mar-in Hank Barth of the MPO staff aintaining direct liaison with ol on the project in Detroit.

ne of the first of the big tasks lved in producing the show a been the job of casting. Re-ly completed, after months of me-screening and auditioning, casting for the show included the auditioning of some 300 female vocalists alone.

The 1962 film spectacular will be privately screened in the fall of 1961, before some 40,000 Ford dealers and salesmen in 36 major cities across the country.

Modine Slidefilm Shows Quality Control Program

A color and sound slidefilm, recently completed for Modine Manufacturing Company, Racine, Wisconsin, reveals the new quality control program Modine has established for its auto radiators.

Produced by Fred A. Niles Productions, Inc., the film features newscaster Alex Dreier in his familiar "man on the go" role. Sequences point out that while a radiator may amount to a mere one percent of a vehicle's total cost, a breakdown of this component may mean the difference between success and failure when a doctor must make an important call in time or a farmer needs to harvest a valuable crop before weather attacks.

The new Modine slidefilm is being shown to executives in the automotive industry.

NEWS-BRIEFS

"Discovering America" a New Series for Television Stations

A new series of sponsored films on travel is now being offered to television stations by Association Telefilms, a newly formed division of Association Films, Inc.

The series, *Discovering America,* consists of 13 half-hour films and includes such subjects as New England, the South, Washington, D. C., jet travel, railroading, touring by antique auto and yachting.

Among the motion pictures to be "premiered" in the series is *Progress Report No. 1,* on the 1964-1965 New York World's Fair. The film shows replicas and renderings of the exhibits, fair-site and Unisphere symbol as well as nostalgic footage of the 1939-1940 World's Fair. H. V. Kaltenborn and John Tillman handle the commentary and interview sequences.

Initially stations are asked to sign up for 13 weeks. However, Association Telefilms is planning to extend *Discovering America* for additional weeks as subjects are made available.

Journal Films Signs Pact to Use Italian Studio Facility

Journal Films, Inc., of Chicago, producer of educational films, has concluded an agreement with the University of Rome's Film Institute (Istituto Internazionale per la Cinematografia Educativa, Scientifica e Sociale) to produce and distribute educational films on a world-wide scale.

In making the announcement, Gilbert Altschul, President of Journal Films, explained: "Italian film craftsmen have developed skills and techniques that have placed them among the foremost film creators in the world.

"Our idea," he said, "is to channel these talents, skills and energies in such a way that they will serve the curriculum goals of American schools. At the same time, we are anxious to make the best American films available to students in Italy."

A New Sales Training Film:

"The Hidden Side of Selling" Shows Factors Affecting Sale

A new 16mm sound film, released by Roundtable Productions, shows how to increase sales by learning to recognize and overcome the hidden influences which make or break a sale.

The Hidden Side of Selling is based upon hundreds of actual sales histories gathered from every field of business and industry, and its practical approach is especially designed to interest and stimulate qualified as well as beginning salesmen.

Explores Problems of Three Salesmen

The 34-minute story begins at a sales meeting. Three experienced salesmen are having familiar difficulties selling to certain of their customers. What happens when each of these salesmen makes his calls and the use of pooled experience is then portrayed. Realistic sales situations show how strong buying resistance is met and overcome.

In the first interview, the salesman faces a "know-it-all" customer, who acts like an expert and becomes rude and abrupt if contradicted. The second salesman faces a customer who can't make up his mind and complains when given too many alternatives. The third true-to-life case shows an overly agreeable customer who is reluctant to say why he's not buying and "clams up" when pressed for answers.

How to Deal With Customer Reactions

The film clearly shows salesmen how to effectively deal with various types of customer reactions and how to blend their personalities with those of their customers. This authoritative picture is designed to create an awareness of the psychological problems, the "hidden side," which is often overlooked in a sales situation. It emphasizes that every salesman, no matter how experienced, is capable of raising his selling score.

Stuart Atkins Associates, sales and management consultants, did the research for the sales techniques demonstrated in this 34-minute, 16mm sound film. For information concerning rentals or purchase, write to Roundtable Productions, 275 So. Beverly Drive, Beverly Hills, Calif.

Recent Product Developments for Projection and Production

The new Cine-King screen

Da-Lite Cine-King Screen is Designed for Wide-Screen Use

"Cine-King," a portable screen designed for CinemaScope and other wide-screen films has been introduced by the Da-Lite Screen Co. Inc., of Warsaw, Ind.

The new screen is eight feet wide and features Da-Lite's "White Magic" glass-beaded, seamless screen surface for reproduction of wide screen pictures. Rugged tripod legs are made of heavy-gauge extruded aluminum tubing to rigidly support the screen. The screen case on the "Cine-King" is adjustable from a low position at the tripod leg bracket to the top of the square stainless steel center tube for variable viewing levels. The screen closes easily to a compact size for portability; sets up quickly with the automatic leg lock that releases tripod legs at a toe-touch.

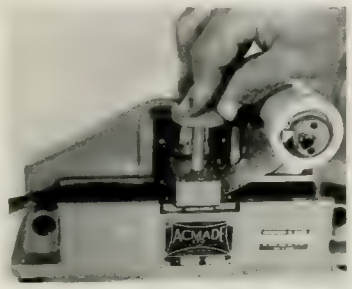
RCA Markets 16mm Projector With Better Reverse Operation

The Radio Corporation of America has introduced a new 16mm sound motion picture projector, incorporating several advanced features, engineered for educational institutions, business and industry.

The improved forward and reverse speeds are controlled by a single rotary switch, permitting faster and more efficient operation. The reverse mechanism automatically cuts off the sound track, eliminating any disturbance from muffled sound during reverse operation.

The new model is also equipped with a separate motor and blower for reverse operation as an extra precaution against any overheating and film damage.



For further information write New Products Desk, BUSINESS SCREEN, Chicago 26.

Acmade Splicer Automatically Applies Mylar Tape, 16 or 35

A new Acmade automatic film splicer has been announced which makes butt-splices and automatically applies Magic Mylar perforated tape in register on 35mm and 16mm film. The new splicer, which works on all film bases including DuPont Cronar, is available from Acmade's exclusive distributor in the United States, Florman & Babb, Inc.

In operating the new splicer, the splicing tape is registered on precision pins and held in place

Perfect register of tape to film with new Acmade automatic splicer.

until automatically applied to the film by swinging the arm over and pressing the chromed button. This action simultaneously cuts the adhesive and applies it in perfect register to the film.

The cutting arm is used by pressing the chrome button for cutting both sides of the film simultaneously. The film, of course, has been registered on pins in the horizontal channel. The cutting blade is easily replaced when necessary.

After cutting, the cutting arm is swung to the right so that splicing can be accomplished. Both arms are precision registered to exact specifications to insure perfect splices.

More information is available on request from F & B, 68 West 45th Street, New York.

Buhl Superwide Lens System Enlarges Short-Throw Picture

If you need to stretch the size of rooms used for the projection of 2 x 2 slides or film strips, the new Buhl Optical Company's Series 400 SUPERWIDE Lens System does it. This System reduces by two-thirds the distance necessary to put big pictures on the screen. Thus, normal office or living rooms can supply enough space to get a full screen size projection with any standard projector. The Lens System adapts easily to any projector without costly modification. It is particularly useful in rear screen projection where space and screen size are important.

The Series 400 SUPERWIDE Lens was developed by the Buhl Optical Company of Pittsburgh. The lens is available in 1", 1.5" and 2" focal lengths. It may be tested on a free 10 day trial offer. The retail price is $80. For further details write the New Products Desk, BUSINESS SCREEN, 7064 Sheridan Rd., Chicago 26.

Below: *top scene shows normal size of image with short-throw and (at bottom) the larger picture made possible with Buhl Superwide Lens.*

Projector-Scope in position

HPI Projector-Scope Puts Image Right on 8mm Machine

A new attachment, the HPI Projector Scope, for 8mm projectors—*sound* or silent—allows films to be seen on a small built-in screen with the room lights turned on.

The attachment will be useful for audiences of five or six people who can see training films or sales films without darkening the room or setting up a projection screen.

The HPI Projector Scope has a 15 square inch screen with a grainless surface which is said to give bright distortionless pictures under normal room illumination.

In use, the film projector's regular lens is removed and replaced with the Projector Scope which has its own built-in special six-element optical system. After the Projector Scope is placed on the projector, film is run through in normal fashion. Focusing is handled just as if the regular projector lens were being focused.

In addition to its regular use as a daylight cine viewing screen, the Projector Scope has a built-in film marker for editing sound or silent films. The HPI Projector Scope sells for $14.95. For further data write the New Products Desk, c/o BUSINESS SCREEN, 7064 Sheridan Rd., Chicago 26.

New Sound Speed Attachment Useful for 16, 35mm Editing

A new Hollywood Film Co. Sound Speed Attachment for synchronizers drives the synch machine at sound speed (36 feet per minute in 16mm and 90 feet per minute in 35mm) and is said to be extremely useful in editing pictures and track or in running the picture at sound speed in instances where narration will be added later.

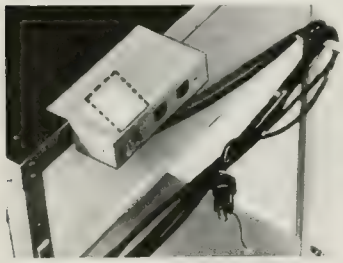
The Sound Speed Attachment (SSA-1), priced at $192, consists

NEW A-V PRODUCTS:

(CONTINUED FROM PAGE 61)

of a geared motor, capacitor, coupling and a three-way toggle switch. This modification may be added at the factory to any synchronizer without additional charge. The entire unit is mounted on an aluminum plate.

The synch machine can run from left to right or in reverse. The motor may be quickly disconnected to permit fast winding to a given area.



Another attachment, the HFC Splicer (SAS-1), permits the tape splicer to be stored over the end plate of the synchronizer and makes the splicer easily available for direct cutting. Write the New Products Desk, 7064 Sheridan Road, Chicago 26, for details and/or literature on this line.

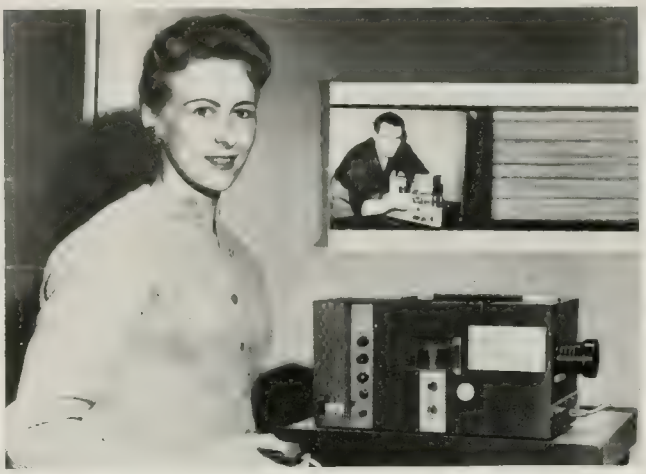
Safety Power Panel Combines Film, Slide Viewer on Stands

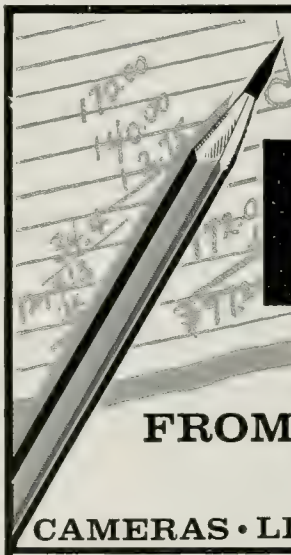
A safety power panel and film and slide viewer to fit almost any projector stand has been announced by Jack C. Coffey Co., Inc., North Chicago, Ill.

The power panel, with a 25-foot power cord and ground wire, affords greater safety when showing films or filmstrips in the classroom. The wire is long enough to



Power panel-viewer mounted on typical projection stand.

loop around a leg of the projector stand or table before connecting it to the electric power outlet. If a student trips on the cord, it will either pull out of the outlet or move the projector table slightly without damaging the equipment or harming the student.



Other conveniences provided by the power panel include: switch controlled film and slide viewer, 7-watt service for threading projector in a darkened room, two outlets, 25-foot heavy duty extension cord with ground wire, adapter plug and ±18-3 strand wire ample for 2100 watts.

At Your Service: the New Products Desk, Business Screen, Chicago 26

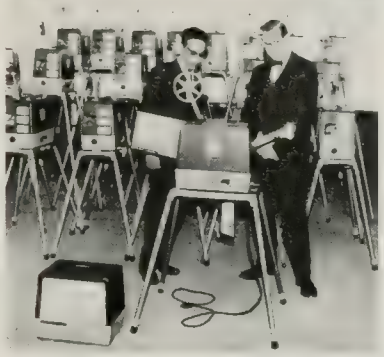
homas 16" Fluid Pan Head
ew TA Mfg. Company Product

An exclusive, balanced, free-
ing action has been engineer-
nto the new Thomas 16, a
pan head for professional
m cinematography. It was de-
ed to assure smoother, vibra-
ess 360° pans and tilts even

"Thomas 16" Fluid Pan Head



when cumbersome telephoto lenses and heavy professional cameras are required. Extreme temperatures, from -60° to 212°, altitudes and climatic extremes of any sort pose no problem to operation.

New and exclusive positive braking system allows adjustment of tilt tension to the camera; Thomas 16 may be locked at any angle without disturbing tension control. Operator is able to return to exact position and sequence; creeping is eliminated. Fits any camera or tripod.

A product of the Cinematography Products Division of TA Manufacturing Corporation, the Thomas 16 is priced at $149.50. The manufacturer provides "absolute guarantee that the Thomas 16 must outperform any fluid head on the market today, at any price, or the customer may return it for a full refund."

Glamour Gals Help Pep Up Soft Drink Sales

Orange-Crush Salesmen Learn "Technique" from Dagmar

DAGMAR AND her Pin-Up All Stars have glamorized the Orange-CRUSH sales training program with their appearance in a full color motion picture entitled *It's the Technique That Counts.*

The famous TV star and her attractive companions dramatize for driver-salesmen techniques that are vital to the successful development of beverage sales. The film is the key element in the complete sales training program, which is part of the CRUSH marketing plan for 1961. Cal Dunn Studios, Chicago, was the producer.

Attention Was No Problem

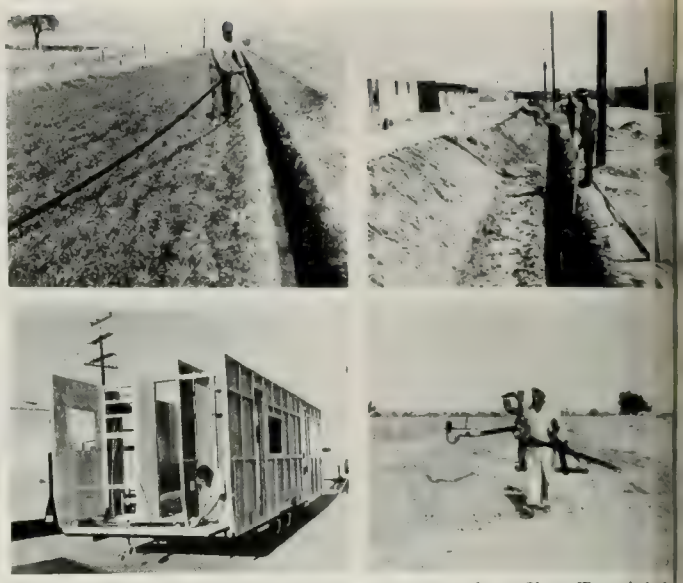
Dagmar and her friends hold the attention of the salesmen, while she, herself, brings out key points in effective salesmanship.

Large "coming attraction" posters showing Dagmar and her companions are posted on plant bulletin boards. They announce the date of these sales meetings where the film will be shown and stimulate imagination and interest. The posters further announce that *It's the Technique That Counts,* starring Dagmar and her Pin-Up All Stars, is coming without divulging that this is to be an Orange-Crush training film.

Did the Picture Go Home?

After the film has been shown a folder which outlines its main points is distributed to each salesman along with an autographed photo of Dagmar as a momento of the occasion.

The 20-minute sound slidefilm was written and produced by Cal Dunn Studios, which also designed the "coming attraction" and "take home" pieces. Helen A. Krupka scripted the film; Joe Betzer and Cal Dunn directed the production.



Large, theater-size *posters of "coming attraction" helped build interest of drivers in slidefilm program produced by Cal Dunn Studios of Chicago.*

Posters Follow Up Film

"Pin-up" type pictures from the film gain maximum attention in a full-color poster, which is distributed monthly to every Orange-CRUSH bottler. Each poster highlights a key point of the sales training film. An outline is provided with each poster with which to build a sales meeting presentation and the monthly "pin-up" girl becomes the focal point for explanation and discussion.

Pin-up girls emphasize sales pointers for driver-salesmen . . .

Four uses for ABS pipe *are pictured in Marbon film. Top left: trenching; top, right: installation at housing project; below: home use, (left) light-weight of pipe provides ease of handling.*

Prospects SEE the Benefits of Plastic P

Marbon Chemical Picture Shows Products on the Job

A new motion picture on ABS semi-rigid plastic pipe shows how urban and rural water systems, gas utilities and manufacturers of mobile homes are gaining superior piping performance while cutting purchase and installation costs.

On-location scenes of diversified piping installations in Kansas, Arizona and California demonstrate the advantages offered by the pipe, made of Cycolac brand polymers, sponsored by the Marbon Chemical Division of Borg-Warner Corporation.

Shows Benefit, Techniques

Actual installation sequences reveal how the semi-rigid pipe reduces initial cost and cuts installing, handling and maintenance costs. Graphic examples depict how improved trenching techniques, fast solvent welding of joints and other innovations are handled by small crews without special skill or training.

The film highlights the use of the tough plastic pipe for a new water district at Independence, Kansas, where 54,000 feet were installed to serve farm and rural residents at a saving of $35,000 over the cost of metal pipe.

Produced by Academy Films

Other advantages of the pipe include complete freedom from corrosion or attack by acid or alkaline soils and an unusually high impact resistance and superior tensile strength.

The 20-minute, 16mm, color picture was produced by Academy Film Productions, Inc., of Chicago. It is available on free loa through Film Dept. C-2, Marbon Chemical Division, Borg-Warner Corporation, Washington, West Virginia.

Charming Film Tale i Early Victorian Vein

SPONSOR: Hallmark Greeting Card Company.

TITLE: *An Old, Old Story* 16 min., color, produced by Alvin Productions.

This is a simple and charming story of a young boy and girl growing up and falling in love during the Victorian Era.

Appropriate to its title, the film presents its love fable through the medium of the elaborate greeting cards in fashion during the nineteenth century. The cards provide a colorful background for the story as they reflect the changing seasons of the year.

Special camera treatment animates the characters on the cards to give an animated effect. The movie captures bygone days of early sleighs, trains, elaborate homes and Victorian fashions. David L. Strout, Dean of the Rhode Island School of Design conceived, wrote and directed the film.

An Old, Old Story is being distributed by Modern Talking Picture Service, Inc., 3 East 54th Street, New York.

Kodak Pamphlets Offer Data on Automated Sound-Slide Showing

Production and presentation of automatic slide shows with sound is the subject of two new pamphlets prepared by Eastman Kodak Company.

Synchronizing Kodak Cavalcade Projectors to a Sound Track (No. S-16) and *The Kodak Cavalcade Programmer, Model 1* (No. S-17), are the illustrated pamphlets available without charge.

Synchronizing Kodak Cavalcade Projectors to a Sound Track describes various methods of accomplishing control of the projector from the sound source. It examines in detail such areas as general principles, electrical requirements, use of sound equipment with built-in tripping provisions, tape recorders, record players, physical and audio systems, and stereo tape recorders. One section of the pamphlet gives instructions for setting up a repeating show with a Kodak Cavalcade Repeating Projector synchronized with a tape recorder.

Kodak Cavalcade Programmer, Model 1 defines the programmer in both general and technical terms and explains its use. As the pamphlet points out, the programmer enables the user to produce and present automatic slide shows with sound for exhibits, classroom teaching, self-teaching, and industrial training.

Both pamphlets are available from the Sales Service Division, Eastman Kodak Company, Rochester 4, New York.

FILMS OF THE MONTH

Facts on Family Circle

SPONSOR: Family Circle Magazine.

TITLE: *For Homemakers Only*, 25 min., color, produced by Dynamic Films, Inc.

☆ Is there a national consumer magazine today without a film? Not likely. Starting about 10 years ago magazine sales chiefs came to realize that some elements of their stories could not be told over the intimate luncheon table, or over the media man's desk with charts and graphs. Magazines had to offer more than ABC figures in today's competitive markets, they had to sell quality of readership, quality of editorial content, and the often subtle differences of one book over another. Nothing does this job better than film—nothing can *involve* the viewer more, nothing can involve more important ad buyers in one perfect sales pitch better than film.

For Homemakers Only is a good example of the magazine film. It has a great deal of quality in its own right. This has to be nowadays—for every magazine has something to show to every ad buyer—a very competitive situation—so the film must say something, and say it cleverly, compellingly and gracefully as well.

FAMILY CIRCLE doesn't have the biggest circulation, doesn't have the biggest bleed c[o]
pages, doesn't pay fortunes for articles by
Duchess of Windsor, doesn't have the
richest readers. But it does have 5½ mil
circulation of paid voluntary copy sales. It
readers who read food articles and food
and who demonstrably buy from these ads.

The story line of the film is based on an
vertising agency plans board meeting, and
media selection for a large advertiser. Ac
include such well known performers as Eve
Sloane and John Baragrey.

For Homemakers Only is being shown
supermarket chain executives as well as
advertising and agency people in the U. S.

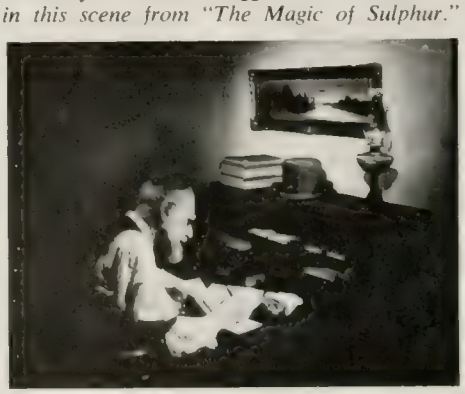
A scene from the Family Circle picture .

Picture of a Vital Element: "The Magic of Sulphur"

AN ALL-NEW color motion picture covering the history, production, chemistry and everyday uses of the important element, sulphur, has been released by the Bureau of Mines, United States Department of the Interior, for free loan distribution.

Released in 16mm sound, *The Magic of Sulphur* replaces the older title, *Sulphur*. Jamieson Film Company, Dallas, is the producer; Texas Gulf Sulphur, the sponsor.

This 27-minute film traces the history of sulphur from the beginnings of civilization, first depicting its use as a mysterious powder for fending off evil spirits. The versatile yellow material next served as a medicine for ancient Egyptians, later was used in flaming weapons of the Romans and, at an early moment in history, was employed in the manufacture of the first gunpowder by the Chinese.



In modern times, the element emerged to help pace the industrial revolution, and in the space of a hundred years, many new indust
requiring sulphur developed. Demands
what the ancients called the "burning sto
soared to millions of tons per year.

The Magic of Sulphur shows the basic st
ture of underground salt domes where depo
of the element occur. It then depicts in l
action sequences, as well as animation,
Frasch method of mining rich sulphur depo
in the United States Gulf Coast area.

Molten sulphur is carried by rail, trucks
barges to the customer and is poured
ships' holds for export. These golden mo
tains, pictured in natural yellow character
of the element, are formed, layer upon la
until they are 50 feet high and hundred
feet long.

Requests for loans of *The Magic of Sulp*

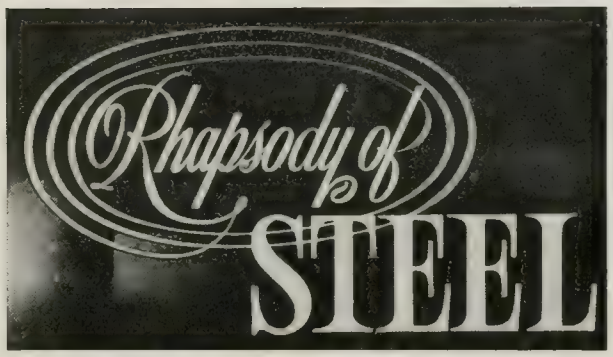
Case History Of A Successful Business Film

To date "Rhapsody of Steel" has been shown in over 6,000 theatres, reaching an estimated audience of more than 16,000,000 people.

"Documentary, institutional – call it what you will, 'Rhapsody of Steel' is a small masterpiece, the best thing of its kind since 'Fantasia.'



– DEEMS TAYLOR

"'Rhapsody of Steel'... is one of those rare industrial films with enough specific quality and general interest to play commercial circuits.

– TIME Magazine, 1959

"'Rhapsody of Steel,' made by U. S. Steel, beautifully conceived and executed... Better than many feature pictures!"

– HEDDA HOPPER, Los Angeles Times

"We Make Sure Our Training Sessions Run Smoothly by Using Kalart/Victor Projectors..."

"The way we use 16mm sound films," continues Mr. Al Tinker, President of Tinker Kirby Nassau Company, Inc., "we need a projector that is dependable at all times. Films play a big role in our program of training men how to sell Kirby Home Sanitation Systems. When we schedule a training session, we want to know that the projector will do its job at the flip of a switch. Our Kalart/Victor fills the bill on this count, and many more besides."

A company such as Tinker Kirby Nassau, with so much at stake in its training program, particularly appreciates the fact that Kalart/Victor projectors are engineered to provide trouble-free performance in continual daily use.

Simplicity of threading, ease of maintenance and protection against film damage are other important features that Mr. Tinker looked for —and found—only in Kalart/Victor.

Three-step threading with color-coded path showing sequence and location makes it easy for nearly anyone on Mr. Tinker's staff to set up a Kalart/Victor. Safety Film Trips, a Kalart/Victor exclusive, prevent damage to valuable training film. And a large-capacity oil reservoir built into the Kalart/Victor means that lubrication is necessary only once a year.

What features are you looking for in a 16mm sound projector? Great picture quality? Magnificent sound reproduction? Adaptability for magnetic recording and playback? Kalart/Victor has them all. Call your Victor Dealer for a demonstration.

THE EDITORIAL VIEWPOINT

THE SEASONS CHANGE and invigorating autumn brings a climate suited to optimism and fresh resolve. It's not far-fetched to believe that you who work with factual, informational films stand very close to the front line in this worldwide struggle for men's minds. What you do *and how well you do it* may play a vital part in the ultimate victory of free men everywhere.

And, in direct terms, this is also a time to be tough—realistic in our thinking and in the appraisal of our industry's resources. This is a time when every kind of "hardware" seems to appear in baffling numbers and kinds. The "hardware" of missiles has been matched by abundant types of "hardware" for audio-visual projection.

As these pages note (42-47) teaching machines are abounding in types but short on the vital factor of programming; television offers all the sets and models their designers can think of; from 35mm and 16mm we have come to 8mm in sound motion picture projection!

But the film medium's greatest resource—and its most-neglected—*is the content of the film itself. Our good, useful pictures are the industry's greatest salesmen.* A selection of the year's best should be "packaged" to show before business groups from coast-to-coast.

Instead of Research & Development for "hardware" in this field, let's have more R & D for vast areas of untapped subject matter. Teen-agers tell us they sleep through those endless reels of men-making-lectures on chemistry and physics. Where is the genius of the screen that can motivate these young people to seek the stars? Where are the films that can instill the fervent beat of our American heritage?

And where are the films to renew the interest of youth in the trades and professions where they are needed? We sicken to read the list of aimless audio-visual "research" projects being undertaken for "National Defense" in colleges and universities that have themselves failed to produce answers to much more obvious educational problems.

The answer to all of this: let the men of vision and understanding of this God-given way of communication come together to review the common opportunity of the tremendous future that lies ahead. And, meanwhile, let's take inventory of our assets upon which to build the program of the future.

* * *

Stockpile of Films: Projector Owners Are Among Industry's Greatest Assets

Stockpiles are a vital part of national defense. The greatest stockpile of know-how, stimulus, and information this country possesses is in the film libraries and producers' vaults where more than 6,000 titles of 16mm sound motion pictures and slidefilms al ad exist.

The crisis here is in cataloging. The d n of the H. W. Wilson catalog has only incr se the vital problem of indexing, describin; an releasing to possible users an immense ar u of useful data. Remember that hundre these were training films on which Eu pe presently flourishing recovery was has ne through U. S. cooperation. Remember h education in underdeveloped countries i on most urgent problem where a-v can help

* * *

Common denominators are importa t this industry. One common denominat the ownership by groups, industry and sc ol of more than half a million 16mm sound ro jectors and the continued flow of greatl im proved 16mm models to these same el equipped audience groups. At a time whe th economics of film production and proc in are benefiting from the 1,000 to 2,000 1 n print orders for *single subjects,* we ne t continue to create and produce more *u fu wanted pictures and to make known to al wh can sponsor them,* the audience poten l— the fact that the most influential segmer m America are in these viewing audiences!

* * *

Remember that the salient fact about n sound projection is simply *the lower co o 8mm sound prints* as well as their gr tly reduced shipping or mailing weight. If p nt aren't less expensive than 16mm, 8mm wil not prevail on the shipping differential. Th problem is one of laboratory facilities.

* * *

As television renews its quest for the in of audience fare the chairman of the CC thinks it ought to purvey, the films that ro vide fact and inspiration in palatable s will further increase their popularity wi program managers. And Zenith's move n color set manufacture further emphasize th growth of that phase of broadcasting.

The people who know color, who have s it most skillfully in all visual forms, are a the family of specializing producers in h industry. From their cameras and their w shops will come new aspects of the visua a to further enrich viewing fare.

And, finally, it is the resource of this c st to-coast family of producing companies ha is among our greatest assets. Cooperation be tween them can help meet this proble o Research & Development. Cooperation c bring us closer to the day when top ma ge ment sits on the juries and in the audi ce when films worthy of their attention a brought to judgment.

* * *

An African Leader Cites the Importan Mass Communications on That Contin t

Modern communication is the vital k f stability and progress in Africa, asserted Chief Emanuel A. A. Fadayiro, Minister of Info n tion for Western Nigeria, at a recent pres re ception in New York. "In Nigeria," he s "we have placed the highest priority or ed

Biological Photographic Association Bestows Honors at 31st Annual Dinner

☆ The membership of the Biological Photographic Association includes some hundreds of men and women who are among mankind's most useful servants employing photography and audio-visuals to interpret advances in medicine, dentistry and related biological sciences.

We joined with this group at its annual banquet proceedings on Thursday evening, August 24, in Chicago, as the guest of its president-elect, Mervyn LaRue, Sr., and our old friend of long standing. It was a revelation to meet with the group, to renew many acquaintances in this highly-specialized field and to witness the honors bestowed by the Society as a special highlight of the occasion.

Ralph Creer, director of medical motion pictures and television for the American Medical Association, served as toastmaster for the evening. It was his privilege to bestow an honor award upon one of England's best-known medical illustration authorities, Dr. Peter Hansell, FPBA, of London's Westminster Hospital and Medical School.

Another special citation was bestowed in absentia by Mr. Creer on the ailing Tom Jones, dean of medical illustrators and an emeritus member of the staff of the University of Illinois' Medical School.

Warren Sturgis Receives Schmidt Award

But the highest honor of all, the famed Louis Schmidt award of the Society, was conferred by its recent holder, H. Lou Gibson, on one of this industry's best-known medical film producers, Warren Sturgis, of New York. And two other Society members, James Ernest Brubaker of Northbrook, Illinois and Thomas Stuart Masterson, Chief of Photography at Stanford University, Palo Alto, California, became Fellows of the Society.

Mr. Brubaker has made notable contributions to biological photography as a designer, builder and user of medical endoscopic cameras and associated equipment. It is through his efforts that unique medical equipment has helped to solve extremely difficult bio-photographic problems.

As Chief of Photography at Stanford, Mr. Masterson is recognized as an authority in the field of medical photography, as well as director of all photographic services on the Stanford campus.

President-elect Merv LaRue himself typifies this spirit of the Association which he now heads, succeeding Verlin Y. Yamamoto. His many photographic inventions and consistently fine work in the field of medical and pharmaceutical films have been too little publ
mostly because of his personal dedicat
the interests of the many institutions, ho
and companies which he has served as
sultant in meeting their special problem

Technical pictures don't have to be too technical. Technicians are also *people.* Their worlds are complex ones, but the technical motion pictures they seem to prefer are the ones which are clear, interesting and well executed, as well as being accurate and informative. Put yourself in an audience with upper-case technicians and you couldn't tell a biochemist from your neighbor next-door. Technical groups want motion pictures on technical subjects to be, in the first, second and third place, good motion pictures.

Kodak
TRADEMARK

Eastman Kodak Company announces a new, transistorized audio-visual projector for people in education, business, industry, religion, and government whose lives are devoted to *communicating ideas.*

This new Kodak Pageant Projector has been built so that an eleven-year-old school child can set it up, thread it, and operate perfect performance with only two practice runs!

New, transistorized sound system

This projector's completely transistorized amplifier incorporates major electronic improvements in the science of re-creating sound.

Turn on the projector and the sound starts instantly, together with the picture. No wait for amplifier warm-up any more.

Before and during performance, you will notice a complete absence of background noise in the sound system. No audible hissing, no crackling or popping. This projector's sound system has the capacity to reproduce—faithfully—any frequency which can be recorded on an optical sound track.

This new transistorized sound system has been created to reproduce the entire audible range of sound, crisply and clearly. You will hear comfortably-audible sound either in the auditorium, where it must be loud, or in small rooms where sound volume level is kept low.

This is sound with the power to operate either through public-address or auditorium speaker systems or through this projector's own large (11x6-inch) speaker.

This is a sound system which should never interrupt a performance, because there are no tubes to age or burn out. Parts are carefully selected for long life. Rugged circuitry withstands bumps and jostling.

Kodak sound engineers estimate that this new projector's sound system should require virtually no maintenance for the life of the projector.

Superb picture brilliance

Kodak Pageant Projectors have always had superior picture brilliance because of a specially developed Kodak shutter. This exclusive Kodak *Super-40 Shutter* projects pictures which are bright and easy to see, even in partially lighted rooms or where "throws" are long.

The *Super-40 Shutter* has been incorporated into this new Kodak Pageant Projector.

You'll see brilliant pictures in room or hall. Also, since projection in small rooms often requires smaller wattage projection lamps for the sake of eye comfort, we have allowed for a choice of either 750-, 1000-, or 1200-watt lamps in this machine.

This Kodak Pageant Projector never intrudes upon the performance

This is a machine which actually contributes to the effectiveness of a motion-picture presentation. Operation is so simple it never embarrasses the operator. The machine runs so quietly the audience doesn't detect its presence. Its sound system and mechanics are so dependable, it won't interrupt its own performance.

It can sturdily accept abusive treatment. A school child, for example, can shift it from full speed forward to full speed reverse at one whack without damaging anything. He may run it continuously in reverse without fear of projection lamp burn-out.

You can see a demonstration of this new Kodak Pageant 16mm Sound Projector, AV-126-TR, at your convenience by calling a Kodak audio-visual dealer. Or write, please, for specification literature.

Thank you for your interest.

Another Fine Product From ACMADE

AUTOMATIC BUTT SPLICER

Cuts, Splices, Applies Magic Mylar Automatically!

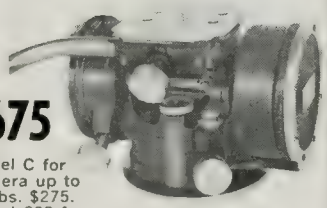
The first practical, speedy and efficient automatic splicer and perforated adhesive tape (Magic Mylar) applicator on the market. Now, with no fuss, mess or waste, it is possible to splice, repair, butt-splice, or strengthen splices on all types of film — positive, negative, magnetic—even duPont Cronar or other bases.

The cutting arm, shown in operating position, is used by pressing the chrome button for cutting both sides of the film simultaneously. The film, of course, has been registered on pins in the horizontal channel. The cutting blade is easily replaced when necessary.

The splicing tape is registered on precision pins and held in place until automatically applied to the film by swinging the arm over and pressing the chromed button. This action simultaneously cuts the adhesive and applied it—in perfect register to the film.

Model 35 for 35mm, Model 16 for 16mm—$295

NEW F & B MARK III FLUID DRIVE TRIPOD



The day of the friction head is fast coming to an end. More cameramen now use fluid drive heads **because** they meet the demand for smooth, continuous, easily-controlled action.

THESE SALES-MEN FOR "HIRE"

Any one of these "sales makers" will be valuable additions to your sales staff. Take a look at their qualifications:

1) After initial investment, they require no salaries, expense accounts, sick leaves or vacations.

2) They make every sales point you want made . . . the way **you want it** made (every time, too!).

3) They never tire . . . as persuasive on last call of day as first in A.M.

No, we haven't found a sales robot to replace the salesman. But, we have designed a line of sales "assistants" that will help your present sales force put their sales curve into orbit. Why not look into these Viewlex "sales makers" for your staff now. Contact your local Viewlex franchised A-V dealer or use coupon below.

SALESTALK

Filmed "Progress Reports" on New York's World's Fair

☆ The motion picture *Progress Report I*, for the New York World's Fair, will be shown in many neighborhood theatres in the Greater New York area beginning in September.

The film, produced by John Campbell Films, is narrated by H. V. Kaltenborn and carries an interview with Robert Moses. It has been distributed nationally by Association Films.

According to AF vice-president Robert Mitchell, *Progress Report I* has now had 40 telecasts in key cities, and has been seen by an estimated 1,600,000 persons.

Progress Report II is now in preparation by John Campbell Films, Byram, Connecticut, and will feature the amusement and entertainment aspects of the coming Fair. Release is expected about November, 1961.

New U. S. Steel Film Shows "How to Weld 'T-I' Steel"

☆ A new 16mm color-and-sound motion picture, particularly helpful to shop and field welding crews, welding trainees and vocational and engineering school students, is now available from the U. S. Steel Corp. for group showings.

How to Weld "T-I" Steel is an 18-minute motion picture produced especially for training purposes. Step-by-step the film shows how easy it is to insure sound welds in structures and equipment fabricated from this widely used engineering material.

Clear, concise narration goes right to the point with close-up photography of actual welding operations on "T-I" steel. The film explains the reasons why it is important to use the right electrodes, the right welding heat—and the right procedure is explained and illustrated in orderly sequence.

For personal study or review of the techniques shown in the motion picture, a comprehensive booklet on *How to Weld "T-I" Steel* will be presented to everyone who sees the film along with a handy Welding Heat Input Calculator.

Five U. S. Steel Distribution Centers (see addresses on page 35) offer this film on free loan.

* * *

The Doctor and Narcotics Subject of New Canadian Film

☆ One of the most dangerous pitfalls for a doctor is his accessibility to narcotics, the Winthrop Laboratories emphasizes in a new motion picture for Canada's Department of National Health & Welfare.

Face of an Addict explains that over 50 Canadian doctors are addicted to narcotics. Most of them start because of the pressure of their work, and until they are discovered can obtain drugs relatively easily.

The film, a Crawley Films' production, traces the downfall of a young doctor who tries to take over in one year a practice which an older physician has built up over his lifetime. He starts taking narcotics because he feels he must get rest so that he can better serve his patients. Supposedly cured, as with most addicts, he again goes back to drugs when he meets his first crisis.

The color film (16mm) was designed for showing *only to medical practitioners*. It is available from the Canadian Department of National Health & Welfare, Ottawa.

* * *

Problems of Salaried Employee Covered in N A M Package

☆ The National Association of Manufacturers is offering a new packaged program, including two sound slidefilms, on *Satisfying the Salaried Employee*.

Pinpointing specific areas of salaried employee dissatisfaction and offering practical solutions to such problems as status, recognition, compensation, communications and supervision, the NAM package includes both visual aids and discussion materials which have been effectively used in over 400 conferences. A two-year study was undertaken of these problems by industry leaders.

Included in the package at a cost price of $22.50 are: a Conference Manual (leader's guide); two color strip films (35mm) on *Union Target for Today* and *Satisfying the Salaried Employee*, together with two-sided records synchronized to the strips and two booklets, "Satisfying the Salaried Employee" and "Making an Audit of Salaried Personnel Practices."

Write the National Association of Manufacturers, 2 East 48th Street, New York 17, N. Y., for details and order data.

* * *

Blue Print Companies Tell Service Story in Slidefilm

☆ The International Association of Blue Print and Allied Industries has recently begun distribution of a 15-minute color and sound slidefilm, designed to help the IABPAI membership tell the story of its services to customers and public groups.

Produced by Torkel Gundel & Associates, Chicago, with sound by CBS, *Many Loves Has the Blue Printer* relates the fable of an average blue printer and his business services.

Young Burt, the Blue Printer, with narration by Fahey Flynn, is seeking a wife. He meets Pricilla Jones in his hometown, Centerville, U. S. A., but in order to marry his sweetheart he must first convince Pricilla's father of the merits of the blue print industry.

He explains that "blue prints are pictures of ideas for everything built, manufactured or fabricated and are the starting point where draftsmen put their ideas on paper to visually communicate for all of industry and commerce."

espite Noteworthy Gains, Defense Education Is Too Little *efense;* Extension of NDEA Expected to Clear Congress

CONGRESS reluctant to go along with Kennedy administion programs rejected comoise efforts to save the remrs of aid-to-education legislarin the closing days of August d the Administration itself alittle time for domestic crises est Berlin and Soviet resumpof nuclear testing carried the toward fateful days of overg importance.

the aftermath of education's tack, the National Defense dcation Act is expected to surv with a one or two year exion by both Houses anticiid. Despite its many friends on Hill and yeoman efforts by etary Ribicoff, Senator Wayne se and the National Education ociation, the feeling was endered that *Defense* Education become much more *general*than its original intent.

Emphasis on the Academic

ertainly the Act's provisions been stretched to cover a range of cultural and periphneeds in education and very applied to original goals of roving the flow of *scientific technical-minded—and well qipped* young people into the bratories, plants and facilities re they are needed.

he absence of a *single* advisory mittee from within either inry or the aero-space and other tary agencies involved was furhighlighted by dozens of longge projects for audio-visual "reich" far beyond the nation's *ense needs.*

Aid Science, Language Study

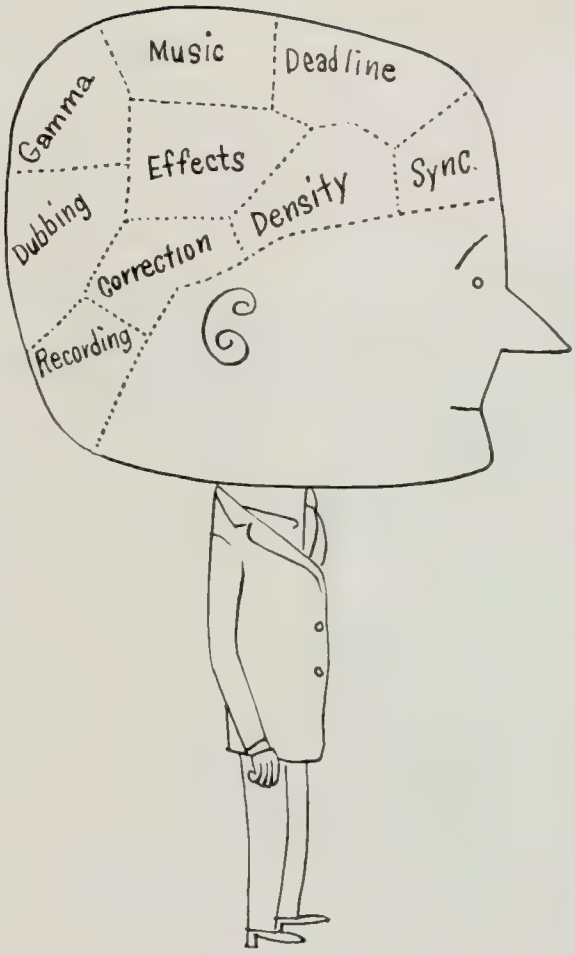
ut, while it lasts, NDEA has ed to get many U. S. schools er equipped with audio-visuals, mprove science instruction and uage teaching. Perhaps, it was in Washington, this interim od will enable both the schools the Office of Education to review progress made under the Act; to adjust sights where adjustment is needed. There's another Congress going into session before too many months have elapsed!

* * *

450 in Training for Nine Projects of the Peace Corps

☆ A scaled-down Peace Corps (at least from the standpoint of early astronomical numbers) has some 450 earnest men and women in training or en route to nine approved overseas projects. The most numerous recruitment is for the 300 teaching assistants requested by the government of the Philippines to serve as educational aides in the islands' elementary schools.

The most practical and immediate program was the recruitment of 20 surveyors, four geologists and four civil engineers for the training of young Tanganyikans to survey feeder roads in the agricultural areas of that African territory.



Bound for Schools and Farms

In addition, 70 Peace Corps' candidates are in training at the University of California for possible secondary school assignments in Ghana; 12 volunteers are destined to help improve agricultural conditions on the overpopulated West Indian island of St. Lucia.

The first Peace Corps' project in Latin America was the assignment of 64 volunteers to community development projects in Colombia. And now the University of Notre Dame has contracted with the Corps to send 40 Corpsmen and women to Chile this year to work in village development and teaching activities with the privately-sponsored Chilean Institute for Rural Education.

Educational classroom tasks carry through other assignments,

such as the preparation (at Harvard University) of some 45 Peace Corps' candidates for secondary school teaching assignments in Nigeria.

In Asia, 25 agricultural aides are to go to the Punjab State and the first of two Peace Corps projects for East Pakistan entered the training stage on August 21 at the headquarters of The Experiment in International Living, Putney, Vermont.

This project calls for 30 specialized men and women in the fields of irrigation, farm production, town planning, medicine, sanitation, engineering, carpentry, bricklaying, youth work and communication.

A-V Aid to East Pakistan

The *first sign* of *any application* of audio-visuals on an official basis within the field work of the Corps came into the East Pakistan project. A three-man visual aid team, working with visuals other than motion pictures (why?) were included within the requirements of this program.

It is devoutly hoped that the existence in U. S. film libraries of several thousand excellent *basic films and filmstrips*, the simplicity of portable projection equipment and the success of these tools in some of the most backward areas in the world is not going to be overlooked as one of mankind's most interesting experiments in cooperative education proceeds along its primary organization phases.

Industrial Audio-Visual Exhibition

Three-Day New York Program, Trade Show Opens at Barbizon-Plaza on October 9th

Right: *talks and film showings will be held in this deluxe theatre of the Barbizon on Central Park South.*

THE 1961 EDITION of the annual Industrial Film and A-V Exhibitions, whose entrepreneur is the hard-working Mr. Herbert Rosen, opens on Monday afternoon, October 9th, at New York's plush Barbizon-Plaza Hotel, on Central Park South. Officially staged by Industrial Exhibitions, Inc., this year's show will be opened by Graphic Varieties' vice-president, Stanley Turtlelaub, who will talk on "Filmstrips as a Means of Communications in Sales Training."

This opening event will be followed by a related talk by the national sales executive for the Beseler Company's "Salesmate" equipment. Bob Shoemaker will discuss the "Psychology of Selling With Audio-Visual Tools."

Jack Moss, an independent audio-visual consultant, winds up the first day's proceedings with "How to Put Life Into Your Sales Meetings."

"Sound & Vision As a Tool"

While exhibits of a-v equipment, accessories and program sources are a continuing feature of the Exhibition, this year's theme promises to give greater emphasis to "Sound and Vision as a Tool." A concurrent "International Festival of Films" is another program feature with awards promised for both producers and sponsors, agents and specialists involved in various techniques of selected pictures.

The Tuesday, October 10th, afternoon program enlarges on film techniques with an Animation Workshop Session, arranged by the Animation Producers' Association of New York and directed by its president, Lew Gifford.

Three Workshop Programs

The Workshop follows three main channels with "Animation: the Medium for Ideas" followed by "New Techniques in Animation" and an open-end discussion forum.

Ben Deutchman, Educational Director of Decca Records, follows at 4 p.m. with a discussion of "Phonograph Records as Resource Material for the Classroom Teacher" and the Metropolitan (N. Y.) Audio-Visual Association holds a workshop session on "The Psychology of Learning as Applied to Teaching Machines and Programmed Learning" to win up that afternoon program.

A dinner session on Tuesday evening will be held by the Metropolitan Audio-Visual group with Diana Douglas, a Yonkers' grade schoolteacher, speaking on "Programmed Materials Adapted to Specific Needs in the Classroom."

The final Wednesday afternoon program events return to a business-industry oriented theme as Robert Grunwald, president of the Harwald Company, Evanston, Illinois, hosts a "Professional Film-Handling Workshop" which promises to offer new techniques for the evaluation of film performance.

Modern Talking Picture Service, Inc., account executive Dick Rogers, will speak at 3 p.m. on "The X-Y-Z's of Film Distribution."

An International Film Festival program, offering a selection of industrial films and television

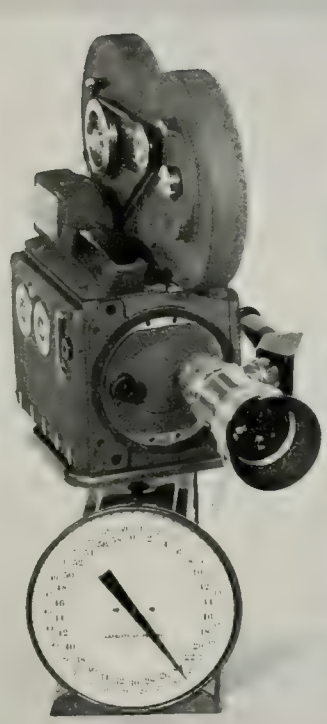
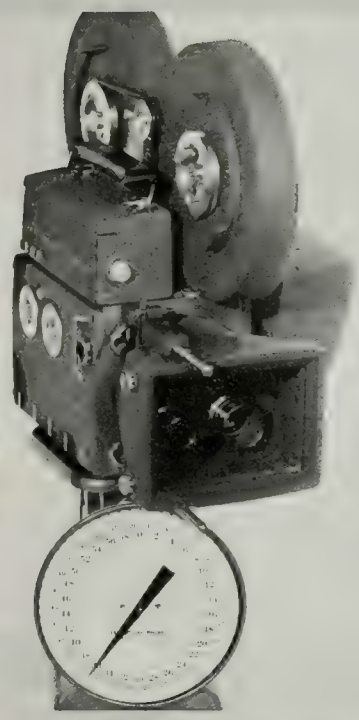
...a lightweight companion to the popular "PRO-600"



Auricon proudly presents the new "PRO-600 Special," a lightweight companion to the famous "Pro-600," now in use by Cameramen all over the world!

The "Pro-600 Special," like other precision Cameras in the Auricon line, is a superb professional picture-taking instrument, Self-Blimped and silent in operation. At a small extra cost for built-in Sound Equipment, it can even record Optical or Filmagnetic Single-System sound. The "Pro-600 Special" being driven by a true, synchronous motor is ideal for exacting Double-System sound recording as well.



While the "Pro-600" is popular for Studio and occasional Newsreel operation, the new "Pro-600 Special" with its minimum weight and easy portability, is the perfect answer for heavy duty Newsreel and Documentary filming.

Broader Name, Objectives for Niles Communication Centers

Fred Niles has announced a major change in the name and structure of his company, formerly Fred A. Niles Productions, Inc., of Chicago and Hollywood. The organization is now known as the Fred Niles Communication Centers of Chicago and Hollywood.

"We have selected the Communication Center name to best summarize the scope of our activities," Niles said. "The nature and character of our business have expanded and diversified since 1958 when we acquired the Chicago film-making facilities formerly owned by Kling.

"We are no longer solely motion picture producers," he noted. "Motion picture production per se accounts for about 60% of our total volume. As we work with industries we are called upon to plan and produce full-scale business programs for the entire marketing chain. Such a program may or may not include audio-visual materials, depending upon who is to be reached and the interest that can be provided for the established budget."

Niles also announced a internal reorganization. A Plan Board to help develop large-scale business programs has been established.

Norman C. Lindquist, senior vice president, heads the account supervisor staff and Len Owen, formerly marketing vice president of J. Case, is now vice president of the marketing division covering promotion and merchandising activities.

Barrie O'Daniels, former Wilding's industrial show president, is in charge of Business Theatre.

In the past six months Niles, whose new theme is "Industry and Producers of Business Development Programs," has created four Business Theatre presentations.

The firm recently established West Coast Division at 6650 Bronson in Hollywood. This operation will also be expanded to cover the increased scope of services.

Westrex in New Beverly Hills Building at 335 North Maple

The Westrex Recording Equipment division of Litton Industries has moved to larger quarters in Beverly Hills, vacating the Hollywood building it occupied for years.

The new location at 333 North Maple Dr. is a 30,000-square-foot building adjoining headquarters of its parent corporation, Litton Industries, Inc. In the new Beverly Hills quarters, Westrex will have more manufacturing and engineering space. The company also has expanded into development and production of recording equipment for industrial and military users.

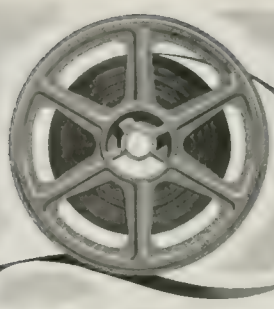
There must be a reason why more audio-visual training programs use RADIANT PROJECTION SCREENS

Sales managers, personnel directors, safety experts and training counselors consistently choose RADIANT Approved Quality Projection Screens over any other. These experts have learned through experience that they can always find the right RADIANT screen for every projection requirement. And RADIANT Projection Screens are built to last . . . built to take heavy-duty usage.

These are only *some* of the reasons why RADIANT Projection Screens are the overwhelming choice of professional men . . . and why more than 5 million RADIANT Screens are in use right now!



WRITE FOR AUDIO-VISUAL GUIDE TO BETTER PROJECTION

Based on our experience as the leading manufacturer of projection screens we have published a comprehensive 40 page reference book that covers every phase of projection in depth. Write for your free copy today. No obligation, of course.

"Variations on an Italian Theme"
Winner of a Columbus Statuette Award

SPONSOR: Alitalia (Italian Airline).

TITLE: *Variations on an Italian Theme,* 28 min., color, produced by Carson Davidson.

When Carson Davidson, a New York independent film producer, approached Alitalia with a rough treatment for a proposed film on Italy the airline officials agreed on most details but insisted that such slight evidences of commercialism as seemed evident in a very non-commercial film be expunged.

So, here is a different airline film with hardly an airliner—an Italian film with no scenes of Rome. *Variations on an Italian Theme* is oriented culturally several steps up the ladder from the standard travelog. The musical score is by Vivaldi, performed by I Musici, a well-known Italian string quartet, and about as long hair as it is possible to get.

The picture is based on several little episodes that might have happened to American travelers in Italy—if we all stretch our imaginations a bit. A girl on a bicycle meets a boy biker on a Val d'Aosta road, and they get happily lost together. A woman meets a little boy in Perugia and receives a gift. A lonely railway engineer in the Dolomites finds joy in a posy thrown by a little girl. A Venetian gondolier shows how to row a gondola with one oar.

These are simple and unpretentious little episodes. It is all blessed by truly excellent photography. Kit Davidson has a fine eye for the tasteful shot—and the patience to wait for the exact light he wants to preserve his carefully contrived mood.

Variations on an Italian Theme is distributed to groups on free loan by Alitalia, 666 Fifth Avenue, New York.

VANCOUVER

Shell Unit, Mead Johnson Awarded Festival Diplomas

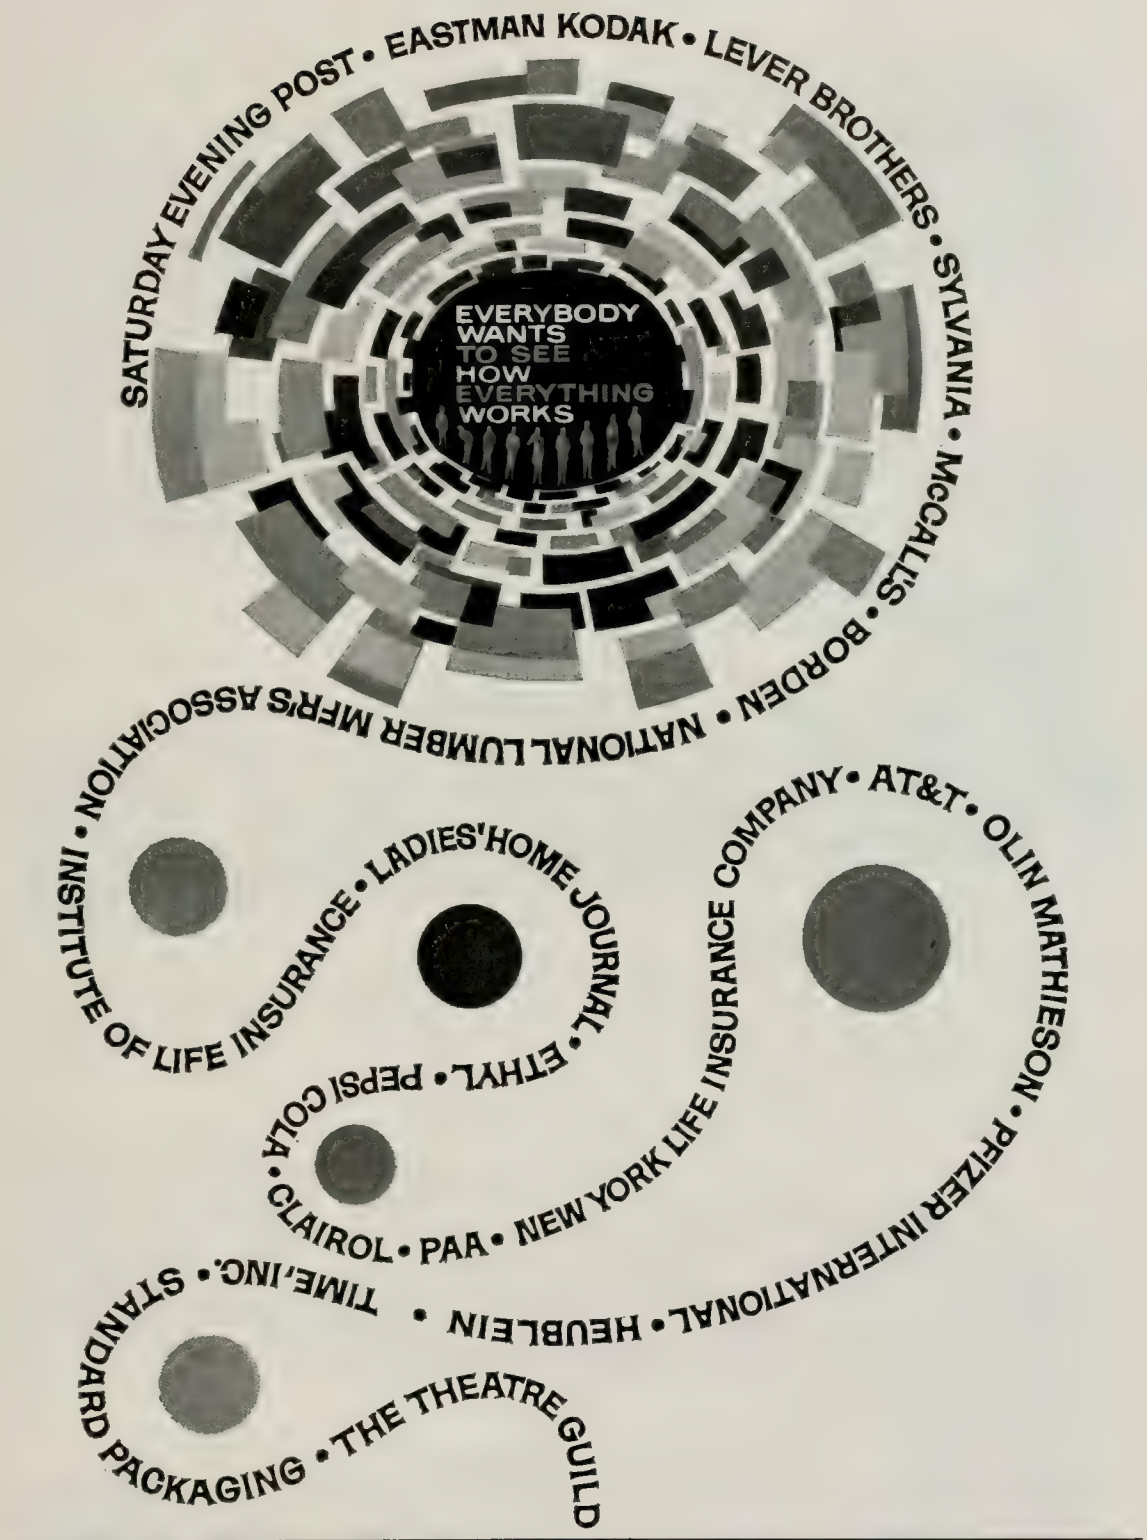
BRITAIN'S Shell Oil Film Unit was commended for "the continued high calibre of productions" and a motion picture from the United States, the Mead-Johnson-sponsored *Hospital Maternity Care*, produced by Dynamic Films, Inc., received a Diploma for the Medical Films at the 1961 Vancouver (Canada) International Film Festival.

The Revealing Eye, produced by the Shell Film Unit, won the Vancouver Diploma in the best of Science & Agriculture films; another Shell production picture, *Hold Back the Sea* produced by the Royal Dutch Shell Group in the Netherlands, won Honorable Mention in this class.

Three Plaques Presented

Cut with Festival emphasis on cultural, entertainment and general documentary subjects, there were only three Plaque winners at Vancouver. The first of these went to Film Polski, a Polish film company, for its short fictional film, *Portrait of a Man*, and another was presented to the Canadian Broadcasting Corporation for their documentary picture, *Rickshaw*, directed by Vancouver resident Alan King.

The third plaque was a special award presented to Norman McLaren of Canada's National Film Board for his experimental film, *Lines Horizontal*.



The International Critics' Award went to the Italian film, *L'Avventura*, chosen for its visual eloquence and "directional imagination." Michelangelo Antonioni was the director honored.

Japanese Anti-War Film

The British film, *Saturday Night and Sunday Morning*, directed by Karel Reisz, was given honorable mention, and Japan's *Fires on the Plain* was chosen by the Canadian Federation of Film Societies "for its profound realization of the horrors of war and its equally profound realization of man's ability to surmount war's degradations."

1,501 attended the numerous showings during the

two weeks of this Can[a]dian festival program. In addi[tion] to the citation given Engl[and's] Shell Film Unit, special [men]tion for their outstanding [con]tributions to the field o[f the] documentary film went t[o the] National Film Board of [Can]ada and to Great Bri[tain's] BBC Television Service.

Honorable mentions in the Health, Welfare and Medical Films' group (which was swept by U. S. entries) also went to *The Larynx and the Voice*, produced by Hanson Leden, M.D., and *There's a Way*, produced by Fred Lide Armond of Seattle's Erde Motion Picture Productions.

Stoney a Diploma Winner

A final U. S. Diploma winner was George C. Stoney, whose film, *Booked for Life-keeping*, was the Instructional film winner over Britain's *Tractor Sense*, produced by the Central Office of Information, and *Wealth in a Pot*, a Pakistani film, sponsored by the Ministry of National Reconstruction and Information of that country.

Nutri-Bio Color Slidefilm Aids Distributors in Field

One of the nation's fast-growing makers of dietary supplements, Los Angeles burgeoning Nutri-Bio Cooperation, is supplying its distributors with a new 22-minute color sound slidefilm that features film and TV star Jobe Cummings and his attractive wife, Mary.

Produced by the Frederick K. Rockett Company, *Give Yourself a Break* is a point-of-sale tool that has been made visually effective through the use of a new three-dimensional animation technique. Produced under the supervision of Nutri-Bio's vice president, J. Harry Ebbe, it also presents Howard Fleeman, Chief of the company's Research Staff.

An interesting sidelight shown in the beginning of the film is Nutri-Bio's Aeronca piloted by Cummings. his new invention enables its owners to drive to the airport, make a few manipulations and fly away in the same vehicle. It's a strong attention-getter

Columbus Presents 9th Annual Awards

"Seconds for Survival" Among Statuette Winners as Nine Ohio Bell Entries Are Among 152 Pictures Selected by Greater Columbus Film Council Jurors

MOTION PICTURES sponsored by American Telephone & Telegraph Co. and its affiliates, the Western Electric Company and Ohio Bell Telephone, swept nine awards at the 9th Annual Columbus (Ohio) Film Festival. One AT&T film, *Seconds for Survival*, was given the Festival's top Award, the Chris Statuette, at annual banquet ceremonies which concluded the event on Friday evening, September 15th.

Out of several hundred film and filmstrip entries, Columbus jurors nominated 152 motion pictures and two filmstrips for finalist honors. All will receive Chris Certificate Awards. But only 14 motion pictures and the two filmstrips were awarded the Chris Statuette by the Festival sponsor, the Greater Columbus Film Council.

Films from Business Win 78 Awards

78 Certificate winners were business-sponsored motion pictures; 40 were produced by educational film companies for classroom use; 38 originated among nonprofit groups such as the Girl Scouts of America (three awards); the National Education Association (three awards); the Greater New York Fund (two); Colonial Williamsburg (two); the Credit Union National Association; the National Association for Mental Health; and the Young Women's Christian Association (one each).

National government film makers were high on the honors list with the U. S. Department of Agriculture winning eight Certificate Awards and two of these, *The Forest* and *The Voice of the Forest*, were presented Chris Statuettes. The National Film Board of Canada, a frequent award winner at such festivals, won four Certificates and its two filmstrip entries, *Ti-Jean et Les Bucherons* and *Cadet Rouselle* were nominated for Chris Statuettes.

Honors to Airlines, Steel Companies

Other business film sponsors who received multiple awards from the Columbus jurors were:

Pan American World Airways, with three awards for *Strangers in Paradise* and *Counter Conflict* (produced by Henry Strauss & Company); *Fishing in Ireland* (produced by MPO Productions). Pan American Grace Airways was awarded the Chris Statuette for *South America—Land of Contrasts*, produced by Coleman Productions.

The Republic Steel Corporation won a trio of awards for *Stainless Steel—The Miracle Metal; The New World of Stainless Steel;* and *The System*. All three were produced by Wilding Inc.

Bethlehem Steel won a pair of awards for *Steels Is Steel* and *Vacuum Pouring for Better Forgings*, produced by Audio Productions, Inc. Another dual award winner was the DuPont Company which received honors for *Step Out on Color* (produced by Audio Productions) and for *Unseen Harvesters*, an MPO Production. Third winner of two awards was the Perfect Circle Company which received Certificates for *Auto U. S. A.* (produced by Dynamic Films, Inc.), and for the *Case of the Slippery Oil*, a Wilding, Inc., production.

Aetna Life Affiliated Companies was the other triple winner. Certificate Awards were given Aetna for *To See Ourselves, Outboard Outings*, and *Seconds to Safety*.

Nationwide Insurance Company was awarded two Certificates. The films, *Fur-Lined Foxhole* (produced by George Stoney) and a motion slidefilm, *The War of* 1861-1865 *as Reported by Currier & Ives*, won honors for this Ohio-based company.

Lockheed Aircraft Corporation not only won a Chris Statuette for its Antarctica production *Rendezvous 90° South*, but also received a Certificate Award for *Hercules and the Four Horsemen*.

Producers Shared These Multiple Awards

Wilding, Inc., was the most-honored film producer at Columbus with a total of seven Certificate Awards but Audio Productions, Inc., with six Certificates and one Statuette also carried high honors.

Dynamic Films, Inc., was another winner of six Certificate Awards and MPO Productions, Inc., with five and Henry Strauss & Company with four awards were among the leaders. Bay State Film Productions, Inc., Centron Productions and Mehring Productions each had three films in the award-winners' circle.

Other multiple award-winners at Columbus from the film production field were Austin Productions (two); Jerry Fairbanks Productions of California (two); George Stoney, Inc. (two); Morton Goldscholl Associates (two); and Frederick K. Rockett (two).

Three Win Statuettes in Travel Group

Three of the Chris Statuette awards went to films which the jurors classified as "Travel—U. S. and Abroad." Two of these were certainly in that vein as top honors went to Harry Coleman's striking color picture, *South America—Land of Contrasts*, made for the Pan American Grace Airways and the other airline winner was Alitalia's (Italian Airlines) *Variations on an Italian Theme*, produced by Carson Davidson.

The third of these Statuette awards went to a widely-honored motion picture, *Frontiers*, produced by Dick Durrance Films for the First Security Corporation (see BUSINESS SCREEN, No. 2, 1961). A CINE selection for overseas festivals, it was also shown at the Turin (Italy) Festival and was the First Award winner (on a

Fast-moving action scenes from TIME's information center sound slidefilm show change with split-second rapidity; gain maximum attention.

Consumer Publications Make Effective Use of the Screen

PROJECTING THE IMAGERY of readership, format and design, of market prediction and a myriad of subjects that reflect to advertisers and advertising agency viewers their special, often subtle, differences, leading consumer magazine publishers are taking full advantage of sight/sound for presentations.

As BUSINESS SCREEN has noted, "nothing does this kind of job better than film—nothing can involve the viewer more, nothing can involve more important space buyers in that one perfect sales pitch better than a *well-made* film."

TIME Presents a Fast-Moving Slidefilm

A FAST-GROWING Manhattan tourist attraction is the new reception and information center in the Time-Life building across the street from Radio City Music Hall. On display here are striking murals, models and big displays based on TIME covers.

One important display in the center of the room houses—from time to time—a short three-minute sound slidefilm which tells—succinctly—the story of TIME Magazine.

Needed a "Stand-Out" Show

TIME came to Elektra Film Studios when the new center was about to open—wanted a filmstrip that would do a thorough informational job for TIME in this display, yet stand out in direct competition with other more flamboyant aspects of the room.

The film had to withstand these viewing conditions: it had to be viewed in a brightly lit room by passing, standing audiences; and it had to be heard on hand-held telephone receivers, not on a loudspeaker.

Elektra was given a great deal of leeway to experiment with different techniques. Production staff searched for a form of presentation that would reflect the pace of TIME—dynamic, energetic, fast-moving and kaleidoscopic. A basic conclusion was that it had to move fast, above all else—yet traditional slidefilm presentation is often limited and slowed by the mechanics of change from frame to frame.

DuKane Met Speed Requirement

After days of pushing the buttons on dozens of equipment models, Elektra found a maximum speed of change consistent with good picture quality in the DuKane "Auditorium" slidefilm projector.

As it has been developed, the TIME filmstrip is a revolutionary approach to the medium. It does such things as popping on and off ten TIME covers in 3½ seconds. It is consistently capable of bursts of three changes per second. Of course, not all the film moves so rapidly, but it shows that amidst a basic treatment of solid information the rapid movement and quick change is in sharp contrast and attention-getting.

Two-Channel Tape Sound

Sound for the TIME filmstrip was recorded on two-channel tape, played back in the display by a Playmatic cartridge machine. Narration, music and effects are on one channel while the other was used for the high-frequency changing impulses.

The film has been playing in the reception room most successfully for several months. It has been cited as an outstanding example of the far-out filmstrip genre (at the American Film Festival) and has won several other awards.

"Revolution by Design" Unveils New Post Form

NOT BY FILM ALONE, but with artful, big-screen visualizations set in the framework of effective staging, the SATURDAY EVENING POST took to the road in mid-August for three weeks of cross-country presentations of "Revolution by Design," stories of the POST's completely new format.

As before, its principal personality (he wrote, directed and staged the show) is promotion chief Bob Hills. The Hills' presentation, backed by some of the East's most capable studio people, is billed as "probably the most elaborate one-man production ever staged in magazine history—and who's going to refute that!"

Certainly not the top advertising men who attended the premiere performance in Manhattan on August 14. A picture story of the POST show is "on-stream" for the next issue.

* * *

Magazines and Their Films

☆ TIME is showing fast-moving filmstrips and motion pictures; FORTUNE is booking some of the most-popular sales meeting film fare now available. Fortune Films broad-gauged film production program lately added *The Computer Comes to Marketing* (Wilding, Inc.) and has done some effective pictures on the aspects of domestic and foreign market opportunities in the Soviet.

Fawcett knows the value of the film medium and has supplied members of its publication family with highly-viewable recent productions. Their film, *Me*, was one of the year's best in the Fawcett library.

READER'S DIGEST is not only active in consumer t.v. programming; there's its recent *Duco Printing* film (U. S. Products) for the media buyer. HOUSE used the same producer for *Writing* last year and the Curtis magazine family has widely publicized THE LADIES HOME JOURNAL with filmographs like *Involvement* (Visualscope, Inc.).

A fast-growing book, U. S. NEWS & WORLD REPORT, took its media story in the Transfilm production, *Signs of the Times*. The U. S. Chamber of Commerce publication, NATION'S BUSINESS, was a slidefilm user with *The Voice of Nation's Business*. BUSINESS WEEK audio-visual presentations have been widely-shown.

EDBOOK

rsents a 17-minute visit
ih some "young adults"

EDBOOK MAGAZINE believed that media buyers ought to ne some of its actual readers so ne invited a random sampling of 5 f them to take part in a 17-inute "interview" film. The re-ults is a new 16mm sound motion icture, *Redbook's Young Adults –low They Live.*

bme nineteen reels were re-ored on the New Jersey film uo sets where these lady sub-rers discussed their lives, their rblems and their plans. High-gs of these spontaneous, off-ara reader discussions were te combined with actual dialogue ecrded as the cameras rolled.

o make its reader-guests feel ome, shooting was done on t built around young family liv-gsituations. But there was no rapting, no script and no re-eals. The only "commercials" e picture are editorial pages kn from recent issues of RED-oc and flashed on the screen.

oping that prospective adver-s will come away from screen-gwith the feeling of having con-rd with its Young Adult mar-et the magazine's promotion edle feel rewarded for their fots. For one thing, several as themes kept repeating them-lves, do much to justify the ohg Adult market story. There e also numerous spontaneous aer statements that were real otion "gems."

he of these quotes: "we're the p of people who aren't satis-ewith the status quo," was used e lead for a 24-page promo-booklet distributed to media elat film showings. This booklet, h picks up quotes from the film danalyses them in terms of a yng market, more than com-rates for the complete absence mpetitive media charts in the -minute film.

Untrained voices and unplanned rersations make this kind of re an uncertain proposition but it has been turned to ad-nge in this instance with candid am . . . real people and their personalities . . . come through ely. It leaves the viewer—the pective advertiser — with the lg of having conversed with BOOK market. •

Redbook's Young Adults on stage: *eight "young marrieds" take part in spontaneous, unrehearsed conversations that are the essence of the magazine's new 17-minute promotional film.*

"Ideas Inside" for Magazine Advertisers

THE MAGAZINE Advertising Bureau of the Magazine Publishers Association, in cooperation with the Association of National Advertisers, has combined an exciting prologue motion picture, *Ideas Inside,* with three depth-discussion panel programs to help stimulate the increased use of magazine advertising.

The panels, each 20 minutes in length, were part of this Wilding, Inc. — produced "package" and were made in the "Communi-Cam" process with TV cameras recording simultaneously on Videotape and with kinescopes to film.

Ideas on Film, produced by Wheaton Gallentine under the direction of Wilding's Mel London is a highly-creative, visually exciting color visualization of magazines as "idea originators whose dynamic impact moves people and merchandise." It is 10 minutes in length.

The three Communi-Cam panel discussion films (outlined in the chart below) cover their special fields in detail to provide fare in depth for top level advertising management, advertising agencies, sales and merchandising staffs.

The entire program is fortified by related materials such as a four-fold mailing piece (in quantity); a sixteen page two-color booklet (reviewing the content of the film package) and an eight-page booklet covering meeting ideas to be enclosed with each film shipment. All were created and produced by Wilding, Inc. Personalized versions of the film may also be made. •

A unique film package on steel making

United States Steel, through its five Film Distribution Centers across the country, is offering makers and marketers of all types of steel products, a "package" program of color and sound motion pictures to aid their sales activities, for internal training—and to use in community relations programs. Three titles provide a virtual screen "encyclopaedia" that covers the history, production and use of this basic metal.

Three new USS motion pictures for selling . . . training . . . community relations

THIS COLORFUL SERIES of outstanding motion pictures, now available to ... American industry wherever appropriate ... needs, is part of U. S. Steel's continuing ... gram to help create among the American p... a better understanding of the important ... that steel plays in everyday life—and to ... build a greater preference for steel pro...

Rhapsody of Ste...

☆ One of the most-honored of contemp... American business films, *Rhapsody of St...* appropriately the first picture in this pro... Produced by John Sutherland Production (... were other films in the series), it feature... art direction of Eyvind Earle and original ... composed by Dimitri Tiomkin.

This 23-minute Technicolor film oper... the hushed world of 50,000 years ago. A ... teor the size of a mountain top crashes ... from space into the quiet prehistoric w... bringing iron to man.

The film moves through historic epi... from the discovery of smelting iron fro... and charcoal to the first production of st... India about 500 B. C. Each period is dep... in its own contemporary art style. Fo... ample, one colorful sequence shows Pe... traders bartering for the fabled Dam... steel sword, worth its weight in gold.

By mid-19th Century, steel is mass-proc...

r he first time and the Steel Age is born. ody, mountains of iron ore and other raw arials are formed into the myriad-shaped oucts of steel that fashion our 20th Cen- rycivilization.

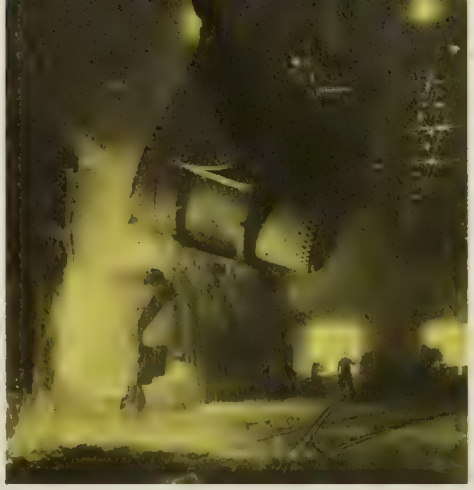
Rhapsody of Steel ends as the first Astro- u leave Earth in a space ship made of steel t explore the birthplace of this "treasure or outer space."

Modern Steel Making

echnicolor photography, animation and e-scene sounds help to make vividly clear e basic story of *Modern Steel Making* to evrs of this 23-minute motion picture.

Gerations in the open hearth and electric rces, various testing procedures, rolling dcountless uses of steel for today's auto- olles, buildings and household appliances e graphically portrayed. Skip cars move ily up a conveyor system, carrying iron e coke and limestone into the huge mixing t he blast furnace. These ingredients, gath- ed from around the world, are superheated d eventually begin the step-by-step process a nds with white hot iron.

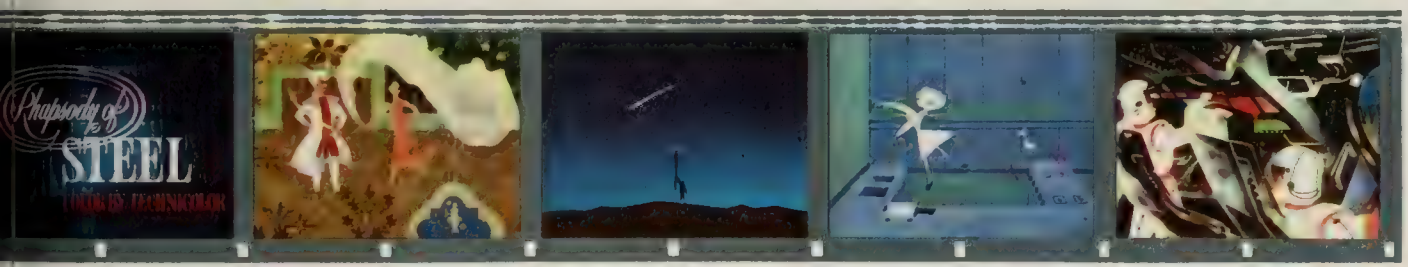
Aimation illustrates in detail the opera- or inside the blast and open hearth fur- c . An imaginative scene shows the rolling igots into blooms or slabs, and the end ouucts into which they are made. The film sopresents research techniques used to make sure that each steel being made meets the customer's exact requirements.



Camera close-ups in *Modern Steel Making* show troughs of bubbling, molten iron; animation "takes the top off" the furnaces; sound tracks capture the roar of steel as it pours into immense ladles.

The Making, Shaping and Treating of Steel

☆ This third part of U. S. Steel's inclusive "package" film program comprises a series of six separate color motion pictures that cover important steel making processes.



This series is more detailed than *Modern Steel Making* and is intended for audiences who, either through special interest, training or education, want to know considerably more about steel. These films are ideal, for example, for colleges, technical and high school science classes—and for employee training programs. Each is a complete subject in itself and can be shown separately. The subjects may be booked separately or as a set.

Titles (and running time) of each reel are: *The Blast Furnace* (7½ minutes); *The Open Hearth Furnace* (7 minutes); *The Electric Arc Furnace* (7 minutes); *Semi-Finished Steel* (8 minutes); *Hot-Rolling of Steel Sheets* (7 minutes); and *The Chemistry of Iron and Steel* (14 minutes).

How to Obtain These Films

☆ Together with *Rhapsody of Steel* and *Modern Steel Making,* this packaged program offers a unique opportunity for use in a number of ways by business and industry. All films are available for loan without charge from U. S. Steel Film Distribution Centers. These are conveniently located at Fairfield, Alabama (Birmingham area); in Chicago, c/o U. S. Steel at 208 S. LaSalle St., Chicago 90; in the East, c/o U. S. Steel, 71 Broadway, New York 6 or c/o U. S. Steel, 525 William Penn Place, Pittsburgh 30; and in the West, c/o U. S. Steel, 120 Montgomery St., San Francisco 6, California. •

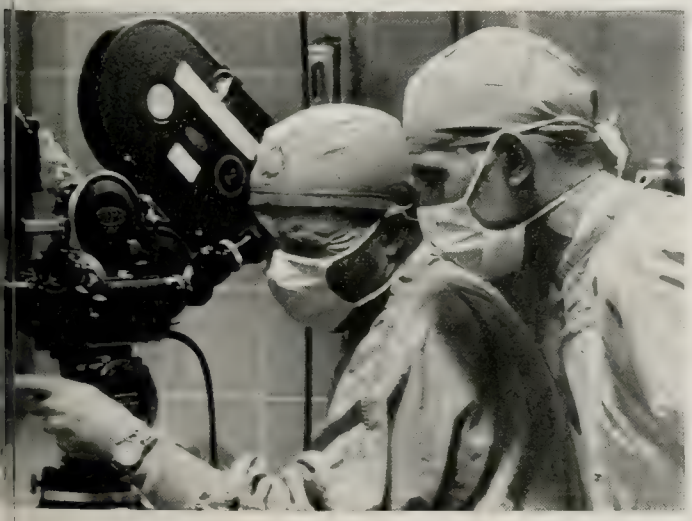
Mead Johnson's Picture of Hospital Maternity Care: Family-Centered

SPONSOR: Mead Johnson & Company.

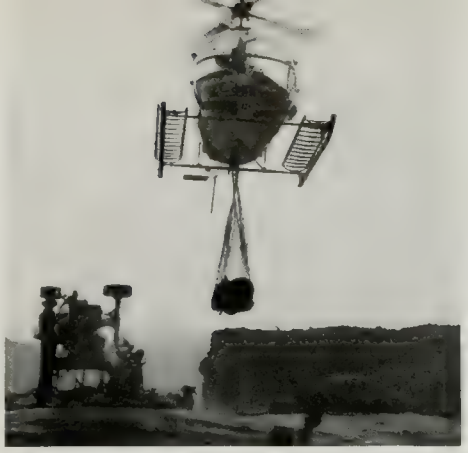
TITLE: *Hospital Maternity Care: Family-Centered,* 28 min., b/w, produced by Dynamic Films, Inc.

This film portrays an experiment in maternity care which is being conducted in the obstetrical division of St. Mary's Hospital, Evansville, Indiana. It describes a system in which family-centered maternity care has replaced traditional, conventional maternity care. For the past four and a half years St. Mary's staff and administration have worked under the new plan and have much to report on its effectiveness.

In conventional care, the film states, maternity is treated almost as a sickness; the emphasis is solely on safe delivery and the physical needs of mother and infant. The family-centered plan sees childbirth as a normal, natural biological process. It takes into full consideration the conventional physical care for the patients but much more as well. It is this "much more" that is the story of St. Mary's.



The film explains that conventional care evolved from efforts to reduce the effects of communicable diseases on mother and child—so extensive a century ago. It details such practices as a central glassed-in nursery, severe restrictions on visitors, non-contact between infants and mothers and infants and fathers. St. Mary's has small nurseries, long visiting hours for fathers, and a home-like atmosphere for the whole family before and after delivery.



Introducing the new plan at St. Mary's wasn't easy: nurses complained at first that they'd have to play "nursemaid" to fathers in addition to so many other duties; doctors were afraid of the increased possibility of infection; administrators were concerned with costs rising under the new plan; and even the mothers doubted whether husbands would really be helpful in such situations as labor—"my husband would probably faint," said one.

The fears of change were deep-rooted. But gradually almost everyone at St. Mary's came to respect the new system. Sister Mary, a nurse: "We learned to respect the mother, to knock at her door, not just walk in as nurses are prone to do, but ask 'am I welcome, may we help you?' We learned to recognize that each was an individual with individual needs and fears. We learned to shed production line methods. We learned to explain—'we take your blood for this and this reason; this is what is happening to you

Skillfully-lensed scenes *within "Hospital Maternity Care" were brought to the screen by cameraman Andrew Costikyan and his assistants.*

Symbol of modern oil production: *helicopters probe future fields, help maintain pipelines.*

THIS IS STANDARD OIL

One of Industry's Significant New Pictures Is Showing Standard's Employees the Full Story of Their Company

THE EMPLOYEE FAMILY of the Standard Oil Company (Indiana) and its subsidiaries has been viewing the "big picture" of their recently streamlined corporate parent, learning with the thoroughness of detail and scope which only a motion picture like this could embrace, every aspect of organization and operation from exploration to marketing and beyond.

This Is Standard Oil (84 minutes, color) would be a "long" picture by average standards and it had to encompass a vast amount of material—but winds up on the screen as one of the shortest, most definitive studies ever filmed of a major U. S. company and its operations in the oil industry.

Parthenon Pictures produced this film in 16mm Ektachrome color. Although largely shot on location in the U. S. and worldwide, it contains many interior sequences filmed in board rooms, processing, control operations, etc. As an example of film production technique, its adroit use of the latest in portable lighting equipment and high-speed color films exemplifies how the field of the film documentarian has expanded.

The cameras move swiftly—never losing the clarity of the total message—through sequences from Board Room to the field—covering 41 states from coast-to-coast—into sagebrush hills for exploration and pipeline stations, control rooms, atop refinery towers and aloft in whirring helicopters. Cameras tour Canada, Europe, the Middle East and the Argentine, always accenting the faces of the men and women who are linked together through these globe-girdling images.

Top management of Standard had a basic need for this picture. "The Big Step" has been widely publicized to the consumer as the American Oil Company recently emerged as Standard's single, nationwide manufacturing, transport and *marketing* subsidiary.

Other important steps had been taken to define specific areas of responsibility among subsidiaries: Pan American Petroleum Corporation now integrates exploration, drilling and petroleum production; Indiana Oil Purchasing Company insures crude supplies to refineries, sells or trades excess production; Service Pipeline Company integrates crude pipeline transportation; Amoco Trading Corporation has broad international responsibilities; Tuloma Gas Products markets liquefied petroleum gas and natural gasoline. And, finally, Amoco Chemicals Corporation manufactures and markets research-developed petroleum products.

Thus, within each inter-related and interdependent company, thousands of people had to know the whole picture. Top management, headed by president John Swearingen, set out to tell them earlier this year, face-to-face whenever humanly possible. Now, their efforts are fortified by *This Is Standard Oil,* as employees and members of their families are being united toward a common goal through the medium of the screen.

President Swearingen, filmed in

(CONTINUED ON NEXT PAGE)

Man against nature: the arduous work of oil drilling crews is memorably told in the film.

PREFACE TO A "BIG STEP"

(CONTINUED FROM THE PRECEDING PAGE)

the company's Chicago board room, makes that objective vividly clear from the outset:

"We are going to grow nationally . . . we're going to grow internationally . . . and grow in the nature of our products as the new age requires. And the key to this growth is one simple fundamental: more sales!"

As the picture develops its theme, the objective becomes three-fold for employees: to be *customer-minded; profit-minded* and *Standard-minded.*

The reality of the Chicago board room dissolves to another, symbolic "board of directors" session which Mr. Swearingen describes as "infinitely more powerful, with the power of final approval or veto of every decision we make, every action we take. This board is in constant meeting . . . making the millions of decisions which total up to approval or disapproval of what the company, and all of us connected with it, are doing."

The film dissolves to a glimpse of this "board" as the motorist, taxi-driver, fleet manager, housewife, farmer, trucker, airline pilot and manufacturer all sit in judgment. Its youngest member, a 3-year-old, "is the customer our product research men must be ready for in 1980—and why we explore for new reserves in a time of temporary oversupply."

The nation's second largest domestic refiner and marketer of petroleum products is keenly aware of the highly-competitive state of the oil business. And it aims to keep its people *profit-minded* to take care of growth, to attract investment to expand its plant and to keep it up to date.

As *This Is Standard Oil* points up: "We have been a collection of assorted regional entities, but in the new era, we will have to be *one* outfit, *one* team, realizing our interdependence and working together toward our shared objective. In short, all of us, in whatever we do, must from now on be *Standard-minded.*"

Sequences move, in logical progression, through the operating functions of each corporate member. Exploration scenes embrace the new role of the helicopter. Air-transported portable seismic-recording equipment opens up hitherto inaccessible areas. The work of Pan American continues in shots of improved drilling techniques, tubingless completions and of the significant Standard-family contribution to the industry—hydraulic fracturing which breaks open underground formations to increase oil flow.

Oil is the only big industry to create and build its own transportation system. It had to. In the Standard of Indiana family, the crude pipelines are the responsibility of Service Pipeline Company, headquartered in Tulsa and

operating some 16,000 miles of line as a [illegible] mon carrier.

Purchasing is a key phase. Nobody ha[s] tell Indiana Oil Purchasing to be "custo[mer]-minded," not with 300,000 barrels of [oil] to sell outside the company every day o[n] year. Standard's "oil exchange" buys the [oil] produced by Pan-Am and by indepen[dent] operators. It's the job of this subsidiar[y] keep the pipelines full and to keep the refin[eries] supplied with the right kind of oil at the [right] time at the right places.

Largest member of the reorganized [cor]porate family, American Oil headquarte[rs in] Chicago but operates nationally. Its pri[mary] tasks begin with manufacturing . . . in [the] refineries at Whiting and Texas City [and] other places . . . where new and moder[n] facilities (like the largest pipe still in the [world] at Whiting) turn the crude into custo[mer]-dictated products.

Helping maintain its position as the se[cond] largest refining capacity in the U. S. ar[e] velopments like the new 30,000 BPD flui[d] cracker at Wood River; like today's com[puter] programming operations in the refin[eries]. *Flexibility* is a vital ingredient. Yester[day's] orphan, kerosene, is one of the indu[stry's] fastest-growing products. As a jet fu[el]—a single Boeing 707 burns 2,400 gallon[s an] hour—kerosene sales are expected to inc[rease] 21% over 1960!

These are the basic elements of Stand[ard's] "big picture" as it moves into the tremen[dous] challenges facing "process research" an[d its] work on new lubricants, isomerization ca[talysts] and the use of radioactive isotopes. S[upply] and transportation sequences give way t[o the] business of marketing and immense be[nefits] gained from a national promotion and s[ervice] organization as the company markets tod[ay in] all 48 states under the brand names: Ame[rican] and Standard.

A picture could be devoted to growth [pat]terns laid down by "The Big Step" and in fact one has been done for the selling organiz[ation]. *This Is Standard Oil* does it concisely [and] pictures the inter-relation of these poten[tialities] in the U. S. and abroad.

It took 11 months from script assign[ment] to that first big showing in Chicago's [Mc]Cormick Place auditorium where 5,000 [head]quarters' employees and their families [pre]miered the film. At one time, eight ca[mera] crews were in the field simultaneously. [The] "big picture" was written and produce[d by] Parthenon's Charles (Cap) Palmer and [the] "credits" owing those who "made it pos[sible]" would take another reel.

Of these, Don Campbell, head of Stand[ard's] p. r. department, aided by H. H. Hardy, [for] the sponsor's very cooperative representa[tive]. The picture has no "public" future, as [such] but prints are destined to go to univ[ersity] schools of business administration when [em]ployee showings have been completed. [The] complete film will also prove invaluable t[o the] company for indoctrinating new employe[es].

By the nature of what this film ho[nestly] shows, the goals and thoughts of Stand[ard] management, the scope of its services, *T[his Is]* —not only—*Standard Oil.* It is truly a [fine] exposition of the American business syste[m].

Autonetics' president John R. Moore faces closed-circuit camera for talk on the Minuteman.

They Watch That TV Screen at Autonetics

Closed-Circuit Television Network Helping Attain High-Reliability Goals

HE BUILDERS of today's extremely precise weapons systems are facing up to a constant goal: *maximum reliability*. his common challenge and objective is amental in this "pushbutton era" where complexity and cost of modern weapons ms involve both free world security and national economy. Thus, employee train- orientation and motivation goals, achieved gh all effective means of communication sible, are directed toward "achieving the st possible quality of workmanship."

hat is the basic factor guiding year-long rimentation with closed-circuit television ucted by the Motion Picture Department

as viewers saw and heard their president.

utonetics, one of the six major divisions orth American Aviation, Inc.

utonetics, as a prime contractor in the ro-mechanical field, supplies inertial nce and control systems for Minuteman Hound Dog missiles; inertial navigation llations for Polaris submarines (it was utonetics' system that brought the Nauti- o the North Pole and back); and radar ms for F-104 and F-105 aircraft.

ants for the division sprawl within a 50- circle of Southern California real estate; house a working force that now num- more than 28,000 workers. Keeping key nnel within these plants informed and e of their important jobs, delivering new ing material, integrating the roles of ors and suppliers—all these are part of ommunications' responsibilities. But un- oring it all is that key factor of high reliability in the functioning of end products.

Thus, constant striving for perfection all along the production lines at Autonetics. "The program's goal is to achieve reliability levels as high as 99.999%," reports a supplier of components.

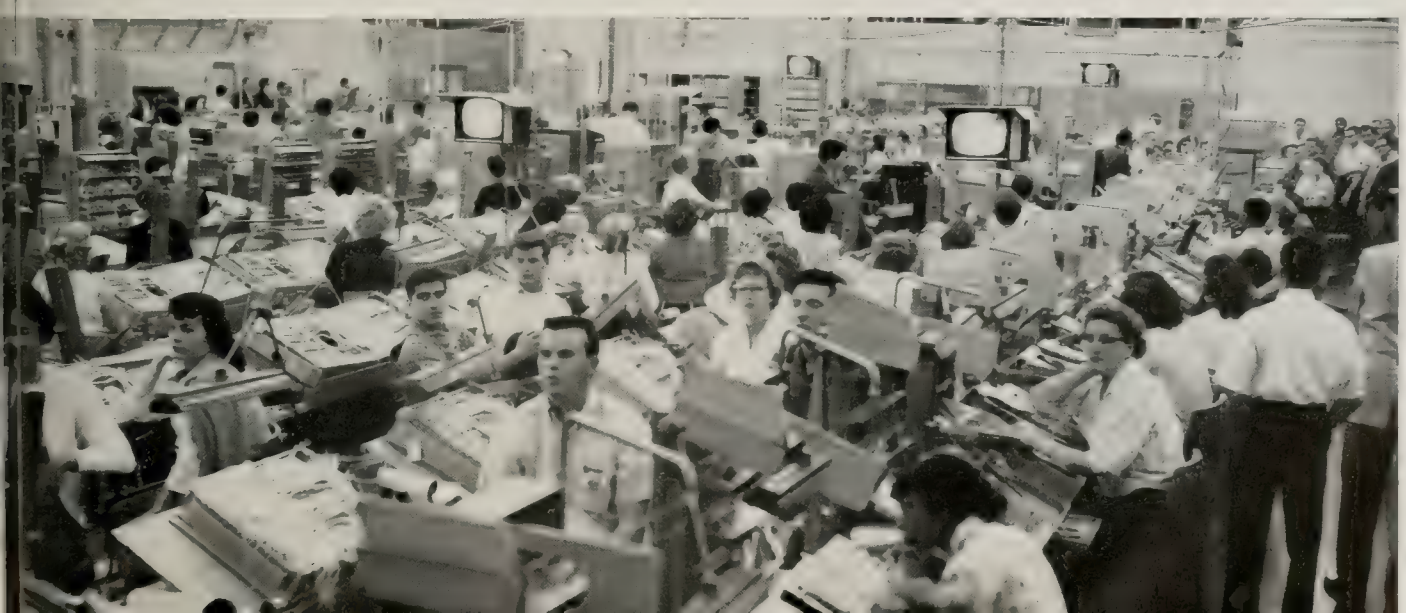
And it is in this frame of reference that Autonetics' Motion Picture Department, which has responsibility for all audio-visual activities of the Division, must *plan* and *produce* and *distribute* communication tools. As Walter Hardy, head of the department, puts it:

"After all our engineers, scientists and production specialists (including those of vendors and suppliers as well) have completed their efforts, the final 'moment of truth' arrives at the work bench where human hands solder connections, assemble components, inspect various stages of assembly.

"It is these people who must be trained and motivated to do the best possible work—no compromise in work quality may pass undetected. Thus, in one sentence, our communications' efforts and our recent use of closed-circuit television for the distribution of both live and filmed material is largely directed to train and/or to motivate employees to achieve the highest quality of workmanship."

Closed-circuit has proven a valuable adjunct to Autonetics' program in several ways. In November, 1960, for example, some 200 representatives of nationwide electronic firms attended a Bidders' Conference in the company's recreation hall, about a mile from Downey headquarters. With sub-contracts to be let for many millions of dollars, it was imperative to show these prospective bidders through Autonetics' high-reliability facilities.

"Through our closed-circuit cameras, we brought detailed visualization to the television monitors in the recreation hall, thus saving bidders' time, possible oversights and, more important, needless interruption of critical work," Mr. Hardy notes.



In still another phase, closed-circuit channels served the training requirements of 125 students, located in five classrooms (four of which were in a facility five miles away). Autonetics televised a three-week program of live instruction from eight to nine a.m. every morning.

"Through closed-circuit, we multiplied the teaching ability of an exceptionally well-qualified instructor five-fold. Close-ups permitted enlargements of blackboard and equipment details more effectively than would be possible under ordinary classroom conditions."

"But," Mr. Hardy also noted, "we have not overlooked certain disadvantages such as the

(CONTINUED ON THE FOLLOWING PAGE)

itor sets located in key spots throughout manufacturing areas each serve from 20 to 40 viewers of Autonetics' closed-circuit programs.

AUTONETICS TV CIRCUIT:

(CONTINUED FROM THE PRECEDING PAGE)

lack of personal contact with the instructor and the inadequacy of question and answer discussions during instruction.

"However, examinations given these students after the televised course and their overall high grades confirmed the effectiveness of the technique."

President Moore Talks to His People

The most dramatic use of this plant network was to *motivate* Autonetics' assembly workers. Monitors placed at convenient locations around the work bench areas brought company officials "face-to-face" with the men and women at their jobs.

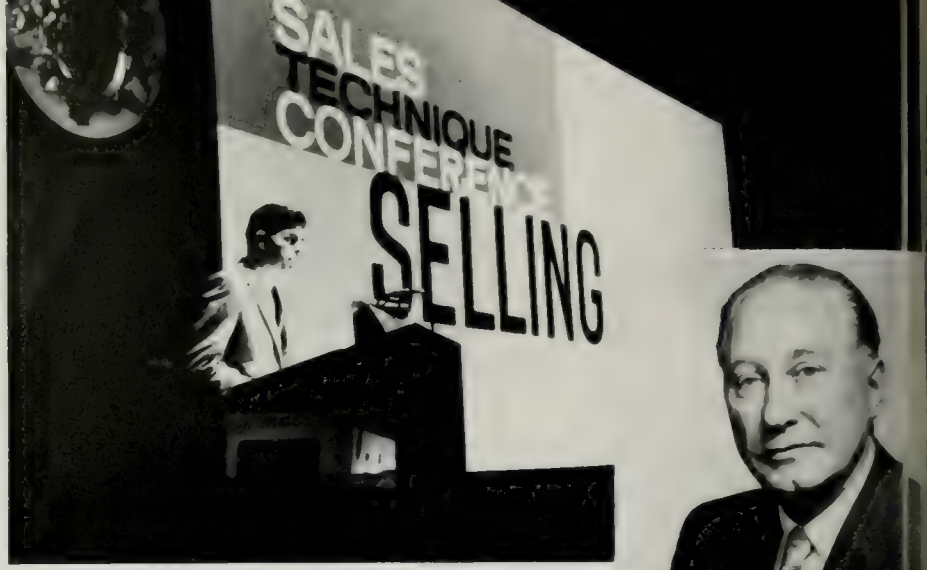
President John R. Moore underscored the importance of scrupulous care in making and checking components for Minuteman guidance systems. Manufacturing Manager Ed Lindaman explained the serious consequences to national defense of careless workmanship.

Programs, extending from 15 to 30 minutes, were developed on a monthly basis. They were presented just before the traditional coffee breaks at 9:30 a.m. or at 2:30 p.m. for the first shift; at 6:30 p.m. and 10:30 p.m. for workers on the second shift. Audiences numbered from 400 to 800 on first shifts (depending on the subject matter) and over 300 on second shifts.

Fifteen monitor sets were located in key spots throughout the integrated manufacturing areas, each serving from 20 to 40 viewers.

How has closed-circuit worked out?

Asking for comments and reactions following one TV talk, Manager Lindaman received over 200 handwritten notes, the basic theme of most being: "I never realized how important our work is" and "it's the first time I ever worked for a company where they took the time to explain the importance of my job to me."



Air Force and Minuteman project officers were equally enthusiastic. As a result, Lindaman's talks were edited and filmed in sync sound for the 14 release prints now in constant circulation among the vendors and suppliers who sub-contract to Autonetics.

Fewer Errors During the TV Period

Measuring the effects of closed-circuit programming on work results must take into account other motivational factors. But, prior to the advent of the network in 1960, discrepancies in the manufacturing area averaged 65 per circuit board. After six months of closed-circuit programming, they dropped to only seven per board. Plans for this fall call for the network to be used on a monthly basis.

Autonetics' motion picture chief Walt Hardy sums it up:

"Our experiments will continue to develop new uses for closed-circuit television. This extension of our audio-visual services has again served to prove the adage, updated, that pictures with sound are worth a million words; that scientifically-designed and carefully applied audio-visual communication is one of industry's most effective and dynamic tools."

Above: *Seagram's Director of Sales Planning, Lionel Greer, presents phases of new Counseling Service.*

Right: *Executive vice-president Herbert W. Evenson.*

Selling: Key Factor in Economic Growth

Seagram Acts to Improve Salesman's Skills With Broad New Counseling Servi

SEAGRAM-DISTILLERS COMPANY'S meeting with its distributors and their salesmen at the Americana Hotel, Miami Beach, on July 24-27, was highlighted by the announcement of a comprehensive new program to strengthen the function of selling as a key factor in economic growth.

Announcement of the Seagram Sales Counseling Service by Herbert W. Evenson, executive vice president of the company, was backed by a full-scale wide screen visual presentation designed and produced by Visualscope, Inc.

Slide Programs for Brand Managers

In addition to the Sales Counseling Service announcement, Visualscope's visual backing was applied (in 250 3¼ by 4¼ inch art and photography slides projected on a 15 by 30 foot screen) to the presentations by brand managers of 7 Crown, V. O. and Extra Dry Gin.

In announcing the Seagram Sales Counseling Service, Mr. Evenson declared, "Government and business leaders have stressed the vital role of salesmanship in maintaining the nation's rate of economic expansion. The single greatest area for advance is where the business of selling comes to grips with the customer. It is in the hands of the salesman and his selling skill."

Greer Presents Four Phases of Service

Presentation of the four phases of the Seagram Sales Counseling Service was by Lionel W. Greer, Seagram's Director of Sales Planning, who supervised its development. He stressed that the program is related to sales problems and actual sales situations.

The four phases of the Seagram Sales Counseling Service are:

1. A round-table conference, in which salesmen are active participants, for developing better sales techniques.

2. A series of long-playing phonograph records for newer salesmen, to provide tested selling principles for use at the outset of the salesman's career.

3. A product and industry indoctrination program to broaden the salesman's knowledge of the brands he sells.

Salesmen Supervision for Managers

4. On the sales management level, a seminar for distributor sales managers covering problems encountered in the area of salesmen supervision.

Following the presentation of the sales conference concept, a Visualscope filmographic was shown which described typical conference procedures.

A Firm Believer in Audio-Visuals

Seagram's distributor meetings are regularly planned to provide a forceful and convincing presentation of what is considered to be the best merchandising and advertising programs in the liquor business. Seagram's thinks that such presentations are consistently the most effective way to communicate ideas—uses many forms of audio-visual media. Practically every kind of device has been used in the distributor meetings over the past 15 years.

This year's meeting and its large screen visuals—also including the premiere of a motion picture produced by Transfilm-Caravel, Inc.—have been widely praised throughout the industry. Distributors across the country have enthusiastically accepted the sales conference program, and their confidence in upcoming advertising and merchandising plans is reflected in advance fall orders for 5,136,000 cases of the three Seagram brands—a new record in the liquor industry.

Safe Passage for Telephone Directories Via the Screen

Salesmate Slidefilm for Delivery Crews

SPONSOR: New York Telephone Company & The Reuben H. Donnelley Corporation.

TITLE: *More Money for You,* 17 min., color slidefilm, produced by Rossmore Productions.

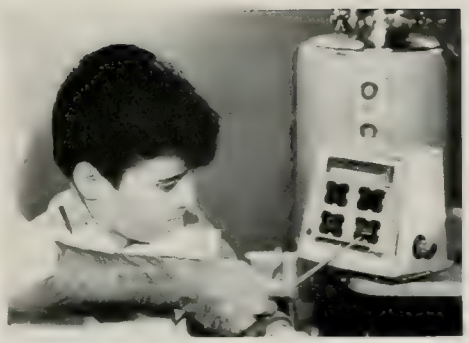
Telephone directories are delivered by individual contractors who are paid by the number of books delivered in addition to an hourly rate of pay. The telephone company would like each contractor to complete his job as easily and safely as possible—earn good money with no troubles along the route.

More Money for You shows these men the best way to do the job. It spells out the details carefully in 73 frames of photography and art which are shown on automatic sound slidefilm projectors redesigned and modified by Rossmore Productions from basic Beseler Salesmate equipment.

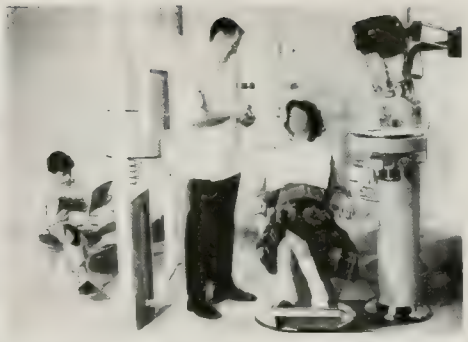
Special Model With Larger Screen

The Rossmore Salesmate projectors have a rear projection screen measuring 24 inches by 9 inches. The new case in scuff-proof material measures 26½ by 21 by 6½ inches, and weighs only five pounds more than the Salesmate original. The price of the modified, larger projectors—New York Telephone is using four of them—is $75 more than the Salesmate. They are particularly useful for the audiences of 50 or more which regularly view the film.

More Money for You shows the right way to perform such functions as loading the delivery bag and filling in the completed delivery forms. It gives such down-to-earth advice as "Believe in signs. 'Beware the dog' means that. Don't even try to leave a book. You'll get paid for it, anyway."

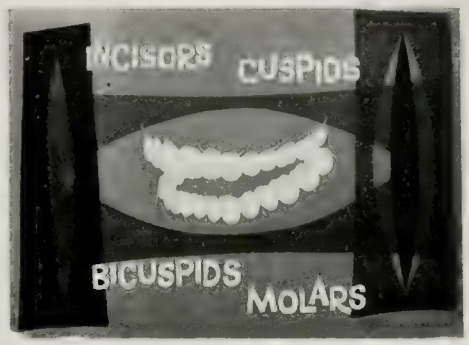


Telephone directories, the film says, should never be left in mail boxes—it's against the law. They should never be left where people can trip over them.



Jersey Success Prefaced This Program

Rossmore Productions produced a film on directory deliveries last year for the New Jersey Bell Telephone Company. It has proved so successful that the New York company arranged for production of this new film for showing to its delivery contractors this year.



Below: *this telephone directory delivery man finds out that "Beware the Dog" means what it says on that familiar sign . . .*

Scenes from the new Audio production "Take Time for Your Teeth" aimed at teen-age viewers.

Timely Advice on Dental Care for Teens

Informative New Film for Teen-Age Audiences at "Make-or-Break" Stage in Dental Life, Sponsored by Johnson & Johnson, American Dental Assn.

SPONSOR: Johnson & Johnson.

TITLE: *Take Time for Your Teeth,* 14½ min., color, produced by Audio Productions, Inc., through N. W. Ayer & Son.

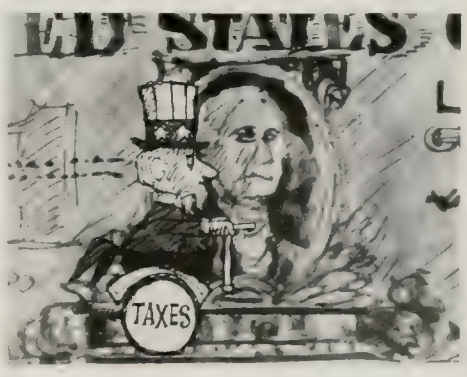
This is a public relations film presented by J & J in cooperation with the American Dental Association. It tells the teen-age audience, which is the picture's prime target, that *now* is the crucial period in their dental life.

Teen-agers are shown that they are at the "make-or-break" stage, that the care they give, or fail to give, to their teeth will affect them for years to come.

Using cameo sets and animated and still "films within the film"—*Take Time for Your Teeth* takes us on a dental tour—showing how our teeth differ from the elephant's great molars, the wolf's crushing bicuspids, the tiger's piercing and tearing eye-teeth and the horse's good central incisors for cutting grass and grain. Our human teeth are as varied as our diet, combine the qualities of all these animals.

The film explains how decay starts and what we can do to prevent it. Good care—proper rinsing, brushing, use of floss and regular prophylaxis by a dentist are the simple steps to good dental health.

J & J brand names such as Micrin, Tek and Dentotape are occasionally visible, though properly in context.



Take Time for Your Teeth will be a welcome addition to the roster of useful hygiene films for school use. Distribution will begin this fall through all offices of Association Films, Inc.

"That-a-Way" Uses Humor and Satire to Point Up the Perils of Inflation
